From Hong Hong, China, we have dates to Sept. 27th. Political affairs at Canton have again assumed a threatening aspect. The rebels are in force a little distance from the city, and fighting is going forward, and also down the river. Fashan continues in possession of the rebels. There appears no prospects of amendment in the present state of affairs.

Our dates from Shanghae are of the 13th September. We have no news of a political nature to report. Shipments of tea and silk are going forward, and the latter is advancing in price. No demand for imports. Freights are falling from an over supply of shipping.

The following extracts from letters of those enegaged in fighting around Sevastopol, give a vivid idea of that sanguinary conflict:—

Riding over the Wounded.—Dear mother, every time I think of my poor comrades it makes my blood run cold, to think how we had to gallop over the poor wounded fellows lying on the field of battle, with anxious looks for assistance—what a sickening scene! In one part of the battle I lost my horse, owing to the one in front of me being shot dead, and my poor horse fell over it, and I was unhorsed; in getting up, my horse took fright and got from me; but, fortunately for me, I saw another that some poor fellow of the 8th Hussars had been killed from; I mounted it in a moment, and was in the rank again. On our return from the charge, I got my own horse again. He had galloped to the camp, and, dear parents, I was as glad when I saw him there as if I had got half the world given to me.

A Sodeier's Escape.—The charge sounded, and away we went into the midst of them. Such cutting and slashing for about a minute, it was dreadful to see; the rally sounded, but it was no use—none of us would come away until the enemy retreated; then our fellows cheered as loud as ever they could. When we were in the midst of them my horse was shot; he fell, and got up again, and I was entangled in the saddle—my head and one leg were on the ground. He tried to gallop on with the rest, but fell again, and I managed to get loose. While I was in that predicament, a Russian lancer was going to run me through, and I could not help myself. Macnamara came up at the time, and nearly severed his head from his body; so, thank God! I did not get a scratch. I got up, and ran to where I saw a lot of loose horses; I got one belonging to one of the Enniskillens, and soon was along with the regiment again. When I had mounted again, I saw a Russian who had strayed from the rest; he rode up to try to stop me from joining the regiment again. As it happened, I had observed a pistol in the holster-pipe, so I took it out, and shot him in the arm; he dropped his sword, then I immediately rode up to him and ran him through the body, and the poor fellow dropped to the ground.

Horrors of the Field.—We soon were relieved by about 700 of our men, coming up, and in all mustered about 800 men, and sent a deadly fire into the Russians, and 800 of the English army charged bayonets and drove their whole 8,000 men down the hill, with great slaughter. Their loss must have been great, for the groans of wounded and dying all last night were pitiful.

Turkish Deserters.—Two wretched Turks were brought in yesterday evening; they had deserted to the Russians, who took every thing from them and ill-treated them; upon this they deserted from the Russians, and, with nothing but a linen shirt and a pair of drawers, have been wandering about for four nights. Their limbs were completely swollen with the cold, and I hear the poor wretches are to be shot to-day. The smell from the town of Sevastopol, as the wind blows from the north, is something fearful. The assault may now take place at any time.

A Soldier's Escape.—I received a lance-thrust in the stomach from the right, which fortunately just missed me, but broke my cap pouch and tore away my revolver case. I also had a saber cut in the arm, but it fell very lightly, as I shot the Russian dragoon through the head when his arm was raised. The enemy's cavalry was an immense force; I had very many hair breadth escapes (thanks to an all-merciful Providence.) Retiring was the worst part of the business; I was nearly the last out of about twenty-five that started together to return, and when we got out of the range of the fire I could only see nine; it was a most awful sight. I could have shot with my revolver three or four more Russians, but as they were a little detached from their main body I thought it would be a little too much like murder.

Facts from Public Documents.

The Patent Office Report states that since the 1st of January, 1,600 patents have been issued, and the whole number for the year will reach 1,900, or double that of 1853. The principal recommendations of Mr. Mason are, that the examining force be permanently augmented, that better provision be made for taking testimony in cases of appeal, and a new rate of fees established.

From the Report on Commerce and Navigation, it appears that there have been built within the present year 264 ships and barks, 69 brigs, 435 smaller vessels, and 121 steamboats, registering an aggregate of over 340,000 tuns. There were built in the New York District, 40 ships and barks, 7 brigs, 185 smaller vessels, and 36 steamboats—63,496 tuns. The total registered tunnage of the United States, on the 30th of June, was 5,661,416; of which 2,333,819 was employed in foreign trade; 2,622,114 in coasting; 146,965 in cod fishing; 181,901 in whaling, and 677,613 in steam navigation.

The Annual Report from the Pension Office states that the whole number of pensioners, June 30, 1853, was 11,867. Annual amount payable to them, $1,070,079. Same, June 30, 1854, 14,065, and annual amount payable to them, $1,172,651 63. Number of Revolutionary soldiers on the roll, June 30, 1853, 1,395; number of Revolutionary soldiers on the roll, June 30, 1854, 1,069. There have been taken from the rolls of the Army Pensioners during the year ending June 30, 1854, by death 643; by transfer to the Treasury Department, as unclaimed pensions, 883—total, 1,526. Of the Navy Pensioners for the year ending Sept. 30, 1854, 24 are reported dead, and 38 transferred to the Treasury Department as unclaimed pensions. Of those transferred to the Trersury Department but few are again restored to the roll.

The Annual Report of the General Land Office gives the following facts: During the year ending June 30, there were 7,035,000 acres sold for cash; 3,402,000 located by land warrants, and 14,000 by other certificates; 11,000,000 reported as swamp lands, and 1,751,000 for internal improvement—making a total of 23,238,313 acres. For the last quarter, 4,780,000 acres were disposed of, being altogether an increase of sales amounting to 5,600,000 acres over the previous year, though there is a diminution of 2,000,000, including land warrant and swamp transactions.

Of the Report of the Portmaster General, the N. Y. *Tribune* speaks as follows:—

We learn that we have 23,925 post offices, and 6,697 mail routes, covering 219,395 miles, over which the mail is carried by 5,167 contractors; and by estimating an average of two persons to each office, and four to each contractor, including stage-drivers, mail-agents, et cetera, we find an army of 68,518 men under command of the Post Office Department. We also find that the people of the United States have paid this army, for one year's service, the sum of $8,577,424 12. In this sum is included $5,401,382 50 for ocean service. The sums actually collected from those who have made use of this great machine for transmitting intelligence, in the last year, amounts to $6,255,586 22. Of this, $3,277,110 50 were paid for letter postage, and $2,146,476 02 for stamps. If we deduct one-fifth of the amount of stamps as the portion applied to payment of newspapers, we shall have as the result, $4,994,292 32, as the amount collected by the Department for letter-postage. The postage of newspapers and pamphlets is stated at $606,148 18. To this add one-fifth of the amount received for stamps, which is $429,293 20, and we have a total of $1,035,441 38 paid in one year for periodical postage, including books sent by mail. Notwithstanding all the receipts, including $4,346 11 found in dead letters uncalled for, and $700,000 appropriated by Congress, the Post Office Department is in arrears $1,755,831 23. To improve this state of things, and to enable the army of 6,858 men to live off the people without the trouble of calling upon Congress for annual appropriations, the Postmaster-General proposes to tax the public double the present amount for newspaper postage. He will not increase letter postage until there is a further deficiency.

Business before Congress.

Upon the tables of the two Houses of Congress, at the close of the last session, a large amount of business was left incomplete, much of which had received the sanction of either one or the other House, and will, of course, be among the first business to now claim attention. The *National Intelligencer* enumerates among business of this description the following measures:—

The Homestead bill, which is now before the House, with Mr. Hunter's substitute as an amendment.

The Texas Debt bill, as passed by the Senate.

The Senate bill to provide payment for French spoliations prior to 1800.

The Ocean Mail Steamer bill, with the amendment of the House directing notice to be given of the termination of the contract.

The bill to establish a mail line to Shanghai by way of the Sandwich Islands.

The bill establishing the Ramsay mail route from New Orleans by the way of Vera Cruz to Acapulco.

The bill to establish a subterranean line of telegraph to the Pacific.

The bill to provide a weekly mail to California.

The bill to increase the rates of postage and require prepayment of letters.

The Senate bill to provide for half-pay to revolutionary officers or their legal representatives.

The bill to extend the benefits of the bounty land system to the officers, soldiers, seamen, &c., of the war of 1812.

Various bills granting lands for the construction of railroads; and

Mr. Bennett's Land bill, granting lands equally to the several States to aid in the construction of railroads and for the support of schools.

Decease of a "Character."—Last summer (says the N. Y. *Journal of Commerce*) we briefly alluded to a remarkable old lady in this City named Jeanne De Lux, as included in the category of "New York Characters." To this allusion and partial description she took umbrage, and repaired to the editor's sanctum for redress. The poor old lady is now gone. Last month, while crossing Broadway she was run over by an omnibus, and had one leg broken, receiving injuries which caused her death last week at the age of 65 years. The assessors of City tolls always encountered in her a most reluctant tax payer, and piteous appeals were made to their clemency; for, to all appearances, she was in great pecuniary distress, living in a secluded apartment in an upper story, with a scanty supply of antique wearing apparel and rickety furniture, denying herself the ordinary comforts of life. In consideration of her extreme poverty and oath, she was last year assessed for only $10,000, though the house she occupied and owned was well worth $25,000. The bureau of the Public Administrator now shows that she owned bonds to the valne of $80,000—making her entire property at least $100,000. She is not known to have had any relative in this country except a nephew, residing in Cincinnati. When inquired of as to what disposition she intended to make of her property, she said she meant to build a splendid hospital. After all, she died without leaving any will, though often urged to prepare one.

Freedom in Indiana.—The following, from the Howesville (Ky.) *Eagle* of Nov. 23d, shows the extent of freedom enjoyed in Indiana by men of color who have no free papers:—

"*Committed.*—There was committed to the Jail of Breckenridge County, Ky., on the 5th day of August, 1854, a negro man, calling himself Rybon Mayo. He was taken up *in Indiana*, about 90 miles below Louisville. He states that he is free, but he has no free papers; he says, also, that he is from Manchester, Virginia, and that he was born free and left there in 1848. When first committed he said that he belonged to a man living in Campbell County, Ky., by the name of Wm. Carr, living about 20 miles from Covington. Said negro is of a dark copper color, about 5 feet 9 inches high—weighs about 175 or 180 pounds—has the mark of a fish on his left side, and a scar from a burn on the right side—about 30 years old. The owner, if any, will please come forward, prove property and pay charges, or he will be dealt with *as the law directs.*

J. H. Keean,
Jailor of Breckenridge Co., Ky.

Massacre on Platte River.—Mr. Udolphus Wolfe, who recently returned from a trip on the Plains, gives us the following reliable information:—

His party consisted of eight men, who were on their way to Fort Laramie, and while encamped on the bank of the South Platte River, on the 25th of October last, the Indians fired upon them, killing one of their men. They immediately retreated to their wagons, and as the Indians approached—fifteen in number—the whites fired upon them, killing three or four. The remainder of them rallied with a yell, and as they rushed on, three or four more were killed, and the party of whites then rushed out upon the Indians, and a desperate conflict for a moment ensued, in a hand-to-hand fight, during which time Mr. Wolfe got wounded in the ankle. The Indians fled across the river. Four of the whites and eight of the Indians were killed.

A dispatch dated Rochester, Monday, Dec. 4, 1854, says: At 9 1-2 o'clock this morning, a railroad accident occurred about six miles west of this city. As the first train on the Albany and Buffalo Railroad was going west it came in collision with the first train east, in consequence of which three locomotives belonging to the train going west, and two to the train coming east, were badly smashed, and two others thrown off the track. Happily no lives were lost. The accident happened in consequence of both trains being out of their time, and the snow falling so thickly that they were unable to see each other until it was too late to avoid coming in contact.

Affairs in China.—The San Francisco *Times* of Nov. 16th has a long article on Chinese affairs, which closes as follows:—

The state of China at this time is melancholy in the extreme. Shanghae has been for the last year in the possession of a party of rebels entirely distinct from the followers of Thae-ping-Wang. It is closely besieged by the imperial troops, amounting to some 10,000 men. The interior of the city is completely in ruins, and presents a fearful picture of the horrors of war. Canton is also closely besieged by the Triads, another distinct party of insurgents. The Chinese merchants and their families have been leaving in numbers for Hong Kong, to place themselves under the protection of the English. Trade there is almost entirely stopped, owing to the troubles, and the principal shipment of teas, silks, &c., have been from Shanghae and Fuchan, but even at these ports serious interruptions have occurred. The Thae-ping-Wang party holds almost entire possession of the rich country watered by the Yang-tse River as far down as Chin-kiang-fee, some two hundred miles from its mouth. They had advanced within a short distance of Pekin, but were driven back. They still hold possession of the mouth of the grand canal. It is impossible to form any opinion of the length of time to elapse before order is restored—the Chinese say twenty years.

Portraits woven in Silk.—At a recent meeting of the Farmer's Club in New York, Mr. C. S. Goodrich, Consul in the City of Lyons, France, gave an account of the Jacquard loom, invented by Jacquard, a native of Lyons. Upon this loom, by some late improvements, portraits are made of silk in the most beautiful manner, so as to be a perfect fac-simile of the original engraving. The time employed in making one of these portraits varies from 12 to 18 months, at an expense of 25,000 to 100,000 francs. The silk fillament is made to pass through a great number of paste board cards—from 20,000 to 30,000. The artists are now engaged upon a portrait of Washington. The expense of duplicates is not so great, but still it is beyond the reach of ordinary persons. They have only been manufactured upon a limited scale as valuable presents, and to show the perfection of this branch of mechanic arts. The length of time required to finish a picture is because the work can only be done when the atmosphere is in a peculiar condition.

California News.—The steamer North Star, with eight days later news from California, and over $1,300,000 in gold arrived at New York on the 9th inst. In looking over the papers we find but little news worth repeating. The principal item relates to the annexation of the Sandwich Islands, for which a treaty has been made and waits only for the promised signature of the King.

Slavery in Kansas.—The election in Kansas resulted in the triumph of Whitfield, the pro-slavery candidate for Congress, over Flenniken, the free-labor candidate. This is represented in most of the papers as substantially settling the question that Kansas is to be a Slave State.

SUMMARY.

The New Brunswick (N. J.) *News*, has a communication which says that Patrick Little, formerly a poor, drunken stage-driver, who killed Nathaniel Sisco, of Bloomingdale, Passaic Co., in January, 1854, and for whom Gov. Price offered a reward of $400, has turned up in California, where he had altered his name, and becoming sober and industrious, had amassed a fortune of over one hundred thousand dollars. As he dared not to return to this State, he was about leaving and settling somewhere in England.

Two young men, aged 19 and 21, sons of Mr. Sutherland, living at the North Beach, in Colchester, Vt., were drowned on Saturday night, 2d inst. While trying to save a flock of geese which they feared would be frozen in the ice, they broke through the ice, it is supposed, and were unable to extricate themselves. The family becoming alarmed at their absence, went with some neighbors to search for them; and about 2 o'clock on Sunday morning their bodies were found about sixteen feet from the shore and in but six feet water. Life was, of course, extinct.

Rev. Dr. Mason, of the Tavoy Mission, who arrived in this country about a month since, has taken a house at Newton Centre, Mass., where he will for the present abide. He is extremely feeble, though, we are glad to learn, improves slowly with rest and quiet. With the indefatigable industry which has marked his life, he is still engaged in the revision and improvement of his Karen translation of the Scriptures—the great work to which he has devoted so many years.

The *Southern Presbyterian* states that at the late meeting of the Presbytery of Charleston, it was decided that there was no need for compliance with the last direction of the General Assembly, that "all pastors should preach on the support of the ministry, and that inquiry should be made annually as to whether an adequate support was given," inasmuch as there appeared to be no delinquency on the part of the churches in the premises.

Another bank "deficiency" was discovered in New York on the 7th inst. The criminal in this case was W. P. Sackett, receiving teller of the Market Bank; and the amount of his frauds is $25,000. The discovery was made by the assistant receiving teller, who having accidentally occasion to add up the columns of the deposit book, discovered that the footings were too small by $25,000. The money, it is understood, has been spent in high living, betting on races, and stock speculations.

A dispatch dated Springfield, Mass., Thursday, Dec. 7, 1854, says: The steam-boiler in the Ames Manufacturing Company at Chicopee, exploded this morning, instantly killing A. B. Hoyt, the engineer, and breaking the legs and otherwise injuring a machinist named Lummas so badly that he is not expected to recover.

There was received at the Library of Congress a valuable present in books from the Government Council of the Swiss Confederation. This handsome and very complimentary donation comprises thirty-six volumes, all elegantly bound, and possessing historic, statistic, or governmental interest.

A dispatch dated Chicago, Friday, Dec. 8, 1854, says: Seventeen Missouri slaves have arrived here. There are men from St. Louis attempting to arrest them. The United States Marshal endeavored to summon the posse comitatus. The military companies were called out, but only one responded to the call. Great excitement has been occasioned by the presence of the slave-captors. Intimidated by the crowd of the people the Commissioner dismissed the proceedings.

The long-contested question who was chosen Judge and Surrogate of Putnam, in 1851, is at last settled. The Board of Canvassers gave the office to Ambrose Ryder, Esq., (Whig,) by a majority of *one vote.* But Azor B. Crane, Esq., (Dem.,) claimed to have been elected, and carried the case before the Courts, but after a number of arguments the case was decided at the General Term of the Supreme Court in favor of Judge Ryder, which ends the controversy.

The steamer Mayflower, that was wrecked on the 24th of November, at Point-au-Pelee, Lake Erie, has been abandoned. Arrangements are now being made to try and save her machinery. Her hull is broken in two across the center. She cost originally one hundred and seventy thousand dollars, and had run for five seasons on the Michigan Central line. There was no insurance upon her.

Last evening, says the Chicago *Tribune* of Dec. 5th, seventeen passengers arrived in our city by the underground railroad, and were immediately forwarded to "the land of the free," where they doubtless have arrived before this notice is generally read by the people of this city. The lot embraced five different parties, who accidentally met on the road.

A dispatch dated New Orleans, Thursday, Dec. 7, 1854, says: The steamboat Gipsy was destroyed by fire this morning at the mouth of the New River. Dr. Hacker, of Plaquemine, with his son and daughter, perished in the flames. Several other persons were also either burned to death or drowned.

From statements made by Capt. Smith, who was recently convicted in New York of slave-trading, it appears that the head-quarters of the slave-trade is now in this City; that here the principal capitalists connected with it have their places of business; and that usually slavers are dispatched hence at the rate of some thirty a year.

James H. Conklin, formerly of New York, convicted in August, 1853, of an attempt to obtain money from the Government by fraudulent pension claims, ond who was sentenced to the Connecticut State Prison for the term of two years, has been pardoned by President Pierce.

The following significant facts are stated in connection with the Michigan State Penitentiary:—There are two hundred and twenty-eight inmates, and of these one-fourth are under twenty-one years of age. Two-thirds of the whole number ascribe their crimes to the influence of ardent spirits.

At the meeting of the Chamber of Commerce, in N. Y., one day last week, steps were taken to induce Congress to send a steam-propeller and store-ship to the Arctic Ocean to relieve Dr. Kane and his crew, and to aid in the search for Sir John Franklin.

Several persons were obliged to draw the wallet in the Police Court yesterday, says the Boston *Bee*, for smoking in the street. The figures were $2 and costs. Some of the cigars smoked in our streets should oblige the puffer to pay at least $10.

There are forty establishments in the United States engaged in the manufacture of Locomotive Engines. These shops, it is estimated, turn out in busy times at least one hundred and twenty locomotives in a year. About nine thousand hands are employed.

The Erie Railroad brought to this city week before last 11,321 fat hogs, mostly from Ohio. At a fair estimate, these would average 150 lbs. net., making 1,698,150 lbs., which at 6d. is $101,889 for the pork received in the city by one line of transportation.

The western part of the town of Willing, Allegany County, adjoining the State line, has been erected into the town of Alma. Thus we have very near us a memorial of the great battle in the Crimea, recently fought.

In his recent message, the Governor of South Carolina informs the Legislature that "the financial distress in that State is greater than at any period since 1837."

New York Markets—December 11, 1854.

Ashes—Pearls $6 37 a 6 44; Pots 6 75 a 6 87.

Flour and Meal—Flour 8 12 a 8 62 for common to favorite State, 8 62 a 9 12 for common to good Ohio, Michigan, and Indiana.. Rye Flour 6 50 a 7 50. Corn Meal 4 50 for Jersey.

Grain—Wheat 1 85 a 1 95 for Western mixed, 1 90 a 2 07 for Southern white, 2 32 a 2 40 for white Genesee. Rye 1 39 a 1 40. Barley 1 30 a 1 38. Oats 48 a 51c. for Jersey, 56 a 58c. for Western. White Beans 1 50 a 1 87.

Provisions—Pork 11 75 for prime, 13 00 for mess. Beef 8 00 a 10 50 for country mess. Lard 9¾ a 10c. Butter 13 a 20c. for Ohio, 20 a 24c. for State, 25 a 28c. for Orange Co. Cheese 10 a 11c.

Hay—60 a 70c. per 100 lbs.

Lumber—17 00 for Eastern Spruce and Pine.

Potatoes—2 00 a 2 50 for Western reds, 2 75 a 3 12 for Mercers and Carters.

Seeds—Clover 10 a 10½c. Timothy 2 50 a 2 75 for reaped. Rough Flaxseed 1 75 a 1 80 for 56 lbs.

Tallow—12½c. for prime City and Philadelphia.

Wool—28 a 30c. for native, 42 and 45c. for American Saxony Fleece

FOR THE SABBATH-SCHOOL VISITOR:

Albert Babcock, Verona $2 00

FOR SEVENTH-DAY BAPTIST MEMORIAL:

Joseph L Perry, Lowell $1 00

WILLIAM M. ROGERS, Treasurer.

A dispatch dated Boston, Tuesday, Dec. 5, 1854, says: The Rev. F. W. Higginson and Martin Stowell, Esq., both of Worcester, were to-day held in bonds of $1,500 each, on the charge of being implicated in the attempted rescue of the fugitive Anthony Burns.

A dispatch dated Buffalo, Tuesday, Dec. 5, 1854, says: The schooner R. R. Johnson, loaded with wheat, went ashore yesterday, at Fairport, and then broke in two and went down with all the hands on board, eight in number.

MARRIED.

At Greenmanville, Ct., Nov. 30th, by Eld. S. S. Griswold, Mr. Eliphalet Lyon, of New York, to Mrs. Ann M. Rogers, of Williamsburg, L. I.

At Alfred Center, Dec. 2, by Eld. N. V. Hull, Mr. George J. Palmiter, of Hartsville, to Miss Julia A. Terwilliger.

In Plainfield, N. J., on the 9th inst., by Eld. James Bailey, Mr. Jacob M. Jennings to Miss Rachel Dunham, all of Plainfield.

At Marlboro, N. J., on the 21st of October, by Eld. D. Clawson, Mr. Philip Harris, of Deerfield, Cumberland Co., N. J., to Miss Cynthia A. Middleton, of Bridgeton.

At the parsonage in Greenmanville, Ct., Dec. 4th, by Eld. S. S. Griswold, Merrit Sweet, of Norwich, to Mary Ann Brown, of Stonington.

DIED

At the house of Jeremiah Davis, while on a visit, after a few hours' illness, October 18, Susanna Davis, widow of William Davis, aged about sixty-five years. She had been for many years a member of the church at Shiloh.

At Shiloh, Nov. 20, Amy, wife of James McPherson, after a few hours of unconscious illness, aged seventy-two years. She had been many years a member of the Church at Shiloh.

Board Meetings.

THE next Quarterly Meetings of the Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will be held at No. 80 Seventh-st., New York, on the first Fourth-day in January, 1855, commencing at 10 o'clock A. M.

Yearly Meeting.

THE next Yearly Meeting of the Seventh-day Baptist Churches in New Jersey will be held with the Church at Marlboro, N. J., commencing on Sixth-day before the fourth Sabbath in December, 1854.

W. C. WHITFORD, Secretary.

Western Association—Executive Board.

THE Executive Board of the Western Association will meet at Independence on the first Wednesday in January next. Persons having communications for said Board would do well to forward the same a short time previous to the meeting, as it frequently occurs that the reports are not received till after the meeting is had.

E. R. CLARKE, Sec. of Board.

Mountain Glen Water Cure and Summer Retreat,
For the Reception of Patients and Boarders,
PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Savery's Temperance Hotel
AND
TELEGRAPH DINING SALOON,
No. 14 Beekman Street, N. Y.
KEPT ON THE EUROPEAN PLAN.
MEALS AT ALL HOURS OF THE DAY.
LODGING ROOMS,
From $2 to $3 per Week, or 50 Cts. per Night.
Bela Sawyer, Sup't. John S. Savery, Proprietor.

Central Railroad Company of New Jersey.
NEW YORK, SOMERVILLE, EASTON, &c.

Winter Arrangements, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.
Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M.

JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further notice, Trains will leave the pier foot of Duane-st., New York, asfollows:

Buffalo Express at 7 A. M. for Buffalo.
Dunkirk Express at 7 A. M. for Dunkirk.
Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Otisville and intermediate stations.
Night Express at 5 P. M. for Dunkirk and Buffalo.
Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.
9.00 A M—Mail Train. Through Way Train, 12 M.
4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.
For Peekskill at 3, 4 and 5.30 P M.
For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

Passengers taken at Chambers, Canal, Christopher, 14th and 31st-sts.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Miscellaneous.

Incidents at Sevastopol.

The following paragraphs, gleaned from British journals, give a vivid idea of the horrors of the battle field around Sevastopol.

THE GREAT CAVALRY CHARGE.—The Russians have had some severe struggles, but they have not the "pluck" of Englishmen, for, though we are far inferior in numbers, we always beat them back. We are in the saddle night and day. I can't tell you how long it is since I was undressed; I only know, that it has been so long that I have forgotten it. The worst affair we have had was the day before yesterday. At daybreak the enemy appeared, and advanced in such numbers that they took from the Turks two of their batteries, and turned the guns upon us. We were obliged to retreat out of range of the guns; and this so elated the enemy that they actually had courage enough to come into the open field with us. Three regiments of their cavalry tried to gain possession of the Highlanders' (93d) position, and charged them, but they had not time to repent, for they went down like cut corn; what were left of them turned and fled, and we pursued them over their own hills; here they were reënforced by three more regiments of cavalry, including Nicholas' crack Imperial Guards. There were the Greys and 1st royals up at this time, and we charged them—they had nothing else for it, so they charged at the same time. I cannot describe it; they were so superior in numbers that they "outflanked" us, and we were in the middle of them. I never certainly felt less fear in my life than I did at that time, and I hope God will forgive me, for I felt more like a devil than a man. We fought our way out of them as only Englishmen can fight; and the 4th, 5th and 6th were there up with us. I escaped without a scratch, though I was covered with blood; my horse was not even wounded; but, oh, the work of slaughter that then began—'twas truly awful, but I suppose it was necessary; we cut them down like sheep, and they did not seem to have power to resist. The plain is covered with dead Russians, and of course we left some of our poor comrades on the field. We only lost two, and about seven wounded.

THE RIFLEMEN.—*One of the most wonderful things, I think, is to see the way in which* our riflemen go about in small detached parties, crawling along on the ground up the side of a hill, till they appear to be within three hundred yards of the enemy, and thus they lie on their bellies till a chance offers, when crack goes a Minié and down falls a Russian. I was informed most credibly, that one of these brave fellows a few days since thought he would go and do a little business on his own account, got away from his company, and crawled up close to a battery under shelter of a hill, lay on his back and loaded, and turned over and fired, when, after killing eleven men, a party rushed out, and he took to his heels, but, sad to say, a volley fired after him by this party, leveled him with the earth, and he was subsequently picked up with thirty-two balls in his body.

A NARROW ESCAPE.—A series of hand to hand encounters go on between our skirmishers and those of the enemy all day long, and in which our fellows are uniformly successful. They go out to these encounters with almost childish delight, and the escapes of some of them seem miraculous. In one of these encounters a rifleman was taken on the 26th, and carried a prisoner into the Russian trenches. There, in the presence of our army, he succeeded in killing and wounding three of the enemy, broke through all who tried to stop him, scrambled over the Russian works, and though whole volleys of shot were sent after him, and he was pursued by hundreds, he contrived to elude all, and reached our camp amid tremendous cheers. Lord Raglan, to mark his successful gallantry, made him a present of £5, and paid him a high compliment on his courage and activity.

THE HORRORS ON THE BATTLE FIELD.—As a matter of course, the field on the spots where the cavalry contests had taken place was a horrible sight; more so from the peculiarly ghastly nature of saber wounds. In such places the daed and dying men and horses literally covered the ground. Both ourselves and the enemy appear to have had two horses killed or wounded for one man. This gave the field an unusually sanguinary appearance, very likely to mislead those not on the spot. I have always imagined that split skulls and cloven heads were figures of speech until to-day, when I have, indeed, been terribly convinced of the reality of such horrors. Some of the dead to-day had their heads as completely cloven as if the operation was performed by a surgeon with a saw. Nearly all the Russians were so killed. Our fellows had been principally slain with lance thrusts; I saw one body with 13 such wounds through the chest and stomach. Another man had six, which all were mere flesh wounds, and not dangerous. The same man, in the 17th Lancers, extraordinary and incredible as it may appear, had two horses killed under him, one or two saber and bullet wounds in his cap, his sword bent double in its sheath by a Minié bullet, five bullets in his saddle, one in his lance-staff, and sword cuts innumerable. Such escapes may well appear almost miraculous, yet in hurried hand-to-hand combat they often occur. There was a large proportion of killed and wounded Russian officers; it was quite impossible to distinguish them from the privates, except by the superiority of their under-clothing. Their uniform was precisely similar to the common soldier's, with the exception of a narrow strip of gold lace on the shoulder.

A TERRIFIC SPECTACLE.—The Russian batteries having it now all their own way, hammered unremittingly upon us with the greatest vivacity. They had sent forth from their ramparts loud shouts of defiance or of victory when the explosion of the French and English magazines acquainted them of our misfortune; but it was now our turn to crow, for about half-past three there suddenly shot upwards from the works, or rather the Redan on our front, a white livid flame, which ascended high into the air, and while we all paused to gaze on the spectacle, a sound which made the very earth tremble beneath us, followed by a most awful report, told us that the Redan had ceased to exist—for in the next minute its garrison of hundreds, blown to atoms, dismembered, and mutilated by the action of the explosion, were discovered hundreds of yards above the parent earth. So fearful and terrifying a spectacle I never have, nor do I hope ever again to witness. In the midst of a dense volume of smoke and sparks, which resembled a waterspout ascending to the clouds, were visible to the naked eye, arms, legs, trunks, and heads of the Russian warriors, mingled with cannons, wheels, and every object of military warfare, and I may say, with every living thing it contained. The explosions in the French and English batteries were like flashes in the pan of a musket compared with this.

SUNDAY SERVICE.—The Russians opened a very heavy cannonade on us this morning—they always have done so on Sundays. Divine service was performed with a continued bass of cannon rolling through the responses and liturgy. The French were terribly cut up by the Garden Battery, more so, however, by their misfortune of last night. The Russians made a stealthy sortie toward morning, and advanced close to the French pickets. When challenged, they replied, "Inglis, Inglis," which passed muster with our allies as *bona fide* English they say, and ere they knew where they were, the Russians had charged them, got into their batteries, and spiked five mortars. They were speedily repulsed; but this misadventure has mortified our brave allies exceedingly.

A SOLDIER'S FEELINGS IN THE MIDST OF BATTLE.—A letter from a private soldier says: "The bullets of the Minié rifle go past you with a most infernal sound. It's as though mocking devils were sneering at you in the air. But your blood soon gets up, the sound maddens you, the smell of gunpowder has intoxication in it, your veins tingle as if fire was running through them, the eyes strain, the jaws become rigid, and in you go." He states that he lost himself altogether at the Alma, till he found himself a victor. He got a wound on the forehead, only a graze, but it bled considerably, "the blood ran down into his mouth, and in his burning excitement he drank it as though it had been inspiring wine."

A NOVEL EXPLOSION.—On the 24th (the eighth day of the seige,) we had another explosion on our right attack. The story has an air of Munchausen about it, and if the facts were not well known, I should have some scruples in telling it. An eight-inch gun had just been loaded with a live shell, and the match was applied to fire it off. At that moment one of the enemy's shells entered the gun, and the two shells exploding burst the gun. Every man in the battery was more or less hurt. Some were killed.

The Perils of Gold Mining.

A correspondent of the Williamsburg *Times*, writing from Australia, narrates the following incidents, illustrative of the dangers which beset the Australian miner:—

"Perhaps no death is more terrible than that which awaits the digger. The heavy yellow dust, with its tempting look, keeps the miner burrowing in the earth with thousands of tons suspended over his head, and by a tenure less reliable than that which upheld the sword of Damocles. An acquaintance of mine—Nutter from the State of Maine—persisted in taking out a rich pillar from a very dangerous hole, and succeeded; but he was not fairly on the ground again when fifteen or twenty square yards sunk down with a dead heavy crash. Little stones accidentally falling and hard lumps of dirt have killed those in holes, and great care is necessary to guard against these evils.

"At Baalarat, where the holes are very deep, accidents are common; one occurred there lately. A man digging found the bottom growing soft, but paid little attention to it until his legs sunk in so that he could not pull them out; he shouted for his mates to let the rope down, and he fastened it round his waist, but they could not pull him up; help came and twisted off the crank of the windlass, they then seized the rope in their hands, but it was of no avail; the water bubbled up around the man in the hole, the quicksand rushed in, buried him to his waist and neck, stifled his cries, and rose thirty feet above his head. To dig him out was useless, in fact, next to impossible. The rope was cut and its end pushed beneath the quicksand.

"In another instance a man driving sixty feet under ground loosened a large stone and found water trickle through where it had been, but, not dreaming of danger from water, he stuck his pick in, when the water burst in with great force. He had presence of mind to drop his pick and turn round. The water drove him violently into the main hole, and, being a swimmer, he kept upright in the hole until he was drawn up, when, carelessly getting out, he slipped and fell, losing his life by the fall.

"But, notwithstanding the many accidents that occur, perhaps they are not greater for the persons employed than in any other business or traffic of life. There are numbers at the mines who would not go to the bottom of some of the holes for all the gold in Australia; but the great majority would gladly place their lives against a fortune, myself for one."

A Wounded English Soldier.

The following is one of a thousand cases which the battle-field makes matter of history. It refers to a wounded English officer at the late sanguinary conflict of Alma, where victory on the part of the Allies was so dearly purchased:—

Poor B—— came to see me in the hovel we were lying in, and burst into tears when he recognized me, I was so altered; of course, one cannot have an ounce of lead through one without swelling, and my face is like a good sized turnip; my mouth much larger than I have any desire to see it in future. I do not suppose the ball could have hit me in any other part of the head where it would not have been attended with more danger—a most summary dentist the ball was, to take out all my teeth at one smash except four grinders; there is a decayed one, which I hope has gone with its brethren, but I can't make out yet, if it has or not. There is a good bit of tongue gone also, but the doctors say that will not signify, and that I shall speak as plain as ever, or at most only with a becoming lisp; so altogether I think even you must allow that I have every reason to be thankful, and I hope you will not allow yourself to fret the least about me.

Just as we were charging the great redoubt, I prayed, O God! spare me! and I really no more expected to return alive than if I had been tied to the cannon's mouth. Only fancy grape and cannister being fired at us within thirty yards, besides a whole battalion letting drive as hard as they could into us. Both the other officers in my company were wounded.

New Mormon Temple.

The great temple which the Mormons are building at the city of the Salt Lake, is described as promising to be a wonderful structure, covering an area of 21,850 square feet. The block on which it is located is forty rods square, and contains ten acres of ground, around which a lofty wall has already been erected, to be surmounted by an iron railing manufactured by the Mormons themselves at their iron works in Iron County, Utah Territory. The temple building will have a length of 186 1-2 feet east and west, including towers, of which there are three at the east end and three at the west, and the width will be ninety-nine feet. The northern and southern walls are eight feet thick. The towers spoken of above are cylindrical, surmounted by octagon turrets and pinnacles, and having inside spiral stairways leading to the battlements. Besides these, there are four other towers on the four principal corners of the building, square in form, and terminating in spires. On the western end will be placed in alto relievo the great Dipper or Ursa Major. As regards the interior arrangements, there will be in the basement a baptismal font 57 feet long by 35 feet wide, and on the first floor, a large hall, 120 feet long, by 80 feet wide; while on the third floor there will be another of the same size, besides numerous other rooms for various purposes. Around the outside of the building will be a promenade from eleven to twenty-two feet wide.

Sights Abroad.

In a lecture on what he has seen abroad, Wendell Phillips observes:—

In Italy, you will see a man breaking up his land with two cows, and the root of a tree for a plough, while he is dressed in skins with the hair on. In Rome, Vienna, and Dresden, if you hire a man to saw wood, he does not bring a horse along. He never had one, nor his father before him. He puts one end of the saw on the ground, and the other end on his breast, and, taking the wood in his hand, rubs against the saw. It is a solemn fact, that in Florence, a city filled with the triumphs of art, there is not a single auger, and if a carpenter would bore a hole, he does it with a red-hot poker! This results not from the want of industry, but of sagacity of thought. The people are by no means idle. They toil early and late, men, women, and children, with an industry that shames labor-saving Yankees. Thus he makes labor, that the poor may live. In Rome, charcoal is principally used for fuel, and you will see a string of twenty mules, bringing little sacks of it upon their backs, when one mule could draw all of it in a cart. But the charcoal vender never had a cart, and so he keeps his mules and feeds them. This is from no want of industry, but there is no competition.

A Yankee always looks haggard and nervous, as though he were chasing a dollar. With us, money is everything; and when we go abroad, we are surprised to find that the dollar has ceased to be almighty. If a Yankee refuses to do a job for fifty cents, he will probably do it for a dollar, and will certainly do it for five. But one of the lazzaroni of Naples, when he has earned two cents, and eaten them, will work no more that day, if you offer him ever so large a sum. He has earned enough for the day, and wants no more. So there is no eagerness for making money, no motive for it, and everybody moves slowly.

Forest-Trees.

One of our subscribers requests us to furnish instructions for raising chestnut, walnut, and locust trees, from seeds. This is a subject of much importance to settlers in prairie countries; and even in many parts of Ohio, it would be well if farmers would plant a few acres of their grounds with forest trees for the prospective wants of their children, if not for their own benefit. In some parts of the State there is already quite a scarcity of timber for fencing and building purposes, as well as for fuel, and good wood-land is worth more per acre than that under cultivation.

The first thing demanded, on the part of those intending to plant forest seeds, is to select such kinds of trees as are best adapted to their soil. Much labor has been wasted by neglecting this precaution; and all the instructions we have seen in books and papers in regard to this business have been defective on this point. It has been stated, for instance, that chestnuts can be raised with the greatest ease from seed; and many farmers have been induced to try the experiment, but have very generally failed because their soil was not of the right kind.

A deep, sandy, and dry soil, is requisite for the successful growth of the chestnut; and it is vain to attempt to make it thrive on soils of an opposite character, as we know from repeated experiments. The black walnut and butternut thrive best in a deep, rich, clayey, and gravelly loam, or what is commonly known as deep limestone soils. The same kind of soil is best suited for the sugar-maple, but this tree will flourish on a greater variety of soils, and requires less depth, than the walnut.

The hickory will bear a strong clay soil, better than most other trees except beech. Neither of these is well adapted to the rich, mucky or sandy soils of the prairies. The oak, in some of its varieties, will flourish on most good soils, not too wet or mucky, but is of too slow growth for our fast people. The locust, on account of its rapid growth, valuable timber, and adaptability to various soils, is perhaps the most useful of all—but unfortunately it is so liable to be destroyed by the borer that it can not be relied on in many parts of our country.

Saving and Sowing Seed—Chestnuts, walnuts, and similar kinds of tree seeds, should never be suffered to become perfectly dry before planting. If not convenient to plant them soon after their time of ripening, they should be put in a box of sand, and kept moist, (not wet,) and be allowed to freeze during the winter, then planted early in the spring, covering them about two inches in depth. They may be planted where the trees are to remain, taking care to keep the plants clear of weeds and grass while young; or they can be transplanted when two or three years old, taking them up carefully, without injuring the roots, and not exposing them to drying while out of the ground.

Locust seed may be kept dry, for a year or two, without destroying its vitality, but it must in all cases be thoroughly *scalded* before sowing, or it will lie a whole year in the ground without vegetating. For a quart of seed pour on four quarts of *boiling* water, and let it stand for 12 or 24 hours, when most if not all of the seeds will be swollen to several times their former size. If a considerable portion are not swollen, they must be scalded again. Stir the seeds while in the water, so as to agitate them briskly, and while in motion pour off the water and swollen seeds, while the others being heavy will remain at the bottom of the vessel; then scald, and let soak as before, and they will generally all swell. The seeds can then be sown where designed to remain, or in a nursery-bed, and the trees transplanted when *one year* old.

[Ohio Cultivator.

Docking Horses.

We are glad to see that the abominable practice of docking and nicking horses is getting out of fashion. It prevails in no other country in the world but England and the United States; we got it from the mother country, and the sooner we leave it off, the better. It is wonderful how anybody but an ignorant, narrow-minded blockhead of a jockey, should ever have thought of it, being as offensive to good taste as a violation to every humane feeling. Has nature done her work in such a bungling manner, in framing that paragon of animals, the horse, that he requires to have a large piece of bone chopped off with an axe, to reduce him to symmetry—or that beauty and grace can be obtained only by cutting a pair of its large muscles.

The docking and nicking of horses, says an intelligent writer on Farriery, is a cruel practice, and ought to be abandoned by the whole race of mankind. Every human being possessed of a human heart and magnanimous mind, must confess that both the docking and nicking of horses is cruel; but that creature called man attempts thus to mend the work of his Almighty, wise Creator—in doing which he often spoils and disfigures them. What is more beautiful than a fine horse, with an elegant long tail and flowing mane, waving in the sports of the wind, and exhibiting itself in a perfect state of nature? Besides, our Creator has given them to the horse for defense as well as beauty.

The same author relates an instance of a fine hunting horse owned by an Englishman, which could carry his rider over a five barred gate with ease; but he thought the horse did not carry as good a tail as he wished—he therefore had him nicked, and when he got well, he could scarcely carry him over two bars—"Thus," said he, "I have spoiled a fine horse; and no wonder, for it weakened him in his loins." Any man of common sense would give ten per cent. more for a fine horse whose tail had never been mutilated, than for one which had been under the hand of a jockey.

[Woonsocket Patriot.

Habits of the Wasp.

The subterfuges resorted to by animals in search of food, have been regarded, by the general reader, as the most interesting and instructive portion of the work of the naturalist. An incident illustrative of the cunning of the wasp, was recently related to us, says the *Exeter News Letter*, by an observing gentleman:—

A blue wasp, known as the solitary wasp, because it lives alone in its little clay nest, was seen to hurl itself upon the strong, wheel-shaped web of a large spider. Here it set up aloud buzzing, like that of the fly when accidentally entangled in a similar web. The spider watching at the door of his silken domicil, stole cautiously forth. His advance was slow, for he evidently felt that he was approaching no common enemy. The apparently desperate, yet fruitless efforts of the wasp to free himself, encouraged the spider and lured him forward. But when within some three inches of his intended victim, the wasp suddenly freed himself, from his mock entanglement, and darting upon the poor spider, in a moment pierced him with his deadly sting in a thousand places.

The wasp then bore his ill-gotten spoil to his lonely home. This house is built of clay, thimble-shaped, and originally containing but one apartment. In the lower part of this *cul-de-sac* the wasp deposits its eggs. Immediately over them it draws a thin, glutinous curtain. Upon this curtain it packs away the proceeds of its hunting excursions, such as spiders, flies, and all other insects which it regards as suitable food for its young. Consequently, when the young escape from the ova, they find upon them a well-stocked larder, and gradually eat their way through the choice depository, finally appearing to the delightful world in the agreeable form and stature of perfect wasps.

Chicago Post-Office.

The Chicago Post-Office is, we believe, the third office in the United States with respect to the amount of matter received for distribution into other mails. Thus, all the mails for Wisconsin, for the greater part of Iowa, all the northern and eastern mails for all Illinois, the northern, eastern, western, and southern mails for a large portion of Michigan, and for the northern part of Indiana, are sent in bulk to Chicago, there to be opened, examined, separated, and again mailed for their appropriate offices.

The postage on letters received at the Chicago Post-Office during the three months ending September 30, 1854, amounts to $62,757 23. In addition to this there were over 18,000 letters which, after having been duly advertised, were not called for. This statement shows that during three months there were received at the Chicago Post-Office, for delivery in that city, the almost incredible number of *two millions one hundred and nine thousand, eight hundred and seventy-four letters*, and that of this immense number, two millions and ninety-one thousand eight hundred and seventy-four letters were actually delivered at the windows of the Chicago Post-Office, leaving only 18,000 not delivered.

There are made up in Chicago, and sent off daily, packages of mails for two thousand different offices. [Chicago Times.

SUPPLY OF COAL.—It is sometimes asked whether the immense drain upon the coal-mines from year to year, will not, ere long, cause a scarcity which no labor or capital can supply. According to Professor Hitchcock's Elementary Geology, there is coal enough in this country to last a million of years, even though the consumption should amount to seven million of tons annually. He says that the great Apalachian coal-field extending from New York to Alabama, covers nearly 100,000 square miles; the Indiana field, 35,000. Add to these fields Michigan, Massachusetts, Rhode Island, Missouri, Iowa, and Virginia, and we shall have a surface more than 27 times as large as Massachusetts. If we suppose the average thickness of all the beds over this surface to be only 25 feet, then the whole amount of coal in solid measure in this country, would not be far from 1,100 cubic miles. And yet the poor are taxed exorbitantly by a duty on foreign coal.

Tunnel under the Ohio River.

The *Louisville Journal* has an article upon the prospects and feasibility of the construction of a tunnel under the Ohio River at Louisville, Kentucky, and Jeffersonville, Indiana. A charter for this work was granted by the Kentucky Legislature, March 6, 1854; and the right of way given by the city of Louisville, and the work forever exempted from taxation for city purposes, on the 27th day of May, 1854. The Fort Wayne and Southern Railroad Company have accepted the charter and the release of the right of way; and propose making up the stock, and if possible to put the work under contract this fall or early in the spring. The tunnel will be exclusively for railway purposes, with a double track, adapted to the use of all the roads for the different gauges. It will be 28 feet wide in the clear, and 17 feet high, perpendicularly, from the center of each track. The arching will be sixty feet less than two miles in length. The descending grades into the tunnel, at either end, will be only eighty feet per mile on a straight line. From the head of the grade on one side, to the head of the grade on the opposite side of the river will be two miles and a half. The tunnel will be constructed in the river by excavating a channel or pit in the rock and arching over with the material excavated—limestone rock of the best quality. The work has been surveyed and the cost estimated at $1,200,000. It is proposed to raise this sum by a subscription, no part of which is made payable until the whole sum is subscribed. Whenever all the stock is taken, then it becomes payable in four equal semi-annual installments.

Retribution of Slave-Trading.

Strange and frightful maladies have been engendered by the cruelties perpetrated within the hold of a slaver. If any disease affecting the human constitution were brought there, we may be sure that it would be nursed into mortal vigor in these receptacles of filth, corruption and despair. Crews have been known to die by the fruit of their own crime, and leave ships almost helpless. They have carried the scourge with them. The coast fever of Africa—bad enough where it has its birth—came in these vessels, and has assumed, perhaps, a permanent abode in the western regions of the world. No fairer sky or healthier air were there on earth than in the beautiful bay and amid the grand picturesque scenery of Rio de Janeiro, in Brazil. But it became the haunt of slavers, and the dead of Africa floated on the glittering waters, and were tumbled upon the sands of its harbor. The shipping found, in the hot summer of 1849, that death had come with the slavers. Thirty or forty vessels were lying idly at their anchors, and their crews had mostly perished. The pestilence swept along the coast of that empire with fearful malignity. Cuba for the same crime met the same retribution. Cargoes of slaves were landed to die, and brought the source of their mortality ashore, vigorous and deadly. The fever settled there in the beginning of 1853, and came to our country as summer approached, in merchant vessels from the West Indies. At New Orleans, Mobile, and other places, it spread desolation, over which the country mourned. Let it be remembered, that it is never safe to disregard crime.

[Africa and the American Flag.

ANCIENT INHABITANTS OF NEBRASKA.—On the Upper Missouri there exists a tract of country known by the name of Manvaises Terres, or, bad lands; at one time, probably, the bottom of an immense lake, in which perished thousands of animals having now no representatives on earth. It appears that the waters of this immense pond were removed by some convulsion of nature or other, and the sediment at the bottom became indurated. The portion of the valley thus excavated forms a surface of ninety miles in length and thirty in breadth. The remains of animals which lived and breathed long before the advent of man on earth are here found in such abundance as to form of this tract an immense cemetery of vertebra. The bones are said to be completely petrified, and their cavities filled with silicious matter. They are preserved in various degrees of integrity, some most beautifully perfect, and others broken. Two remarkable species of Rhinoceros—the first ever found in America—were discovered here, and also a sort of panther, smaller than the present variety, and likewise a number of strange animals with long names, unlike anything which man ever saw alive. We know, then, that there were once individuals in Nebraska as curious, and as strangely shaped, and as pugnacious, as any squatter whom the present great rush of immigration will carry thither.

A LIFE SAVED BY BRANDY.—Under this caption the New York *Journal of Commerce*, in 1829, published the following facts:—

For the first time in our lives, we have the pleasure to record an instance of the preservation of life by means of brandy. On Sunday afternoon the head waiter in one of our extensive boarding houses, retired to his chamber for a short nap; and to protect himself from the cold, took with him a kettle of burning charcoal. As might have been expected, he was soon suffocated, and would have died, had not one of the boarders been in want of brandy. As it could not be had without possession of the keys, and as these were in the pocket of the head waiter, his situation was soon ascertained, and after three hours of exertion, the flickering lamp of life was made to burn again. It is evident that if all the individuals of the family had been members of the Temperance Societies, the man would have died. We therefore pass this life preserved to the credit of spirituous liquors; which deducted from the 30,000 lost annually from the same cause, leaves a balance of 29,999.

The notes of the Eighth-avenue Bank are redeemed by the Bank Department at 94 cents.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherever they are offered.

For further particulars, address, (postage paid,)
ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every perso Single copies 37½ cts., or four for one dollar. ☞ Se by mail, free of postage, to any part of the Unite States. Address as above.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns and process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound and quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order CHIMES of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y

Ayer's Cherry Pectoral.

"*Wisdom shall bow down to it, and the great of the earth, shall kneel before it.*"

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

VERMILLIONVILLE, La., April, 1853.

Mons. le DR. J. C. AYER:—I have of late made frequent use of your Cherry Pectoral in my practice, and I am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M.D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

DR. J. C. AYER—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

DR. J. C. AYER:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.
C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.

PROVIDENTIAL MONITIONS.

BY W. M. FAHNESTOCK, M. D.

Preparedness for death is the chief business of life, when properly estimated; yet, how few take heed unto it, and give it timely consideration. Our state of probation, here below, is rarely comprehended as a fleeting one—evanescent as the morning dew—until the chill evening of decline, if so, peradventure, our short span be protracted, tells us, that we have no longer any pleasure in it; still our three score years and ten are, at most, but a hand-breadth, and few, very few, ever attain *half* that period. It was a significant remark made on the death of Kelpius, the learned and good Kelpius, one of the leading spirits among the Pietists, (who had their origin in the attempted reformation in the Lutheran Church, under the distinguished Spener, Ecclesiastical Superintendent of the Court of Saxony, in the latter part of the seventeenth century,) that "he died at half his days"—*thirty-five years*—regarding three score years and ten as the limit, if not the extreme limit, of the age of man. Not the half of mankind arrive at half their days *in this sense;* still, they do not consider and prepare for their end, until the Enemy, who is always singing, with the Syren's lulling voice, "To-morrow shall be as this day, and much more abundant," appears to announce that our little hour of probation has ended, and the soul not saved.

In our youth we are apt to look forward to many days, and regard the pleasures of the world as a natural inheritance of early life, to be squandered without account; yea, turn aside the daily admonitions of a kind Providence, and presume upon deferred retribution. Emphatically, with such deluded mortals, is the declaration, "Thou fool, this night thy soul shall be required of thee," verified to its most fearful extent. Truly has Dr. Young said:

> "Procrastination is the thief of time;
> Year after year it steals, till all are fled,
> And to the mercies of a moment leaves
> The vast concerns of an eternal scene."

But even *that moment* is not always vouchsafed to poor deluded mortals; in an instant, before the confused mind can comprehend the blow, all is gone, and gone forever. Sad, sad indeed, must be the prospect of that soul who thus relies upon such an uncertain moment, for repentance, for pardon, and for sanctification, to make him meet to dwell among the saints in light. Dr. Young judiciously adds:

> "Youth is not rich in time; it may be poor;
> Part with it as with money, sparing; pay
> No moment but in the purchase of its worth;
> And what is worth? Ask death-beds; they can tell.
> Part with it as with life; reluctant; big
> With holy hope of nobler time to come;
> Time higher aim'd, still nearer the great Mark
> Of men and angels; virtue more divine."

How presumptuous, how culpable, how criminally culpable, then, to neglect the improvement of that time, and to defer a reformation, which is to determine our eternal destiny. We do not assume to be the judge between God and man, nor do we attempt to restrain the tender mercies of the Lord. God's mercies may be entirely beyond our conception, but we can only judge of them by his Revealed Word. The heart right toward God, God may accept it at the eleventh hour, yea, at the last moment, although there is but one instance in the Record to encourage such an expectation, and none to presume upon it. Our duty is made clear, that none need err therein, namely, to turn in with the overtures of the precious Redeemer, now in the accepted time, now in the day of salvation, and not resist the strivings of the Holy Spirit; for we are told in the Word of Truth, that that Spirit will not strive alway.

A useful lesson, under peculiarly interesting circumstances, of the acceptance and the rejection of the gentle monitions and tender leadings of a beneficent Providence, may be found in the following sketch.

A gay party, numbering twenty to twenty-five fashionable young persons, had assembled at one of the most enchanting Iron Establishments of the Conewaga Mountains, to spend a fortnight among the wild hills of that romantic region, and enjoy themselves in a round of merry-makings and adventure. It would require entirely too much space for a newspaper article, to become the chronicler of such an interesting party through a succession of amusements and adventures for days together; for no subject can be more replete with entrancing incident, than *Life in the Furnace Hills*—the domestic history of its denizens—more strange and astounding, ofttimes, than any fiction can possibly prove; yet my narrative will not permit of such a digression, agreeable as it would be to the writer, to trace the sports of such gatherings, and to embody some thrilling reminiscences of by-past times, which would afford material for a volume, without exhausting the interest of a single Establishment. It must, therefore, suffice to make a general remark, that on occasions like the present, the most liberal hospitality is generally extended to the numerous guests, and there is an unrestrained privilege for each individual to enjoy his time and seek amusement from any source at his command, and an equal privilege of the whole party to roam over the country in pursuit of enjoyment, and make a descent on any of the neighboring Furnaces or Forges, without ceremony, and enjoy a delightful day, and even a brilliant assembly in the evening, at one and all of them; and that without even embarrassing a family, or finding them unprepared to entertain in the most sumptuous manner.

Such perambulations among the wild hills, and their sudden descents upon the surrounding Establishments, (for *there* eighteen and twenty miles, or even more, is considered neighborhood,) varied by excursions to persons and places of note, ever affords abundant opportunity for piquant remark and profitable reflection, apart from personal emotions, which enter greatly into the entertainments of such an expedition. We shall, therefore, allude, briefly, to but one or two interesting incidents which occurred on this occasion, having a particular bearing on the subject before us.

In going, one day, to visit one of the neighboring Furnace Establishments, the party diverged from the usual route, and rode some miles out of the way, to call, from curiosity, at the cell of a hermit, who had gone into recluse life, about that time, under very touching circumstances. He had selected the wildest and most secluded part of the hills for his retreat, not presuming that any thing would lead a single being thence, to disturb his silence and his solitude; for it was silence and solitude—undisturbed silence and solitude—that he coveted. He was a man deeply stricken by a singular providence. His sister, Elizabeth Wilson, who became the victim of an English officer during the Revolutionary War, and was condemned to death for an act of which she was entirely innocent, and for whom her devoted brother, William Wilson, the recluse, had procured a pardon at the last moment, but did not reach the place of execution, from insurmountable obstacles, in season to save her—determined to pass his days apart from the world, which had inflicted such a poignant, such an enduring sting to his tender heart, at the ignominious death of a beloved, an only sister. As they arrived at the cell, they discovered a still more singular man—a tall, graceful man, with extremely white flowing hair, and most luxuriant snowy beard, covering his whole chest, wrapped in a long cloak, secured by a girdle, and having a cowl attached to it, which he used instead of a hat, and carried a long rude staff in his hand. It was Jaebez, the Prior of the Ephrata Monastery, a man of great learning, piety, and distinction among the good and the great of the land; and who had been the fortunate deliverer of the traitor Widmer, who was condemned to death for treason to the government. He came on foot, his usual way of traveling, to condole with Wilson, whom he knew very well, on his misfortunes. Their interview was one of profound interest, discussing the mysteries of Providence, and His purposes, which are sometimes hard to be reconciled by the afflicted; yet the Prior dwelt particularly on the importance of that frame of mind which enables us to praise God for his *judgments* as well as for His *mercies.*

The gay party present were much edified with the profound reasoning of the Prior; which rendered them sober and thoughtful for a long time after they were wending their way along the dark ravines and craggy steeps. One remark of the Prior sank deep into the heart of one of the party, Theodore Oakley, an estimable young man, who knew and respected the good, benevolent Prior, and who reciprocally estimated his young friend. After extending a graceful parting to each of the company, with an appropriate admonition, he took Theodore by the hand, and remarked, in a most affectionate manner, in the words of Scripture, as was his general habit in discoursing with all persons: "Remember thy Creator in the days of thy youth. Seek first the kingdom of heaven; for the day of the Lord cometh as a thief in the night. Be not in darkness that that day overtake you as a thief." They all departed in profound silence; and although Theodore did not make a single remark, on what had transpired, yet, whenever his mind dwelt upon it, and he could not throw it off, a sadness overcame his heart like a pall—an irresistible, depressing pall, which he could not comprehend nor remove. It was not only a sinking weight upon his spirits for the day, but haunted him in his gayest hours and in his greatest seclusion.

Theodore Oakley was the nephew of Mr. Eldridge, proprietor of the Establishment, by his sister. He was a bright young man, in gayest spirits, having just returned from Princeton College, flushed with the first honor of that Institution. His uncle was proud of the young man, as a worthy scion of the family, and was ever ready to bestow any favor, or meet any expense, to forward his interest or his pleasure. The party assembled were invited to rejoice with him in his recently won high destinction, and his additional success in winning the favor of one of the most estimable young ladies, Mary Worthington—a singularly fortunate young man, enjoying the double fortune of possessing the honors of old Nassau on his brow, and the signet of woman's favor in his heart—a double honor, and a double triumph; for the distinguished belle who had thus favored him, had two other equally promising offers at the same moment. His betrothed, Mary Worthington, was a young lady of many accomplishments; not the ephemeral accomplishments of mere dolls in fashionable life, but the sterling, substantial accomplishments which render a lady of an Establishment, not a gay, flippant butterfly, but the honored matron; which distinguishes the woman from the flirt.

Among the party were Robert Henderson and Harry Ridgley, gay young men of enviable position, accomplishments, and ample means to pursue life at their pleasure; and whose whole life, at present, was a round of fashionable follies—plunging into every gayety and dissipation, to "kill time," and seek enjoyment from *ennui.* They were young men of good families, brought up under the faithful admonitions and prayers of pious parents. Such wholesome influence, however, did not lead them to the Rock which is higher than themselves; and they became singularly stricken. Both lost their parents within a few weeks. They were alike bowed down. They both became thoughtful, and vowed a dedication, within themselves, which they never openly professed. Harry Ridgley was left entirely alone. In the loss of his parents he lost all his kindred; and was invited to make his home with the Hendersons, Robert and his sister, who continued the Establishment. Robert was taken very ill, suddenly, and was brought nigh unto death. His sister, Julia, and Harry, who was engaged to that exemplary girl, were instant, day and night, at his side, not only in administering medicine, but in supplicating the great Physician of souls; and both the sick young man and his friend, vowed fealty to their God before Julia, with a solemn engagement to ratify that vow on Robert's recovery.

Robert was restored; but both Robert and Harry turned from their solemn promise. God came near unto them again; Julia sickened and died; but in a short time their new grief and their renewed vows of dedication fled together. It was not long after this latter occurrence, that they joined the party to the hills, to dissipate their serious impressions, and be out of the way of remark or reproof of their more sober-minded friends; not thinking, for a moment, what an important part they should play in a sad drama, which soon followed.

On Sunday morning, the whole party determined to attend public worship at Litiz, a Moravian village a few miles distant from the furnace, and they set out at an early hour to gain time to examine the prominent points of that singular, yet interesting village, before the hour for worship.

Litiz, at the period of which I write, was occupied exclusively by Moravians, and has ever been characterized by the cleanliness of its streets, its neat residences, the quiet demeanor and exemplary walk of its inhabitants, adorning their profession as a peace-loving and peaceable community. In the centre of the town is an oblong square on one side of the street, having a street running round this apparently half square. The square is laid out as a pleasure ground, crowded with trees and pleasant walks, having the two celebrated schools at either end—the Boys' school at the northern end, and the Girls' school at the southern extremity; while the whole length, back, is occupied by the houses for the single brethren and the single sisters, two imposing buildings, and the church and parsonage between them; and all together filling up the entire plot.

The Sisters' house and the Brothers' house are large two-story stone buildings, with high hip-roofs forming a third story, lighted by square dormor windows, and have capacity to accommodate comfortably a large number of persons; which in the olden time were pretty well filled with active, energetic persons, laboring solely to advance the welfare of their happy community. The Sisters' house was ever the particular attraction of casual visitors. A neater and more comfortable establishment cannot be imagined, in which simplicity, joined to frugality, gave it an air of home-feeling that very few places of much greater pretensions can afford. Beside this neatness and comfort, the visitor, who was always received most graciously, would find groups of bright, smiling, contented faces, in every part of the building, busily employed through the week at some handiwork, which was exposed for sale in a room set apart for that purpose, and on Sundays each occupied an old fashioned, slender, high-back rocking chair, intent on reading the Scriptures, or preparing for some church service.

There happening a funeral at the moment, the party entered their beautiful grave yard, and had an opportunity to stroll through one of the most enchanting yet unostentatious cemeteries to be found in the land—enchanting from its extreme simplicity and appropriateness. It was divided by three parallel alleys, through the length of the yard, with one crossing near either end, into which the three terminated, leaving the plots in long, narrow beds, of easy access. Along the side alleys are rows of trees, and the plots are covered with a rich, luxuriant sward, always kept neatly dressed, and the walks clean and inviting. The grave yard, as all the Moravian cemeteries, is arranged in a peculiar manner. One of the large plots is set apart for *adult males,* one for *adult females,* one for *young men,* another for *young ladies,* one for *male infants,* and another for *female infants;* and their order of burying is uniformly the same, namely, each person of each *class* is interred next to the former in exact distances from each other, having a low, modest mound, made by placing a mould of proper dimensions over the grave, which is filled up compactly, neatly sodded all over and round its sides, leaving a narrow passage of about a foot between each mound, and the top strown with the seed or plant of the mountain pink. A small marble slab of about fifteen inches square, or perhaps slightly oblong, *numbered* at the head, which is registered, with the name and age of the person inscribed upon it. This order and arrangement obtains uniformly, with the rich and the poor, and presents a beautiful sight, as well as a useful lesson, namely, that we are all leveled to equality by the grim Archer, the common enemy of our race, yet, cheered by the simple faith, that as in one man all died, so by one man, the man Christ Jesus, we may all live again in the beatific regions of the blessed, through faith in Him who died for us.

Beautiful as is this necropolis, yet it presents one repelling feature to those not accustomed to it—the separation of families, no two lying side by side, unless a sad fatality befals a family, and two of the same sex are called together from the one household. The Moravians have one other singular, yet judicious arrangement, in relation to their dead. Between the Sisters' house and the Parsonage, they have a small building, called the *Dead-House*—a building arranged to receive the corpse after it is laid out, to be kept until the hour of burial; which serves three very important purposes. 1st, Should animation return, which, unfortunately, is not an infrequent occurrence, alarm is given to a person in waiting, in an adjoining room, by a bell, the wire of which is secured to the hand of the corpse; 2d, It saves riotous or disturbing *night watching,* for nights in succession, as is customary, generally, in the country; and, 3d, It saves others from danger when the person dies of a contagious or highly malignant disease, instead of hurrying them, prematurely, into the grave. No people care more for their dead, or make more appropriate arrangements for all things connected with a funeral, than these same simple-hearted Moravians.

The funeral train had left the cemetery under the solemn tolling of the church-bell, while the party from the Funeral lingered within the holy precincts of that solemnizing spot, until they heard the double peal, summoning the community to the public worship, which followed so soon as the afflicted family had become seated in the places usually allotted to them. The meeting-house is in perfect correspondence with the rest of their architecture. It is an exceedingly plain, neat building, having a gallery, one end of which is occupied by a fine organ, a full orchestra, and an excellent choir.

The services that day were peculiarly solemn, the occasion being the special improvement of the sudden death of the young man just buried. After a solemn dirge, and an affecting prayer, the good old Pastor took for his text the passage, "*My son, give me thine heart.*" The Preacher, after showing who claimed the consecration of the heart to his service, God, our Maker and Preserver; glancing at what is man's condition under condemnation; the provision made for sinners by the Lord Jesus Christ; the glorious inheritance laid up for those who yield themselves to the rightful reign of the Sovereign of the Universe, made a powerful appeal to *all* to turn in with the overtures of mercy *now* presented to them—"*to-day,* if ye will hear his voice, harden not your heart as in the provocation."

To the surprise of the whole congregation, (for in those days not anything was known of *protracted meetings,* or *special efforts* and *anxious seats,* and, therefore, the more astonishing, because so very singular,) Theodore, who had not only been profoundly attentive, but deeply affected, during the whole sermon, rose solemnly to his feet, while yet the preacher was exhorting the congregation earnestly, walked deliberately forward, but evidently with stifled tears and heaving breast, up to the altar, and kneeled before the whole assembly. All were taken aback, even the preacher himself, at this singular conjuncture; still he went on, somewhat embarrassed, to make his application. When he got through, he paused a moment, feeling much confusion in determining how to proceed in circumstances so novel. At length he came down from the desk, and kneeling by the young man, prayed most fervently, that he might give his heart wholly to the Saviour of souls, and become a child of the living God.

After the good old Pastor had risen from his knees, the young man still remaining bowed down, the deep notes of the organ pealed soft tones, while a single voice, a female voice, of much richness, fullness, and clearness, chanted the following appropriate hymn:—

> "Peace, troubled soul, whose plaintive moan
> Hath taught each scene the note of woe;
> Cease thy complaint, suppress thy groan,
> And let thy tears forget to flow;
> Behold the *precious balm is found,*
> To lull thy pain, and heal thy wound.
>
> Come, freely come, by sin oppressed,
> On Jesus cast thy weighty load;
> In Him thy refuge find, thy rest
> Safe in the mercy of thy God;
> Thy God's thy Saviour, glorious word;
> O hear, believe, and bless the Lord."

And afterward, organ, orchestra, and the whole choir, joined in a loud hallelujah:—

> "Come let us adore Him; come bow at his feet;
> O give Him the glory, the praise that is meet;
> Let joyful hosannas unceasing arise,
> And join the full chorus that gladdens the skies."

It was a thrilling scene, almost a distracting scene, to the whole congregation. The gay young persons of the party knew not what to make of it, and felt rather provoked than interested in such a singular, and, to them, unseasonable movement, while all who had tasted of the goodness of the Lord, wept and rejoiced exceedingly, never having seen the hand of the Lord after this fashion. Theodore remained on his knees, unmoved by the loud chorus, or the profound silence which followed. His heart was withdrawn from the earth; his soul had penetrated the material heavens, and his spirit was bowed before the Throne in humble supplication.

Continuing on his knees long after the benediction had been pronounced, added greater confusion to the audience, who all waited, standing, the issue of the unaccountable circumstance. The good old Pastor waved his hand for them to retire. The great throng withdrew, and after the house was quiet, and he left alone with the Pastor, kneeling at his side, in silent prayer, Theodore opened his mouth in broken utterances of prayer and praise to Almighty God, for his goodness in bringing him to see the things which make for his eternal peace. His oppressed heart was relieved, and after a short conversation with the Pastor, he rose to depart, after making an engagement to see him, to converse with him on the subject of religion, with the view to connect himself, at once, with the children of the heavenly King.

The carriages of the whole party were in waiting at the church door; and when Theodore made his appearance, leaning on the arm of the good old Pastor, Mr. Eldridge handed him into his own carriage, containing Mrs. Eldridge, Mrs. Thorndike, and Mary Worthington, and mounted Theodore's horse himself, for Theodore was in the habit of seeing every one of his uncle's guests properly seated, and generally followed on horseback.

A profound silence ensued for a mile or two on their way homeward, not any of the party in the carriage having courage to break upon Theodore's meditations, by any remark on what had transpired, or to attempt to dissipate them by any trifling conversation. Mary Worthington, who had made a profession of religion about a year before, felt deeply for Theodore, apart from any particular interest in the young man, but the sympathy of heaven-born spirits. After many efforts, and under considerable agitation, she broke the painful silence, which she found was not going to be attempted by his aunt, or Mrs. Thorndike. "Theodore," said she, "you have taken an important step to-day—may God prosper you in it—" and she choked in utterance. Theodore was delighted with the opportunity to open his mouth, for his heart was oppressed with its own fullness, but he did not wish to obtrude his own emotions on the company.

"God be praised," he exclaimed, "that I have lived to see this day—that I have lived to feel that I am a sinner, and been brought to see the fullness that is in Christ Jesus, the sinner's friend;" his own feelings overwhelmed him, and he hid his face in his handkerchief, sobbing and weeping floods of tears.

Mary, with a Christian's heart, seized his hand and exclaimed, "My brother!" but she could utter no more; and all Theodore could respond was, "My sister—my sister."

Their arrival at the Furnace, soon after, broke the tedium of the ride to Mrs. Eldridge and Mrs. Thorndike, and released them both from a most uncomfortable position, as both were fashionable women, and neither had ever given the subject of religion the slightest consideration, further than it is well enough for folks when they grow old, and without being able to see how upright young persons should give themselves any trouble about it.

"What an unaccountable thing," exclaimed Mrs. Thorndike, on entering the parlor, where most of the party were seated in advance of the arrival of the family carriage, containing the persons already named; "what an unaccountable thing," she reiterated; "I never witnessed such a proceeding. Can the young man be going mad, to take on so, in so simple a matter. Why, none but fanatics carry on that way. I like the good old way better—it saves a great deal of fuss and nonsense. I like the good old way, just to have our children christened when they are babies, and then be confirmed when they grow up; and I don't see any use of anything else; and particularly, making such a fuss, to attract attention and frighten the life out of one."

"And I don't see," added Mrs. Eldridge, who really loved her nephew, and regarded him as a perfect model young man on other matters, "why he needs *religion*—he has always been nothing but religion; he has always been better than all the church-going folks in the neighborhood, a thousand times over. I cannot invent what he has to repent of, or to dread. If his state is not safe, I shall quake for all others."

"Ah! my dear," remarked Mr. Eldridge, "your partiality for that excellent young man blinds you in so momentous a matter as the soul's eternal interest. In the sight of a just Judge, all have gone astray—there is none that doeth good—no, not one. To make a profession of religion is a work of vast magnitude—a matter in which we have to deal with offended Deity. Who can, possibly, contend with the Almighty, and what can man do to appease the inflexible justice of Heaven? When surrounded by a wild, crashing thunder gust, we feel like puny, worthless creatures; but what shall we feel when the Lord comes out in judgment—when we have to encounter the wrath of Him who rideth upon the whirlwinds, taking vengeance on his rebellious subjects. Theodore was right to turn in with the free overtures of mercy, while the Holy Spirit was striving with his soul, to win it to his Maker, God. Immeasurable is the grace of conviction and conversion, and he who resists the gracious workings of the Spirit, resists to his own destruction, and incurs a far more exceeding weight of condemnation. Theodore was right; and doubtless has entered upon this course with a true purpose to carry out his profession. The Lord bless him and sustain him."

No one attempted any further remark. Theodore, immediately on entering the house, went directly to his room, and remained alone the whole afternoon undisturbed; neither did Mary Worthington appear at dinner that day; her heart was too full of holy joy to have it dissipated by the frivolous discourse of the gay portion of the party. She remained in her room to pray that God would carry out the work he had so propitiously begun in the heart of the amiable young man, and make him a shining light in his kingdom.

The gay portion of the young folks, feeling considerably annoyed by this serious turn in Theodore, and fearing that it would throw a damper on their enjoyments for the remainder of the prolonged sojourn at this delightful Establishment, which was to continue a fortnight, and which had not half expired, determined to set about something to dissipate the sober turn things were assuming; and scarcely had they been seated at the tea table, and Theodore and Mary had taken their places, than Bob Henderson asked, in a most animated tone: "Well, ladies, what amusements have in store for to-morrow?"

Kate Kinlake, a gay, lively young lady, or rather romp, of good family and standing in society, but one of the wildest, most unstable creatures imaginable, ever ready for fun or frolic, and rattle at all times and under all circumstances, yet withal a kind-hearted girl, overflowing with good feeling and devoted purpose, into whatever channel she would throw the promptings of her happy spirit, seconded the proposition with much energy, and was the first to respond: "Any thing, from trout fishing to corn husking. Trout fishing to-morrow, and corn husking next day; for it is corn husking season, and I'll warrant the farmers are at it briskly, and will give a merry party a right hearty welcome." They all responded to the trout fishing; and the duty of having every thing arranged for an early start, devolved upon Theodore, not without design.

At the starting hour, they found that Theodore, who never shrunk from a duty assigned him, had the amplest provision of tackle, bait, and attendants to see to the hooks; while Mrs. Eldridge freighted a ponderous ox-cart with all manner of refreshments customary on such excursions.

Soon after the party set out, Bob Henderson and Harry Ridgley lagged behind in earnest conversation.

"What a cursed shame this is of Theodore, getting into this serious mood just in the midst of our pleasures," exclaimed Bob Henderson.

"Yes," replied Harry Ridgley, "it is a sad bore."

"I am afraid," resumed Bob, "it is going to interfere, altogether, with our amusements. It will depend entirely upon his humor whether we have any further sport while we remain."

"It was a sudden thing—was it not?" asked Harry.

"Yes," replied Bob, "no one dreamed of such an occurrence until after our trip to the hermit's cave, and he met that monk; but that we did not regard as a matter of any moment. That affair, yesterday, at Litiz, came like a thunderbolt. It was a devilish piece of nonsense; absolutely rude to the company, to yield to it now, even if he felt serious. He might have had better manners, and waited until the party had dispersed."

"Cannot we make him ashamed of it in some way?" inquired Harry.

"Or knock it out of him," added Bob. "I detest these whining, canting proselytes, who are forever hanging their heads and apprehending death. Enjoy life, I say, while we have it. Life is short; meet death when he comes. Give me any thing but your effeminate, dough-mouth religious young men. I say, such men have lived long enough; and the sooner they are taken to heaven the better."

"Do you really think he is in earnest, or only a momentary disturbance, which many a one has had for a short time as much as he has?" asked Harry.

"Yes," replied Bob, "if we do not knock it out of him."

"How?" inquired Harry—"ridicule it?"

"No," answered Bob, "we cannot attempt it. Respect for Mr. Eldridge precludes that. But I'll tell you how we may knock it out of him."

"How?" asked Harry.

"Theodore understands his position too well," added Bob, "being in his uncle's shoes to-day, not to make an effort to seem, at least, to be interested in entertaining his friends, whatever may be going on within his noddle. So let us put him on his *courtesy,* and each of us insist upon a glass of wine, time and again. Pass it around among the chums, and make a vigorous effort to do it up brown. We can floor him in an hour or two; and then farewell to his seriousness."

"That's an admirable idea," responded Harry. "Wine is the word. Mum."

They had scarcely reached the point at which they were to commence their angling, and which was to be their rendezvous, than Bob intimated the propriety, after a long walk in the damp morning air, to partake of some refreshment before they commenced their operations along the chilling mountain stream, to keep out the cold; in which he was seconded by many voices.

Theodore ordered the servants to make some lemonade.

"Lemonade!" exclaimed Bob, Harry, and a half dozen others. "Lemonade! on a fishing excursion! No, give us something more warming in such a chilly ravine as this."

"Then," retorted Theodore, "let the young gentlemen help themselves to what they may find, but make lemonade for the ladies."

"Lemonade for the ladies! faugh!" exclaimed Kate Kinlake; "I don't care a straw for lemonade without a stick in it. Give us punch—no chilling lemonade."

Before the lemonade was made, the young blades had the wine, cherry bounce and brandy out, incessantly claiming the courtesy of a glass with Theodore; which he, as often, politely declined; repeatedly asserting that his attentions were due to the ladies, and that he could not partake of any thing but what they, *generally,* partake of; throwing a particular emphasis on *generally.* They persisted in it as due to them, his uncle's guests, and Theodore as obstinately maintained that it was due to the position he filled on that occasion, not to enter upon any indulgence that might interfere with his duties, whatever might be his inclinations, of which he had not the slightest.

Foiled in their attempt, they went to the object of the day's excursion, considerably chagrined at their defeat, but determined upon it more than ever. So when they were gathered at the rendezvous for lunch, and were all seated round the rustic board, the abominable attempt was renewed to force Theodore into the exchange of *civilities* in a glass of wine. Failing in that game a second time, they drugged his lemonade. Detecting that shameless trick, he threw it aside without making any exposure before the ladies. They then commenced a sham forcing of each other to a tumbler of brandy under the "*forking operation,*" as a pretext of doing the same with Theodore; but they signally failed again; for while he kept his temper throughout all their proceedings, he determined to show that he would not submit to such an outrage, and in the very onset let them understand so. It was a moment of intense, painful interest, while they, in affected sportiveness, determined, equally, to carry it out, and as two or three seized Theodore and pushed him up against a tree, and two or three more brought up the fork, against all the remonstrances of the ladies—against all their entreaties and remonstrances—at the beck of Kate Kinlake, who had been exerting all the energy of a military chieftain to make them desist in their rude effort—the servants sprang forward and delivered him from so ungentlemanly, so disreputable an outrage.

Failing in all but disgracing themselves, they attempted to pass it off as a joke, and continued to laugh at it as a joke; which they saw sat very ungraciously, and wishing to be released from their awkward position, the two originators, Bob and Harry, jumped into the ox-cart, and drove off at a furious rate, bellowing and goading the poor oxen until they drove them, without being aware of any danger, over a stump on a heavy sidling, which overset the cart, and being thrown underneath, in the fall, Bob and Harry were both crushed to death, instantaneously.

* * * * * * * * * *

I need but add, in addition to this retribution, so suddenly executed on those rash young men, for their efforts to thwart the leadings of Providence, and the evident mockery of the Holy Spirit, that the party dispersed to their homes the next day. In proper time Theodore and Mary were united in wedlock; Theodore having consummated his vows to his Maker, by an open profession. They lived to a good old age, enjoying the smiles of a covenant-keeping God, in full tide of earthly prosperity and usefulness in society, and then were taken to the rest laid up for the faithful in the Lord. Blessed are the dead who die in the Lord.

"WHAT IS YOUR LIFE?"

The sacred writer, who propounds this question, gives a striking solution: "It is even a vapor, which appeareth for a little time, and then vanisheth away." Is this a truth? Yes, an undeniable truth. No one disputes it; yet all live as if it were a mere theory, and not a reality. The youth looks on the future with buoyant hope, and by imagination fixes on this and that enjoyment or improvement in life, which will afford happiness, or honor, or wealth, and thinks but little of death and eternity. The man of maturer years, with his hands full of business and worldly enterprises, is stretching every nerve to get rich, or become great, and is often so absorbed in his pursuits that one might suppose he never dreamed of another world than the present. The aged man, especially if he is blessed with a strong constitution, and a healthy old age, talks and acts, not as if he were on the confines of the spirit land, upon which he must shortly enter. What a strange infatuation has fastened itself upon the human mind! How blind is man to his real dignity as an immortal creature, and thoughtless as to his future destiny, and indeed to the divine design of his existence! If man was merely made for time, or the pursuits of this life, he would be no enigma; but considering him as only a short probationer here, and destined to live forever, it may seem amazing strange that the road to his home—his everlasting home—should engross all his thoughts and command all his energies. Does he not know, that he is onward to the grave? Is he not conscious of the fact, that the broad and rapid stream of time is hurrying him on to a vast eternity? Oh, yes; but he will defer the business preparatory for a future day. Serious things to-morrow, is his cry, and let eternity provide for itself. Alas! to-morrow comes not; the enemy is at the gate; death has pulled his bow-string, and the arrow is on its way to his victim, and in an unexpected moment the sinner, in all the agonies of self-reflection and despair, is hurried into the presence of his judge.

"What is your life?" A brief, evanescent thing; but fraught with eternal interests. The character is to be formed in it, which must determine our destiny—the principles to be acquired and cultivated, which will last forever. Every moment and every facility for improvement is of countless worth. Every moment lost, or privilege misimproved, is irrecoverable. If this short life is misspent, or any portion of it wasted, our Lord will bring us to a reckoning—we must give an account of our stewardship. Should the great object of life be missed, and every minor one engage all our thoughts, powers, and efforts, of what avail to our souls will be the heaps of shining dust, the numerous possessions, the honors poured upon us by mankind, or our intellectual attainments? Nothing.

Again, the solemn question, "What is your life?" presses itself upon our attention. What is it but a season for repentance—a portion of time allowed us to learn the great elementary principles which are to be developed in eternity—an opportunity to step into that divinely appointed life-boat which will land in safety on Canaan's blissful shore? However short life may be, if Christ is our confidence and portion, it matters not, and the true Christian can say, with one hand grasping the Cross, and the other the Divine promises—

Well, if our days must fly,
We'll keep their end in sight;
We'll spend them all in wisdom's way,
And let them speed their flight.

They'll waft us sooner o'er
This life's tempestuous sea;
Soon we shall reach the peaceful shore
Of blest eternity.

SUNDAY-KEEPING AT THE WEST.

The following extract from the correspondence of the *Central Christian Herald* shows that the Roman Catholics of this country, as well as those of Europe, regard the Sunday as a mere festival, not at all entitled to be kept with the strictness of the Bible Sabbath. What a pity that these Protestant reformers, who no doubt feel a real zeal for the sabbatic institution, should stand directly in their own light by trying to make a Sabbath out of a popish festival day. The state of things which they regard as so sad will certainly grow worse and worse while they continue to occupy this strange and inconsistent position. The correspondent in question says:—

"It is an occurrence by no means uncommon, as I am informed, in this city, [St. Louis] especially upon the grounds adjoining their churches, to see upon the Sabbath both the clergy and laity engaged at the sports of the season—bat and ball, marbles and the like. With a friend I visited one of these churches on Sunday afternoon. We entered the inclosure—a church in the centre of the city—and to our dismay witnessed the priests and a large number of youths thus engaged, disturbing the neighbors by their boisterous confusion and noise. I recollected how Cataline sought to corrupt the youth of Rome, and I could not but exclaim, These are the Catalines of America—the disturbers of our peace, the corrupters of our youth, the plotters of the ruin of the Republic!

"The effect of this anti-Sabbath policy upon the masses is exhibited, as indeed it is in all our cities, in the extensive patronage bestowed upon the numerous pleasure gardens with which the city is environed, and which, immediately after vespers, are thronged by them, and where drunkenness and revelry, to a greater or less extent, one very Sabbath, abound.

"O, can the eye of the American patriot not see in all this an augury of danger to our national character and permanency? And shall we sleep over this subject? What is true of St. Louis is equally so of Cincinnati and most of our cities; and our youth, aye, our people, are being contaminated by it. We must awake. State Sabbath Conventions, County Sabbath conventions, City Sabbath conventions, Presbyterian, Methodist, Episcopalian, and Baptist Sabbath conventions, should be held all over our land, and means, decisive and prompt, be resorted to, that, under God, our Sabbath and nation be preserved."

BRITISH CORRESPONDENCE.

GLASGOW, November 24th, 1854.

We are called to "love the truth and peace;" and although the love of truth has thus the precedence, we could sacrifice much of our ease and convenience and pleasure for the sake of peace. The feeling which guides our individual action, we could wish to see carried into the affairs of nations; and we long for the time when the sword shall be beat into the ploughshare. Neither our feeling nor our desire should, however, blind us to the truth revealed in God's Word, that before the blessed day in which Jesus shall visibly reign as the Prince of Peace, dark and dismal days intervene. In the present conflict between our own country with France and Russia, we fear there is the commencement of a series of troubles such as the world never before beheld. It is, however, only as relating to the question of the Sabbath that we are at present disposed to allude to it. In the account of the war in the Crimea, it is this week stated, by an eye witness of the battle of Inkermann, on *Sunday*, the 5th instant, "The Russians opened a very heavy cannonade on us this morning—they have *always done so on Sundays*." Now, the Russians profess to be Christians. They are warring at this time, they say, for Christianity and its Holy Places. They are counted as Christians when the Scripture testimony is to be set aside by an appeal to universal observance of Sunday, and they are numerically of much importance in that argument. Here, then, is part of their observance of Sunday; it is *especially* a day for the attack of their enemies by fire and sword.

This same war brings out other forms of that universal observance of Sunday, to which we are called to surrender the unmistakable evidence of God's word. At home, Cabinet Councils have been repeatedly held for the consideration of preparations for the war. At the special invitation even of the Queen, the French Imperial Guards, who had come to London to the Crystal Palace, attended at Windsor Castle, when their Band took the place of one of the Regimental Bands in playing airs—the Queen and Royal Family, and many of the nobility, being present for two or three hours—and according to the *Morning Herald*, they enjoyed a "treat of most gratifying character." A special train had brought them along the South Western Railway from London—and all this *on Sunday*, Oct. 29th. During the preceding autumn and summer months, the bands of the regiments in garrison had in like manner played for the gratification of Her Majesty and others in the gardens of the East Terrace, every Sunday afternoon. Such things take place more frequently, and with less censure, than formerly. We do not now even read of Railway Companies paying over to charitable institutions their Sunday gains—as the Liverpool and Manchester Directors did of £300 some seventeen years ago. We see from a letter in the London Record newspaper of Sept. 12th, that in England there are places where *wakes* are kept on Sunday, at which articles are openly sold.

In Scotland, year by year, it is quite evident that Sunday, theoretically and practically, is less and less regarded. On the Clyde, the Emperor steamer continued pleasure trips on Sunday all the past season, as it had done the season before—being generally well filled, and sometimes having immense crowds of passengers, notwithstanding of the efforts made by the different church courts for its suppression. Another steamer sailed in autumn twice on Sundays from Leith to Aberdour. In the post office, 29 substitutes for rural letter carriers in Scotland have been provided on alternate Sundays, during the last two years, for the purpose of enabling the regular letter carriers to attend at church. But the *Northern Warder* stated in September, that the Directors of the Scottish Central Railway were occasioning a change of the men working the Ferries on the river Tay, where they had refused to work on Sundays, having the fifth Sunday to themselves, although the *Warder* thinks some of these Directors are members of the Sunday Alliance. At the Evangelical Alliance in London, last month, it was stated, by their Traveling Secretary, that the Council had determined to offer a prize of £100 for the best Essay on Sunday Observance. Several of the speakers at the meeting expressed their apprehension that the Crystal Palace will be opened on that day, and their determination to do the utmost in their power to prevent it. Captain Young said that every thing relating to Sunday Observance hinged upon that, adding, "If that object were once gained, they might give up the struggle"—for the opening of Museums, and other places of public amusement, would necessarily follow.

The Alliance passed a resolution "expressing approval of the efforts which have been made by English Christians to benefit the Jews in Palestine." As it was merely an expression of approval, there seems little reason for their limitation of it to the efforts of English Christians, when others are cöoperating in the same good cause. A paragraph has appeared in our papers, however, of 300 German families in Wurtemburg—Gentile Christians, as we understand it—having besought their Government to use their influence with the Turkish Sultan to grant them land to settle in Palestine. They are in this actuated by their religious views, it is stated; but whether they purpose to aid and encourage the Jews to cultivate their land, was not explained. It is, however, another evidence of God's beginning to "remember the land," as He has promised. J. A. BEGG.

THE SECOND COMING OF CHRIST—NO. 3.

BY B. CLARK.

"Unto them that look for him shall he appear the second time, without sin unto salvation."

"Blessed and holy is he that hath part in the first resurrection; on such the second death hath no power, but they shall be priests of God and of Christ, and shall reign with him a thousand years." Rev. 20: 6.

In an article in the *Recorder* of Oct. 19th, under the head of "*Prophecy, No. 1*," we find for some of the "landmarks of divine truth," that "the second advent, the general resurrection of both righteous and wicked, the burning of this present earth, and the final judgment, will *all* take place at one and the same time." But we ask leave to differ from this view of the subject, at least one thousand years. One of his scriptures quoted to show that (what he calls) "the general resurrection of both righteous and wicked," will take place at one and the same time, is John 5: 28, 29—"The hour is coming in the which all that are in their graves," &c. This scripture could not mean that all, both just and unjust, both righteous and wicked, would rise at *one time*—in one given "hour" of sixty minutes; because "*many* bodies of *saints* which slept, arose and came out of the graves" after Christ's resurrection, and went into the holy city and appeared unto many; so that those had their "hour" to rise soon after the words were spoken. Now, if there had been many bodies of the wicked also risen at the same time, then there might have been some reason to believe (from such an example,) that both the *righteous* and the *wicked* would rise at one time. This resurrection of some of the *saints* at that time, is a prelude—a practical illustration—a surety to us, that there will be a "*first resurrection*" of the *saints only*—that "the *dead in Christ* shall *rise first*." 1 Thes. 4: 16.

There is, therefore, to be a first resurrection of all the saints which sleep in Christ when he comes. "For if we believe that Jesus died and rose again, even so *them that sleep in Jesus* will God bring *with Him*. (1 Thes. 4: 14.) We do not read that all, both just and unjust, will be raised when Christ comes. "But every man in his own order; Christ the first fruits; afterward, *they that are Christ's at his coming*." (1 Cor. 15: 23.) This is called "the resurrection of the just." (Luke 14: 17.) "They which shall be accounted worthy to obtain that world, and the resurrection from the dead, neither marry, nor are given in marriage; neither can they die any more," [the second death can have no power on them,] "for they are equal unto the angels, and are the children of God, being the children of the resurrection;" alluding, doubtless, to the first resurrection. Luke 20: 35.

The saints will rise and reign with Christ *on the earth* one thousand years before the rest of the dead will rise. See Rev. 5: 10. "And hast made us unto our God kings and priests; and we shall reign *on the earth*." "And they lived and reigned with Christ a thousand years. But the rest of the dead lived not again until the thousand years were finished. This is the first resurrection." Rev. 20: 5, 6.

This thousand years' reign of Christ, "with all his saints"—the dead saints *raised*, and the living saints *changed* at his coming, (1 Thes. 4: 14, 17)—must be *after* his second personal coming; because, the present reign of wickedness will continue "*until*" his coming. (Dan. 7: 21, 22; 2 Thes. 2: 8.) The Jews will then be restored to their land, and under the government of Christ on "the throne of his father David." (Luke 1: 32.) As he said to his apostles, "I appoint unto you a kingdom, as my Father hath appointed unto me; that ye may eat and drink with me at my table in my kingdom, and sit on thrones, judging *the twelve tribes of Israel*." (Luke 22: 29. And as the seventh day is the Sabbath of the Lord; and as "one day with the Lord is as a thousand years, and a thousand years as one day;" so this seventh thousand year, we believe, will be a rest—a happy day for the people of God.

The glorious body of the saints at the first resurrection—"it is raised in glory." "When Christ, who is our life, shall appear, then shall ye also appear with him in glory." "For our conversation is in heaven; from whence also *we look for the Saviour*, the Lord Jesus Christ, who shall change our vile body, that it may be fashioned *like unto his glorious body*." Phil. 3: 21. "We shall bear the image of the heavenly." "Beloved, now are we the sons of God, and it doth not yet appear what we shall be; but we know, that when he shall appear we shall be like him, for we shall see him as he is." David said, "I shall be satisfied when I awake with thy likeness." What more can the dying saint ask, than to be assured that he shall awake with the likeness of Christ in his glory? We have a kind of prelude to this exceeding glory—a practical illustration—at the holy mount, where Christ was transfigured before Peter, James, and John. "And his face did shine as the sun, and his raiment was white as the light." Mat. 17: 2. "And behold, there talked with him two men, which were Moses and Elias, *who appeared in glory*, and spake of his decease which he should accomplish at Jerusalem." Luke 9: 30. This was an example, or a "coming in his kingdom." Matt. 16: 28. And as he then appeared with two of his *glorified saints*, we have a surety of "the coming of our Lord Jesus Christ with *all his saints*." Then shall the righteous shine forth as the sun in the kingdom of their Father. Who hath ears to hear, let him hear." They shall "appear with Christ in glory," as did Moses and Elias when they talked with him on the mount. Blessed and holy is he that hath part in the first resurrection.

The translation or change of the living saints at the coming of our Lord: "For this we say unto you by the word of the Lord, that we which are alive and remain unto the coming of the Lord shall not prevent them which are asleep. For the Lord himself shall descend from heaven, with a shout, with the voice of the arch-angel, and with the trump of God; and the dead in Christ shall rise first; *then* [at the same time] we which are alive and remain shall be caught up *together with them* [the raised saints] in the clouds, to meet the Lord in the air; and so shall we ever be with the Lord." 1 Thess. 4: 15. "Behold, I shew you a mystery; we shall not all sleep, [that is, all the saints,] but we shall all be changed, in a moment, in the twinkling of an eye, at the last trump; for the trumpet shall sound, and the dead shall be raised incorruptible, and we [that is, the living saints—those that walk with God, as did Enoch] shall be *changed*." 1 Cor. 15: 51, 52. "And he shall send his angels with a great sound of a trumpet, and they shall gather together *his elect* from the four winds, from one end of heaven to the other." Matt. 24: 31. This will be a glorious meeting, all the elect—all the saints—all that love his appearing in his great power and glory, whether we who love him are *alive* and remain unto his coming, or whether we have fallen asleep in Christ, "we shall live together with him." 1 Thess. 5: 10.

One taken and another left. "Then shall two be in the field; the one shall be taken, and the other left. Two women shall be grinding at the mill; tae one shall be taken and the other left. Watch, therefore, for ye know not what hour your Lord doth come." Mat. 24: 40. See also Luke 17: 34, &c. Thus we are informed that as Enoch "was not, for God took him," (Gen. 5: 24,) so also at the coming of Christ, though two men or two women shall be together, about their common business, either in the day time or in the night, yet *one of them shall be taken, and the other left*. "By faith Enoch was translated, that he should not see death; and was not found, because God had translated him; for before his translation he had this testimony, that he pleased God." Heb. 11: 5.

Let us, dear reader, watch and pray, and try to *please God*, that whether we wake or sleep when Christ comes, we may live together with him; to whom be praise, might, and dominion, now and forever.

LETTERS FROM PALESTINE—NO. 7.

JAFFA, Nov. 8, 1854.

By a private letter from Beirut, I hear that the Ottoman and his allies are victorious at Sevastopol, so far at least as to have surrounded and taken all the strong outposts of the city, and given the latter twenty-four hours to capitulate. If they do not surrender, the city is then to be stormed. We expect the next steamer will bring us news of dreadful work on the persons of combatting hosts, and also upon those of defenseless women and children. Except the foregoing, we have nothing of importance to communicate of public affairs; all being quiet and peaceable in the country around us.

Doct. Smith, of Port-au-Prince, who was mentioned in my last as on a short tour in Palestine, returned from Jerusalem on Sabbath, the 14th ult., and took lodgings with us. He attended our meeting, and called upon the American families, expecting to leave that evening. The steamer arrived the following day, when he took leave of us for Constantinople and Paris, on his way to his island home far over the sea. By the same vessel in which he took passage, arrived the Rev. Mr. Percival. He called upon us at one P. M., dined, and then was shown the way to the homes of the rest of the colony. At five the same afternoon he set off for Jerusalem. He is a missionary of the English Church, 26 or 28 years in Madras; has been to England to visit his family, whither he had sent them for their education some years previous; has one son born in India; sent him to England when only two years old, and at the age of nineteen or twenty, was returned to him *a preacher of the gospel*. Said he, "I could only trace in him some of the lineaments of his father, but he is now more than a son." After four years, he expects his family to join him in Madras. I admired the economy of this missionary in traveling, which is that he has invariably taken a third class passage, by which the money or price for a first class through ticket is sufficient to enable him to travel in Egypt, Italy, France, Greece, and Palestine. The price of a first class passage from London to Madras is £115. Although his circuitous route will take longer, and subject him to many tedious, nameless, and almost intolerable inconveniences, yet he finds pleasure in so doing, and more especially as he intends publishing his Notes of Travel in the Tamul language, and thereby giving forty thousand native Christians in the East an idea of Christians and the Bible land of the West.

Our first rain commenced falling on the 29th ult., and continued at intervals for two days. On Sabbath, the 4th inst., we had a second rain. The gardeners ceased irrigating a week ago, the water of heaven having been given in great abundance. The weather is delightfully cool; some of the time we feel the need of a stove, and try to supply its place by a small-mud furnace, our only means at present of warming our rooms. The thermometer during October stood at 63 at sunrise, 80 at noon, and 74 at sunset. Among other items of interest, and more than ordinary interest, in our little circle, is a *wedding*, which came off a week ago last Sabbath, in the presence of our little congregation, eighteen in all. We now number five families. May this incident, united with many others, serve to influence some of our good brethren to bring their families and substance here, for the sake of the good of the land and the cause of Christ. Those already here are anxious to purchase land, but have deferred doing so, in the hope that some of our brethren would join us, that we might all settle near each other, if not purchase a tract together. Who of the readers of the *Recorder*, and of our brethren, will take the responsibility of coming to our aid in this work? Let some of our able farmers be among the first to come, as they are the most needed at present. We want Christian families, and a united Christian influence, to turn the erring multitude into the way of the Lord. Dear brethren, will not some of you inquire of the Lord if you have not a duty, a personal duty, to Palestine? I remember that many of you have expressed yourselves as deeply interested in the planting of a colony in this interesting land. Is the love of Christ not strong enough to constrain you to make the sacrifice? Be induced to join us soon. My prayer is that some of you may.

Your brother in Christ, WM. M. JONES.

"DIED FOR THE WANT OF LIFE."

I observed an article in the *Recorder* of the 7th inst., bearing this very *graphic* title, which conveys false intelligence, and is apparently characterized by a spirit of unkindness which demands a little gentle reproof.

Truth, in its simplicity, is a distinguishing characteristic of all good men, and is ever cherished in the hearts of all who love it; while hatred or malignity has no abiding place in the bosom of the just. I am sorry to believe that the author of the article referred to has so far wandered from the principle of right as to allow an evil passion to enter his heart and induce him to publish, voluntarily, a statement so plainly marked with that want of kindness which should enliven the breast of every philanthropist and Christian.

It is a beautiful trait in the character of any one, to do good to his fellow men, and the field is broad before him, inviting *all* his energies to that great and noble work. But alas! how the heart is pained when we behold those great and good men, on whom we lean for instruction in the paths of virtue and peace, stepping aside, and lending themselves the willing instruments to stir up discord in the minds of those who surround them—begetting in such minds feelings of disrespect or animosity, losing thereby their influence, and rendering themselves feeble and ineffective laborers in the great field of reform which lies before them.

These ideas are suggested by reading the article referred to. Had it contained nothing but truth in its simplicity, it would be hard even then to discover the necessity for its publication, creating as it would unnecessary ill feelings, without the hope of effecting any good. But since it conveys false impressions—promulgates statements having their foundation elsewhere than in truth, calling at the same time upon the people, in the language of holy writ, to hearken unto its "*voice*," it appears to me that the mind of the author needs an *alterative* to correct its tone, and give it a more healthy action. X.

DERUYTER, Dec. 13, 1854.

To the Editors of the Sabbath Recorder:—

I notice by a paragraph in your paper of the 7th inst., that your correspondent "*Vox*" regards the dissolution of the Odd Fellows Lodges in this place of sufficient importance to herald the fact, exultingly, of "their happy exit;" they having, as he wisely informs the public, "died for the want of life." Unquestionably, "Vox" rejoices at the event. Their offices of kindness, benevolence and charity, were a standing rebuke to him and the old-fogy religionists whose piety consists in lip service rather than the every day, practical business of doing good to humanity for humanity's sake. Such men cannot, of course, afford to divide the honor awarded to benevolence, or share the meed due to the charitable, in common with the world's people, because forsooth they do not chance to think in their way, or worship after their forms and ceremonies. The Odd Fellows assisted their own poor, and defrayed the expenses incurred by the sickness or death of their brethren or of a brother's wife. Can "Vox" say the same of his society? If he can, I think it must be because they practice a different rule from the one they observed when the Odd Fellows assisted by benevolent donations in cash some of the poor persons of "Vox's" own church in DERUYTER.

☞ The Annual Reports of the Seventh-day Baptist Missionary and Tract Societies are published. Parcels have been put up for each church in the denomination, which will be forwarded by the first opportunity. Meanwhile those who can send to this office for them, are requested to do so.

DEATH OF DR. FAHNESTOCK.—The sad duty devolves upon us of announcing the death of Dr. Wm. M. Fahnestock, of Bordentown, N. J., which occurred on the morning of Sixth-day last, at the Pennsylvania Hospital, Philadelphia, whither he had been taken on the previous Second-day, in consequence of injuries received in falling down a flight of stairs in Second-st. The particulars, farther, we have not been able to learn.

Little thought we, in our pleasant interview with him some three weeks ago, that it was the last of the kind we should ever enjoy. True, in the course of that interview, alluding to articles for the press which he had in contemplation, he remarked that he felt urged to diligence by an impression that his time was short. But who, in view of his activity and vivacity then, could have believed it *so* short? Truly, in the midst of life we are in death. The communication on our first page to-day—of which a proof sheet was sent to Dr. Fahnestock before learning of the accident which had befallen him—is probably the last from his pen.

METHODIST MISSIONS.—The *Western Christian Advocate* furnishes the following encouraging statistics of Methodist Missions:—

From the most authentic statistics, dating about two years back, we learn that the total strength of the evangelical missionary enterprises, throughout the world, in foreign lands, comprises 2,945 missionaries; 11,807 assistants; 333,604 church members; 31 native institutions; and 40 printing establishments. The expenses of all these amount to $3,202,419.

The various departments of Methodism support 900 ordained ministers in the foreign field. These are assisted by 8,226 local preachers, catechists, interpreters, school teachers, &c. Under the pastoral care of the Methodist churches, are 165,972 church members, and 101,742 scholars in schools. On these foreign fields are seven institutions for training a native ministry, and eleven printing establishments. The amount necessary to support these agencies last year, was $684,453.

About one-third of all the missionaries of evangelical Christendom belong to the various Methodist churches. They have about one-half of the church members and scholars, and one-fourth of the printing establishments and native institutions. Yet this one-third of the missionaries has been sustained on about one-fifth of the whole income. Thus the money contributed by the Methodists accomplishes more in evangelizing the world, than the same amount contributed by most others.

RELIGIOUS INTOLERANCE IN GERMANY.—In Germany, for a few years past, persons have frequently been subjected to fines and imprisonment for worshiping God according to the dictates of their own consciences. The British Evangelical Alliance has done what it could to put an end to such things, but to little purpose, as would appear from the report made by Dr. Steane, at a recent meeting in London. It seems that in 1851, he with other delegates from the Alliance, attended the meeting of the Kirchentag, at Elberfeld, and advocated the cause of religious liberty. But no cordial response was made by the German divines, who listened with respectful attention. In 1853, another deputation, headed by Merle D'Aubigne, and composed of French, German and Swiss, as well as English delegates, appeared before the Kirchentag, for the same purpose, and requested a distinct answer to the question, "Will you not discountenance the intolerance prevalent in Germany by the whole weight of your moral influence." But the grave assembly evaded a direct answer by a profession of love for all genuine Christians. The delegation appointed for 1854 were providentially hindered from being present at the meeting of the Kirchentag, but forwarded a pamphlet prepared by Dr. Steane, *with* a full narration of the facts relating to the persecutions in the Germanic States, and sent also a letter imploring the Kirchentag to exert their moral influence to put an end to persecution. But the German divines found it easier to overlook the document than to answer it, and it would seem from the reports of their meeting, that the memorial was not even submitted for consideration.

THE SPORTING CLERGY.—In "the supplement to the *Bury and Norwich Post*," bearing date Sept. 27, 1854, are published "The Game Lists for the County of Suffolk," England. In this first batch of Suffolk sportsmen there appear no less than *forty-seven clergymen!* At the head of every twelve or fourteen squires or yeomen, stands a pastor or evangelist—one to whom is entrusted by God and the Church the care of immortal souls—"who is to watch for them as one who must give an account"—who, by his ordination vow, is bound "to give himself wholly to the work," "to make full proof of his ministry," "to give himself to prayer and the ministry of the Word." And he conceives that he is carrying out his solemn vow and redeeming his pledge by taking out a license as a sportsman, exchanging his study for the cover of pheasants and the turnip and stubble-field, and leaving his sick and dying poor, and the half-taught children in his schools, while he amuses himself like a country gentleman!

RELIGIOUS LIBERTY IN FRANCE.—The Washington Globe states that two spirited letters have been addressed to Louis Napoleon by English Christians, requesting that religious liberty might be granted to his Protestant subjects. Queen Victoria has also addressed him an autograph letter on the same subject. In one of their letters, the English Christians quote the memorable words of Napoleon Bonaparte, addressed to Protestants at his coronation. After stating that it was his firm purpose to maintain freedom of religious creeds, he adds: "If any of my race, hereafter to succeed me, should disregard the oath which I have taken, and which, misled by the inspiration of a perverted conscience, he should come to violate, I devote him to public animadversion, and I authorize you to give him the name of Nero."

An interesting Slavery item is contained in the Detroit *Advertiser*, detailing the escape of fourteen chattels by the Underground Railroad; and stating that since the 6th of May last, 1,482 fugitives have crossed the river at that point for the soil of Canada.

General Intelligence.

Abstract of Proceedings in Congress.

SECOND-DAY, DEC. 11.

In the **SENATE**, Mr. Adams introduced a bill to establish a uniform rule of naturalization throughout the United States. The bill extends the term of naturalization to 21 years, and acts, prospectively, upon those foreigners only who may enter the United States after the passage of the act. The bill was referred to the Judiciary Committee. The correspondence concerning the arrest of the French Consul at San Francisco was called for. Notice was given of bills to improve Illinois River and Chicago and Waukegan Harbors; also to abolish the franking privilege. The Ocean Mail-Steamer appropriation bill of last session was taken up; but, after some discussion, it was laid on the table. This bill was passed by the House with a clause requiring the Postmaster-General to give notice of discontinuing the contract. This clause the Senate struck out, an effort to agree failed, and so the bill went over, coming up now as unfinished business.

In the **HOUSE**, Mr. Clingman asked leave to offer a resolution requesting the President to tender the mediation of the United States to settle the Russian war, but the House would not suspend the rules. A resolution to send a steamer and transport vessel to the relief of Dr. Kane met with the same refusal. Three days of next week were set apart for business relating to the District of Columbia. Appropriations for the Army and the Military were reported from the Ways and Means Committee. The Pacific Railroad bill was put over to the second Tuesday in January, waiting for reports from the surveyors. A bill to improve the discipline of the Navy was referred. The President's Message was then taken up, and Mr. Giddings made a pungent speech on the remarkable fact that this is the first Annual Message in twenty-five years that says nothing of Slavery, finding reasons therefor in the overwhelming condemnation administered by the people in the late elections. Mr. Wheeler moved a Committee to look into the President's Graytown war, which the speaker thought was a violation of the Constitution on the part of the President. The motion was voted down. The Message was then distributed to the appropriate Committees, and the House adjourned.

THIRD-DAY, DEC. 12.

The **SENATE** made the reorganization of the Judiciary the special order for the 2d day of January. The joint resolution for the election of Chaplains was taken up, when, after a short debate, the Rev. Mr. Slicer, the present Chaplain, was reëlected.

In the **HOUSE**, a bill for the better protection of life and property on the Long-Island and New Jersey Coasts was reported, and, after a debate, was adopted by the application of the previous question. It provides for more stations, more men, and better arrangements for life-saving along both Coasts. The next subject was a proposition to repeal the duty on Foreign Coal, in favor of which Mr. Walbridge of New York City made a speech. The House passed the Pension bill, and adjourned.

FOURTH-DAY, DEC. 13.

In the **SENATE**, a proposition to entertain at the public expense the Convention of Soldiers of 1812, to meet during the winter at Washington, was referred. Mr. Badger's bill increasing the salaries of Judges of the Supreme Court, and raising the pay of Members of Congress from $8 to $12 per day, was introduced, and for the present laid on the table. A bill was introduced and referred to the Finance Committee, granting railroad companies three years time in which to pay duties on iron imported for railroad purposes.

In the **HOUSE**, the Judiciary Committee were instructed to inquire into the expediency of repealing the Usury Laws. The Public Lands Committee reported in favor of extending the California Land Commission. The House voted to print 15,000 copies of the Abstract of the Census for the use of the members. The House then went into Committee on the Indian Appropriation bill, when Mr. Mace rose to offer a bill restoring the Missouri Compromise line, and of course prohibiting slavery in Nebraska and Kansas. Mr. Mace supported his plan in a brief speech, saying that he meant the measure to bring the country back to the quiet produced by the act of 1820. His bill is an exact copy of the eighth section of that act. Remarks on the subject were made by several members of the House.

FIFTH-DAY, DEC. 14.

In the **SENATE**, bills were reported to increase the compensation of Land Registers and Receivers under the Graduation Act, and to establish a Military Hospital at Galena. The House resolution modifying the plan of the New Orleans Custom-House was adopted. Adjourned over to Monday.

In the **HOUSE**, memorials asking that an expedition be sent to the relief of Dr. Kane, were presented. A joint resolution was offered, authorizing the President to take measures to secure the building of a lighthouse on Cape Race. The Indian Appropriation bill was then taken up in Committee, and Mr. Stephens, of Ga., and several others, made political speeches.

SIXTH-DAY, DEC. 16.

The **SENATE** was not in session.

In the **HOUSE**, the Civil and Diplomatic Appropriation bill was reported, and referred to the Committee of the Whole. A bill for the improvement of Michigan City Harbor was referred to the Commerce Committee. The House then took up private bills, one of which was for the relief of the children and heirs of Baron DeKalb, for whom $66,000 were voted. Memorials for the passage of the Homestead bill were presented, and then the House adjourned to Second-day.

A letter in the New York *Commercial* states that "the great drift of Arctic ice of the floe of 1853–4 has ceased, but Dr. Kane has not arrived, and fears are entertained for his ultimate safety." The writer, (Mr. E. Meriam,) calls upon the public for an application to Congress that a steamer may be sent in aid of the gallant men who constitute the expedition. In accordance with the above, the N. Y. Chamber of Commerce unanimously decided on the 7th inst. to make the necessary application to Congress on this subject.

European News.

The steamer Pacific with European news to Nov. 29, arrived at New York, on the 13th inst.

Since the terrible battle fought at Inkermann on Sunday, the 5th of November, in which the allies lost nearly 4,000 men, and the Russians nearly 10,000, neither party has been in a condition to renew active hostilities. On that occasion both sides claimed the victory. The Russians were the attacking force; the battle raged from dawn till afternoon, when they retired to Sympheropol, from which they came—the allies being unable to pursue.

The urgent necessity of reënforcements to the allies, to preserve the very existence of their army, has called forth an unwonted degree of activity in England and France, and, ere this, reënforcements to the extent of 30,000 additional men, must be in position before Sevastopol. This will enable the besiegers to resume their attack. Reënforcements are, in like manner, augmenting the Russian strength, and it is evident another great battle, or series of battles, must be fought, before the fate of Sevastopol be decided.

The Diplomatists of Russia, Austria, Prussia, and the lesser Germanic States, are particularly active. England and France have, however, taken a higher tone than they have hitherto assumed, and have notified the German Governments that the western powers no longer recognize the four points as a basis of negotiations; also, that they intend to hold the Crimea, and will, in their own time, dictate terms of peace.

From the details of the battle of Nov. 5th, it appears to have been the most bloody yet fought in this war. One letter from the scene says:—"Toward evening I walked over the battle field; but I can never describe to your readers what it was like. Its horrors beggar all description—12,000 dead and wounded English, French, and Russians, lay upon the hights, and the groans and screams of agony were rising up from all parts. Alma was a mere skirmish to it. What made the scene worse, was, that the Russians from the ships in the harbor and the fortifications to the north were throwing a perfect storm of shell all over the field, killing their own and our wounded.

Another letter says:—

Now that we are able to think over the battle of Inkermann, we find our losses to be really alarming. Generals Torrens, Cathcart, Goldie, and Strangways were killed. Yesterday afternoon, near the camp, Lord Raglan and most of the chief English and French officers attended the funerals. Strangways was killed by a piece of a shell, which struck and burst in Col. Poulet Somerset's horse, close by Lord Raglan. The Guards have lost upward of 500 men killed and wounded, and 28 officers. The Coldstream Guards had eight officers killed. The 30th, 41st, 47th, 49th, and 55th are terribly cut up. The returns to-day give 38 officers killed and 95 wounded. Our total loss is 2,360. Upward of 8,000 Russians, dead and wounded, remain on the field of battle. Of these more than 5,000 are dead. Our Minie bullets have mangled the Russians in the same awful manner as at Alma. Nearly all our dead were killed by shot and shell. Some of them were so mangled as barely to be recognizable for human remains. It is awful to stand on one of the hights and look over the field. The ground is hidden by the corpses. Round the little battery which was taken and retaken so often, are 2,500 dead Russians. For about 50 yards around the outside of the battery the corpses literary lie two and three deep. Many of the wounded were afterward killed by the shells which the Russians threw from the forts to the north of the harbor.

A terrible storm occurred, on the night of the 14th, on the Ægean and Black Seas. At Constantinople, the minarets of the mosque of the Sultan Achmet were blown down. At the mouth of the river Katcha, twelve transport-ships, belonging to the Allies, were wrecked, and the crews fell into the hands of the Russians. Two steamers and a screw-frigate were driven ashore, but got off. The weather continued very stormy until the 19th, and, if we are to believe Russian accounts, the Allies had lost no fewer than twenty-five transports and ships-of-war. Advices now to hand confirm the fact that, in the previous storm of Oct. 29, the Egyptian three-decker Muptahi Djehat went down, with the Admiral Hassan Pasha and 700 men.

A dispatch dated Constantinople, Nov. 20th, says:—Thirty-two English transports were lost in the hurricane on the 14th inst. The Prince and Sea Nymph foundered with all on board. Three mail steamers have been stranded. The Sanspareil was driven ashore, on fire from her machinery.

It is stated by the Frankfort *Post Zeitung* that the Earl of Westmoreland and Baron de Bourqueney, in the name of England and France, have informed the Austrian Government that, whatever negotiations may be proceeded with, the operations against Sevastopol will not be suspended. Further, that the allies have resolved permanently to occupy the Crimea. From that Peninsula their forces would operate against Georgia, while the Turks, supported by the allied ships, would attack Anapa and carry on the war elsewhere in Asia.

The Slaveholders Caught.

It seems, according to the Columbia correspondence of the Charleston *Standard*, that "an amiable gentleman, of the name of Reuben Smalle, who had the good or ill fortune to be born in Massachusetts, had been in the habit, for several years prior to 1851, of coming in the winter season, to the seaboard of the State to cut live-oak, and, by the winter of 1851, he had so conducted himself as to have inspired certain citizens of Beaufort District with some distrust of his influence over the slave population in the neighborhood of his operations." What act or acts, if any, excited these suspicions, are not related. Mr. Smalle, accordingly, moved his operations to the neighborhood of Ashepoo Ferry, in Colleton District. The citizens there determined to prevent him, and when he presented himself at Tar Bluff, to cut timber off the lands of Mrs. Elizabeth Pinckney—with whom he had made a contract to that effect—they ordered him away; but he returned, and began to cut. They then arrested him under a charge of larceny—"a rope having been found in his possession which belonged to a gentleman in the neighborhood;" —and sent him to Walterboro' Jail. Under a writ of *habeas corpus* he was liberated, and, being discharged, commenced suits against the parties. These proceeded again on the charge of larceny, under which he was convicted, and sentenced to receive five lashes. A pardon was offered him if he would pay the costs, (it would seem that his persecutors believed the accusation of larceny false,) and the prosecutors tendered him the money, which he would not receive, but took the whipping. This completed, he commenced suit in the Federal Court against "C. B. Farmer, J. A. Warren, Paul Fripp, M. Godfrey, and R. Reynolds, men of character and standing"—the prosecutors, as related. Mr. Pettigrue plead the cause of the poor wood-chopper, with such effect, that the Jury brought in a verdict of $2,500

Narrow Escape of the Steamer Washington.

The following account of the collision between the steamer Washington and an unknown brig in the English Channel, is from a private letter furnished to the N. Y. *Tribune*.

BREMEN, Friday, Nov. 24, 1854

"When you, on Sunday, 19th Nov., about 2 o'clock, were sitting quietly together, you did not suspect that at the same moment the steamer Washington was involved in the same dangerous position by which, a few weeks ago, the Arctic and its passengers were destroyed. We were cosily sipping our tea when the vessel received a powerful shock. Notwithstanding that three lanterns were lighted on the Washington, and that there was a special watch on the forecastle, a brig under full sail had run against us, boring with its bowsprit a hole as large as a man in our left side, leaving therein the broken splinters of her bow. Striking us again, her broken timber bored, in another portion of the forepart of the steamer, a second hole, with such a force that the whole bowsprit of the brig remained in our vessel. Happily, this damage in the steamer was six feet above the water. You can easily imagine what an excitement seized upon everybody. But the officers did not lose their presence of mind; and the first thing ordered was to post a watch near the boats, armed with loaded pistols, to shoot any one who should try to seize upon them without an order from the Captain. In the interior of the vessel the Chief Engineer directed the necessary repairs, and by his orders the holes were stopped with mattrasses, outside. The captain himself, suspended on ropes above the water, worked for four hours, until the work was done. It was the first passage of the Washington under the command of Capt. Cavendy, and the passengers have every reason to be satisfied with his behavior. We could not ascertain what became of the brig, as she instantly disappeared in the darkness. This accident took place in the Channel, between Dover and Calais, as we could discern the light on both shores."

California News.

Eight days later news from California has been received.

The mining news continued favorable, though the miners were in some localities greatly in want of water, and were anxiously expecting rain, of which less than the average quantity has fallen thus far in the season.

Business at San Francisco, and at most places in the interior, was extremely depressed.

Advices from Oregon state that the numerous and powerful tribe of Indians called "Snakes," had commenced war upon the whites, and slaughtered a whole train of immigrants.

The advices from San Juan, represent the revolution in Nicaragua as still in progress; but we do not learn that either party has yet achieved any decided advantage.

The San Francisco papers record the loss of the whale-ship City of New Bedford.

A CURIOUS SURPRISE.—A letter from San Francisco relates a curious incident that occurred there a short time since. Her Britannic Majesty's exploring ship Plover arrived at San Francisco a short time since from the Polar Sea, where she had been ice-bound since 1847. When she left San Francisco, some years ago, it was a mere trading station, resorted to by a few vessels in pursuit of hides, and the town or place contained only a few adobe houses. The captain and crew of the Plover expected to find the same San Francisco in 1854 that they left in 1847. The captain, therefore, sailed into the bay without a pilot, and approached the city in the evening. He was much amazed at the numerous lights he saw. When he awoke from his dream of seven years, the next morning, he found a noble city occupying the site of the *ancient* San Francisco. He had known nothing of the Mexican war, and cession of California to the United States, and the many other great events that had taken place during the time he had been locked up in the frozen regions of the North.

At the funeral of the late Dr. Spencer, Dr. Spring said that a few days before his death, he said to him, "Brother Spencer, I fear you are going soon to leave us." "I think so," said he, grasping Dr. Spring's hand, and saying, "You see I am strong yet, and it is possible that I may rally; but these excrutiating pains are fast wearing away my strength, and probably will overcome it before to-morrow morning." "Brother," said Dr. S., "is it peace?" "Yes," he replied, "all is peace."

It is stated that the incense alone, which is burnt in the Chinese empire, in the worship of their idols, annually costs £90,000,000 sterling, or about five shillings (a little more than a dollar) for each man, woman, and child. At first sight, the estimate appeared to us extravagant, but, on a moment's reflection, we conclude that it may be near the truth. All this is expended on a ceremony which neither informs the mind nor educates the heart.

The *Journal of Missions* states that a revival has been in progress in China; twenty-seven persons have been baptized at Amoy, by the missionaries of the American Board and of the London Missionary Society, and much interest was manifested at the public meeting of the missions. Fifteen miles from Amoy, things are said to be still more hopeful—a remarkable reformation, under the labors of Mr. Burns, an English Presbyterian, having broken out.

The American Missionary says that some of the missions of the Society of which it is the organ are in great need of reïnforcements. The Jamaica Mission ought to have three or four additional missionaries and assistants soon; and the African Missions are greatly crippled in their efforts for want of additional ministers and teachers.

SUMMARY.

Messrs. Tiffany & Co., of Broadway, have nearly completed a large and excellent clock, in front of their new marble store near Prince-st., which is to be illuminated at night for the benefit of the public. The clock is supported by a Herculean figure nine feet in hight; the dial or face of the clock is five feet in diameter, with very distinct hands and figures. At night it will be lighted by a large number of jets of gas, properly blended by five reflectors, so that thousands of persons in Broadway will be able to tell the time at a glance. The movements, which are of the best kind, and such as to insure the most accurate time, are in the third story of the building. The whole affair costs about $3,000.

Among the recent applications for Patents at the U. S. Patent Office, there is one for the employment of a new material for the manufacture of printing and writing paper, articles in so great demand at the present time, both in this country and in England. The supply of the usual raw material has been found inadequate to fill the orders for paper. The raw material is the pith and fibre of the sugar-cane. This is said to combine the desired qualities of strength, toughness, and of being very white, while the supply is inexhaustible, and the article very cheap.

One day last week Archibald Henderson, a long-bearded man, was found in West Broadway, New York, flourishing a formidable sword, much to the danger of any who approached him. He was taken into custody by Officer Fowler, of the Fifth Ward, and, on being arraigned before Justice Bogart, informed that functionary that he had been commissioned by the Almighty to slay 20,000 men on that day, and he meant to do it. The magistrate committed him as a lunatic to the charge of Dr. Covil, of the City Prison.

A dispatch dated Boston, Friday, Dec. 15, 1854, says: Wendall Phillips, Esq., appeared in the U. S. Circuit Court this morning, and gave bail in the sum of $1,500, to appear in March next to answer the charge of resistance to the U. S. Marshal at the time of the Burns rendition. At his request the following persons were allowed to become his bondsmen: Messrs. Geo. W. Phillips, H. I. Bowditch, R. E. Apthorp, Samuel May, C. M. Ellis, and Francis Jackson.

A statement of the results of Miss Lind's Concerts in the United States shows that the total receipts from 95 concerts, (including three given in Havana, were $712,161; from 35 concerts given in New York, (exclusive of the two devoted to charity,) $286,217, or an average of $8,177 50 each. According to the contract with Mr. Barnum, his gross receipts were $535,486; Miss Lind's net avails, $176,675.

The Chicago *Tribune* of Dec. 12th says:—On Sunday evening, about 9 o'clock, the seventeen fugitives from Missouri, whose attempted arrest created such an uproar in our city last week, marched to the depot of the Michigan Central Railroad in a body, took a car especially provided for the purpose, and arrived safely at Detroit on Monday morning. By this time, we suppose, they are under the protection of Queen Victoria and the British Constitution.

Wm. J. Brown, secret Post Office Agent, has succeeded in detecting J. M. Watson, the Postmaster at Rawsborough, in robbing the mails which passed through his hands. Various losses of letters on the line west of Chillicothe, have recently occurred; and to ascertain the office at which the stealing was committed, a plan of operation was adopted which led to the arrest of Watson.

It is stated that the profits of the People's Line of steamboats on the North River, for the year 1854, will foot up to over a quarter of a million of dollars. From the opening of navigation to the close, the boats of this Line have had more patronage than room. The Merchant's Line, composed of the Hero and Manhattan, have also done a good business. Their profits are put down at $60,000.

The whole amount expended on the Pennsylvania Railroad for outfit and invested in real estate is $16,700,000. It is believed the receipts of the road for the year will not be less than $3,500,000. Deduct for expenses 50 per cent., $1,750,000. Net receipts, $1,750,000, or about 10 1-2 per cent. profit upon the whole outlay. $5,200,000 of which are permanent loans at 6 per cent. per annum.

A pair of three-year old steers sold the other day, at Bull's Head, New York, for $450. They were full-blood Durhams. One was white and the other a red roan, the red predominating. Both were very fine in the bone. We think, as did all that saw them, that they were the finest pair of beeves ever offered in this market. The weight of beef in each was estimated at about 15 cwt.

Cornelius Vanderbilt is now building two steamers, upon the plan of the North Star, to ply from New York to Havre or Liverpool, which will be ready for sea in the course of the coming spring. It is said that he intends, within the course of 16 or 18 months, to have six or eight additional steamers put upon the Atlantic to ply between New York and Havre or Liverpool.

Mr. Pease, at the Five Points, in New York, has adopted a good plan for the benevolent to feed those who beg for food, instead of giving them money. He has issued tickets, which are sold ten for a dollar, each one of which will entitle the bearer to a good meal, whenever it is called for, at the Five Points House of Industry.

The failure of Messrs. Hill, Carpenter & Co., of Providence, R. I., is reported. They were very extensively in the wool-trade, supplying manufacturers, and the depressed state of that interest has injured their credit for some time past. The amount of their liabilities is variously stated, and is probably about a million and a half of dollars.

It is predicted by the weatherwise, that the ensuing winter will be unusually stormy, marked by heavy falls of rain or snow, or both. The prediction is based upon the fact that about the same amount of water falls to the earth each year, and as much less than the usual proportion has fallen during the last six months, the balance is to be made up this winter.

Eleven thousand three hundred and twenty-one swine were received in the city last week, over the New York and Erie Railroad. They were mostly from Ohio. At a fair estimate the hogs averaged 150 pounds each, or 1,698,150 pounds—which, at 6d. per pound, is $101,889 for swine over a single route in the space of seven days.

A dispatch dated Philadelphia, Saturday, Dec. 16, 1854, says: Yesterday afternoon the engine "Wisconsin," while drawing a coal train on the Reading Railroad, exploded near Manayunk tunnel, instantly killing George Long, engineer, of Baltimore; John Lynch, fireman, and Chas. Miller, of Dauphin Co., and seriously injuring a lad, and a passenger who resides near Reading.

A freight train came down on the 14th inst., on the Central Railroad, from Buffalo, consisting of forty-eight freight cars, loaded to their utmost capacity. It was said by those on the road, to have been the heaviest train which ever passed over it. It was drawn by two of the most powerful engines employed on the road.

R. J. Lamborn, of Chester Co., Pa., lost fifteen head of bullocks, worth a thousand dollars, as it was thought, from eating acorns; the tonic acid of which produced constipation and a disease resembling dry murrain. Wilted cherry-leaves, which contain Prussic acid, will produce the same effect.

A new diving-bell, the invention of one of the engineers of the Neapolitan navy, was tried lately at Naples. It remained 3 hours under water at a depth of 50 feet, with 3 men inside, who regaled themselves with a breakfast during that time.

The sudden closing of Lake navigation, by the late storm, has locked up in the Welland Canal some 185,000 bushels of Wheat and Corn, with thirty-six vessels bound eastward. Besides these, there are some twenty vessels at Port Dalhousie and Gravelly Bay.

The State Treasurer of Michigan has given notice that he shall sell at private sale or at auction, within twenty days from the 7th inst., so much of the stocks deposited by the Government Stock Bank of Ann Arbor as will be sufficient to redeem the outstanding circulating notes of said Bank.

A dangerous shinplaster has been put in circulation in the shape of drafts, in the similitude of bank-notes on the Merchants' and Mechanics' Bank of Oswego, an institution which failed some time since. They were signed by a Mr. Somers as drawer.

The ship Niagara, Capt. Drummond, of New York, which sailed from New Orleans on the 24th Sept. for Venice, was abandoned at sea on the 24th of Oct., in lat. 29, lon. 68. Capt. Drummond and one sailor arrived at New Haven in the brig Etewardo, from Barbadoes.

Yet another boat has gone to the shades in the Mississippi, near Cairo. The steamer Hudson, in command of Capt. R. B. Hughes, bound for New Orleans, struck a snag in the Mississippi about two miles above Cairo. No lives were lost.

The Brenham (Texas) *Enquirer* of the 28th ult. has the annexed announcement: "We learn that a number of persons were baptized by immersion on Sunday last, at Independence, among whom was Gen. Sam Houston."

James W. Nye, of New York, has been appointed Receiver of the Lewis County Bank, before whom the creditors of the bank must prove their claims by the 20th of the present month.

New York Markets—December 18, 1854.

Ashes—Pots $6 50; Pearls 7 25.

Flour and Meal—Flour 8 25 a 8 62 for common to good State, 8 81 a 9 25 for Ohio, Michigan, and Indiana, 10 75 a 11 75 for extra Genesee. Rye Flour 7 37. Corn Meal 4 31. Buckwheat Flour 4 75 a 5 00 for 100 lbs.

Grain—Wheat 1 85 a 1 95 for Western mixed, 2 28 for white Michigan, 2 50 for prime white Genesee. Rye 1 40 a 1 42. Barley 1 30 a 1 38. Oats 54 a 58c. for Western. Corn 95c. for Western mixed, 98c. a 1 00 for old round yellow.

Provisions—Pork 12 50 for prime, 13 50 for mess. Beef 5 25 a 7 00 for country prime, 8 25 a 11 00 for country mess. Dressed Hogs 6¼ a 6½c. Lard 10¾ a 11c. Butter 14 a 20c. for Ohio, 20 a 25c. for State, 25 a 28c. for Orange Co. Cheese 10 11½c.

Hay—90c. a 1 00 per 100 lbs.

Potatoes—2 62 a 2 75 per bbl. for Western reds; 3 12 a 3 37 for Mercers and Carters.

Seeds—Clover 10½ a 11c. Timothy 2 75 per bushel for good reaped. Rough Flaxseed 1 80 for 56 lbs.

Tallow—12½c. for city rendered.

Wool—28 a 30c. for native, 42 a 45c. for American Saxony Fleece.

MARRIED,

Near Jaffa, Palestine, Oct. 28, by Elder Wm. M. Jones, Mr. FREDERICK WILLIAM GROSSTEINBECK, formerly of Rhine Province, Prussia, to Miss MARY ELIZABETH, daughter of Mr. Walter and Mrs. Sarah Dickson, late of Groton, Mass.

In Clarkville, Madison Co., N. Y., Nov. 11th, by Eld. Joshua Clarke, Mr. JAMES B. HIBBARD, of Bridgewater, Oneida Co., to Miss SARAH F. WADDELL, of Plainfield, Otsego Co.

In Crossingville, Pa., Nov. 18th, by Eld. A. A. F. Randolph, Mr. T. W. BRANDT, of Alfred, N. Y., to Miss E. B. STELLE, daughter of Deacon Stelle, of the first-named place.

In Brookfield, N. Y., Dec. 5, by Eld. S. D. Gardner, Mr. LAUREN A. CHASE, of Penn Yan, to Miss F. J. LAVANTIA CLARKE, of the former place.

In Adams, Dec. 11th, 1854, by Eld. Jas. Summerbell, Mr. JOSEPH S. COON, of Petersburg, Rensselaer Co., to Miss SARAH DORLISKA, daughter of Mr. George Armsbury, of Adams.

In Alfred, Dec. 10th, by Eld. D. E. Maxson, Prof. A. R. CORNWELL, of DeRuyter Institute, to Miss B. A. WILLIAMS, of Alfred, N. Y.

DIED,

In Williamsburg, L. I., on the morning of the 7th inst., ESTHER ANN ROGERS, daughter of David Rogers 2d, formerly of Waterford, Ct., aged 24 years. She had been confined to her room several weeks with a fever, but was not considered in immediate danger until a short time before her decease. Though death came suddenly, it had no terrors for her. She took leave of her parents, brothers, sisters, and friends, with the composure of one going on a pleasant journey, comforting them with the assurance that she esteemed it better to depart and be with Christ.

In Brookfield, Madison Co., N. Y., on the evening of the 7th inst., suddenly, of disease of the heart, Mrs. DEBORAH MASON, wife of Mr. Henry Mason, aged 49 years. Sister Mason experienced religion when young, and united with the 1st Seventh-day Baptist Church in Brookfield; where she retained her membership until one year since, when she, being located in the vicinity of, united with the 2d Seventh-day Baptist Church of Brookfield, where she remained a devoted member until by death she was removed from the millitant to the triumphant church. J. C.

LETTERS.

Joshua Clarke, J E Crandall, L C Moss, R B Adams, A A F Randolph, N V Hull, B P Langworthy, Hamilton Clarke, L R Babcock, D E Maxson, J C Green, W T Morgan, W B Maxson.

RECEIPTS.

FOR THE SABBATH RECORDER:

James Muncy, DeRuyter	$2 00 to vol.	11	No. 52
C V Hibbard, Brookfield	2 00	11	52
David Babcock, Leonardsville	2 00	11	52
James Allen, Alfred Center	2 00	11	52
Luke G Witter, Wellsville	2 00	12	20
J C Green, Evansville, Ind	1 00	11	52

FOR SEVENTH-DAY BAPTIST MEMORIAL:

Josiah Witter, Wellsville, vol 3	$1 00
Julia Ann Woolworth, Alfred Center, vols 3 & 4	2 00
N V Hull, sale of bound vol	2 62
Orra Stillman, sale of vol	1 50

WILLIAM M. ROGERS, Treasurer.

Board Meetings.

THE next Quarterly Meetings of the Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will be held at No. 80 Seventh-st., New York, on the first Fourth-day in January, 1855, commencing at 10 o'clock A. M.

Yearly Meeting.

THE next Yearly Meeting of the Seventh-day Baptist Churches in New Jersey will be held with the Church at Marlboro, N. J., commencing on Sixth-day before the fourth Sabbath in December, 1854.

W. C. WHITFORD, Secretary.

Western Association—Executive Board.

THE Executive Board of the Western Association will meet at Independence on the first Wednesday in January next. Persons having communications for said Board would do well to forward the same a short time previous to the meeting, as it frequently occurs that the reports are not received till after the meeting is had.

E. R. CLARKE, Sec. of Board.

Savery's Temperance Hotel

AND

TELEGRAPH DINING SALOON,

No. 14 Beekman Street, N. Y.

KEPT ON THE EUROPEAN PLAN.

MEALS AT ALL HOURS OF THE DAY.

LODGING ROOMS,

From $2 to $3 per Week, or 50 Cts. per Night.

BELA SAWYER, Sup't. JOHN S. SAVERY, Proprietor.

Woodworth's Youth's Cabinet.

A New Ballad for Yankee Doodle—by Brother Jonathan.

To every body, far and near,
In all this Yankee nation,
Who'll hear my song, I'd like to give
This piece of information:

Chorus.—The *Cabinet* is just the thing
For merry boys and girls, sir;
There's nothing like it in the land,
That's making such a noise, sir.

Woodworth's Youth's Cabinet (the name
Scarce fits my jingling measure)
Is the young people's magazine,
That yields unceasing pleasure.

Among its rivals, 't is the best;
It beats the whole to pieces;
'T is made by "Uncle Frank," for all
His nephews and his nieces.

It treats of strange and curious things,
In nature and in art, sir;
There's nothing wondrous in the world
That here plays not its part, sir.

It tells its readers, now and then,
Of famous men and women;
Of beasts and birds; of fishes, too,
And of the sea they swim in;

Of travels, voyages, and deeds
Of peril, and of glory;
It chats in prose and poetry,
In fable and in story.

It hunts for curiosities
In near and distant places,
And pictures, racy, rich and rare,
Its treasury embraces.

Its riddles, puzzles and charades,
Too numerous are to mention;
The time would fail me to rehearse
The things that claim attention.

Whoever reads its pages o'er,
(There's no mistake about it,)
Is sure to find, ere he's aware,
He cannot do without it.

'T is issued every month, you know;
And please these facts remember:
The volume now has just commenced,
'T is finished next December.

And by the way, 'twere well to note
Another circumstance, sir:
For one whole year, you've but to pay
One dollar in advance, sir.

So please the money now enclose
To *Woodworth, New York City,*
One hundred eighteen Nassau street—
And I will end my ditty.

☞ The publishers of such newspapers as receive this notice, are requested to give the foregoing ballad (not including this notice) two or three insertions—the first insertion in their literary department. To those who comply with this request, the undersigned will send one copy of *Woodworth's Youth's Cabinet* for two years, or two copies for one year, at the option of the publisher respectively. D. A. WOODWORTH.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of FRANCIS C. WOODWORTH, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year.*

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83⅓ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

Money and post-office stamps may be sent by mail, at the risk of the publisher.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year.*

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.

Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 5.30 P. M.

JOHN O. STERNS, Superintendent.

Miscellaneous.

Morning.

It is morning, it is morning,
And the weary wing of night
Slowly lifts its sable plumage
To admit the early light.
Streaming o'er the distant mountain,
With a glad and glorious sheen;
Tinging all the tallest tree-tops
With a hue more fresh and green;
Glancing on the river's ripples,
Gleaming o'er the peaceful lake;
Waking all the silent songsters
That repose in bush and brake;
Lighting up the lovely landscape,
Lately hidden from the view,
Comes the golden sun in glory,
Giving life and light anew.
So, when merciless misfortunes
Darkness o'er my spirit throw,
Let the sun of hope unclouded
In my soul serenely glow;
Driving out all searing sorrow;
Chasing all the gloom away;
Radiating life and gladness,
Like the light of early day. [Knick. Mag

Deep-plowing, Sub-soiling, and Draining.

The following paragraphs on this subject are from an address by Horace Greeley at the Agricultural Fair in Franklin County, Pa., reported in the *Chambersburg Repository and Whig*:—

This has been a season of severe drouth. On every side we meet evidences of its ravages, and it is madness to pretend that the crop is not actually a short one. It is far within bounds to estimate the loss of our country from this year's drouth, at One Hundred Millions of Dollars—about half the entire cost of the Mexican War. Now it were needless to tell any intelligent farmer, that there is water enough in the earth, if the roots of plants could only run down to it. Give them a sufficient depth of mellow, rich soil, and they will draw their own water, no matter whether it rains or not. In short, we have lost more than a Hundred Millions this year, and we are losing more or less every year, because our farmers will not be persuaded to plow their lands deep enough.

I suppose I need not tell farmers, that water is the principal component of every living plant, and that there is just as much water in the world at one time as another, and enough at all times. When there is least water in or upon our soils, there is most in the atmosphere. This upper sea is never dry, and is always fullest just when plants need water most. In the dryest and hottest season, it will deposit water freely on any sufficiently cold metalic or other tolerably smooth surface. Sage grandmothers may tell you that the pitcher would not sweat if there were no water inside of it, but they are mistaken; the outside of the pitcher would gather moisture just as it now does, by precipitation on a surface cooler than itself, if that surface could be kept cool enough. Let the contents of the pitcher be oil or lead the deposition of simple water on the outer surface will continue, provided that surface be kept cool enough.

Here, then, is the basis of our urgent commendation of Deep Plowing, Sub-soiling and Draining. We want the soil kept loose and permeable, to such a depth that the air passing over it may always freely traverse it and go down till it finds a degree of cold sufficient to cause a deposition of its water. Hence, and not merely because roots strike deeper in deep, mellow soils—our demand for Subsoiling and Deep Plowing—two feet, if possible; but, at all events, somewhat deeper every time the soil is turned over.

When I remark that we have had a season of uncommon drouth, and that the losses and failures thence resulting should teach us to plow deeper, you readily comprehend, though you possibly may not agree with me; but when I add that it should also impress us with the importance of Draining, some of you will stare in bewilderment. "What? drain land to guard it against drouth?" you inquire. Yes, Sirs; just exactly that! How often I have been told "This land don't need draining—it is dry enough." "Yes, sir," I respond, "it *does* need draining, though it is already too dry." Let me make myself understood:

The atmosphere surrounding and embracing the earth is a great reservoir of moisture, which evaporation is constantly replenishing, and rains or snows occasionally making drafts upon. Let any current or body of air be brought into contact with a surface colder than itself, and it begins to deposit moisture or water thereon—witness the common sweating of a pitcher in a hot day. "Ah! the water sweats *through* the pitcher," says an objector, "a dry pitcher will never sweat." Yes, sir, it *will* sweat, provided you can keep it long enough colder than the air which comes in contact with it. If you doubt this, and think the sweat on a pitcher was abstracted from the fluid inside, pray explain why a pitcher sweats only on hot days, or in a hot room. But the fact is beyond dispute.

Now, a drain, whether made of tile (hollow brick,) as it should be, or of stone, timber or other material, is a long tube discharging into a stream or at any place where a bank or declivity insures against back-water, running thence across the field to be drained, and terminating under a heap of loose stones at the upper side. If of tile, these are simply laid end to end in the bottom, with a sod reversed over them, so as to cover each junction and prevent the introduction of earth. You need borrow no trouble about the water; all that the soil does not need will find its way into the drain and pass rapidly off to the outlet, provided there is a gradual though slight descent toward the mouth, no choking up at any point, and no back-water. All the surplus water immediately above the drain will thus pass off with that for one or two rods on each side; but as you recede from the drain, the area drained by it rises so that a drain three feet under the surface will not drain away the water to a depth of more than two and a half feet at a distance of a rod on either side, nor to a depth of more than two feet at a distance of two rods. (I do not pretend to accuracy in these details, but only to illustrate the principle.) As to depth, much must depend on the nature of the ground and the facility of avoiding back-water. My drains will not average three feet in depth, and I have some under two feet, because I cannot get drainage-way to a greater depth; but if I could go as deep as I choose, I should, while tile continue as dear as now, sink them four to five feet, for then I think they might be laid four rods apart in rocky, compact soils, and possibly five or six in loose, dry soils. They ought not in general to be more rods apart than they are feet deep.

Now such drains, well laid, will not merely keep the soil free from excessive moisture, but they will enable it to retain more water in a dry time, by keeping it loose and porous, and by preventing the subsoil, after being once plowed up, from being baked, or caked down again by stagnant water. There is not a dry lot on earth which would not, with proper plowing, be aided to resist drouth by draining. For each drain, made as I have indicated, with a vent at each end, is a funnel through which a current of air is constantly passing, and sending off jets in either direction through the crevices between the meeting tile. You need not be told that the atmosphere is the great reservoir of fertilizing substances—that carbon, which, next to water, is the principal constituent of nearly all plants, is obtained from the carbonic acid of the atmosphere, and that ammonia, the stimulant of vegetation, is but a modification of nitrogen, which is a principal ingredient of the air. Dig a cellar wherever you please, throwing out on the top earth which was never before within six feet of daylight; let it freeze and thaw one or two winters, and be visited by sun, wind and rain, and mark what a rank growth will cover its surface—the product, not of the earth mainly, but of the atmosphere. So the air, constantly escaping from the current flowing through the tile, permeates the earth on every side, and imbues it with warmth and fertility.

But I propose to show more especially how these drains protect land from drouth. I have already spoken of the sweating pitcher, the constant presence of water in the atmosphere, and the tendency of the air to deposit this water on coming in contact with a surface colder than itself. Now the surfaces of the drain are always, in common with the earth surrounding the drain, colder throughout warm weather than the atmosphere above them. Of course, the air entering the drain from without is perpetually brought in contact with surfaces colder than itself, and perpetually depositing moisture in the adjacent soil.

It is very well to make drains of stone where suitable stone are abundant, and the farmer wants to get rid of them. Where the soil beneath is solid and unyielding, and care is taken in laying and covering the stone, such drains may for years work even better than if made of tile, because they will draw more water from the soil, and give it more air in return. But in swamps and marshy soils, where a tile-drain, laid on slabs placed flat side up, or on the poorest rough boards, will endure for many years, a stone drain will soon sink and become choked and useless. Besides, a stone-drain requires far more displacement of earth in the making, and at least twice the labor in laying and covering. Let every farmer begin to drain at once, even with two poor boards or slabs for the top and bottom of each drain, and a smooth pole for each side; but he will soon realize the superior convenience and economy of the tile.

I know well, that tile are both scarce and dear at present—and we pay more dollars per thousand than the English do shillings, and probably get an inferior article at that. But this is a temporary grievance, which a constant and growing demand for tile would soon obviate.

An Eventful Life.

A book has recently appeared under the title of "*Sketches of Places and People abroad,*" by Wm. Wells Brown. In a notice of this book, the New York *Tribune* gives the following account of its author:—

The name of the author is familiar to those who are at all conversant with the Anti-Slavery movement. He was born in Kentucky, where he resided on a plantation until he was five or six years old. His master then removed to Missouri, occupying a farm in a beautiful and fertile valley, near the Missouri River. Here the slaves were put to work under a wretch of an overseer, whose harshness and cruelty made their lives intolerable. At an early age, William was separated from his mother, who was retained as one of the field-hands, while he was employed as a servant in the medical office of his master, who was a physician as well as a planter. When about ten years of age, he had a taste of the bitterness of Slavery, which he never forgot. He heard the cries of his mother, as she was flogged by the negro-driver for being a few minutes late in reaching the field. His blood ran cold at the sound, and he wept aloud; but he could, of course, afford no aid to the helpless victim. When he was twelve years old, his master removed to St. Louis, and having more slaves than he wanted for his own use, he let out William to a sporting tavern-keeper. This man was a real specimen of "the fancy"—a horse-racer, cock-fighter, gambler, and a drunkard into the bargain. The young slave found it impossible to stand the treatment which he received, and ran away. He fled to the forest a few miles from St. Louis. He had been in the woods but a short time when he heard the baying of blood-hounds. Aware of their ferocious nature, he took refuge in a tree, to save himself from being torn to pieces. The hounds were soon at the trunk of the tree, where they remained howling and barking until the pursuers came up. The slave was called down, tied, and taken home. On his arrival, he was fastened up in a smoke-house, whipped till the vindictive spirit of his master was satiated, and then smoked with tobacco-stems. This process was called "Virginia play." Some time after he was hired by a slave-trader named Walker, and was made superintendent of the gangs of slaves that were taken to the New Orleans market. In this capacity he made one or two voyages down the Mississippi, gaining fresh experience of the horrors of slavery. He was at length induced to run away, in hope of reaching the free States. But after traveling ten nights and hiding in the woods during the day, he was secured by a gang of negro-hunters, chained and handcuffed, and taken back to St. Louis. Changing owners once or twice, he again resolved to become free. He was assisted in his attempt by a benevolent Quaker, whom he fell in with after his escape, and from whom he took the name by which he is now known.

Having gained the freedom for which he longed, he made rapid progress in intellectual and moral improvement. In the spring of 1844, he became an agent of the Western New York Anti-Slavery Society, and in 1849 embarked for Europe as a delegate to the Paris Peace Conference. "The reception of Mr. Brown at the Peace Congress, in Paris, was most flattering. He admirably maintained his reputation as a public speaker. His brief address upon that 'war spirit of America which holds in bondage nearly four million of his brethren,' produced a profound sensation. At its conclusion the speaker was warmly greeted by Victor Hugo, the Abbé Duguerry, Emile de Girardin, Richard Cobden, and every man of note in the assembly. At the soirée given by M. de Tocqueville, the Minister for Foreign Affairs, and the other fêtes given to the members of the Congress, Mr. Brown was received with marked attention." Returning to England, he was met with a hearty welcome by some of the most eminent philanthropists of that country. Here he decided to maintain himself by public lecturing and other literary labors. In this course he was highly successful. He remained in England five years, "and during his sojourn there he traveled above twenty-five thousand miles through Great Britain, addressed more than one thousand public meetings, lectured in twenty-three mechanics' and literary institutions, and gave his services to many of the benevolent and religious societies on the occasion of their anniversary meetings."

The volume is filled with notices of his public tours, sketches of celebrated people, and remarks on English society in general.

Railroad to the Pacific.

Col. Benton recently delivered a Lecture before the Maryland Institute, on the geography of the country west of Missouri to California, and its adaptation to settlement and the construction of a railroad. He closed his lecture with the following language in reference to a railroad to the Pacific:—

"The road will be made, and soon, and by individual enterprise. The age is progressive and utilitarian. It abounds with talent seeking employment, and with capital seeking investment. The temptation is irresistible to reach the golden California, and to connect Europe and Asia through our America. The country is open to settlement, and inviting it and receiving it. The world is in motion, following the track of the sun to its dip in the western ocean. Westward the torrents of emigration direct their course; and soon the country between Missouri and California is to show the most rapid expansion of the human race that the ages of man have ever beheld. It will all be settled up. Settlements will promote the road—the road will aggrandize the settlements. Soon it will be a line of towns, cities, villages and farms; and rich will be the man that may own some quarter-section on its track, and some squares in the cities which are to grow up upon it.

"But the road beyond the Mississippi is only the half of the whole; the other half is on this side, and either in progress or completed. Behold your own extended iron way, departing from this city to reach the Ohio—crossing it to join the western trunk through Cincinnati, Vincennes, St. Louis—there to find the Pacific road in progress to the western limit of Missouri. Behold the lateral roads from Pennsylvania, New York, New England, all pointing to the West, and converging to the same central track. And behold the diagonal central road of Virginia, to traverse the State from its south-east to its north-west corner, already finished beyond the Blue Ridge, and its advanced pioneers descending the Allegheny, to arrive at the mouth of Big Sandy, in the very latitude of St. Louis, San Francisco and Baltimore, and there to join the same great western central trunk. And the Blue Ridge road of South Carolina, bound upon the same destination; and the roads of Georgia, pointing and advancing to the north-west. What is the destiny of all these Atlantic roads, thus pointing to the West and converging upon the central track, the whole course of which lies through the center of our Union, and through the center of its population, wealth and power, and one end of which points to Canton and Jeddo—the other to London and Paris? What will those lateral roads become, in addition to their original destination? They will become parts of a system, bringing our Atlantic cities nearer to the Pacific coast than they were to the Blue Ridge in the time of canals and turnpikes. And what then? The great idea of Columbus will be realized—though in a different and more beneficial form. Eastern Asia is reached by going west, and by a road of which we hold the key; and the channel of Asiatic commerce, which has been shifting its bed from the time of Solomon, and raising up cities and kingdoms wherever it went—to perish where it left them—changing its channel for the last time—to become fixed upon its shortest, safest, best, and quickest route, through the heart of our America—and to revive along its course the Tyres and Sidons, the Balbecs, Palmyras and Alexandrias, once the seat of commerce and empire, and the ruins of which still attest their former magnificence, and excite the wonder of the oriental traveler."

A Letter from a Soldier.

The London *Daily News* publishes as an illustration of heroism, the following letter from W. H. Floyd, one of the Welsh Fusiliers.

General Hospital, Scutari, Oct. 14, 1854.

My Dear Mother:—You may see by my letter that paper is very scarce with me. A letter written by me to my brother will inform you that I have had the honor to serve in the two greatest general engagements ever fought in the world. It will likewise tell you that I have been severely wounded in three places, which is as follows: A musket-shot through the right arm, which I received about an hour after we commenced the action, but being determined to pay them for making a hole through my jacket and fleshy part of my arm above the elbow, I would not fall to the rear, but made my comrade tie a handkerchief round it, and fought through the action, which lasted three hours after; but just as we thought the action was over, for the imperial Russian army was routed, and we had gained the entrenchments and forts, they halted and wheeled round, and made another stand, which did not last long, for General Sir G. Brown, or Lord Raglan, (I do not know which of them,) ordered us, the Royal Welsh Fusiliers, Scots Fusilier Guards, Grenadier Guards, and the 33d Regiment of the Line, to form up for the charge, which we did directly; and now came the grand charge, and away they went after a few moments wounding with the bayonets, but not before they had left me a bayonet wound in the left thigh and a rifle ball through the left breast, which passed through the breast-bone and left lung, going out under my shoulder blade. My other wounds are trifling to compare with the latter, for they are nearly healed up. The wound through my breast is closing up quite fast outside, but it will be months, the doctors tell me, before it will be healed up inside, and that I will always have to take great care of myself, for any convulsive or quick movement will be dangerous to me. They seem to think it quite a miracle that I should live, for they have agreed that the ball passed between the leading-strings of the heart and about half an inch from the heart. Yet I am better, and live in hopes to live better a long time, although I shall never have much power in my left arm, nor shall I ever be upright; at least I can hardly expect it—but I must hope for the best. I never did despair, nor shall I. I have served my Queen in the best manner I could through an arduous campaign until I became mutilated with wounds; it is her turn to serve me during the remainder of my days. I shall be home in England in December, and be discharged in May, so you must have a corner berth ready for me. I am getting the best treatment here. I can get any thing I wish; liquors of any description, or food; it matters not what it costs, I am to get it. Give my love to J—— and his wife, Mr. T——, and Mrs. L——, Granny, and Uncle Jones. Please tell Joseph that I received his letter with the stamps, but they were no good to me, for I lost them with my pack and kit on the field of battle.

Now for a small anecdote. The bit of hair that you sent me, and another bit that a person you know sent me, I wore in a little bag round my neck. I was shot straight through the middle of the bag, and most of the bag and hair went into my breast, and every morning the doctor takes some of it out. Please answer by return of post. My love to you all, friends and relations. I remain your affectionate youngest son. Hamlet.

Homography.

This new invention is a wonderful step onward, if the statements below are reliable. They are from the Paris correspondence of the New York *Times*:—

"Homography is a new art, an art of yesterday, or rather to-day, for which the inventor makes the following extraordinary claims: Whoever possesses a printed book, possesses the stereotype plates of that book; whoever has an old lithograph, a copy of an extinct edition, an impression of a steel engraving, has, by a wonderful process of transfer, the original stone, the original type, the original plate, the original block. An octavo of 500 pages can be executed, at a trifling cost, in six days. Reprints cost but half the price of the first composition; and engravings, after expensive originals, may be made for a few sous. Stereotyping will be done away with; the first edition will be printed from type, and any one copy furnishes the plates for all successive editions. Rare editions are annihilated, as one copy may be multiplied to infinity, and that, too, with all the typographical peculiarities of the epoch in which it was first printed. Books in foreign languages, in dead languages, in Hebrew, in Greek, in Sanscrit, may be reproduced by workmen completely ignorant of them. The following is the history of the process, as described by Victor Meuieri, the scientific feuilletonist of the *Presse*:

The inventor, Mr. Edward Boyer, a chemist of Nimes, undertook to solve the problem that the inventor of lithography, Senefelder, of Munich, sought in vain to solve—to reproduce upon stone any typographical work, lithograph, or engraving, of which a single copy is in existence—to do it instantaneously, cheaply, without damaging the original, and so exactly that the most practiced eye can not tell the difference, and finally to multiply the copies to infinity. In principle, M. Boyer arrived at a solution in 1844; he has spent ten years in researches tending to simplify, cheapen, and render practicable the process. He has now succeeded, and stereotypes a quarto page in ten minutes, as he actually did in presence of M. Mennier. A cast of the Temptation of St. Anthony, which lately cost a Paris publisher $280, might have been furnished him by M. Boyer for two cents and a quarter!

The process is of course a secret, and will not be disclosed even in specifications for a patent. M. Boyer does not mean to patent his invention; he will control and superintend the business in France, and will sell the secret to foreign countries."

How they Dig Anthracite Coal.

The Rochester *Democrat* has a letter from Scranton, Pennsylvania, descriptive of the manner in which the anthracite coal of that region is dug and conveyed to the surface:—

The coal-bed is entered by a horizontal digging through earth and sand upheld by timbers for a few rods, till the coal is reached in a bed perhaps six feet thick, lying in the midst of a floor of rock on the bottom and top. This bed lies at the bottom of a hill, sloping upward to the west some hundred feet, and containing other beds above, and separated from this and each other by strata of rock, 25 feet between some, to 70 or 80 feet between other beds. This bed extends through the hill, probably, and covers some hundred acres. Here the entrance is nearly horizontal, but the coal strata often has an inclination to the horizon from 10 to 35 degrees, according to the variation in the upheaving power by which they and the whole rocks have been raised from under the ocean in times long gone by, doubtless long before the race of Adam was placed on earth.

The coal is broken out by blasting, and a great many men and boys are employed in this process, and in removing the coal into the open air and daylight. A path is cut (by blasting) into the bed, wide enough for the carts drawn by mules to enter. At the proper distances cuts are made at right angles to the main path. These are cut across by paths parallel to the main path, and the coal borne away, thus leaving solid blocks of anthracite, perhaps 20 feet square, to uphold the strong roof of the bed between which the coal is removed 50 feet wide. Thus the bed is cut up into the figures of a chess board, the blocks remaining for the support, and not being moved like chessmen. More than half a mile of these cuttings are already made in this bed. The air within is cool, and ventilation is secured by sinking shafts from the surface above down to the cavity formed. As yet, no inconvenience is felt from the combustion of the gunpowder or confinement of the air, so completely is the ventilation secured by the process adopted.

The excavation must of course be dark as the blackest midnight. The workmen use oil-lamps to give them light. The boys who drive in the coal-carts and drive out the coal, have each a small oil-lamp fastened to his hat for his own illumination. Viewed from some distance within, the scene is wild and magical, and one thinks of pandemonium as the blackened Vulcans come along with their lighted lamps bobbing up and down. But the jokes, and songs, and pleasantry, and happy activity, soon convince you that this is another sort of pandemonium. The workmen and boys are said to be healthful, industrious, well paid, and prosperous, and find a competent support for a multitude of contented families, whose small and comfortable dwellings are scattered at various distances from the bed. The Lackawanna rolls on at a little distance, and has the power of whitening the coal-bearing faces and bodies of the laborers, especially if employed in adequate quantity.

The Best Sort of Food.

Physiology and medicine have established the fact, that it is necessary, in order to keep the human body in full vigor and health, that the food of man should be varied. Bread alone is not sufficient to give the body sufficient strength and to keep it in a perfect state of health. To understand thoroughly the importance of the change of food, it is necessary to study the nature of each kind of food, and the part it acts in the support of life. Food serves two distinct purposes: 1. To produce heat; 2. To restore the losses occasioned through the activity of the vital functions. Experience has shown that the food of a laborer should contain each day 310 grammes of calorific and 130 grammes of restoring elements. When we examine into how much of these elements are furnished by the common articles of food, we find that

100 grammes of bread furnish 8 gr. of restoring and 30 of calorific elements.

100 grammes of meat without bones, 20 gr. of restoring and 11 of calorific elements.

100 grammes of beans, 30 gr. of restoring and 40 of calorific elements.

100 grammes of rice, 7 gr. of restoring and 43 of calorific elements.

100 grammes of oat meal, 12 gr. of restoring and 41 of calorific elements.

From this we see that 4 lbs. of bread would be necessary for a man to supply the system with 130 grammes of restoring elements a day; but it would produce 555 grammes of calorific elements, consequently about 245 grammes too much. A slight change shows the advantage of varied food. For instance:

1000 grammes of bread contain 80 gr. restoring and 300 calorific elements; 300 grammes of meat contain 60 gr. restoring and 33 calorific elements—together, 140 gr. restoring and 333 calorific elements.

600 grammes of bread contain 40 gr. restoring and 180 calorific elements; 300 grammes of beans contain 90 gr. restoring and 120 calorific elements—together, 130 gr. restoring and 300 gr. calorific elements.

One or the other of the above changes furnish the body with the two elements in sufficient quantity, but without excess. At the present high price of breadstuffs in France, the necessary supply of food, consisting in bread alone, would cost 93 centimes (about 18 cents;) bread and meat, 85 centimes; bread and beans, 48 centimes. Thus economy is here in conformity with the rules of hygiene. The laborer will do well not to live entirely on bread, as is often the case with the French people, but to add either some meat or another kind of farinaceous food which will supply the necessary amount of restoring elements.

New East India Company.

Under this title *The St. Louis Daily Intelligencer* tells that a scheme is in agitation there to open a direct trade between St. Louis, China, India, etc., across the continent, by means of a semi-weekly overland stage and transportation line between some point on the Missouri River and the Pacific Ocean. Such a line, it is calculated, could be maintained for a year on a capital of $500,000, with all the conveniences that may be had on any stage-route in the Union; and in order to insure this, it is proposed to have permanent stations, not over thirty miles apart, along the whole way, with every thing to render the traveler comfortable. The revenue of the enterprise would be derived from stage fare, mail contracts, freightage of gold dust, and other commodities brought from the Pacific, including teas, silks and spices from China and India. This undertaking seems a gigantic one, when we contemplate the immense wilderness intervening between St. Louis and the Pacific; but in these days we must not deem any thing impracticable, and we are therefore prepared to believe, *The Intelligencer*, when it assures us that the names and influence of citizens of St. Louis are already pledged to this scheme sufficiently to insure it a good reception by the public. Many things favor such an attempt the ensuing season. It is not the first of the kind projected. There is already a regular mail stage line in operation between Santa Fé and the Missouri frontier, and a plan for a stage line from California to St. Louis has been projected in San Francisco. Kansas Territory will next season be swarming with white settlers, and there are many there already. This part of the route will need no stations of the company's erection, as it will pass through a settled region. Then, too, the military force on the Plains will be largely augmented, new forts established on the emigrant trail, and a strong effort made to afford all requisite protection to travelers. The Mormon settlements at the Salt Lake are now very convenient for all the purposes of a traveling or transportation route, and will furnish the Company with all needful supplies. The Carson Valley settlement is also useful as a recruiting place after the passage of the desert and before crossing the Sierra Nevada. Now, with these things all ready to their hands, the Company will not require a very large expenditure of money to establish the required stations in the intervening spaces. The maintenance of relays of horses, and the pay of persons at the stations, would, however, form a large item. If such a line be attempted with the capital stated, it would be an event of more than ordinary importance, leading, as it would, to the speedy settlement of the overland route, and the consequent building of a railroad to the Pacific. It would undoubtedly be the duty of the United States Government to lend such an undertaking all possible military aid, though, with the present limited army, that would not be much. It has been repeatedly recommended to Congress, by successive heads of the War Department, that a chain of military posts should be established all along the overland emigrant route, for the protection of travelers. Had this been done, the opening of mail communications, and the establishment of stage lines by that route, would now have been accomplished. An appropriation for that purpose, by the present Congress, would be most opportune.

New York and Erie Railroad.

On and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands, retail by Rushton, Clark & Co., and by all Druggists, everywhere.

PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

"CONFLICT OF AGES"—NO. 4.

In my last, I enumerated five propositions which Mr. Beecher supposed well established, and which it may be well for the reader to re-peruse before reading this; and particularly the one which refers to the justice of God as requiring him to afford all men a fair probationary trial. I then offered other extracts, which Mr. B. thinks conclusive evidence, that mankind do not have a fair trial, from the fact, that all men, when born, are predisposed to sin, or, rather, are sinners when born, if not while in their embryo state in the womb. This state of original sin, Mr. B. concludes, must wholly repudiate the idea that men born under such circumstances can enjoy a *fair* probation. Hence the conflict; justice, right and honor demanding a *fair* trial, and birth, circumstances, original sin, absolutely forbidding the possibility of it. And still their Creator is the author of both—the intuitions of justice, as well as the providential orderer of the circumstances. Can any one wonder why the "Conflict of Ages" has existed—why the minds of good and pious Christian men have reeled and staggered under the mighty pressure? Let them speak for themselves, both the living and the dead.

Dr. Woods says—"God inflicts this tremendous evil on all men, for the sin of one man;" and then asks, "How is this proceeding just to Adam's posterity? What have they done, before they commit sin, to merit pain and death?" He says, "We apply in vain to human reason or human consciousness for an answer. It is contrary to the dictates of our fallible minds."

Prof. Hodge—"These dealings of God cannot be explained on the common-sense principles of moral government. *The system which Paul taught was not a system of common sense*, but of profound and awful mystery."

Pascal—"What can be more contrary to the rules of *our wretched justice*, than to damn eternally an infant incapable of volition, for an offense in which he seems to have had no share, and which was committed six thousand years before he was born?" And yet Pascal believed the fact.

Abelard—"Would it not be deemed the summit of injustice among men, if any one should cast an innocent son, for the sin of a father, into those flames, even if they endured but a short time? How much more so, if eternal? Truly, I confess, this would be unjust in men, because they are forbidden to avenge even their own real injuries. But it is not so in God, who says, 'Vengeance is mine—I will repay;' and again, in another place, 'I will kill, and I will make alive.' For God commits no injustic towards his creature in whatever way he treats him, whether he assigns him to punishment or life." Thus Abelard considered it just in God to cast an innocent child into eternal flames for the sin of Adam.

Dr. Chalmers says—"An individual is justly culpable for an inquitious deed, done not by himself, but by another who lived six thousand years ago," but that his own moral sense is "altogether unable to apprehend it." Pretty well for Dr. Chalmers.

Dr. Channing—"If I and my beloved friends, and my whole race, have come from the hands of our Creator wholly depraved, irresistibly propense to all evil, and averse to all good; if only a portion are chosen to escape from this miserable state, and if the rest are to be consigned by the Being who gave us our depraved and wretched nature to endless torments in unextinguishable flames, then I do think that nothing remains but to mourn in anguish of heart; then existence is a curse, and the Creator is ——. To give existence under this condition, would argue unspeakable cruelty; and to punish the sin of this unhappily constituted child with endless ruin, would be a wrong unparalleled by the most merciless despotism." Dr. Channing says, "Christianity contains no such doctrine."

Dr. Dewey—"It is in the very nature of a moral and imperfect being, to err—not to sin wilfully, malignantly—that is not necessary. And it is in the *power* of such a being to sin intentionally."

Dr. Burnap—"Every human soul comes from the hand of God as was Adam, without any decided character, but capable of virtue and holiness, though exposed to temptation and sin. It is God's will that man should commence his career at nothing, without positive character, though innocent. All that can be expected of man is that his career should be *progressive*—that his choice should be fixed on good after wavering a while. This world is a state of discipline, having in view this very end, the *production* in man of a holy character."

Dr. Channing—"A doctrine which contradicts our best ideas of goodness and mercy cannot come from the just and good God, or be a true representation of his character. The Creator waives his claims to our veneration and obedience any further than he discovers himself to us in characters of benevolence, equity, and righteousness. He rests his authority on the perfect coincidence of his will and government with those great fundamental principles of morality written in our souls."

John Foster—"How would all our ideas be confounded, while contemplating God bringing, of his own sovereign will, a race of creatures into existence in such a condition that they certainly will and must—*must by their nature and circumstances*—go wrong, and be miserable, unless prevented *by special grace, which is the privilege of only a small proportion of them*, and at the same time affixing on their delinquency a doom of which it is infinitely beyond the highest archangel's faculty to apprehend a thousandth part of the horror. To behold successive innumerable crowds carried on in the mighty impulse of a depraved nature, which they are impotent to reverse, and to which it is not the will of God, in his sovereignty, to apply the only adequate power, the withholding of which consigns them inevitably to their doom—I repeat, I am amazed to conceive what men contrive to do with their sensibility, and in what manner they maintain a firm assurance of the Divine *goodness and justice*."

Author of the Triangle—"You shall hear it inculcated from Sabbath to Sabbath, in many of our churches, that a man ought to feel himself actually guilty of a sin committed six thousand years before he was born; nay, that prior to all consideration of his own moral conduct, *he ought to feel himself deserving of eternal damnation for the first sin of Adam.* I hesitate not to say, that no scheme of religion ever propagated among men contains a more monstrous, a more horrible tenet. The atrocity of this doctrine is beyond comparison. The visions of the Koran, the fictions of the Sadder, the fables of the Zendovesta, all give place to this. Rabbinical legends, Brahminical vagaries, all vanish before it. The idea that all the numerous millions of Adam's posterity deserve the ineffable and endless torments of hell, for a single act of his, before any one of them existed, is repugnant to that reason which God has given us, is subversive of all possible conceptions of justice. The whole of that doctrine is this: Man (in the first place) is condemned, incapacitated, and eternally reprobated for the sin of Adam; in the next place, he is condemned over again for not doing that which he is totally and in all respects unable to do; and in the third place, he is condemned, doubly and trebly condemned, for not believing in a Saviour who never died for him, and with whom he has no more to do than a fallen angel. Such doctrines are calculated to drive men to scepticism, deism, atheism, libertinism; nay, to madness."

Gregory of Nyssa, concerning young children dying, says—"*The child free from all sin* finds itself in the natural state, and needs no purification for its health, because it has as yet fallen into no disease of the soul."

Chrysostom—"We baptize children, *though they have no sin*, that they may have holiness."

Athanasius, the father of orthodoxy, (says the Conflict,) was so far from believing in the general corruption of mankind, as to look upon several individuals, who lived prior to the appearance of Christ, as righteous.

Cyrill assumed that men are born in a state of innocence. He says: "We come into the world without sin. The soul has free will, and the devil can suggest temptations, but he cannot compel to sin contrary to choice."

Julian says to Augustine—"The children, you say, do not bear the blame of their own, but of another's sin. What sort of sin can that be? What an unfeeling wretch, cruel, forgetful of God and righteousness, an inhuman barbarian, is he who would make such innocent creatures as little children bear the consequence of transgressions which they never committed, and never could commit? God, you answer. What god? for there are gods many, and lords many, but we worship but one God, and one Lord Jesus Christ. What god dost thou make the malefactor? Here, most holy priest, thou fabricatest something more mournful and frightful than the brimstone of Amsanctus."

I ought to trespass no farther by quotations, but the above are only a few of the many, which might be produced, to show what a Babel has been built within the Christian Church; for the authors quoted were equally pious as well as learned. And yet, what system of religion, be it Jewish, Mohammedan, Pagan, or Papal, ever conceived doctrines so utterly irreconcilable to each other, so abhorrent and repugnant to reason and common sense, or so libelous to the character of the Divine Being? It is inquired, Were the authors of such creeds good men? Certainly they were, among the best the world ever saw. They were good in spite of their creeds. They loved, yea, even adored God, and bowed in reverence to his supposed will and order, even though it dethroned reason, and perverted even their highest, deepest convictions of right, honor, and justice. So long as men acceded to each other the right of individual opinion upon the doctrines of Christianity; so long as they made love to God and to our neighbors the basis of Christian union and fellowship; so long the church was unity. But when opinion, dogma, creedology, usurped the place of charity as the basis of Christian union, then fires and faggots, rack and torture, excommunication and anathema, became the defenders of the faith, and sectarianism advanced its written creeds into the place of God's word, and seating herself in the temple of God, declared herself to be the only rightful expounder of the scripture, and

> "With blows and knocks,
> Proved her doctrine orthodox."

To return. This "Conflict of Ages" pressed so heavily upon the mind of Mr. Beecher, that for some twenty years he almost sank under it. And who can but admire his noble, manly, unflinching integrity, in facing those mighty systems of error, hallowed by time, and honored by names, and thus bearding the lion in his den? How almost infinitely high stands such a mind above the many drivelers, who shun light and investigation. Whether Mr. B. has cut the "knot" is another question. But his fearless course is worthy of imitation.

In reading the "Conflict," all will be reminded that, as H. W. Beecher one said, what is orthodoxy in one place and age, is heterodoxy in another. And yet, he who dares think outside of a denominational creed, or popular orthodoxy, is generally subjected to the cold-shoulder and suspicion of infidelity. For many seem to think, that an earnest inquiry after truth is the direct road to impiety, infidelity, and atheism. But were it not that the martyrs of free inquiry had stained the earth with their blood, we might have held the same God-dishonoring doctrine to which reference has been made in these articles. To God alone is man amenable for his belief.

S. S. Griswold.

For the Sabbath Recorder.

THE MARTYR'S HYMN.

The bright effulgence of the sunlit day
  Had faded softly from the hills of Spain,
And solemn midnight shadows dimly lay,
  Like a dark pall, upon the silent plain;
And through the city gates there poured along,
Moved by one common impulse, a vast throng,
  Following with eager steps a martyr train,
Which went forth calmly, 'neath that starry sky,
To show to erring men how nobly Christians die.

Why is it thus—that mankind love to gaze
  Upon life's last and bitterest agony;
Have crowded round the martyr fire's red blaze,
  And listened all unmoved to pain's wild cry;
Have coldly seen the good, the true, and brave,
Pass to a fearful and dishonored grave?
  Not thus the blessed Saviour from on high,
Taught us the tide of sympathy to stay,
And turn with callous hearts from others' woes away.

Like the strange, solemn pause, before the breath
  Of the wild hurricane careers along—
So fell deep stillness o'er that place of death,
  The shadowy, starlit plain, the breathless throng,
Lit up with fitful splendor by the light
Of wavering torches, gleaming through the night,
  Now faint and flickering, now clear and strong,
Flashing and fading over cheek and brow,
And lighting up each face with wild unearthly glow.

And firm and fearless stood that noble few,
  With faith and high resolve stamped on each brow.
Alas! that they, the young, the pure, the true,
  To blinded bigotry's behest must bow!
Yet not in vain they drank the bitter cup
Not vainly were their lives thus yielded up;
  And while we weep, we bless our God that now,
The holy faith, for which the martyrs died,
Is shedding o'er the earth its blessings far and wide.

But soon a brighter brilliancy was given
  To the vine-mantled hills and dusky sky,
As shooting up toward the midnight heaven,
  In wavy spires, the lurid flames swept high,
With crackling rush, and strangely ruddy glare,
Streaming like fiery banners on the air;
  And a low murmur, like the storm's first sigh,
Stole through the throng, as eagerly they gazed
Upon those quivering forms, circled by that fierce blaze.

Was that a cry of mortal pain and fear,
  Which sounded from that glowing funeral pyre?
No! 'twas a holy anthem—strong and clear,
  And full of joy; higher, and yet higher,
It swept in waves of melody along,
Till th' heavens rang back exulting bursts of song,
  Breathing of faith and triumph, which the fire
Was powerless to quench! No wail of pain
Mingled with the rich swell of that triumphant strain.

There were man's sounding tones, full, deep, and clear,
  Like clarion's swell o'er a wild battle field;
And woman's voice, as clear as when her song
  At evening through the orange bowers pealed;
Ringing out joyfully in that dread hour,
Telling of hearts victorious o'er death's power,
  That knew not to the tempter's wiles to yield.
O! glorious they, who through the strength of God,
The path of martyrdom and patient suffering trod.

O! strong and lofty faith, which thus had power
  To pour the numbers of that sounding hymn,
E'en in the mystery of that awful hour,
  When death was gathering shadows vague and dim;
O'ermastering e'en deep human agony,
And lifting up the soul, bold, strong, and free;
  And fixing all its thoughts alone on Him
Who for man's sake, in anguish and dismay,
Trod in his mortal flesh, the dark and gloomy way!

Sarah.

Shiloh, N. J., 1854.

A WELL-AUTHENTICATED FACT.

Copied from an old paper, by request.

In the year 1814, the late Mr. and Mrs. Foster, who were lost in the Rosthay Castle steamer in 1831, were acquainted with three sisters residing in London, two of whom were very serious, retiring women, and the third just as gay and volatile. They were all elderly, which rendered the gaiety of the third less becoming, and also inclined her the more easily to take offense at any remarks made upon it; she hated the piety of her sisters, and opposed it in many petty spiteful ways; though they endeavored sedulously to accommodate themselves to her wishes, and to render the difference of their opinions as little disagreeable as possible.

One night, towards the close of the year 1814, she had been out at an assembly very late, and the next morning at breakfast was so remarkably different from her usual manner, that her sisters feared that she was either unwell or had met with some misfortune that had affected her deeply; instead of her usual incessant chatter about every person she had met, every thing they wore, and had said, and done, she sat silent, sullen, and absorbed; the gloom upon her brow was a mixture of temper and distress, which seemed to indicate a fixed resolution formed upon circumstances disagreeable to her, as if she was determined to pursue her own will, though it should lead her into trouble, rather than pursue the course she knew to be right, but would reduce her to submit to the control of another. As she ate nothing, her sisters asked her if she was unwell. 'No.' What was the matter? 'Nothing.' Had nothing distressed her? 'She had no idea of people prying into what did not concern them.' The whole of the morning she spent in her own room, and at dinner the same scene as in the morning recurred; she ate little, never spoke but to answer uncivilly, and then with an appearance of depression and melancholy that spread their influence very powerfully over the cheerfulness of her companions. She retired to rest late, and with the spirit of one that expects from sleep neither alleviation nor refreshment.

The next morning she again scarcely tasted breakfast, and seemed in the same distressed, uncomfortable state, as on the preceding day; her sisters again renewed their inquiries. She said, 'I am well and nothing pains me.' Then you have something on your mind; why will you not tell us, do we not love you, have we not the same earthly interest as you, and can we seek any good but yours in our anxious wish to share your sorrows? 'O, you have superstitions enough of your own, without mine being added; I shall not tell you what ails me, so you have no occasion to rack your curiosity; I dare say you would think it some spiritual triumph, but I laugh at such things; I am not quite old enough yet to be the victim of dreams and visions.' 'We do not live in dreams and visions, Anne,' was replied; she answered harshly, 'No, and I do not intend you shall.' The sisters looked at each other, and remained silent.

The second day passed as the first; Anne was gloomy and moody, and her sisters both from pity and anxiety were unhappy. The third morning she again arose and looked on the day as one who loathes the light, who has no object in living, and to whom the lapse of time in the prospect of futurity brings neither comfort nor hope. As her sisters looked on her, one of them suddenly said, 'Anne, what was your dream?' 'Ha! what was it? you would give the world to know, but I shall not tell you; I thought you did not believe in dreams.' 'Neither do we in general, we know them to be the offspring of a disordered stomach, confused images and fancies, when reason is dormant, and the memory of them usually passes away as soon as we are engaged in our daily avocations; yet there is no doubt, some dreams are no more sent in vain than any other affliction or warning. There is a verse in Scripture which mentions God as speaking 'in the visions of the night, when deep sleep falleth upon man." She laughed again. 'You have a verse in the Bible for every thing that suits you, but I do not choose to be warned in such a manner, and there is no doubt I shall get it out of my head in a day or two.' 'Anne, we do beseech you to tell us; if you really have had a dream from Heaven, you surely would not wish to forget it, and if not, we will help you to laugh it off.'

She answered, "Well, if I must tell you, I must; no doubt it was very extraordinary and very frightful; I should have thought it the effects of the ball, but that I never saw any thing any where in the least like it.

"I thought I was walking in the wide street of a great city; many people were walking there besides myself, but there was something in their air which immediately struck me; they seemed thoughtful and cheerful, neither occupied with business nor with pleasure, but having about them such a dignity of repose, such high and settled purpose, such grace and such purity, as never were stamped on mortal brow; the light of the city was also strange; it was not the sun, for there was nothing to dazzle; it was not the moon, for all was clear as day; it seemed an atmosphere of light; calm, lovely, and changeless. The buildings seemed all palaces, but not like palaces of earth; the pavements were all alike of gold, bright and shining, and clear as glass; the large and glittering windows seemed like divided rainbows, and were made to give and transmit none but the rays of gladness; it was indeed a place to which hope may bend, and whereon charity might dwell. I could not help exclaiming as I walked along, 'These are the habitations of righteousness and truth;' all was beauty, bright and perfect; I could not tell what was wanting to make me wish for an eternity in such a place, and yet its very purity oppressed me; I saw nothing congenial, though looks of kindness met me in every face of that happy throng. I felt nothing responsive; I returned in silence their friendly greetings, and walked on alone, oppressed and sad. I saw that all went one way, and I followed, wondering the reason.

"At length I saw them approach a building much larger and finer than the rest. I saw them ascend its massive steps, and enter beneath its ample porch; but I felt no desire to go with them, further than to the foot of the steps. I approached from curiosity; I saw persons enter who were dressed in every varied costume of the nations; but they disappeared within the porch, and then crossed the hall in white. Oh! that I could describe *that* hall to you! It was not marble, it was not crystal, it was not gold; but light, pure light, consolidated into form. It was the moon, without the coolness; it was the sun without his dazzling ray; and within was a staircase mounting upwards, all of light, and I saw it touched by the snowy feet, and white and spotless garments of those who ascended. It was indeed passing fair, but it made me shudder, and I turned away. As I turned I saw on the lower step one looking at me with an interest so intense, and a manner so anxious, that I stopped to hear what he had to say; he asked in a voice like liquid music, 'Why do you turn away? Is there peace elsewhere? Is there pleasure in the works of darkness?' I stood in silence, he pressed me to enter, but I neither answered nor moved; suddenly he disappeared, and another took his place with the same look and manner; I wished to avoid him, but seemed riveted to the spot. 'Art thou come so far,' he said, 'and wilt thou lose thy labor? Put off thine own garments, and take the white livery here.' He continued to press me until I got weary and angry, and I said, 'I will not enter, I do not like your livery, and I am oppressed by your whiteness.' He sighed and was gone. Many passed by me with looks of mingled kindness and pity, and pressed me to follow on with them, and offered me a hand up the steps which led to their mysterious change, but I rejected them, and stood melancholy and distressed.

"At length one bright young messenger came up to me, and entreated me to enter with a voice which I could not resist. 'Do not turn away,' he said, 'where canst thou go? Do not linger, for why shouldst thou weary thyself for nought? Enter thou and taste of happiness. Do not all tribes and colors press into that hall? Are they not clothed and washed and comforted?' He gave me his hand, and I entered the hall along with him.

"Here I was sprinkled with pure water, and a garment of pure white was put upon me, and I know not how, but I mounted the white staircase with my happy guide. Oh! what a light burst upon me when I reached its summit! Mortal words cannot describe it, nor mortal fancy conceive it. Where are the living sapphires—where are the glittering stars, that are like the bright radiance on which I stood? Where are the forms either, or the looks of love that breathed in the innumerable company that moved around me? I sunk down overpowered and wretched; I crept into a corner, and tried to hide myself, for I felt that I had nothing in unison with the blessed creatures of such a place; they were moving in a dance to the music, to the harmony of songs that never fell upon mortal ear; my guide joined in raptures, and I was left alone. I saw the tall forms all fair and brilliant in their ineffable felicity, their songs and looks of gratitude forming the circumstances and differences of each.

"At length I saw one taller than the rest, one every way more fair, more awful, surpassing thought, and to him every eye was turned, and in his face every face was brightened. The songs and the dance were to his honor, and all seemed to drink from him their life and joy. As I gazed in speechless and trembling amazement, one who saw me left the company, and came where I stood. 'Why,' he asked, 'art thou silent, come quickly and unite in the dance and join in the song.' I felt a sudden anger in my heart and I answered with sharpness—'I will not join in your song, for I know not the strain; I will not unite in your dance, for I know not the measure.' He sighed, and with a look of surprising and humiliating pity, returned to his place. About a minute after another came, and addressed me as he had done, and with the same temper I answered him in the same words; he seemed as though he could have resigned his own dazzling glory to have changed me; if heaven knew anguish, he seemed to feel it; but he left me and returned. What could it be that put such tempers into my heart?

"At length the lord of this glorious company, of these living forms of light, saw me, and came where I stood. I thrilled in every pulse with awe; I felt my blood curdle, and the flesh upon me tremble, and my heart grew hardened, my voice was bold. He spoke, and deep-toned music seemed to issue from his lips. 'Why sittest thou so still, when all around thee are glad? Come join in the dance, for I have triumphed! Come join in the song, for now my people reign.' Love ineffable, unutterable, beamed upon me as though it would have melted a heart of stone, but I melted not. I gazed an instant, and then said, 'I will not join in the song, for I know not the strain; I will not join in the dance, for I know not the measure.' Creation would have fled at the change of his countenance. His glance was lightning, and in a voice louder than ten thousand thunders he said, 'Then what doest thou here?' The floor beneath me opened, the earth quaked, and the whirlwind encompassed me, and I 'sunk into tormenting flame.' With the fright I awoke."

There was silence for a time, for the sisters were struck with awe. They considered the dream, and the deep impression it had made. "Anne," said they, "we cannot wish you to forget this dream; we surely believe it is from God. Your description of the holy city is much the same as we find in the Bible; 'The city hath no need of the sun, nor of the moon to lighten it, for the temple of God is there, and the Lamb is the light thereof;' all who enter there must put off their own garments, that is, their own righteousness, and must be clothed with linen clean and white, even in the righteousness of the saints, and their righteousness is of me, saith the Lord.' Those that walk in the heavenly temple, are those that have come out of great tribulation, and washed their robes and made them white in the blood of the Lamb; wisdom waits daily on the steps to call the sons of men into that temple, and the people of God try to persuade their fellows to tread in their steps. O, dear sister, you know something of the way; do hearken to the fearful warning, join us, and walk in the path that leads to heaven.' Anne's brow again darkened, and she answered, "I will do as I please; I do not intend you to preach to me." She continued in this melancholy state until the end of the week, and was found in her own room a corpse; no one knows the cause of her death; she died without disease, and without change.

* * *

CONVERSION OF LA HARPE.

The following confession, says the *New York Evangelist*, is too remarkable to be lost. As we have never met with it in English, we translate it from the French. La Harpe was a celebrated infidel writer of the last century, of the school of Voltaire. During the Reign of Terror he was seized, and narrowly escaped the guillotine. It was while he was shut up in prison that he became a firm believer in the Christian religion. He says:

"I was in my prison, alone, in a small room, and profoundly dejected. For some days I had read the Psalms, the Gospels, and some good books. Their effect had been not rapid, but gradual. Already I was restored to faith, I saw a new light; but it threw me into terror and consternation, for it showed me an abyss—that of forty years of wandering. I saw the whole evil, and no remedy; nothing around me offered the aid of religion. On one side, my life was before my eyes, such as I saw it in the light of celestial truth; on the other, death—which I daily expected. The priest no longer appeared on the scaffold to console the condemned; he ascended it only to die himself. Full of these desolate thoughts, my heart was completely prostrate, and addressed itself but in a whisper to God, whom I had just found, and whom, even then, I scarcely knew. I said, What must I do? What am I to become? I had upon the table the Imitation of Christ, by Thomas á Kempis, and I had been told that in this excellent book I should often find the answer to my thoughts. I opened it at random, and fell, on opening, upon these words, 'Here am I, my son! I come to thee because thou has called me.' I read no more; the sudden effect which I experienced is beyond all expression. It is no more possible for me to describe it than to forget it. I fell prostrate, with my face to the earth, bathed in tears, stifled with sobs, raising cries and broken words. I felt my heart consoled and expanded, but at the same time ready to break. Overwhelmed with a crowd of ideas and of feelings, I wept a long time, without retaining any remembrance of this situation, except that it was without comparison an emotion the most powerful, and the sweetest, I have ever known; and these words, 'Here am I, my son!' have not yet ceased to echo in my spirit, and to stir most deeply all its faculties."

THE OCEAN'S DEAD.

Extract from Dr. Adams' Sermon on the Loss of the Arctic.

"Nevertheless, one will sleep as safely 'rocked in the cradle of the deep,' and will as certainly be restored again, as if interred in the shadow of the church where he was baptized. 'The sea is His, and He made it.' It lies in the hollow of God's hand as really as the solid earth, and just as sure is it to render up the dead who were committed to its keeping as is any quiet church-yard. The sea has entombed many more precious than the pearls and treasures which lie around them—too precious to be forgotten of God in the day when He maketh up his jewels. There is Samuel J. Mills, the pioneer of modern missions, who was buried at sea on his return from the exploration of Africa; Professor Fisher, whose loss in the Albion made science and religion to mourn; the youthful Laurie, thrown overboard in a missionary tour by Chinese pirates; Chamberlin and Wyman, seeking temporary rest from missionary toil, and finding a longer rest beneath the Indian ocean; the eloquent Cookman, who went down in the President. There was many a goodly man and gentle woman, who, sinking with the Home and the Pulaski, were denied interment by the kindly hands of bereaved friends, and among them my brother in Christ, and in every pleasant affection, who went from our communion table to his watery grave, and whose last words, as heard in the howlings of the fatal tempest, deserve to be written in the cabin of every ship that floats: 'He that believeth in Jesus is safe, even amid the perils of the sea!' Precious are the words of God. The sea shall give up the dead which are in it."

* * *

AN AFFECTING SCENE.

The Rev. Dr. Dill, of the Presbyterian church in Ireland, who a few years since visited this country and delighted many with his eloquence, not long ago related in London a touching fact, which alike illustrates the dreadful spirit of popery and the mighty power of the grace of Christ.

A girl of about twenty years of age had renounced Romanism, and being found steadfast in her adherence to the great principles of Protestantism, she was, by the positive command of the priest, turned out of her father's house. A Protestant neighbor received her into his family, which the priest heard of, and feeling greatly disconcerted with her comfortable situation and prospects, he required her parents to take her home again, and to try by every kind and conciliatory means to win her back to the church. But she was still immovable; and at length the priest required her parents to send her to this country to her brother, whom he knew to be extremely bigoted and exceedingly fierce and violent in his temper and conduct. He had indeed been the terror of his neighborhood before he left Ireland. The priest expressed his entire conviction that he would cure his sister of her Protestantism.

Under the direction of this professed minister of the gospel, the poor girl, with a heart almost broken, was dismissed unattended and friendless, to go on board a ship to sail for a distant and strange land. When she arrived in the United States, she went directly to her brother, resolved that before receiving his protection she would tell him of her conversion, and declare her adherence to the gospel of Jesus. As soon as the first warm salutations were over, with a palpitating heart she addressed herself to her task of telling her brother that she was a Protestant, expecting to be instantly turned out of doors. Her words were brief—for the brother suddenly lifted his hands, and for a moment covered his face, while she stood trembling in expectation of the terrible blow; when he fell upon her neck and tearfully said, "Mary, it is but three weeks since I too have renounced Roman Catholicism, and have found peace in coming directly to Jesus Christ our Lord." The rest need not be told. [Watch. & Reflec.

THE DEAD.

How seldom do we think of the dead! Although we sit around the same hearth where they once sat, and read from the same volume they so loved to peruse, yet we do not think of them. Oh, how the heart throbs with wild and uncontrollable emotion, as we stand beside the dying friend we dearly love! We wildly strive, but all in vain, to prolong the precious life; we follow in deepest anguish down the dark flowing river; the spirit of the loved one passes onward alone—and we are left to linger on the shore of time. We think, as we behold the inanimate form consigned to the cold grave, and hear the damp earth thrown over it, that we will never forget the life scenes of the departed—that their memory will always remain fresh in our hearts, and almost wonder that the busy multitude can move on so briskly among us. But the sun shines brightly as ever on the new-made grave. Nature looks as gay and smiling, and the birds sing as merrily as before.

Again we mingle with the busy, jostling throng. Weeks and months roll on—we visit the graves less frequently—and gradually cease to think of the lost ones, save when some voice or incident of by-gone days recalls them to our memory. The feelings of bitter anguish and bereavement are soon worn off by the accumulating cares and pleasures of life. Thus we, in turn, must ere long pass away and be forgotten. Such is human life.

* * *

Great minds are charitable to their bitterest enemies, and can sympathize with the failings of their fellow creatures.

THE CHRISTIAN A REFORMER.

Notwithstanding the religion of Jesus Christ is a scheme for the reformation of the world, it is remarkable how few of its professors are actuated by a reforming spirit. "Go preach the gospel to every creature," is an injunction, not upon ministers merely, but upon all Christ's followers, and binds them to go about reforming their fellow creatures, not relaxing their diligence, till they see every one made perfect in Christ Jesus. The most of them, however, seem content to leave the world just as they found it; so that their lives are spent without really fulfilling their mission.

One would think that such persons would be slow to find fault with the state of the world—that they would but mildly censure what is wrong, and excuse, or justify, the errors of society as much as possible. Very far from it, however. Some of them are, of all persons, most censorious. Nothing satisfies them. They are forever complaining, because the world is not just what it should be. Instead of laying themselves to work, to make society around them better, they spend their time in murmuring because somebody else has not done it for them. Now we have a word or two to such complainers.

In the first place, suppose all who lived before you had been of the same spirit with yourselves—would the world be, even now, as good as it is? Would you now find as many comforts around you as you do? For you appear to overlook the fact, that the present generation is indebted, for the comforts it enjoys, to the self-denying labors of the men of the past. But had those men spent their lives in quarreling with the condition of things around them, instead of patiently laboring to render it better, the world would be now no better than it was before the flood. Society, in fact, would stand still. Things are not, in this world of sin, as they should be; and with all the advancement that human nature is capable of, they never will be. There will always be something to cross the desires, to disappoint the hopes, and to vex the patience. There will always be wayward people to deal with, and the tongue of slander will, probably, never cease from the earth. And if we would enjoy any tolerable share of happiness, we must create it for ourselves by trying to render men and things around us better than they are, instead of fretting because they are not already what we can enjoy.

In the second place, what right have you to claim for yourselves a better, or more comfortable, state of things, than others before you have enjoyed? Was the world made exclusively for you? Did God raise up earnest, self-denying, hard-laboring men, of the past ages and through their agency bring the world to its present state of advancement, merely for your enjoyment? Is society formed, simply that you may be the recipients of pleasure? Future generations are as much entitled to something from your self-denying labors, as the present is to the good which results from the labors of the past. But if you, and all the present generation, live simply to *receive* and *enjoy*, doing nothing to *impart* good to others, the future will be nothing benefited. According to the Scripture rule, "none of us liveth to himself," but "whether we live, we live unto the Lord." Now we "live unto the Lord," when we live for the benefit of our follow creatures; for the Lord himself, personally, is neither benefited, nor injured, by what we do.

In the third place, your complaints are against God. That the world is as bad as it is, is not, it is true, the result of a direct influence from God to make it so; but it is in strict accordance with His plan of moral government, that it is a state of trial. It is also in accordance with His plan, that the moral disorder of the world shall be remedied by degrees, and that it shall be accomplished through the self-sacrificing labors of his people, in every age. It is folly in any one, therefore, to expect to find, any where on the earth, a society already molded and fashioned just to his taste. And his loud, censorious complaints about the things that annoy him so greatly, are consequently nothing but the overflowing of a spirit of unreconciliation to the duty, which Providence has clearly laid upon him, of toiling and patiently laboring, in the meekness of a Christian, to reform mankind.

T. B. B.

Good Counsel for the Times.—Professor Maury, Superintendent of the National Observatory in Washington, is writing a series of letters, through the columns of the Richmond *Enquirer*, addressed to his son, who is now at school at Newburgh, in New York. They relate mostly to the subject of internal improvements in Virginia. In one of these letters, after referring to the honor accorded by posterity to De Witt Clinton, for his agency in the construction of the great Erie Canal, and comparing him with Mr. Jefferson, as to all which that great man achieved as a politician subsequent to the establishment of the Federal Government, he says:—

"Thus you see, my son, that one can become a great man, can win the blessings of posterity, receive the praises of the good, and die crowned with honors, without being a great general or sea captain, or anything else in the gift of 'Uncle Sam.' I hope you will never seek his service. I consider that I committed the great mistake of my life, when I accepted a midshipman's warrant in the navy. To the truly wise and good man, office, place, honors, distinctions, are desirable or welcome only as they increase his sphere of usefulness and enlarge his privilege of doing good. To win such privileges I hope will be the highest point towards which the ambition of any one of my sons will ever be directed. I do not know where their lot may be cast, for they are all to be the artificers of their own fortune. But wherever it may be, I hope they will let politics alone; seek to be useful members of the community in which they live; and study the welfare of the Commonwealth to which they belong. Let this be a rule of conduct with you now; for little boys may make themselves useful as well as great men."

THE TRAINING FOR THE TIMES.

What is the preparation required of the young for the activities of life, by the progress and spirit of the age?

1. Thorough and comprehensive mental discipline is demanded. There is needed quickness and sagacity—power to grasp intricate problems, a keenness to discover intricate and far-reaching relations. The activities of the age require activity of mind. There is danger, however, of seeking quickness and brilliancy at the expense of scope and depth. There is need of looking beyond the flash and glare of the times into those principles and laws that underlie all times and all conditions. This intellectual training must be long and thorough—the training of a day or a year will not answer in these times. Deep, long-continued, profound thought, should characterize him who prepares himself for a place among men. Thought, applied thought, is what distinguishes the modern from the ancient world. What are all of the inventions and discoveries, but thought developed and applied? Thought reduced to practice gives advancement, in the arts and sciences, in religious truth, in civilization. Thought thus applied may be either good or bad, profound or superficial, grave or gay, yet whatever their character, they will have their influence. The mechanic may develop his thought, his ideal, in the house he constructs by means of axes, saws, planes, chisels, and hammers. The farmer embodies his best thought in his farm, there to instruct the world. As is his thought, so may be his farm, so will be his instruction. The author develops his thought by means of pen or type, ink and paper, and sends it forth on the wings of wind and steam, to give light—or perhaps its office may be to ray out positive darkness. There are long iron thoughts running all through our land, commonly called railroads—long thoughts, indeed, yet very penetrating, even to the dividing asunder of rocks and mountains. Painting and sculpture are but ideas of the beautiful developed on canvas or marble.

It is interesting to trace the thoughts of the leading minds of the world in their development. How beautiful and how grand! How sublimely they loom up in the productions of a Homer, a Milton, a Shakspeare, Angelo, Rapheal, Corrigio, or a Pericles!

Corpernicus had an idea that this earth, instead of being flat and resting on the back of a turtle, elephant, or some other animal, with the sun, moon, and the whole starry host revolving about it, was but a comparatively small globe, revolving about the sun. He labored long and hard to prove this idea. He watched the heavens night after night, from youth till old age. Age and disease were wearing him away. A few observations yet remained in order to prove his problem. With trembling hand and faltering efforts these were completed. An account was written out with his own palsied hand. The printers printed it, working with one hand and holding weapons in the other to ward off the mad populace, so enraged had they become because a new thought was about to be developed and given to the world. At length the book was completed. Corpernicus lay upon the bed of death. Messengers clad in armor brought him the just-completed volume. He opened his glazed eyes, beheld his developed thought, and closed them forever. That thought has changed the whole system of astronomy.

There was another man once sitting under an apple tree. An apple chanced to drop upon his head—no strange occurrence. Most would have passed it by as a trivial affair. But it waked a thought in his mind, which never slept till the great system of gravitation was developed.

Another man saw the lightnings on their zig-zag course, careering wild and free through the heavens, a terror and astonishment to man. He thought within himself of a way by which to tame these wild and firey spirits of the clouds; so, once on a time, he sent up a silken kite to invite them down. They very cheerfully accepted the invitation—came down, and very cordially shook hands with the Doctor—and ever afterwards they were sworn friends.

Another man saw that, although these spirits of cloud and storm had made friends with man, yet they were still leading a sort of useless, wandering life. He had a thought, that perhaps he might set them to work. After much cogitation, he contrived a way by which he could set them to writing for the benefit of man, and these spirits now stand with long wire pens in hand, ready to write down your thoughts thousands of miles distant—thus, by their wizzard-like pens, annihilating time and space.

So in the social, political, and moral worlds. Great minds and pure hearts have arisen, developed their great and good thoughts, elevating society, reforming governmental abuses, purifying the moral atmosphere, and letting in the rays of truth. The world needs many more such minds. It has work a plenty for them all to do.

2. The youth of the present day need a various, a many-sided culture. The times are rich with variety of development. This development requires a manifold culture on the part of those that would enter with advantage upon the activities of life. The time was when a man could be said to be educated with a limited range of studies; but that time has passed. So many new fields of study and investigation have been opened, that a far wider range is presented to the student of the present than to the student of the past. This is beneficial in a merely intellectual point of view, irrespective of the knowledge to be acquired. Such variety of studies give variety, scope, richness and versatility to thought and the powers of mind, provided these studies are pursued with the right spirit and method. The student wants mathematics to give close, consecutive, abstract reasoning. They give accuracy, precision. They tend to form logical minds. The student wants astronomy, to unfold to him the sublimity of the universe, and give elevation and grandeur to his thoughts of the universe and of Deity. He needs the study of language, to train him in conditional reasoning, in attention and nice discriminations, to give strength to perception and memory, to refine the taste, and give ease, clearness, and polish, in writing and speaking. He needs history to unfold to him, as by a powerful magnifying glass, humanity in its various relations and tendencies. It will also furnish a sure and steady light by which to sail amid the rocks and whirlpools of life. He needs metaphysics to reveal, as by microscopic acuteness, the powers and laws of mind, and to give acuteness and depth to his mental activities. So with the whole range of studies. They all tend to develop some new power of mind, or give variety and skill to its faculties.

3. Sincerity, earnestness, are requisites for one that expects to conquer prejudice, obstacle, and foe.

> "There is in kind and frank benevolence,
> A something which has power resistlessly
> To steal into the triple-guarded breast,
> Unlock the secret chambers of the soul,
> And captivate the heart. A look, a smile,
> A word of artless kindness, oft hath wrought
> A change mysterious as the wizard's wand—
> A metamorphosis from hate to love.
> We cannot live within ourselves—we must
> Partake, chameleon-like, a shadowy hue
> Of that around us. 'Tis impossible
> That we should feel a cold indifference
> At heart, when proffered friendship fondly smiles."

Such is the effect of kind and frank sincerity in disarming the foe, the indifferent, the cold. Each one should be prepared to stand forth in the purity of his cause and the honesty of his intentions, and claim, at least, respect and kindness. He may need the higher and warmer element of enthusiasm to carry forward the great pursuits of life. This will warm and fire not only his own spirit, but those around him. This is greatly needed in the scramble and bustle and turmoil of the present age.

4. Theory and practice united in harmonious proportions are essential elements of success, eminent success, in the highest sense of the term. Mere theory alone, mere practice alone, will not do it. Theories are good if they are practicable. Practice is right if it is sustained by good philosophy. Dr. Franklin was the right kind of a theorist. He was great at experiments also. When crossing the Atlantic he was in the habit of dipping his thermometer in the ocean and noting its variation. These simple experiments caused one of the great internal revolutions of this country, transferring commerce from Charleston to New York, from the South to the North. Lieutenant Maury, by his star-gazing, and poring over old log-books, is improving the routes of navigators to a remarkable degree. By his labors, the route to Rio has been shortened seventeen days, and that to California has been shortened from one hundred and eighty days to one hundred. Let these practical theorists, these practical philosophers, be increased. This can be done only by waking up and training mind.

5. The education of the present needs much of the religious interwoven with the intellectual. The religious element of our natures must be carefully developed in connection with the other powers of our being. Strong moral restraints must be thrown around the youth of the present age, to keep them from wandering off into the numerous and ever increasing avenues of vice, that are tempting them on every hand. A living religious principle must control and energize all institutions and systems for the education of the young.

*

Foreign Operations of the American Tract Society.—Interesting intelligence was communicated at the meeting of the Executive Committee of the American Tract Society, on the 18th inst., from various parts of Europe, Syria, West Africa, Northern India, Siam and the Micronesian Islands. The Rev. Dr. Barth, of Cologne, Germany, reports the publication of the one hundreth edition of his "Bible Stories," and their translation in a dozen new languages. The Rev. Mr. Buel, of the Greek Mission, states that the Pilgrim's Progress has been issued in Modern Greek, and that a Colporteur is successfully employed in Northern Greece. He solicits English publications for the British troops at Athens and the Piraeus. The Rev. Mr. Hunter, Beyrout, requests appropriations, and writes that works of the Tract Society in Arabic, from the missionary press, have been called for at Constantinople and Alexandria. "One result of the war," he says, "will be an increased demand for them, wherever the Arabic language is spoken." The Rev. Mr. Gulich, Ascension Island, Micronesia, acknowledges the timely receipt of a grant of publications, and writes of the conversion of a sailor in that remote region, by means of a tract.

THE SECOND COMING OF CHRIST—NO. 4.

BY B. CLARK.

"Unto them that look for him, shall he appear the second time, without sin unto salvation."

The early Christians.—"The ancient Millennarians held that, after the coming of antichrist, and the destruction which will follow, there shall be a *first resurrection* of the just alone—that all who shall be found upon earth shall continue alive—that Jesus Christ will then descend from heaven in his glory—that the city of Jerusalem will be rebuilt, in the manner described in Rev. 21st and Ezek. 36th. Here they suppose the Lord will fix the seat of his empire, and reign a thousand years with the saints, patriarchs, and prophets, who will enjoy perfect and uninterrupted felicity, in a second paradise, more glorious than that of Eden. This opinion is adopted in the epistle of Barnabas, by Papias, Ireneus, Justin Martyr, and many more of the ancient fathers, and is illustrated and confirmed by many learned moderns." So says H. Adam's Dictionary. This extract is not given as testimony, but to show the *views* of other Christians.

Great Mistakes.—As the Jews have made a very *great mistake*, in overlooking the first coming of Christ, so it appears the Gentiles are making a *very great mistake*, in overlooking the second coming of Christ, and the first resurrection. There are, it is true, some very honorable exceptions in both cases. But the most common doctrine now taught (I believe) is, that there will be "*a long reign of righteousness and peace established and sustained in the earth*," before the second advent, as in the *Sabbath Recorder* for Oct. 19th. The doctrine of "*peace and safety*" will be taught when Christ comes. 1 Thes. 5: 2, 3—"The day of the Lord so cometh as a thief in the night. For when they shall say, peace and safety, then sudden destruction cometh upon them." Some will say, "Peace and safety;" some will say, "My Lord delayeth his coming;" some scoffers will say, "Where is the promise of his coming?" &c. But Jesus has told us, three times over, in the last chapter of the Revelation, "Behold, I come quickly"—"surely, I come quickly." Then what right have we do add, "after a long reign of righteousness and peace?" and thus keep the nations asleep! We read that the Wicked Powers and "war" will continue until his coming; 2 Thes. 2: 8, Dan. 7: 21, 22; and that wickedness will continue—some wise and some foolish virgins—both the tares and the wheat—"the children of the kingdom," and "the children of the wicked one," will both grow together until the harvest. Mat. 13: 38. Compare 1 Tim. 4: 1, 3; 2 Tim. 3: 1, 5; and 4: 3; 2 Pet. 3: 3, 4, 12, 13; Mat. 24: 36, 40; Rev. 16: 9, 15. And though six of the *seven last plagues* were to be poured out before Christ cometh as a thief, yet, it is said, "Men blasphemed the name of God, and they repented not to give him glory."

Objection.—But there must be universal peace and holiness, when the law shall go forth of Zion, and the word of the Lord from Jerusalem, and *the nations not learn war any more.* Isa. 2d chapter; Micah 5th chapter.

This brings to view more particulars Some things which he will do at and after his second coming. Dan. 7: 21, 22—"I beheld, and the same horn [understood to mean the Papal Roman Power,] made war with the saints, and *prevailed* against them, until the Ancient of Days came, and judgment was given to the saints of the Most High; and the time came that the saints possessed the kingdom." "And then shall that Wicked be revealed, whom the Lord shall consume with the spirit of his mouth, and shall destroy with the brightness of his coming; even him [the Papal Power] whose coming is after the working of Satan, with all power, and signs, and lying wonders," &c. A true picture of the working of the Papal Power thus far.

As the Babylonian, Persian, Grecian, and Roman kingdoms have claimed to be universal kingdoms, so the fifth universal kingdom of Christ and his saints will succeed all these other kingdoms; it will "break in pieces and consume" them, and this kingdom will "fill the whole earth." "And the kingdom and dominion, and the greatness of the kingdom under the whole heaven, shall be given to the *people* of the saints [a *Republic*] of the Most High, [holding the higher law of God above all other laws] whose kingdom is an everlasting kingdom, and all dominions shall serve and obey Him." "Do ye not know, that the saints shall judge the world?" "And hast made us unto our God kings and priests, and we shall reign *on the earth.*" "And they lived and reigned *with Christ* a thousand years." Dan. 2: 35, and 7: 27; 1 Cor. 6: 2, Rev. 5: 10, and 20: 4. "Behold, the Lord cometh with ten thousand of his saints, to execute judgment upon all, and to convince all that are ungodly among them of all their ungodly deeds, which they have ungodly committed, and of all their hard speeches which ungodly sinners have spoken against him." [This looks like a time of probation after the coming of Christ. Mat. 12: 32.] "I saw in the night visions, and behold, one like the Son of man came with the clouds of heaven, and came to the Ancient of Days, and they brought him near before him. And there was given him dominion and glory, and a kingdom, that all people, nations and languages, should serve him; his dominion is an everlasting dominion, which shall not pass away, and his kingdom that which shall not be destroyed." Dan. 7: 13. Here we see different "*nations* and *languages*" *after* he coming of Christ in the clouds of heaven, that are to be subject to him. And after the "Lord God shall give unto him the throne of his father David;" and after his apostles "shall sit on twelve thrones, judging the twelve tribes of Israel;" *then* the law shall go forth from Zion, and the word of the Lord from Jerusalem, and the nations shall learn war no more. He shall speak peace to the heathen, and his dominion shall be to the ends of the earth. "And the name of the city from that day shall be, *The* Lord *is there.*" Ezek. 58: 35.

And now, dear brethren, shall we be "like unto men that *wait for the Lord*, when he will return from the wedding; that, when he cometh and knocketh, they may open to him immediately?" (Luke 12: 36)—like those who "*wait* for his Son from heaven?" (1 Thes. 1: 10)—or, shall we be like that servant which says "in his heart, my Lord delayeth his coming?" (Luke 12: 55.)

DEATH OF DR. FAHNESTOCK.

Shiloh, N. J., Dec. 17, 1854.

To the Editors of the Sabbath Recorder:—

I deem it my duty to inform you and your readers of the unexpected and solemn death of our much-esteemed and worthy brother and friend, Dr. W. M. Fahnestock, of Bordentown. My son, F. B. Gillett, who is a student in the Pennsylvania University at Philadelphia, who was with him from the time he met with the sad disaster that terminated his existence until his death, has furnished me the following particulars, with a wish that the facts may appear before the public as they are. I give them in his own language:—

"On Monday, the tenth day of December, when coming to my boarding place, I was informed that a gentleman had fallen, across the way from our house in Second-st., down a flight of stairs which had nothing on either side but smooth walls. He fell the whole length of the stairs, breaking his umbrella and gold-headed cane, also inflicting a wound on the left side of the cranium immediately above the external commissure of the orbit. The bystanders supposing his skull was fractured, and no one recognizing him, he was taken to the Hospital. He being insensible, nothing could be learned from him, excepting the name, *W. M. Fahnestock*, inscribed on the head of his cane. About 3 o'clock, Mr. McCalley, the man with whom I board, being a police officer, related the circumstances to me, as he had heard me often speak of a Dr. Fahnestock. I concluded it must be him, and immediately went for Dr. Jackson, the oldest professor in the College, knowing that he was an intimate friend of Dr. F. I then went to the Hospital, and found him in a private room, attended by one of the nurses, very much disfigured, and covered with blood. His consciousness had returned, so that he knew me. Very soon Dr. Jackson came, and in a short time two of his distant relatives living in the city, Mr. B. Fahnestock and son, druggists in Market-st., also Mr. Cook, a class-mate of mine from Bordentown. Mr. Cook went immediately to Bordentown to take the sad tidings to his family, but Mrs. Fahnestock was not able to come. The Doctor's eldest daughter came, however, and they arrived about 9 o'clock in the evening.

"Every thing was done that human aid could procure, and our most sanguine hopes were awakened by seeing his system slowly and steadily react, which it did about 3 o'clock in the morning; and as his skull was found uninjured, there being only a flesh wound, we entertained strong hopes of his recovery. He bled profusely from the wound and nose, which stopped with returning consciousness; but about the time that reaction fully began, he commenced complaining of uneasiness in the epigastrium, and vomiting blood mingled with bile. Dr. Jackson requested that Mr. Cook and myself should stay with him, in order that we might see and know if there should be any unfavorable symptoms. His mind became perfectly clear, uneasiness of the stomach yet increasing, until the morning of the 13th, when the faith of his medical attendants began to fail, for it was found that he was slowly and surely sinking. They supposed that there were internal injuries.

"Mrs. F. and the Doctor's other daughter were immediately telegraphed for, but, as before, it was not possible that Mrs. F. could leave her home without endangering her life. At 9 o'clock his youngest daughter came, accompanied by her uncle, Elder Harrison, of Easton, Pa. The Doctor's brother, Adam Fahnestock, and his sister, Mrs. Weir, of Harrisburgh, Pa., were present the last few hours of his existence, having been telegraphed for. After the decision of the counsel, consisting of Doctors Jackson, Gibson, Norris, and Wilson, Mrs. Weir conversed with him about his future prospects; and although the delirium of exhaustion had begun, at intervals he was conscious enough to tell her that he had no fear of death—that he had long expected it, and his only trust was in the Saviour. He knew his little daughter when she arrived, and also his brother-in-law, but at intervals his mind would wander to his professional duties, expressing his views of certain medical subjects. He knew us all by voice when we spoke, as he could not see on account of the swelling originating from the wound on his head. He continued in apparent extreme agony until twenty minutes before five o'clock Sixth-day morning, Dec. 15th, when, with a convulsive struggle, his spirit took its flight to Him who gave it. At one o'clock his friends accompanied his remains to Harrisburgh, where they will be put away to their long resting place, until the resurrection morn."

The family, consisting of a feeble wife and two affectionate daughters, have lost a kind husband and father, the place in which he lived has lost a faithful and skillful physician, and the church of Christ has lost a pious and devoted member—one who was always zealous for the truth; while the literary world has lost one who has contributed much to her advancement.

W. B. Gillett.

THE SABBATH IN ILLINOIS.

The editor of the *Sabbath Recorder* will much oblige by giving the following two or three insertions in his paper:—

To the Legislature of the State of Illinois, in the Senate and House of Representatives assembled:—

Your petitioners, inhabitants of ——— and vicinity, respectfully pray that the School Laws of this State may be so amended that all meetings for the election of officers and voting of taxes be held on some other day of the week than the Seventh, and one not observed as a Sabbath by any of the citizens of this State. And your petitioners will ever show due respect.

It is reported, that the School Laws of the State of Illinois will be modified during the approaching session of the Legislature. It is therefore respectfully proposed, that all Sabbath-keepers residing in this State copy the above petition, obtain signatures, and forward the same to their own county representatives, or some other member of the Legislature, at as early a day in the session as practicable.

Samuel Davison, Farmington, Ill.
John R. Butts, Southampton, Ill.

Street Preaching in England.—The English correspondent of the *Northwestern Christian Advocate*, gives the following interesting statement concerning street preaching in England, which ought to excite inquiry as to the possibility of making this old-fashioned method of preaching Christ effectual in the large towns and cities of our own land:—

The subject of open air preaching continues to press itself upon the public attention. Almost all denominations have been more or less adopting this mode of operating on the outcast population during the fine season of the year. Even the starched clergy of the State Church have many of them taken their stand in the open air in some of our large towns. The Rev. E. P. Prust, Independent minister of Northampton, has preached many successive Thursday evenings at eight o'clock, in some of the lowest parts of the town where he resides; and his zealous labors have been most acceptable and useful. The Methodists began with these out door efforts, and although there has been a partial suspension of these labors, yet now their primitive spirit is again breaking out. Your correspondent has for the last nine years supplemented his labors in doors with one and occasionally two additional sermons in the open air, in the most destitute portions of the town where he has lived; and he can testify from actual experiment as to the beneficial result of carrying the word of life to those who will not enter our places of worship.

Missions in Kansas.—A correspondent of the N. Y. *Daily Times*, writing from Kansas City, Kansas Territory, under date of November 1, says: "Within a mile from Westport we crossed the boundary line and entered Kansas. In three miles further, we turned a little to the left of the road, to call at the mission of the Methodist Church South. Its ample buildings, well fenced fields, and capacious stacks of grain, abundantly sustain the popular character for thrift given to its manager, Rev. Mr. Johnson, a prominent candidate for delegate to Congress. He is also said to be a shrewd speculator in slaves, and keeps several at the mission. Near by are the missions of the Baptist and Quaker churches, both of which refuse to own slaves."

Revivals.—Our exchanges furnish occasional notices of revivals in different parts of the country, which are exceedingly cheering in these times of general declension. At Kent, Putnam Co., N. Y., twenty-four persons were recently baptized. At Red Mills, in the same county, some thirty persons profess to have found hope in Christ. At Natick, R. I., "a number have been converted." At Amesbury, Mass., twelve persons were baptized on a recent Sunday. At White Hall, Ill., twenty-five persons have been added to the Baptist church.

Our China Mission.—A letter from Bro. Solomon Carpenter, dated Shanghae, Sept. 19th, came to hand on the 25th inst., and will probably soon appear in the *Recorder*. It states that the new house was completed in August, and is now occupied by the families of brethren Carpenter and Wardner. Things in general at Shanghae remain much as at last accounts. Rev. Mr. Roberts had sailed for the United States, partly on account of the feeble health of his wife. Rev. J. Goddard, of Ningpo, died on the 4th of September.

"The Carol."—Such is the title of the volume of Hymns and Music for the use of Sabbath-Schools, compiled by Lucius Crandall, and published by the Seventh-day Baptist Publishing Society. Its appearance has been delayed in consequence of making it a larger book than was at first intended; but it is now all printed, and will be ready for sale about the first day of January. It will consist of 28 octavo pages. In point of mechanical execution, it will be equal to any book of the kind issued in this country.

"The Visitor."—The fourth volume of the *Sabbath-School Visitor* ended with the December number. The January number—the first of the fifth volume—will be issued in a few days. Now is the time to get up lists of subscribers and forward the money for volume five. It is hoped that no society will allow the number of papers now sent to be diminished, but that most of our societies will increase the number.

RELIGIOUS INTELLIGENCE.

The system of Industrial Schools, which has only been in operation in this country about two years, comprises more than twelve schools of this class in the city of New York, embracing two thousand destitute children, and two hundred voluntary teachers. The system has extended to Brooklyn and Williamsburg, to Newark, Philadelphia, Cincinnati, St. Louis, New Orleans, and other towns and villages throughout the country, and promises still larger results.

By the annual report of the Methodist Episcopal Tract Society, read at their late meeting, it appears that under the recent charter granted them by the State Legislature, the amount of real estate the Society is empowered to hold for the purposes of its incorporation is limited to $50,000. Personal estate for like purposes is limited to $75,000. The aggregate income of both not to be over $10,000.

At the close of a fair held by the Free-Will Baptist Society in Manchester, N. H., a few evenings since, says the *Journal*, the pastor, Rev. Mr. Davis, was asked whether dancing would be allowed. His answer was, No; for dancing did no good, it was a barbarous custom, and the first Baptist of whom we have any account, *lost his head by dancing!* The audience was satisfied with the reason.

Bishop Boone, of the Episcopal Chinese Mission, on account of the great "present distress" in that country, recommends that none but single men be sent out as missionaries at present; he will not be surprised if he has to send Mrs. Boone and his two children home; but is determined to stand by the work himself, with all the men that will cling to him.

It is said that upwards of sixty clergymen are elected to the Legislature of Massachusetts. The Newburyport *Herald* remarks, without much regard to the cloth: "Clergymen have usually made poor politicians, not one in a hundred of them equaling in legislative ability the poorest deacons that go."

The annual appropriations of the American Board have been made. The knife was applied in some cases rather severely to the estimates sent home by the different missions; still, the sum total, including the present debt of $12,000, amounts to a little more than $334,000.

On the authority of the Newark *Advertiser*, it is stated that by the death of the venerable Mrs. Susan Bradford, of Burlington, N. J., a valuable property comes into the possession of the General Assembly of the Presbyterian church.

Rev. Dr. Wightman, President of Wofford College, acknowledges in the *Christian Advocate*, a donation of five thousand dollars from a gentleman of Charleston, as the nucleus of a fund for the liberal education of young men for the ministry.

The Madiai.—The N. Y. *Observer* quotes from a private letter, dated Geneva, Oct. 20, the following passage, referring to these victims of persecution:—

"We travel hence to Marseilles in company with those dear servants of the Lord, Francesco and Rosa Madiai, with whom we have become much acquainted, and whose sweet humility, after all the noise that has been made about them, is as delightful as their faith and patience under sufferings were remarkable. They do not speak of their trials, unless questioned about them; but have much to say of the Lord's goodness. They always pray for the Grand Duke, and seem to have no feeling of ill will towards any of their persecutors. They are feeble in health, the consequence of their sufferings in prison, but strong in faith, and full of zeal in doing good. Francesco gets hold of every Italian he can find and tries to lead him to Christ."

Young Men's Christian Associations.—Through the instrumentality of a young man connected with a mercantile house in London, one was established in that city on the 6th of June, 1844, and it has now, throughout the United Kingdom, thirty-five branches. In Germany the first established was in 1847, and there are there now one hundred distinct Associations, with 5,000 members. There are in Holland, 4; in France, 38; in Algiers, 1; at Geneva, 1; in Switzerland, 20; in Australia, 1; in Constantinople, 1; in Beyrout, Syria, 1; on the shores of Africa, 1; in Sweden, 4; in the United States, 38, making a total of 248.

Barnum's Autobiography.—In a brief notice of this book, the *Independent* says:—

"We cannot suffer this occasion to pass, without uttering to parents a word of caution against that exciting and pernicious book. We regard it as one of the most dangerous books that can be put into the hands of a lad who is at all alive to a sense of the ludicrous, and not thoroughly grounded in the hatred of falsehood. By an example of great worldly prosperity, achieved by systematic deception, this book seeks to exalt lying and fraud into a science, whose feats may be employed alike to excite the mirth and to fleece the pockets of the multitude. In these times of astounding frauds, the influence of such an example is doubly dangerous. Parents should be watchful to guard their sons against its temptation."

Slavery in Kansas.—Mr. Dodson, of Georgia, brother of the editor of the Georgia *Examiner*, writes to that paper that slavery already exists in Kansas, and needs no act of legislation to permit it; that it is impossible to get white labor there, and they must have slaves; that Missouri will send half her population there to protect the territory from the control of the abolitionists. He adds, that slaves hire readily at from $150 to $200 per annum, and that Kansas was intended by Providence to be a Slave State.

Temperance Jubilee.—The election of Myron H. Clarke as Governor of the State of New York was made the occasion of a grand Temperance Jubilee, at the Broadway Tabernacle, on the evening of the 20th inst. After the appointment of officers, the exercises consisted of reading letters from distinguished friends of temperance who could not be present, and a series of resolutions, followed by addresses from John Marsh, Governor **Dutton of Connecticut, and E. D. Culver.**

Abstract of Proceedings in Congress.

SECOND-DAY, DEC. 18.

In the Senate, Mr. Shields reported a bill for the increase of the Army. Mr. Sumner presented a memorial from the American Peace Society, proposing the settlement of international controversies by arbitration. Gen. Cass presented a petition from the heirs of Gen. Worth, asking remuneration for his military services. The bill for a Department of Law was taken up, and referred to a special committee. It makes the Attorney-General, ex officio, principal officer. It also provides for an Assistant Attorney-General, to be nominated by the President and confirmed by the Senate; and, also, empowers the appointment of a Chief Clerk. The Secretary of the Interior's supervisory powers over accounts are to be exercised by the Law Department, and the Solicitor of the Treasury to be one of the bureaus thereof. The bill also makes provision for auditing and adjusting accounts, disbursements, claims and expenditures.

In the House of Representatives, a resolution, authorizing the construction of six sloops-of-war, was referred to the Naval Committee. Mr. Clingman made an ineffectual effort to introduce a joint resolution that it might be referred to the Committee on Foreign Affairs, requesting the President to tender the meditation of this Government between the powers engaged in the Eastern war. The bill for the relief of Mrs. Batchelder (whose husband was killed in the Burns excitement at Boston) was made the special order for Friday, Jan. 12. The Indian Appropriation bill was debated in Committee, and ordered to be reported to the House. The House then went into Committee on the Military Academy bill, pending which several political speeches were made. The Military Academy and Indian Appropriation bills were passed.

THIRD-DAY, DEC. 19.

In the Senate, Mr. Cass gave notice of his intention to move the adoption of Mr. Underwood's resolution of last session, in regard to Religious Liberty for Americans in Europe. Mr. C. spoke highly of Napoleon's sentiments in regard to religious liberty. Mr. Brodhead strongly supported the resolution to send relief to Dr. Kane's Expedition. The Indian Appropriation and Military Academy bills from the House were referred. The Invalid Pension bill was passed, but reconsidered, and postponed for a day. A Joint Committee of the two Houses, to adjudicate private claims, was proposed in place of the House Bill for a Board of Commissioners.

In the House, the Naval and Fortification Appropriation bills were reported from the Ways and Means Committee, and referred. The House then took up business relating to the District of Columbia. On a bill to establish Houses of Refuge or Correction, Mr. Giddings tried to get in an amendment that no person should be imprisoned except for crime or suspicion, but as this would have prevented the locking up of free negroes and selling them into Slavery to pay their jail fees, it was voted down. There was a long debate on suppressing bank notes of small denomination in the District, but the House did not get to a vote before adjournment.

FOURTH-DAY, DEC. 20.

The Senate received several memorials in favor of repealing the Kansas and Nebraska bills. The act for the naturalizing of Children of Americans born while their parents are abroad, was adopted. The Commerce Committee were directed to report whether any further legislation was necessary to protect American interests at the fisheries. The bill to preserve Life on Emigrant Ships, introduced last session, was sent to a Select Committee. The Pension bill was taken up, and an amendment, to place widows of Navy officers on the same footing as officers of the Army, was defeated.

In the House, Gen. Whitfield, Delegate from Kansas, appeared and was sworn in. The Commerce Committee were directed to report if any legislation was needed to protect Americans at sea. The House then took up District of Columbia business, and passed the act prohibiting the circulation of bank notes smaller than five dollars.

FIFTH-DAY, DEC. 21.

In the Senate, petitions were presented in favor of protecting Americans abroad in worship and funeral rites. A bill for the improvement of lake harbors was introduced; also, to finish breakwater on Lake Champlain. A resolution proposing mediation between Russia and the allies was laid over. The bill to establish a Court or Board of Commissioners of Claims was taken up, and after a brief debate adopted. Resolutions in favor of cheap ocean postage were introduced.

In the House, Mr. Stanton, of Tenn., moved that the Judiciary Committee report whether more law was required to protect United States officers in the execution of national laws. [Meaning the Fugitive Slave law, of course.] Several improvement bills and resolutions were introduced and referred. Mr. Zollicoffer brought in a bill to regulate the right of suffrage in the Territories. Some bills relating to the District of Columbia were passed, and the House adjourned.

The Jennings.—The Jennings estate would seem to be a cheat. A letter received from an intelligent Virginian in England, dated Oct. 24, says:—

"I cannot find the will of old Jennings, for the reason that Lord Beauchamp has lost it where he could not find it now. He administered the estate as of kin—Earle Howe taking possession of Acton as next heir, so that they cannot be reached except a will be found later than that now on record, which would show special devises and bequests to your ancestors or some other claimant. If the will was found, and if lapse of time did not operate as an effectual bar to recovery, what next? (1.) It would take a mint of money and many years to oust Lord Howe, and the Beauchamps have squandered away the money. (2.) A deeper fraud was never practiced or planned than this claim. It has ruined many claimants, and will ruin many more. I would not touch it, for I was cautioned about it, on my arrival, by friends, and I took their advice. Thousands of indigent knaves, who practice law in London, would starve but for the harvest they reap from the investigation of such claims; and they stimulate **inquiry and excite false hopes by newspaper** publications and letters—*lacri causa*—with the full knowledge that never a dollar could, by possibility, be recovered. 'Tis a thing almost unknown to recover claims of this character."

European News.

By the steamers Washington and America we have European dates to Dec. 9th, eleven days later.

Affairs before Sevastopol are unchanged. There has been some fighting, but none of importance. The garrison continues to make sorties. During the night of November 14th, in a hurricane of wind and rain, the Russians made a sortie from the city on the French camp, but were repulsed. On the 15th of November, several men and horses died in the camp from cold and exhaustion. On the 25th, the Russians made a sortie, but were repulsed by the English, who, in pursuing, took and retained nine guns, which the Russians forgot to spike. Another account says two seven-gun redoubts. On the 26th part of the garrison attacked the French lines, but retired with the loss of 230. The French lost 75. The defensive works of the English, between the right of their line of attack and Balaklava, were nearly completed.

The principal news by this arrival is of the alliance of Austria with France and England. A treaty was signed at Vienna on the 2d of December. The exact terms are not known, but are surmised as follows: First, That Austria regards the violation of the Turkish territory as a war against herself. Secondly, That Austria will augment her force in the Principalities, so as to enable the Turks to resume offensive operations. Thirdly, That on the demand of France and England, 20,000 Austrians will be sent to the Crimea. Fourthly, France and England guarantee that the territorial possession of Austria shall, under all circumstances, remain undiminished. Fifthly, "At present, is secret." Sixthly, Prussia shall be invited to join the alliance. Seventhly, The treaty to come into operation on the part of Austria, should Russia not come to terms before 2d January.

There is also published a letter from Count Nesselrode, setting forth the terms on which the Czar will assent to peace, namely: First, a joint guarantee by the five powers, of the protection of the whole Christian population in Turkey. Secondly, A joint protectorate of the five powers over the Principalities subject to existing Russian treaties. Thirdly, The revision of the treaty of 1841, to which Russia will assent, if the Sultan will likewise do so. Fourthly, The free navigation of the Danube.

The Maine Law.

The rise and progress of laws, in various States, prohibiting the sale of intoxicating drinks, is briefly exhibited by the following abstract:—

1851—Passed by Legislature of Maine.

1852—Passed by Legislature of Minnesota.

1852—Passed by Legislature of Rhode Island.

1852—Passed by Legislature of Massachusetts.

1852—Ratified by the people of Minnesota.

1852—Passed by Legislature of Vermont.

1853—Passed by Legislature of Michigan.

1853—Ratified by the people of Vermont.

1853—Ratified by the people of Michigan.

1853—Its submission to the people pronounced unconstitutional by the Supreme Court in Minnesota.

1853—Pronounced unconstitutional by U. S. Supreme Court in Rhode Island.

1853—State Supreme Court equally divided in Michigan.

1854—Pronounced unconstitutional in Massachusetts.

1854—Passed by Legislature of New York.

1854—Vetoed by Governor of New York.

1854—Passed by one branch of Legislature of New Hampshire.

1854—Passed by one branch of Legislature of Maryland.

1854—Passed by Legislature, but two branches fail to agree, in Pennsylvania.

1854—Passed by Legislature of Ohio.

1854—Voted for by people of Wisconsin.

1854—Pronounced unconstitutional in Ohio.

1854—Passed, in modified form, by Legislature of Rhode Island.

1854—Passed by Legislature of Connecticut.

It will be observed, that it has passed the Legislatures of seven States and a Territory. It has fallen, through Legislative disagreement, in four. It has been submitted to the people, and ratified by them, in four. It has nowhere been repealed by the Legislature, though it has been four times set aside by the Judiciary, and in one reënacted in a modified form.

It will probably be the subject of discussion in the Legislatures of all the northern States this winter, and in those of Maryland, Virginia, Delaware, South Carolina, Georgia, Kentucky, Tennessee and Texas. [Albany Eve, Jour.

The Sifting of Hard Times.—The Money article of the *Independent* says, with truth:—

"Doubtless, many men embrace the present *favorable* opportunity to fail, as they think an excuse can easily be furnished. Others there are who feel no moral obligation to make any considerable *sacrifice* to sustain themselves. They had rather take an easy course and face their creditors with a proposition to compromise for 50 to 75 cents on the dollar. Such a course, just now, is a fashionable way to make money.

"Some western merchants don't want to pay their notes, because exchange on New York costs them from 8 to 10 per cent. They 'won't stand any such shave;' not they. Very well, we think the New York merchants will not stand any such excuses. If Indiana and Illinois permit their territory to be flooded with a shinplaster currency, they must take the consequences.

"We are happy to say that the West, as a whole, is paying very well, considering all the circumstances. Hundreds of noble-minded and honorable merchants will pay, and pay promptly, let the cost be what it will. The present is a favorable time, not only to show where there is ability, but mercantile integrity."

An Extraordinary Case.—We see it stated in an exchange paper, that the Rev. Dr. Norman, formerly of the Established Church of England, in whose service he accepted a mission to Africa, having relinquished his arduous duties, has resided for the last **eighteen months in Texas, where he met** with the dreadful misfortune through long and severe illness of being deprived of both hearing and speech, is now living in Cincinnati, *a mute*, and in very destitute circumstances. Efforts are being made there by the benevolent to relieve him. Dr. Norman was born in London, and graduated at the German Universities. He is the author of quite a number of essays in various languages, and is conversant with and writes twenty-five different tongues, acquired in Europe, Asia, and Africa.

Give me Bread, or I must Steal.—The following incident will show to what destitution some of our citizens have been reduced by the stagnation of business and consequent hard times. A few days since, a respectable mechanic, who had been unable to procure employment, had expended the last farthing, had not a morsel of food in the house for 24 hours, and his children crying for bread, applied to a neighbor for assistance. He said: "You must give me bread, or I must steal. I am out of employment, and can find no work; my children are crying for food, of which they have had none for 24 hours, and they must be fed; for myself I ask not; I would willingly die; but oh! the cry of my poor starving children I cannot endure. For Heaven's sake, give me relief, and save them from starving, and me from sin and shame."

SUMMARY.

The new cent pieces, it is said, will be issued from the Mint in the course of a few days. They are considerably smaller than the old cent pieces, and form an attractive copper coin. On one side is the head of Liberty, and, the thirteen stars being omitted, the surface is plain and polished. The reverse is the same in design as the old cent, but brighter and much more finished. There is a certain amount of alloy mixed with the copper, and the perfection of the die gives to the coin a finish that has never before been attained in our copper coinage.

The case of Samuel Drury against George Wilkes and others, for trespass committed in 1849, was decided on 28th ult., in the Circuit Court of Queens' county. The jury returned a verdict for the plaintiff in the extraordinary sum of $40,000; to which the judge added $2,000 costs, in consideration of the vexatious nature of the suit. Drury, it may be recollected, was charged by Wilkes, (who was editor of the Police *Gazette*,) with getting up a tornado box or "infernal machine to kill Thomas Warner," and other crimes.

The ship Rochambeau, Capt. Stackpole, from Antwerp, arrived at New York, recently, having on board twelve Belgian convicts, and about one hundred and fifty paupers, which had been sent over by the authorities for our benefit. Sergeant Bell, of the emigrant squad, attached to the Mayor's Office, received information respecting the character of the vessel's cargo, and before the passengers had time to land, went on board the vessel, with several of his officers, and secured the convicts, who were temporarily committed to the Tombs.

For the benefit of our distant readers, says the Boston *Transcript*, no less than for the character and reputation of our city, we desire to state, that as far as we can ascertain the sentiment of Whigs, Democrats, Free Soilers, and Know Nothings, the arraignment of the orators at the Faneuil Hall meeting is regarded here as the veriest judicial farce enacted in Boston for an age. It is a stupid blunder on the part of the United States officials, and can only redound to increase the Slavery agitation.

From Halifax papers of the 12th, we learn that two men from Southern Harbor report having picked up a boat on the 16th ult., while on their way to Little Placentia, Newfoundland, and succeeded in getting her safe to Ram's Island. By their description she must be a life-boat, of iron or zinc, complete in every particular, except an air-tight compartment. She was full of water, with an ash oar lashed in the middle by a painter acting as a drag. She may prove one of the unfortunate steamer Arctic's boats.

George Beach, Esq., of Hartford, Ct., has erected a fine brick building in that city, comprising twelve comfortable tenements, which he designates "House for Widows"—being intended for the comfort and accommodation of women who have been deprived of the means of support by loss of husbands, &c. This building he has put in the hands of Trustees for that purpose—merely requiring of each tenant the nominal sum of $10 a year, which is to pay repairs, insurance, and taxes.

A case of some interest was decided the other day in the Marine Court, New York. The proprietor of the Kings County Hotel was arrested last summer, we believe, by Mayor Wall, of Williamsburgh, and put in prison for keeping his bar-room open for the sale of liquor on Sundays, contrary to law. He brought suit against Mr. Wall in his private capacity, for false imprisonment. After a hearing, the case was dismissed.

A correspondent of the *Mail*, at Cambellton, states that recently, while a herd boy was walking along the shore at Ballochgair, he picked up a portion of the bow of a vessel which bears every mark of having belonged to the ill-fated steamer City of Glasgow. It has on it, in large gilded characters, not much defaced, "City of Glasgow," and in the corner, "Let Glasgow flourish."

William Wells Brown, a fugitive slave, and author of "Sketches of Places and People Abroad," gave the Anti-Slavery Lecture at the Tabernacle, Dec. 19th. His residence in Great Britain for the last five years doubtless qualified him to utter much wholesome truth on his chosen topic—"Our National Character, and how it is viewed from a distance."

Mr. William Winter, editor of the *Ladies' Examiner*, published at Worcester, Mass., while standing in Broadway the other day, looking at a military company pass, had the breast-pocket of his coat cut open and a wallet containing $600 in money abstracted therefrom by some dexterous thief, who escaped.

The receipts of live hogs week before last, by the Erie Railroad, exceeded fourteen thousand. It is safe to estimate these at $10 each, making $140,000. At 150 pounds each, this would make two millions one hundred thousand pounds of pork.

A Mr. Stillson, a young and intelligent lawyer of Marathon, N. Y., accidentally shot himself through the heart on Friday, Dec. 15. No event that has occurred there for a long **time has produced so profound a sensation.**

On the 20th inst., a very extensive fire occurred in Broadway, near Grand-st., destroying the City Assembly Rooms, the old Olympic Theatre, and several stores and houses. The fire broke out in the Assembly Rooms, while a ball was in progress. The consternation was fearful, but all the guests escaped without serious damage.

There is a proposition being considered by some of the Banks, that the honesty and fidelity of their employés should be measurably secured by making life insurances for them, at the expense of the Banks, for the benefit of their families. This course, it is thought, would remove some of the temptations to dishonesty.

Judge John Woodhull, a resident of Lower Aquehogue, Suffolk County, Long Island, will, on the 7th day of January next, be complimented with a public festival in honor of his 100th birthday. The Judge is said to be in the enjoyment of excellent health, notwithstanding his great age.

A dispatch dated Racine, (Wis.,) Monday, Dec. 18, 1854, says: The schooner Whirlwind arrived here to-day, with a part of the crew of the propeller Westmoreland. She reports the sinking of the propeller in 25 fathoms of water, 18 miles this side of "Sleeping Bear," and the loss of seventeen lives.

The report of the Board of Education, New York, states that the number of pupils who actually attended, and were taught in the Schools, under the charge of the Board of Education, was 127,237 during the year 1852, and 123,530 during the year 1852.

Two Roman Catholic Churches at Elizabethtown and Newark, N. J., are in trouble in consequence of the priests claiming to control the property, while the people think that privilege belongs to them.

In New York, as well as in most of the neighboring towns, a great many men are out of employment, and their families are suffering for the necessaries of life. In several places steps have been taken to supply the wants of the needy.

In Canada, an attempt is making to abolish entirely the postage on newspapers and periodicals. The Postmaster General is said to be in favor of the measure.

One of the finest mansions in the upper part of New York, situated in Madison Avenue, the cost of which, exclusive of the lots, was over $21,000, sold recently for $14,500.

The Jury in the case of the Windham Bank robbers, have rendered a verdict of guilty against all the prisoners except Jones, on whose case they could not agree.

The city of New York now contains 700,000 inhabitants, and is growing at the rate of eight or ten per cent. per annum. The city of Brooklyn has over 200,000 residents.

Notice is again given, that an application will be made to the next Legislature for an act to authorize the construction of a bridge over the Hudson River at Albany.

The Boston *Atlas* states that the work of building the Hoosac Tunnel will be vigorously begun in the spring, notwithstanding the present inauspicious state of monetary affairs.

Nicholas Behan, the murderer of the Wickham family, on Long Island, was hung for the crime on Friday last. He made no public confession.

A fire occurred Dec. 12, in Philadelphia, destroying fifteen or twenty buildings, and other property, valued at $175,000.

John W. Shrock, Treasurer of Holmes County, Ohio, has absconded, taking with him some $30,000 of the people's money.

The Chicago *Free Press* claims that Chicago is the largest Grain exporting place in the world, and gives figures in proof.

Counterfeit bills on the Casco Bank of Portland, are in extensive circulation.

MARRIED,

At New Salem, Va., Nov. 30th, by Eld. Samuel D. Davis, of Lost Creek, Va., Mr. Samuel Tompson, of near New Salem, to Miss Mary P. F. Randolph, of New Salem.

At Alfred Center, Dec. 16, by Eld. N. V. Hull, Mr. Halsey M. Burdick to Miss Mary Jane Mosher, all of Alfred.

In Brookfield, Madison Co., N. Y., Dec. 21st, by Eld. J. Clarke, Mr. Henry P. Kieth to Miss Mandana C. Peck, both of the above place.

DIED,

Of injuries received on board a vessel on Lake Erie, during a gale, Oct. 30th, 1854, Nelson C. Green, son of Alvah G. Green, of Henderson, Jefferson Co., N. Y., aged 21 years and 6 months. The subject of this notice left his father's house a number of years since, with the inexperience of boyhood, plunged boldly into the dark and heartless world, faced the ocean storm, and visited its lonely and barbarous islands. After years of wandering and danger, he returned and gladdened the hearts of his friends with the purpose of settling for future life with his father. In the midst of such promises and hopes as these, the unseen and the unanticipated stroke is given, and the dream of life is ended. Nelson is no more. J. S.

Drowned by breaking through the ice while skating, at Null's Mills, near Shiloh, N. J., Dec. 9, Lewis, son of Sheppard West, in his eleventh year.

In Shiloh, N. J., December 9, 1854, Mrs. Amy Ayars, wife of Isaac Ayars, aged sixty-five years. She had been for many years a woman of great suffering, and a devoted Christian. She united with the Church at Shiloh when young.

At Bridgeton, Nov. 25, Emma Platts, wife of David Platts, aged sixty-eight years.

In New London, Ct., on the 16th inst., Lillie Annett, daughter of Beriah B. and Juliaette M. Champlin, aged 6 months.

LETTERS.

G W Maxson, Joshua Clarke, W B Gillett, A G Boss, F F Randolph, Wm Caughe, Samuel Davison, J P Livermore, H C Fahnestock, L Crandall (sent) N V Hull, B Stelle, W V Hubbard, J B Wells, J Parmalee, B B Champlin, J S Spencer, Charles Potter, Philip Collins.

RECEIPTS.

FOR THE SABBATH RECORDER:

B W Andrew, Rockville, R I	$2 00	to vol. 11	No. 26

WILLIAM M. ROGERS, Treasurer.

Board Meetings.

THE next Quarterly Meetings of the Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will be held at No. 80 Seventh-st., New York, on the first Fourth-day in January, 1855, commencing at 10 o'clock A. M.

Yearly Meeting.

THE next Yearly Meeting of the Seventh-day Baptist Churches in New Jersey will be held with the Church at Marlboro, N. J., commencing on Sixth-day before the fourth Sabbath in December, 1854.

W. C. WHITFORD, Secretary.

Western Association—Executive Board.

THE Executive Board of the Western Association will meet at Independence on the first Wednesday in January next. Persons having communications for said Board would do well to forward the same a short time previous to the meeting, as it frequently occurs that the reports are not received till after the meeting is had.

E. R. CLARKE, Sec. of Board.

Savery's Temperance Hotel
AND
TELEGRAPH DINING SALOON,
No. 14 Beekman Street, N. Y.
KEPT ON THE EUROPEAN PLAN.
MEALS AT ALL HOURS OF THE DAY.
LODGING ROOMS,
From $2 to $3 per Week, or 50 Cts. per Night.
Bela Sawyer, Sup't. John S. Savery, Proprietor.

Woodworth's Youth's Cabinet.

A New Ballad for Yankee Doodle—by Brother Jonathan.

To every body, far and near,
In all this Yankee nation,
Who'll hear my song, I'd like to give
This piece of information:

Chorus.—The *Cabinet* is just the thing
For merry boys and girls, sir;
There's nothing like it in the land,
That's making such a noise, sir.

Woodworth's Youth's Cabinet (the name
Scarce fits my jingling measure)
Is the young people's magazine,
That yields unceasing pleasure.

Among its rivals, 'tis the best;
It beats the whole to pieces;
'Tis made by "Uncle Frank," for all
His nephews and his nieces.

It treats of strange and curious things,
In nature and in art, sir;
There's nothing wondrous in the world
That here plays not its part, sir.

It tells its readers, now and then,
Of famous men and women;
Of beasts and birds; of fishes, too,
And of the sea they swim in;

Of travels, voyages, and deeds
Of peril, and of glory;
It chats in prose and poetry,
In fable and in story.

It hunts for curiosities
In near and distant places,
And pictures, racy, rich and rare,
Its treasury embraces.

Its riddles, puzzles and charades,
Too numerous are to mention;
The time would fail me to rehearse
The things that claim attention.

Whoever reads its pages o'er,
(There's no mistake about it,)
Is sure to find, ere he's aware,
He cannot do without it.

'Tis issued every month, you know;
And please these facts remember:
The volume now has just commenced,
'Tis finished next December.

And by the way, 'twere well to note
Another circumstance, sir:
For one whole year, you've but to pay
One dollar in advance, sir.

So please the money now enclose
To *Woodworth, New York City,*
One hundred eighteen Nassau street—
And I will end my ditty.

☞ The publishers of such newspapers as receive this notice, are requested to give the foregoing ballad (not including this notice) two or three insertions—the first insertion in their literary department. To those who comply with this request, the undersigned will send one copy of *Woodworth's Youth's Cabinet* for two years, or two copies for one year, at the option of the publisher respectively. D. A. WOODWORTH.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of Francis C. Woodworth, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year.*

Great Inducements for Clubbing.

4 copies one year, 87½ cents each $3 50
6 copies one year, 83⅓ cents each 5 00
8 copies one year, 75 cents each 6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

Money and post-office stamps may be sent by mail, at the risk of the publisher.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year.*

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown wtth trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.
Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M. JOHN O. STERNS, Superintendent.

Miscellaneous.

The Battle Field.

If any who have read the accounts from the battle fields around Sevastopol are not already sick of War, let them peruse the folfollowing description of the field after the battle of Inkermann:—

On the evening of the battle, I went over the field. I think I have said, over and over again, that it was a sight which could never be described. A considerable number, some 800 to 1,000, Russians killed and wounded were lying among our tents, and here also were many, too many, corpses of Zouaves and French Infantry of the line. All our wounded had been removed, and the wounded of the enemy were being gathered in. The kindness and attention of our fellows to their helpless enemies was beyond all praise. They brought them water, got knapsacks to put under their heads, and borrowed blankets in which to cover them from the raw night air; here and there, small groups of them stood absorbed in pity round some prostrate foe, to whom their kindness came too late, and who, shot either through the head or lungs, gasped out his existence in painful sobs, or terminated it in a horrible convulsion which made your blood curdle to hear. A little above the line of tents was the brow of the hill overlooking Inkermann Hights. Here was the spot where the allied artillery engaged that of the enemy after the retreat, and here the sight was sickening indeed. There is nothing so awful as the spectacle of the bodies of those who have been struck down by round shot or shell. One poor fellow of the 95th had been struck by two 24 pounders in the head and body. A shell afterward burst on him and tore him to pieces, and it was only by the fragments of cloth, with the regimental buttons adhering, that you could tell that the rough bloody mass which lay in the road had ever been a human being. But it is useless to dwell on these sickening details; suffice to say, that here, among the carcases of some 200 killed and wounded horses, lay the bodies of our brave English and French artillerymen, all more or less frightfully mutilated. Some had their heads taken off at the neck, as if with an axe; others their legs gone from the hips; others their arms, and others, again, who were hit in the chest or stomach, were as literally smashed as if they had been crushed in a machine. But it was not alone the allies who lay here; on the contrary, there were ten Russian corpses for one of theirs; but the latter were all killed by musketry before the artillery came up. On this spot the Russians kept dropping shells the whole night, but their vindictive efforts were in vain; all who lay in reach of their missiles had suffered the last which they were to endure on earth.

Passing up the road to Sevastopol, between heaps of Russian dead, you came to the spot where the Guards had been compelled to retire from the defense of the wall above Inkermann Valley. Here our dead were nearly as numerous as the enemy's. Across the path, side by side, lay five guardsmen who were killed by one round shot as they advanced to charge the enemy. They lay on their faces, in the same attitude, with their muskets tightly grasped in both hands, and all had the same grim, painful frown up their features, like men who were struck down in the act of closing with their foes. Beyond this, the Russian guardsmen and line regiments lay thick as leaves, intermixed with dead and wounded horses. The latter, with fractured limbs, were now and then rising, and after staggering a few steps, rolling over among the corpses, snorting and plunging fearfully. Up to the right of the wall was the way to the Two-gun Battery. The path lay through thick brushwood; but the path was slippery with blood, and the brushwood was broken down and encumbered with the dead. The scene from the battery was awful—awful beyond description. I stood upon the parapet at about nine at night, and felt my heart sink as I gazed upon the scene of carnage around. The moon was at its full, and showed every object as if by the light of day. Facing me was the Valley of Inkermann, with the Chernaya like a band of silver flowing gracefully between the hills, which, for varied and picturesque beauty, might vie with any part of the world. Yet I shall never recall the memory of Inkermann Valley with any but feelings of loathing and horror; for around the spot from which I surveyed the scene lay upwards of 5,000 bodies. Many badly wounded also lay there; and their low, dull moans of mortal agony struck with horrible distinctness upon the ear, or, worse still, the hoarse, gurgling cry and vehement struggles of those who were convulsed before they passed away. Around the hill small groups of men with hospital stretchers were searching out those who still survived; and others, again, with lanterns, busily turning over the dead, looking for the bodies of officers who were known to be killed, but who had not been found. Here also were English women, whose husbands had not returned, hurrying about with loud lamentations, turning the faces of our dead to the moonlight, and eagerly seeking for what they feared to find. These latter were far more to be pitied than the inanimate forms of those who lay slaughtered around. The ambulances, as fast as they came up, received their load of sufferers, and even blankets were employed to convey the wounded to the rear. Outside the battery the Russians lay two and three deep. Inside the place was literally full with bodies of Russian Guardsmen, 55th and 20th. The fine, tall forms of our poor fellows could be distinguished at a glance, though the gray great-coats, stained with blood, rendered them alike externally. They lay as they fell, in heaps; sometimes our men over three or four Russians, and sometimes a Russian over three or four of ours. Some had passed away with a smile on their faces, and seemed as if asleep; others were horribly contorted, and with distended eyes and swollen features, appeared to have died in agony, but defying to the last. Some lay as if prepared for burial, and as though hands of relatives had arranged their mangled limbs, while others, again, were in almost startling positions, half standing, or kneeling, clutching their weapons, or drawing a cartridge. Many lay with both their hands extended toward the sky, as if to avert a blow, or utter a prayer, while others had a malignant scowl of mingled fear and hatred; as if, indeed, they died despairing. The moonlight imparted an aspect of unnatural paleness to their forms; and, as the cold, damp wind swept around the hills, and waved the boughs above their upturned faces, the shadows gave a horrible appearance of vitality; and it seemed as if the dead were laughing, and about to rise. This was not the case on one spot, but all over the bloody field.

The Russian soldiers, I have already remarked, were infinitely inferior in appearance to those we met at Alma. In all that relates to discipline and courage, our late antagonists were far superior. They were all clean, but ragged in the extreme. None had knapsacks, but merely a little canvas-bag of that disgusting, nauseous-looking stuff they call their bread. No other provisions were found on any. The knapsacks, I presume, were left behind, in order that they might scale the hights on our left with greater facility. Every man wore strong, well-made Wellington boots, of a stout but rough-looking brown leather. On none, that I have heard of, were found either money or books. On many were miniatures of women, and locks of hair. They appear to have been veteran troops, as a large number bore the scars of previous wounds. The dead officers, as at Alma, were with difficulty to be distinguished from the men. Their officers behaved very well.

The Sultan's Firman against Slavery.

The following is the firman lately addressed by the Sultan to Mustapka Pacha, General-in-Chief of the Imperial army of Batoum, interdicting the commerce of slaves in the Black Sea:—

"Man is the most noble of all the creatures formed by the hand of God, who destined him to be happy in making him free-born; but, contrary to that decision, the Circassians indulge in the strange habit of selling their children and relatives as slaves, and even of stealing children from each other, in order to sell them like animals or articles of furniture. These proceedings, incompatible with the dignity of man, and contrary to the will of the sovereign Creator, are altogether reprehensible, and I condemn them absolutely. Wherefore I have just given orders that, to prevent that state of things from being continued, counsels and directions should be given to the Circassians, and at the same time proper measures be adopted to prevent the embarkation of slaves on the coast; and in order that this decision be known to all the civil and military authorities in these districts, the present firman has been rendered expressly by my imperial divan. Wherefore, a vizir being thus informed of what I desire, you will proceed with that zeal and high intelligence which distinguish you, to make known my sovereign will to the Circassians and all others concerned, by publishing it in the most detailed manner. You will do all that your sagacity and experience will suggest to you to put an end to that traffic, and to prevent the passage and embarkation of slaves in the waters under your command; and besides, as it is urgent to punish all who contravene these orders, and are guilty of selling their children or relatives, or the children or relatives of others, you will not lose sight of that point; in fine, you will pay every attention to do every thing indicated above, and you will show full respect to the noble cipher with which the present document is adorned. Given in the ~~second~~ decade of the month of Mouharrem, 1271 (beginning of October, 1854.")

Burning of a Ship at Sea.

The St. Helena correspondent of the N. Y. *Journal of Commerce* furnishes a narrative of the burning of the British ship Polar Star, and the escape of her crew and passengers, in all ninety-six souls, after suffering the agonies of suspense for three days and two nights. The following is the narrative of Captain Walker:—

Sunday, Oct. 1, 1854, lat. 31° 00′ S., lon. 25° 00′ W., at 8 A. M., I was alarmed by the cry of fire, which was immediately confirmed by the sergeant of the detachment of Royal Artillery which was on board rushing into the cuddy calling to this lieutenant, "The ship is on fire, sir; the ship is on fire." I immediately rushed out on deck, and found the statement but too true. On going forward I found the smoke issuing out of the fore-hatchway in a dense black cloud. I immediately ordered the helm to be put up, and let the ship go off before the wind. The smoke then began to ascend in a thick, black cloud, up the main hatchway. All hands, troops and passengers, were immediately set to work with pumps and buckets to pour water down the hatchways, it being impossible for any one to get below. After working with the water for some time, and finding that the fire was gaining, I ordered all hatches to be put on and securely battened down, to prevent any air from getting below. After getting hatches secured, cleared away the launch and hung her over the side in the tackles, fearing the flames would burst up the hatchway and consume her. After seeing the boats all right, we cut holes in the deck, fore and aft, to insert funnels into, being careful to stop up the holes when the funnels were removed from one hole to another. During the whole of this time, no pen can describe the distraction and confusion among the women and children, many of them with scarcely any clothing on them, and no possibility of getting any. We now found ourselves in a most deplorable position; for, in addition to having our ship burning under us, we found that we had neither water nor provisions on deck, one thousand miles away from land, and our boats not capable of containing more than two-thirds our number if obliged to have recourse to them Noon: crew and passengers working unceasingly with pumps and buckets, in hopes of keeping the fire under. Observing a great deal of smoke to escape out of the topgallant forecastle, we immediately filled up all the seams and crevices, and covered all over with a wet sail. About 4 P. M., made an attempt to get down through the poop into the after storeroom, and succeeded in getting up two or three bags of biscuit, two or three hams, and a small keg of spirits. At 8 P. M., divided the troops, passengers and sailors, into two watches; Lieut. Temple taking charge of one watch, and myself the other. They were then told in which boat they would have to go, in case of necessity, so as to have as little confusion as possible at the last moment. Sixty were named for the launch, twenty-two for the pinnace, and fourteen for the gig. The watch was then set to work again, and continued throughout the night to work incessantly and cheerfully. At daylight on Monday morning sent one hand up to the mast-head, hoping some sail might providentially heave in sight, as that was our only hope of escape—the boats being sure to swamp if made use of. Noon—strong breeze and a dark, gloomy atmosphere; all hands working most indefatigably, and making every effort to keep the fire under. At 6 P. M., darkness again closed in, without having seen any sail or signal of delivery. During this day, oh! how anxiously every eye was directed round the horizon, so long as a blink of daylight remained; but in vain—nothing was to be seen afloat but our burning ship, the smoke issuing out from every aperture where any air was admitted. At 8 P. M. set the watch again, and relieved each other during the night. At day-light sent another look-out up to the mast-head, but nothing was to be seen. At 6 A. M. got some water out of the tank and found it to be almost up to boiling heat. The deck becoming very much heated. Noon—strong breeze and cloudy. Nothing in sight; crew all at work making every effort to suppress the fire and keep it from bursting forth. At 6 P. M., just as night was again closing in for the third time, and with it almost every hope of any succor, it pleased God to bless our eye and cheer our hearts with the sight of a ship on our weather bow. All hands immediately rose up and gave three cheers; but as darkness was closing in fast, they were admonished not to build their hopes too high, for fear they should not see our signals, whereby the disappointment would only be the greater. We immediately commenced firing minute-guns, and burning blue-lights, which were promptly answered, and we had the happiness of knowing that we were seen and our signals understood. The ship was fast bearing down to us. At 7 P. M. she rounded to under our stern, when Lieut. Temple and myself went on board to explain our situation. The ship proved to be the Annamooka, from Callao, bound to Cadiz. Capt. Hutchinson promised to render us all the assistance in his power, and lay by us till daylight. At 8 P. M. we returned on board again, and sent all the women on board the Annamooka. At daylight Capt. Hutchinson went round the decks with me, and examined all the holes that had been cut, feeling the heat of the decks, &c. His opinion perfectly coincided with mine and Lieut. Temple's, that she could not possibly hold out much longer, and that as soon as the hatches were lifted, the flames would ascend; nothing but the unceasing exertions of the crew and passengers, and having kept everything battened down, had saved the ship from being consumed before. I immediately sent what live stock, &c., we had, together with the passengers and some of the troops, on board the Annamooka, keeping sufficient on board for the boats to carry without being too deep. After making the boats fast, under the lee quarter, with one or two hands in to keep them off, I ordered the hatches to be taken off, when immediately the ship was enveloped in a cloud of smoke. In less than ten minutes the flames burst up the main hatchway. All hands were then ordered to the boats and to shove off, which had not been done more than ten minutes before the mainmast fell over the side with a loud crash, tearing up the decks and dragging down the fore-topmast and mizzen-topmast with it. In a short time after, both fore and mizzen-masts fell. The ship was now one livid mass of flames from end to end, and fast consuming. At dusk, as near as we could tell, she was burnt to the water's edge. At 9 P. M., nothing to be seen; so, concluding that she had gone down, made sail and stood away to the eastward for St. Helena.

I remain, yours respectfully,
(Signed) HENRY WALKER,
late commander of ship Polar Star.

ST. HELENA, Oct. 21, 1854.

Bossuett's Remains.

By order of the Bishop of Meaux, the leaden coffin, recently discovered, containing the the mortal remains of Bossuet, was opened on the 14th Nov. The head was found covered with four folds of linen, which was cut away with a pair of scissors, and the features were then seen. They were much less changed than might have been expected, considering that the body has been buried a century and a half. The head was leaning a little to the right, like to that of a person asleep, and the left part of the face was, in particular, exceedingly well preserved, and at once reminded the lookers-on of Rigand's portrait of the deceased. The mouth was open, the eyes shut, the nose somewhat fallen in, the hair white, and the moustaches and imperial visible. The skull had been sawed across, so as to allow the brain to be taken away, in order to let aromatic substances be placed in its stead. An artist who was present took a sketch of the face as it appeared when the coffin was opened. When it was known that the features of the deceased could be seen, a great number of persons hastened to the cathedral. Several ecclesiastics also arrived from Paris, and among them the curé of St. Roch and the curé of St. Louis d'Antin. In the night of the 14th a glass was fixed over the face, so as to preserve it from the contact of the external air, and the next day, at 10 in the morning, a funeral service was performed, at which the bishop officiated. Pontifical ornaments covered the coffin, a crosier was placed close to it, and Bossuet once more appeared as bishop in his own cathedral. All the functionaries of the town were present on the occasion, as well as a large number of other persons. After the mass had finished, the crowd walked round in order to see the features of the deceased. The coffin was replaced, in the evening, in the vault. Bossuet died in 1704.

The Retina.

This is a thin coat on which every thing we look at is painted by the light with a wonderful clearness and accuracy. It is connected with the optic nerve, which is the messenger between the world outside and the brain inside. Besides many other parts which make up the machinery of the eye, there are muscles which are so placed, and are so obedient, that as quick as thought, you can pull one chord and the eye will turn to the right, or pull another and the eye will turn to the left, or up or down, or round, while one steadies and regulates the motion of the rest.

But the retina is the strongest picture gallery in the world. All the great galleries, and all the splendid paintings that have ever been seen, are nothing to it. If you stand on the top of a high mountain, and can look around you thirty, or forty, or fifty miles, all that great picture is painted by the light on the retina, with all the colors, and shapes, and sizes, more correctly than could ever be done by the art of man. This great picture is painted with a finer pencil than any painter ever used. All the landscape, with hills, valleys, towns, rivers, and sky, is painted on this delicate canvas only half an inch in diameter. There was in the Crystal Palace a gold dollar, upon which the Lord's Prayer was engraved on one side, and another curiosity of engraving in the shape of a merchant's business card, consisting of several lines of writing, all in a space which the head of a good-sized pin would cover. But this is nothing in comparison with painting such a picture as may be seen from the spire of Trinity Church, New York, in a space only as large as a sixpence.

This is proved by actual experiment with the eye of some large animal, say an ox. By taking the two outside coats off from the back part of the eye, so as to leave the retina exposed, you have an opportunity of seeing any object which is reflected upon it. Now close the shutters of the room, and set the eye in a hole prepared for the purpose, looking out, and the light will paint every thing in reach of the eye on the retina, the same as though the animal were alive. Houses, trees, men walking, and every thing outside will be painted in the small space, and upside down. The optic nerve sets them right again by the time they get to the brain. [Wm. O. Bourne.

Facts from the Census.

The following interesting facts are gleaned from the volume prepared by Debow, and printed by order of Congress:—

At the close of 1854, the total population of the United States, upon the supposition that its average ratio of increase has been maintained, may be stated in round numbers at 26,500,000. The extraordinary increase is owing in some measure to the inclusion of those brought in by annexation.

The numbers of white males in the United States in 1850 was 10,026,402, and of white females 9,526,666. Of these, 8,786,968 males and 8,525,565 females were ascertained to be native born, and 1,239,434 males and 1,001,101 females to be foreign born.

In New England the females are always in excess, and in some cases as much as 3 in 100, as in 1820. In all the other divisions of the Union males are always in excess for every period, the excess being greatest generally in the South West, where it is about 100 males to 91 females. In the Territories and California there are nearly three times as many males as females.

For very old persons, the excess is with the females, the exceptions being chiefly in the new States.

The free colored population of the United States in 1850 amounted to 434,495, of whom 275,400 were black, or of unmixed African descent, and 159,095 mulattoes, of mixed African and other blood.

The declining ratio of the increase of the free colored in every section is notable. In New England the increase is now almost nothing.

The number of fugitive slaves, or those who had absconded during the year 1849–50, and had not been heard from, was 1,011 by the reports.

There were in 1850 in the United States 208,724 males, and 225,771 females, of the free colored population.

As with the whites, in New England with the free colored the females are always in excess.

The number of slaves in the United States in 1850 was 3,204,313.

When slavery existed in New England, the females were largely in excess. In 1830 there were over three to one male.

The total number of families holding slaves, by the census of 1850, was 347,525. On the average of 5.7 to a family there are about 2,000,000 persons in the relation of slave-owners, or about one-third of the whole population of the white States.

Counting jails, hotels, &c., as a dwelling, upon an average for the Union there ore 16.82 houses for every 100 white and free colored persons.

Those 100 years of age are only one in about ten thousand of the total population.

The average age, by the census, was as follows: Whites 23.10 years; free colored 24.54, and slaves 21.35—the aggregate average of the duration of life being thus only 22.89 years.

The aggregate number of persons deaf and dumb, blind, insane and idiotic, by the census of 1850, was 50,944, being one for every 406 persons; or one deaf and dumb for every 2365, and one blind for every 2368.

Of the native population of the States, 13,103,650 still reside in, and 4,176,225 reside out of the States in which they were born.

It appears there were in 1850 within the United States 961,719 persons born in Ireland; 278,675 in England; 70,550 in Scotland, and 29,868 in Wales, making a total for Great Britain and Ireland of 1,340,812, which is considerably more than half of the total foreign born residents in the country. From France there are 54,069; from Austria 946; from Prussia 10,549, and from the rest of Germany 573,225.

Wintering Stock.

Much of the profit of rearing cattle depends upon the manner of keeping them through the winter. If they are suffered to lose flesh during the cold season, and turned out to pasture "spring poor," it takes a long time to regain what they have lost. With the best quality of early cut and well made English hay, with regular and judicious feeding, and comfortable quarters, a stock of cattle, from the oldest to the youngest, may be made to thrive all winter, to gain size and flesh; with a small allowance of meal, potatoes, turnips, or other roots, they would do better.

Our horses, cattle, and sheep, were originally constituted to subsist the year round on green and succulent food.

By domestication they have been gradually introduced from a warm to the cold climate of the north, where, as with us, they generally have to be fed on dry forage for six months or more, every year. This, in some degree, is placing them in an unnatural condition, and it seems to us, it is a strong argument in favor of a more extensive root culture among us, for feeding purposes.

Most farmers have more or less coarse fodder, such as poor hay, corn fodder, straw, &c. And many commence feeding their cattle exclusively on these the first part of the winter, or till it is used up, and seem to think it is a "good riddance of bad rubbish." Cattle and sheep, doubtless, like a change of food as well as man, and when kept in good condition they seem to relish a foddering of meadow hay, corn-fodder, or straw occasionally; but if fed entirely on such fodder the first half of the winter, they lose flesh, and will be apt to come out in the spring in poor condition, in spite of English hay.

Corn-fodder is as nutritious as common stack hay, when fed in connection with it, but to compel cattle to live on such fare for weeks together, is, as some one has said, "absolutely cruel, as it makes their teeth sore when fed for a length of time." A better way is, to give cattle one foddering a day of corn butts, and that at the last feeding at night, and if they have a pretty stout allowance given them, they will eat it nearly clean before morning—at least, what they reject will hardly pay for passing through the straw-cutter. Cattle, to do well, must have drink as well as food; and a free use of card and brush adds to their good looks.

[Granite Farmer.

Improved Spark Arrester.

The Spark Arresters applied in the repair shop of the New York Central Railroad Company, are probably superior to any others in use for the purpose designed. Their peculiar points are in the form and construction of the deflecting cone, and in the application of the wire netting. The form and dimensions of the inside chimney are also different from the usual proportion. The deflecting cone is made of sheet iron. Its form may be understood by describing its shape in its cross-section. The rolling or bent portion is two semi-circles, each twelve inches in diameter and twelve inches apart. In plan, it would be half of a hollow cylindric ring of three feet outside diameter. The sides of the cone, proper, are tangent to the inside of the circular surface of the ring, the angle of the point of the cone being a right angle, or 90°. For such a deflector of three feet diameter, the top of the outer casing is four feet diameter. From a little above the outer edge of the deflector, a wire netting extends diagonally (or conically) downward, so as to meet the inside of the outer casing. Above, all is open. The sparks are thus deflected by a very large cone and by the netting. There is no back pressure of steam against the latter, as is the case in the "bonnet pipe." The deflecting process is so complete as to secure about all of the sparks. The smoke is not "trailed" on the outside. The inside chimney, for a 16 by 20 inch cylinder, is 16 inches at the base; contracted to 11 inches at eight inches above the base; and afterward regularly enlarged to 14 inches at the top. The cone is placed centrally over the two blast pipes, by plumbing downward when the boiler and frame of the engine are level. Great care is exercised in this respect, and a more than usually perfect vacuum is obtained in the smoke-box—thereby materially increasing the strength and efficiency of the draught.

[Railroad Advertiser.

Hints for Farmers.

Sand your Stalls.—Let fresh, clean sand be sprinkled every day over the floors of your tie-ups. This will keep the animals clean, and prevent their being attacked by vermin. Every morning, remove all the excrement to the manure shed, and throw over it a few handfuls of gypsum or pulverized charcoal.

Charcoal for Hogs.—Provide a trough or other suitable receptacle, fill it with charcoal and place it in your hog-pen. Few articles that can be administered to swine, will prove more beneficial than this.

Salt for Horses.—Deposit a lump of rock-salt in your horse's manager, and allow him to have free access to it.

Fence Posts.—Char your fence posts to a coal before setting and set them top down. You will find this to be an excellent preventive against rot. Posts, thus treated, will last much longer than if set in the ordinary way.

Gates are much handier, and far more economical in the long run, than bars. At every entrance, set a good stone post firmly in the soil, and append thereto a light but strong gate. With the proper materials and tools, almost any person can construct a good and efficient gate, and hang it. It should also be protected from the weather by a coat of paint.

Stone Steps will be found much more economical than wooden ones. Place a set at every door, where you are not particularly anxious about the "ornamental." They may cost you a trifle more at first, but they will be the cheapest in the end. Let a good scraper be firmly inserted at one end.

Sink Wash.—Arrange so that all the water from the sink and wash-room may be conveyed to the compost heap; also the urine made on the premises, and the rich liquid from the privy. From twenty to twenty-five loads of excellent manure may be made in this way, annually. [Germantown Tel.

DAVY CROCKETT'S FAMILY.—The Hickman *Argus*, of Friday last, says that the wife and daughter of the distinguished patriot and eccentric genius, Davy Crockett, passed through Hickman last week, on their way to Texas, to get possession of a portion of the land donated by the State of Texas to the heirs of those who fell at the battle of Alamo during the struggle for independence. It says the widow is a plain, sensible woman, about sixty-five years of age, and the daughter is a woman of a similar appearance, except in age, being about thirty-five. Davy Crockett had three sons, two of whom died lawyers and politicians of some distinction, one of whom was the Hon. John W. Crockett, who died in Memphis about two years ago, and who had obtained a brilliant reputation as a man of remarkable ability, popular manners, and sterling worth. He at one time represented his father's district in Congress, and was spoken of as a Whig candidate for the Vice-Presidency.

BRISTOL AND ITS WORTHIES.—Southey was the son of a Bristol tradesman, and was born and bred in that city. Coleridge, the poet and metaphysician, was also a Bristol man. In painters Bristol has been singularly prolific—Sir Thomas Laurence, and a yet greater man, Turner; Danby, Bird, Rippingille, and others. In sculpture we may name Baily, whose "Eve at the Fountain" would alone suffice to render his name famous in the annals of art. As examples of scientific distinction, Pritchard, the author of the "Natural History of Man," and of elaborate researches on the subject of insanity, and the two Carpenters, father and son. The monument of the great author of the "Analogy," Butler, Bishop of Bristol, may be seen in the cathedral of that city.

Mozier, an American sculptor at Rome, has lately finished a statue of Truth, in which the personification is a female figure, armed with a two-edged sword, wearing upon her head a helmet, and pointing with her sword to a mask at her feet, just struck from the wearer, while with her left hand she gathers her garments about her to avoid contact with Falsehood. On the front of the helmet are serpents supporting a ring, emblematic of wisdom, and on her breast plate a lilly, symbolizing purity.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, asfollows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed *meantime*, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. SANDS; retail by RUSHTON, CLARK & CO., and by all Druggists, everywhere.

GEOLOGY AND THE BIBLE.

Copied by request from an article by David N. Lord, editor of the Theological and Literary Journal, entitled "Genesis, and the Geological Theory of the Age of the Earth."

How is it that, at a period when unusual efforts have been made for the religious instruction of the young and the general diffusion of sacred knowledge, a distrust of the inspiration of the Holy Scriptures and doubt of their authenticity has sprung up and gained a wide diffusion among the classes who have enjoyed, in a large degree, the means of an enlightened and religious education? Of the fact there is no room for doubt. It is so conspicuous as to attract the notice of observers in every direction, and excite surprise and alarm. It cannot be regarded as resulting from the exertions that are made by the avowedly infidel to propagate their sentiments, as their influence is chiefly expended on those of a different circle. It springs undoubtedly from doctrines that are taught them by persons of their own sphere, and that enter as elements into the system of popular education, and doctrines that, instead of being openly hostile to revelation, are masked under the form of facts or truths of natural science, metaphysics, or some other branch of knowledge that is not directly connected with religion. It were easy to verify this by a multitude of proofs, but it cannot be necessary. It is known to all familiar with the subject, that speculations respecting the structure of the universe, the nature of the mind, the causes of perception, the laws of life, the principles of language, and other kindred subjects, are often made the medium of promulgating sceptical views; and that doctrines are advanced by physiologists, chemists, professors of the several branches of natural philosophy, and writers on the higher metaphysics, that contravene the teachings of revelation, and naturally lead those who adopt them to doubt its divine origin. This fact renders it peculiarly important that the false principle by which they thus become the instruments of undermining the authority of the Scriptures should be pointed out, and the means indicated by which they may be counteracted. It is to such a purpose that the present article is to be devoted.

Among the various speculations that are fraught with that mischievous influence, the theory of modern geology in respect to the age of the world, holds, we believe, a conspicuous place; and from the title and air with which it is invested of an inductive science, from the great number of interesting and extraordinary facts that are alleged as demonstrating it, and from the acquiescence and sanction it receives from men of learning and worth, is one of the most imposing and seductive. Geologists have not confined themselves to the discovery and description of the great facts of the science;—that the crust generally of the continents and islands has received its present form since the creation of plants and animals; that it consists of a series of different rocky and earthy beds, in many places very numerous and of great depth, which have either been deposited from the ocean or thrown up from beneath; that many of them are interspersed with the relics of other rocks, and of plants, shells, the bones of fish, and the skeletons of land quadrupeds, a large share of which are of species and genera that no longer exist; and that subsequently to their formation, most of them have been raised into new positions, contorted, dislocated, and broken into fragments; but they have, on the ground of these facts, framed theories respecting the causes of which they are the result, and the sources from which their materials were derived, that have led them to conclusions that conflict with the inspired account given in Genesis of the creation. Proceeding on the assumption that they are the product of forces like those that are now giving birth to somewhat similar effects, as on volcanic mountains, at the mouths of rivers, and on the shores of seas, they have inferred that their deposition must have occupied a period immensely larger than that which is assigned to the earth by the Mosaic record. If they are the result, they reason, of the chemical and mechanical forces that are now in activity, and operating with only their present intensity, instead of being the work of but six thousand years, they must have required an almost inconceivable duration; they must have been the growth of an incalculable round of ages. And thence, unfortunately, mistaking that conclusion from a mere hypothesis for a scientific induction from those facts, and elevating it to the rank of a demonstrated truth, they have exhibited geology as contradicting the Scriptural history of the creation, and prepared the way for the inference that that history is not true, and cannot therefore have proceeded from God. For that conclusion is the logical consequence of their theory. It is incredible, they themselves admit, that the truths of science should be at war with the teachings of a divine revelation. It is impossible that God should make a communication to us through one medium which he contradicts and confutes in another. But we know, they assert, that the great volume of nature, the vast monuments of the material world, proceeded from his hand; and on those indestructible tablets he has inscribed a record, which announces in the most unequivocal and emphatic terms that the earth and its organized and living races, with the exception of man, instead of having been summoned into being, as Moses relates, only some six thousand years ago, had at that epoch existed through myriads and millions of ages. And contemplated thus, the inference is inevitable that the contradictory testimony of Moses is false, and cannot be from God. That Hebrew writer, it is said, may have been ignorant of the date of creation; God cannot. Moses may have deliberately framed a fiction; it is impossible that God should not have spoken the truth.

That the supposed physical record thus contravenes the sacred history, is fully admitted and asserted, not merely by those geologists who are avowedly sceptical, but by many who receive the Scriptures as a revelation. Thus a writer in a foreign journal, in vindicating their theory, says:—

"Geology is accused of inculcating views with respect to the formation of the planet we inhabit, irreconcilable with those statements which may be gathered from the book of Genesis.

"We have always thought the wisest and most consistent course for divines to pursue with regard to this delicate question, would be that of maintaining, to the full extent, the inspiration of the sacred volume on all facts involving the history, prospects, and *moral condition of man*; but allowing a greater latitude in regard to those portions which relate to *natural phenomena*, with which these facts are in no wise concerned. It seems reasonable to expect that a book, intended for our moral guidance, should be exempt from error wherever we are to look in it for the regulation of our conduct; but that the deity, who does not interfere unnecessarily, should have withheld any extraordinary assistance from such portions as relate to *natural phenomena*, in which man has no vital concern. Indeed, any revelation on such points as those would have been not only superfluous, but subversive of some of the great ends for which the book of nature has been unfolded, which appears to have been intended to awaken our appetite for inquiry, to afford a fit and healthy exercise for our reasoning faculties, and to impart glimpses of the great designs of the Creator in the system of the universe. Granting this to be the case, there seems an *a priori* improbability that the writings of Moses should contain any precise information on such subjects as these; for the condition of the globe before the creation of man is clearly as irrelevant to the objects for which revelation was specially intended, as the question whether the moon has inhabitants or is endowed with an atmosphere."—*Literary Gazette*, 1834, p. 770.

The irreconcilableness of the history of the creation in Genesis with the views of geologists, is thus exhibited as so clear and indisputable that no safe course is left to divines but to admit that those portions of "the sacred volume which relate to *natural phenomena*" are not inspired, nor free from error, and that there is an intrinsic improbability, from the nature of the subject, that "the writings of Moses should contain any precise information" respecting such events. As "natural phenomena" include not only the effects produced by the omnipotent fiat in the six days of the creation, but all that were observable by the senses, and the theophanies, therefore, miraculous works and historical events recorded in the Scriptures; this sweeping doctrine, which surrenders all that the most eager infidel could ask, would not have been advanced had not its author felt the most unhesitating conviction that the narrative of the creation in Genesis cannot be conciliated with his views of the facts of geology.

Professor Sedgwick, a clergyman of the establishment and a distinguished geologist, indicates in an equally emphatic manner his conviction that it is wholly impracticable to harmonize the sacred record with the doctrines of the science. He says:—

"The only way of escape from all difficulties pressing upon the question of cosmogony, is to consider the old strata of the earth as monuments of a date long anterior to the existence of man and to the times contemplated in the moral records of his creation. The Bible is then left to rest upon its own appropriate evidence, and its interpretation is committed to the learning and good sense of the critic and the commentator; while geology is allowed to stand on its own basis, and the philosopher to follow the investigations of physical truth wherever they may lead him, without any dread of evil consequences."—*Discourse on the Studies of the University of Cambridge*, p. 108.

No terms could show more decisively that the history the Bible gives of the creation is felt to be wholly irreconcilable with his geological theory. If coincident with each other, if not in the most palpable collision, why, in order to escape pressing difficulties, assume, in direct contravention of the fact, that the Bible utters nothing on the subject of the earth's creation?

Though the conviction of these writers of the impossibility of reconciling those two views of the creation, is, in our judgment, legitimate, and had better be acknowledged than disguised, a great number of geologists recoil from it, and the startling and self-contradictious methods proposed by them for evading the abandonment, with which it is felt to be fraught, of the inspiration of the Scriptures, and maintain, some on one supposition and some on another, that the sacred narrative and the geological theory are consistent with each other.

The principal hypotheses which have been advanced for the purpose of reconciling them are stated in the following manner by the Rev. W. D. Conybeare, England, a clergyman of the establishment, and an eminent geologist:—

"We may, perhaps, without real violence to the inspired writer, regard the periods of the creation recorded by Moses, and expressed under the term of days, not to have designated ordinary days of twenty-four hours, but periods of definite but considerable length. . . . . Those who embrace this opinion will, of course, assign the formation of the secondary strata, in great part at least, to those *days of creation*, and we have the authority of several divines for such an interpretation.

But "it does not seem inconsistent with the authority of the sacred historian to suppose that, after recording in the first sentence of Genesis the fundamental fact of the original formation of all things by the will of an intelligent Creator, he may pass, sub silentio, some intermediate state, whose ruins formed the chaotic mass he proceeds to describe, and out of which, according to his further narrative, the present order of our portion of the universe was educed. Upon this supposition, the former world, whose remains we explore, may have belonged to this intermediate æra."—*Outlines of the Geology of England and Wales.* Introd. pp. lix., lx.

These expedients, however, have only served to show in a more decisive manner the impracticability of their conciliation. Thus the assumption that the word day, in the narrative of the successive acts of the creation, instead of signifying the time of a revolution of the earth on its axis, denotes a vast indefinite period of cycles, or centuries, is in direct contradiction to the passage itself, which defines each of the six days as consisting of an evening and morning; *i. e.* the period of a complete revolution of the earth on its axis. "And God divided the light from the darkness; and God called the light Day, and the darkness he called Night; and the evening and the morning"—which were the darkness and light of twenty-four hours—"were the first day."—Chap. i. 4, 5. This is confirmed also by the announcement at the institution of the law at Sinai, that "in six days the Lord made heaven and earth, and the sea, and all that in them is."—Exodus xx. 11. As we have thus the explicit testimony of the Most High himself that the days of the creation were ordinary days, to assign to the word so totally different and unnatural a meaning, is to contravene his own definition and use of it. It is, in fact, nothing less than to impeach the veracity of his declaration in one passage, in order to save his word from a charge of falsehood in another. So self-confuting a device, instead of answering its purpose, could only serve to impress those who carefully scrutinized it with a profounder feeling of the contrariety of the two representations, and of their hopeless perplexity who could rely on such an expedient for their conciliation. Accordingly, though advanced with much confidence, and for a time accepted by many, it was soon seen to be untenable, and is now, we believe, generally rejected by geologists.

The other expedient—the assumption that the creation of the heavens and earth in the beginning, announced in the first verse, was not included in the first of the six days' work, but took place at the distance of innumerable ages, and that, in the interval between that and the creation narrated by Moses, there was a series of creations and destructions of vegetable and animal races—is equally at variance with the representation in v. 4, 5, that the darkness, which was divided from the day—which must have embraced that of the whole space between the first creative fiat and the production of light—was called night, and formed part of the first day. It is also in direct contradiction to the declaration of the Almighty at Sinai, that "in six days he made heaven and earth, the sea, and all that in them is;" in which the creation of the heavens and earth is as specifically assigned to the six days, as the plants, fish, fowls, and beasts are, with which the earth and sea were peopled. It is, like the former, accordingly, nothing else than an attempt to bring this passage into harmony with the theory of geology, by impeaching the veracity of the other; or to clear the word of God from the charge of falsehood by transferring that charge to himself!

Apart from this consideration, also, the supposition of such an omission is unnatural and improbable. If such a vast interval, and occupied by such a stupendous series of creative acts, intervened between the fiat which called the heavens and earth into existence, and the six days of the Mosaic creation, why should the Most High, in professedly giving a history of his work, pass them in total silence, and frame the narrative so as necessarily to mislead his creatures in respect to the date and history of the earth? If, as geology asserts, the strata form an indubitable record of those creations, the recital of them in the history in Genesis, so far from unimportant, was obviously necessary, both to his vindication, and to the just instruction of his creatures. To exclude it, was to place them under an unavoidable necessity either of misconceiving or distrusting him, and prepare the way for their being betrayed into the most fatal errors. For, as the sole creation in our system which he claims is that of the six days, including the fiat by which the heavens and the earth were called into existence, if there were other previous creations equally important, what could suggest itself so naturally as the reason that they were not claimed by him, as that they were not in fact his? But it is wholly unlike his procedure, and incompatible with his perfections, thus to place them under a seeming logical necessity of doubting that he is the author of his own works. The supposition of such an omission in the narrative he has given of the creation, is thus in every relation wholly improbable.

These considerations, then,—which are hereafter to be confirmed by others equally decisive and emphatic,—sufficiently show that the expedients by which it has been supposed that the narrative in Genesis is brought into harmony with the doctrines of geology, so far from answering that end, only serve to demonstrate that their reconciliation is impossible.

The theory of the existence of the earth and its races through innumerable ages, is thus in direct antagonism with that part of the Mosaic record which defines the period of the creation, and if held to be true, renders the conclusion natural and unavoidable, that that record is not. And such, it is well known, is the result to which it carries great numbers of those to whom it is taught. Wherever advanced by a popular lecturer, and exhibited as a truth that is demonstrated by the strata of the earth, there it will be found it has left the impression very generally on the hearers that the Mosaic account of the creation is convicted of error; and thence cannot be regarded as having been written by inspiration. It has, indeed, been so boldly and speciously taught for many years, in books, in laboratories, in lyceums, in popular lectures and sermons, that it has become a very common impression with the young that the first chapter of Genesis is mistaken and without authority.

[To be continued.

Envy is a development of our fallen nature. Evil temper very frequently exhibits itself in jealous fretting at the prosperity of others. Men cannot bear to see those whom they deem not more deserving than themselves advanced to a higher position. And hence not only private discontent, but detraction and ill offices.

AUTUMN LEAVES.

The autumn leaves! the autumn leaves!
They fall and die in the mournful blast!
And a strange wild thought my heart conceives
In their ghost-like echoes of the past.
'T was thus they fell in years agone—
Thus they will fall as time rolls on.
And ever thus man's spirit grieves
O'er withered hopes, like autumn leaves.

The cold wind sweeps the barren fields,
And whistles through the withered grass,
The humid earth no fragrance yields,
And days grow chiller as they pass.
Thus human hearts grow chill with years,
Thus human joys are damped in tears,
And man distrusts what long deceives,
And reads his fate in autumn leaves.

The autumn leaves are sere and dead!
The autumn fields are bare and chill!
Their fragrance gone, their verdure fled,
But beauty hangs about them still.
Thus may we, as we pass away,
In virtue hide the heart's decay,
And find in faith what faith believes—
A gentle fall—like autumn leaves.

The autumn leaves! the autumn leaves!
They wither, die, and pass away,
And mournfully my fancy weaves,
But pen cannot transcribe the lay.
Soon, soon alike the winter cloud
Will spread for them and us the shroud;
And peace to him whose heart receives
The lesson taught by falling leaves.

"GO WORK TO-DAY."

List thee, Christian! The voice of the Master is not drowned by the din of business. The claims of religion are not abated by your hurry, and stress of occupation. The still small voice that bids you to be at work to day *for God* is peremptory. What though you are pressed with care. Religious duty is care's great cure. What though the car of business drags heavily? it is by prayer and heavenly hope that the wheels are to be kept in motion.

Go to work to-day in the vineyard. God has need of you now. When your convenience serves, he will have done with you. He will not accept the service of your leisure hours. Religion's great aim and triumph are realized in the subjection of the 'change to the closet, of the bank to the Bible, of the street to the sanctuary. What is religion worth that can flousish only as weeds do in a desolate and untilled field? What is that principle worth that cannot withstand the least pressure of worldly solicitation?

Go work *to-day*. Now, when labor will be a cross; now, when your example will be valuable; now, when the world should know your principles; now, when the mass are trying to serve God and Mammon, go work for God, and you can do something worthy of your vows. What does the cause of Christ need more than examples of that religion which makes a place for the prayer-meeting and the lecture in every week's calendar, and which shuts the door of the closet upon the world, until God is worshiped? The greatest attainment of life is to use this world without abusing it—to attend manfully to every claim of business, to breast with heroism every storm of commercial embarrassment—to do one's best in whatever circumstances may develop, and at the same time, to live out the Christian, by a course of daily usefulness. To be at the same time a good business man and a warm-hearted disciple—to care for every interest of religion amidst all secular cares—to lay a stone on Zion's walls with every accession of worldly fortune, this is true Christianity. Nor will any principles of living ensure men from the snares of covetousness, and the deep pit of commercial dishonesty, except those simple rules of living which the Gospel prescribes for all times.

Go work to-day. Seek out some humble labor of love. It may save you from falling. Invite some interruption of your excessive worldliness. Call in some umpire who shall put down the false and ruinous claims of Mammon.

Have a religion which can live and be honored abroad as well as at home; in busy seasons as in dull times; on rainy Sundays as on fair ones; in the afternoon as in the morning; when prosperity fans, as when adversity baffles your progress. Seek a cure of your religious distempers by going to work to-day for God! [N. Y. Observer.

A GOOD SAMARITAN.

A correspondent residing in Louisville, Kentucky, writes to us as follows: "Permit a constant reader of your excellent journal to communicate a small item to your well-stored columns, and one which I assure you, at the time it occurred, appeared to me as very distinctly of a generous nature. A thinly and poorly clad little girl, apparently about six years of age, was wending her way from market with a basket of beans. As she was passing along the street on which my office happens to be located, her basket—which was very old and dilapidated—gave way, and her beans rolled out on the pavement. She set her basket down, and commenced gathering up her lost treasures; but just so fast as she would restore them to the basket would they again ooze out from the crannies, and again find their way to the pavement. The poor child persisted in this useless labor for a long time, during which hundreds of unsympathizing and uncaring people had passed her without notice, although the poor little thing was sobbing at her useless labor as if her little heart would break. Not so, however, a kind-hearted physician of my acquaintance, who chanced to pass at the time. His quick eye, ever alive to perceive, and his good heart always ready to respond to all appeals to his better nature, at once comprehended the cause of the little one's distress, and suggested the requisite assistance. Kindly approaching the friendless child, he soothed her by a few gentle and timely words, and taking a newspaper from his pocket, he spread it in the bottom and around the sides of the old basket, and getting on his knees on the pavement, with the child's assistance, restored her beans to their now safe repository, and sent her on her way home, not only with her eyes dried of their tears, but with a living consciousness, ever after to be remembered, that the Bible story of the 'Good Samaritan' was not alone traditional. This was a mere street occurrence, gentlemen, the like of which I would fain believe occurs hourly in our goodly city; but do you know that little act has caused me to think much more of that physician's heart than had I seen his name paraded in the newspapers, set opposite to a thousand dollar subscription to some public charity!"

[Home Journal.

GEN. HARRISON'S WIDOW AND FAMILY.

We have none of us forgotten that day of sadness and of gloom, when death struck down, after one brief month's residence at the capitol, the lamented Harrison. It may not be known to many of your readers, that the widow still survives him. She is living in retirement at the old mansion from which the nation summoned her husband in 1840. Advanced in life, and in feeble health, she is calmly and peacefully waiting her summons to occupy a place by the side of her companion, in the family vault, and a better home, we trust, with him in heaven. For many years she has been a member of the Presbyterian church at North Bend, greatly beloved by all the members of this church, and by all who know her, for her consistent piety, her godly example, and the deep interest she takes in every good work. It is no exaggeration to affirm, that she is indeed and in truth a mother in Israel. Benevolent to the full extent of her means, plain and neat in her attire, and though brought up in the midst of affluence (her father having been the richest man in Ohio,) yet deeming it not beneath her to superintend the affairs of a numerous household. Since the death of her husband, she has lived in retirement, in that once beloved and still cherished home, over which death has cast so deep a gloom. In feeble health, she is rarely seen, except by her most particular friends. If she is seen away from home, which has now become rare, it is only to visit the house of God. As a mother, we would like to hold up her example before the eyes of all the mothers in the nation; and it is for this especially we write. Her influence over her children and grand-children is such, and has long been such, as only a consistently pious, praying mother can exert. By them, she is held in the highest veneration. In early life she taught them daily to peruse the word of God, and made them the object of constant prayer. And even when grown to manhood, they were accustomed to come into her room and sit down by her side, and daily read the Bible.

Where, we ask, is the mother, who has sown in tears, who has failed to reap in joy? Where is the mother to be found, who has labored and prayed, and lived as well as labored in Christian meekness and faith, who has failed to receive a glorious reward? The only surviving son (now a member of Congress) is a devoted Christian, and an exemplary elder in the church. A daughter some time since deceased, was one of the most lovely Christians the world has ever seen. Another daughter, still living, is professedly walking with God. Six grand-children, within the space of the past two years, have made a public profession of their faith in Christ.

NEVER TOO OLD TO LEARN.

The following well authenticated facts will illustrate the principle that *man is never too old to learn:*

Socrates, at an extreme old age, learned to play on musical instruments. This would look ridiculous for some of the rich old men in our city, especially if they should take it into their head to thrum a guitar under a lady's window, which Socrates did not do, but only learned upon some instrument of his time, not a guitar, for the purpose of resisting the wear and tear of old age.

Cato, at eighty years of age, thought proper to learn the Greek language. Many of our young men, at thirty and forty, have forgotten even the alphabet of a language, the knowledge of which was necessary to enter college, and which was a daily exercise through college. A fine comment upon love of letters truly!

Plutarch, when between seventy and eighty, commenced the study of the Latin. Many of our young lawyers, not thirty years of age, think that *nisi prius, fieri facias,* &c., are English expressions; and if you tell them that a knowledge of the Latin would make them appear a little more respectable in their profession, they would reply that they are *too old* to think of learning Latin.

Boccacio was thirty-five years of age when he commenced his studies in polite literature. Yet he became one of the three great masters of the Tuscan dialect, Dante and Petrarch being the other two. There are many among us, ten years younger than Boccacio, who are dying of *ennui*, and regret that they were not educated to a taste for literature, but now they are *too old*.

Sir Henry Spelman neglected the sciences in his youth, but commenced the study of them when he was between fifty and sixty years of age. After this time, he became the most learned antiquarian and lawyer. Our young men begin to think of laying their seniors on the shelf when they have reached sixty years of age. How different the present estimate put upon experience from that which characterized a certain period of the Grecian republic, when a man was not allowed to open his mouth in cases of political meetings, who was under forty years!

Dr. Johnson applied himself to the Dutch language but a few years before his death. Most of our merchants and lawyers of twenty-five, thirty and forty years of age, are obliged to apply to a teacher to translate a business letter written in the French language, which might be learned in the tenth part of the time required for the study of the Dutch; and all because they are *too old to learn*.

Ludovico Monaldesco, at the great age of one hundred and fifteen, wrote the memoirs of his own times; a singular exertion, noticed by Voltaire, who was himself one of the most remarkable instances of the progress of age in new studies.

Ogilby, the translator of Homer and Virgil, was unacquainted with Latin and Greek until he was past fifty.

Franklin did not fully commence his philosophical pursuits till he had reached his fiftieth year. How many among us of thirty, forty, and fifty, who read nothing but newspapers, for the want of a taste for natural philosophy! But they are *too old to learn.*

Accorso, a great lawyer, being asked why he began the study of law so late, answered, that indeed he began it late, but that he should, therefore, master it the sooner. This agrees with our theory, that healthy old age gives a man the power of accomplishing a difficult study in much less time than would be necessary to one half his years.

Colbert, the famous French Minister, at sixty years of age, returned to his Latin and law studies. How many of our college-learned men have ever looked into their classics since their graduation?

We could go on and cite thousands of examples of men who commenced a new study and struck out into an entirely new pursuit, either for a livelihood or amusement, at an advanced age. But every one familiar with the biography of distinguished men, will recollect individual cases enough to convince him that none but the sick and indolent wil say, *I am too old to study*.

WORTHY OF THOUGHT.

A short time ago, says a pastor, I tried to make my people see under what embarrassment many professors would find themselves, on arriving at heaven. I supposed that a crowd of glorified spirits would gather around the new comer, to learn what was doing for the extension of the Redeemer's kingdom, but that many would be as ignorant of these matters, as they were of what was passing in the moon. "But were there no papers published to give you information on this subject?"

"Yes, but we did not feel interested enough to take them."

"Had you no monthly concert, where intelligence was communicated, and prayer offered for the conversion of the world?"

"Such a meeting was held, almost at our door, but we were never in the habit of attending it."

Could Christians only look at this matter now as they will see it in the light of eternity, I believe that our monthly concerts would be our most crowded meetings, and the annual receipts of the Board would soon reach half a million dollars. [Journal of Missions.

NEGATIVE RELIGION.

In these latter days of ease from persecution, a profession of religion may be made, and a decent outside may be preserved, without much cost. There is one class of professors, and that by no means a small one, made up of those who have received a religious education, have been trained up to an *outward* conformity to the precepts of the gospel, who abstain from the open follies and corruptions of the world, but remain quite satisfied with a NEGATIVE RELIGION.

They do not defraud their neighbor.
They do not neglect the poor and needy.
They do not run a round of gaiety and folly.
They are not drunkards.
They are not swearers.
They do not bring up their children without some regard to religion.
They do not cast off the *fear* of God.

BUT

They do not *love* him.
They do not experience his love shed abroad in the heart.
They do not enjoy vital, heart-felt religion.
They do not give God their hearts.
They do not delight themselves in him.
They do not esteem his word more than their necessary food.
They do not *love* the habitation of his house, and the place where his honor dwelleth, though they attend it.
They do not enjoy the peace of God, which passeth all understanding.
They are not the temples of the Holy Ghost.
They are not habitations of God through the Spirit.
They have not passed from death unto life.

Reader, are you a Negative Christian?

THE UNAPPRECIATED SKY.

It is a strange thing how little, in general, people know about the sky. It is the part of Creation in which Nature has done more for the sake of pleasing man, more for the sole and evident purpose of talking to him, and teaching him, than in any other of her works; and it is just the part in which we least attend to her. There are not many other works in which some more material or essential purpose than the mere pleasing of men, is not answered by every part of their organization; but a very essential purpose of the sky might, so far as we know, be answered, if, once in three days, or there about, a great, ugly, black rain-cloud, were brought up over the blue, and every thing well watered, and so all left blue again till next time, with perhaps a film of morning and evening mist for dew. And instead of this, there is not a moment of any day of our lives, when Nature is not producing scene after scene, picture after picture, glory after glory, and working still upon such exquisite and constant principles of the most perfect beauty, that it is quite certain, that it is all done for us, and intended for our perpetual pleasure. And every man, wherever placed, however far from other sources of interest and beauty, has this doing for him constantly. The noblest scenes of the earth can be seen and known but by few; it is not intended that man should live always in the midst of them; he injures them by his presence; he ceases to feel them, if he be always with them; but the sky is for all; bright as it is, it is not 'too bright nor too good for human nature's daily food.' Sometimes gentle, sometimes capricious, sometimes awful; never the same for two moments together; almost human in its passions, spiritual in tenderness; almost Divine in its infinity, its appeal to what is mortal in us is as distinct as its ministry of chastisement or of blessing to what is mortal is essential.

THOUGHTS ON THE PRESENT CRISIS.

It has often been remarked, that one important effect of the Christian religion has been to mitigate the horrors of war. We are willing that this opinion should be entertained, for we believe there is good foundation for it. But who can contemplate the atrocities of the conflict now waged in the Old World, without being convinced that the work of war is the work of murder still? Cloven skulls; bodies pierced through and through with lance wounds, or riddled with bullets; arms, legs, trunks, and heads of soldiers covering over acres of ground; magazines and hospitals destroyed, and the explosion sending souls into eternity by hundreds; multitudes gasping in the last throes of death; terror and desolation spreading on every side, while every active participant aims to slaughter as many of his fellow creatures as possible—do not exhibit such a picture as the Prince of Peace came to draw. It is the work of the Destroyer; it is the triumph of Hell over fallen humanity.

We are assured, in Scripture, that God restrains so much of the wrath of man as will not contribute to His praise, otherwise we should look upon the terrible convulsions of the Old World as ominous of nothing but evil. But there is a God that rules, and allows these things to take place, only that He may the more abundantly display His glory. Whatever evils may intervene, the final result will certainly be the destruction of them that oppress mankind. Souls that are made in the image of God must not be trodden down like brutes. Governments that do so, systematically, must and will be overthrown.

Men are not always, and every where, in a condition to exercise their God-given rights. For though their Maker has constituted them equal, their proneness to abuse themselves and one another, renders it necessary that they be restrained, till they shall have learned how to exercise their rights with safety to themselves. Hence, often, when they have struggled for freedom and equality, they have failed to achieve their purpose. Still, their failures are not to be looked upon as utter abortions. If the Hungarian, struggling to extricate himself from Austrian despotism, gains nothing for himself, he nevertheless gains something for humanity at large. If the Pole fails to break the crushing yoke of a tyrant, and suffers in consequence yet greater severity of oppression, he does not fail to awaken the sympathy of mankind, nor to give a new impulse to other nations in the direction of freedom. Mankind at large always gain something, notwithstanding the disappointment, for a time, of such isolated portions as have made the active struggle. The disappointment of these is but temporary, however, because in proportion as humanity at large is the gainer, the final benefit of all its portions is rendered certain.

The conflict now in progress between Russia and the opposing powers is not, primarily, a conflict between an oppressive government and its down-trodden subjects. It is not the upheaving of the masses in their aspirations for freedom, opposed by despotism seeking to reduce them again into still deeper degradation. It is, however, the over-reaching, all-grasping spirit of government, that would fain extinguish every spark of liberty that kindles among the nations, and that aims to enslave Turkey, only that its own despotism may be rendered eternally secure. The conflict is, therefore, virtually, a modified form in which the free spirit that burns in every human breast resists the encroachments of injustice. And it is certain, that it cannot be long protracted, without assuming the more decided and unequivocal form of a struggle between oppressed mankind and their wicked oppressors.

Whether this conflict will issue in the overthrow of Turkey, or the humbling of Russia; whether it will involve the Allied Powers in general ruin, or result in the supremacy of their arms; or whether it will be protracted, till all the contending Powers are reduced to inefficiency, and perhaps completely prostrated, new forms of government rising out of their ruins—are questions which no mortal can probably solve. But let the result in these respects be what it may, we are sure that there will be a final gain to oppressed humanity, and that God, who makes the wrath of man to praise Him, will be glorified in bringing the nations into a state of preparation for that freedom which is their natural right. T. B. B.

The Chinese Rebel Chief.—A recent number of *The Macedonian* contained an article relative to the Rebel Chief of China, from Rev. Mr. Dean, the Baptist Missionary at Hong Kong. Mr. Dean appears not to participate in the hopes of good from his triumph which have been expressed in some quarters. In noticing a pamphlet by Hung Jin, who claims to be a cousin of the chief, Mr. Dean says:—

"The story of Hung Jin is an interesting one; but his countrymen have so often imposed upon the credulity of foreigners, that we are forced to receive his statements with some reserve; but if true, it serves to confirm the impression that Tae Ping Wang is a visionary Machiavellian, and that he has adopted the Christian creed, grossly corrupted, to promote his own selfish and political designs. And if half be true, that he has published of him, his Christianity is little better than Paganism, and his continued use of the sword, and his corrupted editions of the Bible, are more in accordance with the spirit of Mahommedanism than the peaceable principles of Christianity. By it we are led back to the conclusion which forces itself upon us from any view we take of the condition of China, and that is, that the present chaotic state of the people calls loudly upon us to give them a pure gospel before these corruptions become stereotyped, and the hundreds of millions of that empire become confirmed in the belief of errors more dangerous and deadly than Romanism or Mormonism."

NEWS FROM CHINA.

Extracts from a letter of Eld. Solomon Carpenter, dated Shanghae, September 29, 1854.

It appears that other Boards are increasing the number of their missionaries in Shanghae. Rev. Mr. Jenkins has just arrived with a recruit of three. Two from the Presbyterian Board have just arrived, and others from other Boards are expected soon. There is one question, of deep interest, which, properly decided, would have a mighty bearing on other questions; that is, whether the rising power, if it gets the reins of government, will tolerate foreign missionaries of any order. And we are all profoundly ignorant of the designs of Tae-ping-wang on that subject. But, as you will see from the last number of the *North China Herald*, which I now send regularly, he has already decreed that the rulers of the people shall be their teachers. A beautiful system he has made out, according to which there is to be a church in every circle containing twenty-five families, and the people must go to meeting, and the officers must expound the Scriptures, every Sabbath, or be degraded to the rank of the common laborer. Now, whether it will come to pass that foreigners will take part in this ministry, and bring in all the jargon of western nations, or be entirely excluded, no mortal can at present divine. But it is perhaps wisest to go upon the presumption that we shall find something to do, and prepare to do it. And inasmuch as it requires so much time to acquire the language, I hope our people will have more missionaries on the ground as soon as they can bring it about. What a wonderful time is the present! How big with important consequences are all our movements! And how strongly are we appealed to by the voice of Providence to be awake to our duty! What a wonderful phenomenon we have here in China! Suppose the rising Emperor should succeed, then, whether he be a sincere man or a deceiver, what a spectacle to have the Holy Scriptures every where distributed, and his officers attempting to explain them to the people! Do you think the word thus sent out would return void? Nay, verily. It must accomplish that whereunto it is sent. What though the same power puts forth its dreams and its extravagant errors, at the same time that it puts forth the Bible; is that to prevent the Bible from doing its work? And may not the word of God remain after the vagaries of a poor mortal are passed away? I do rejoice that God has raised up a man to arouse this nation from its deathly slumbers; and even if no foreigner will be permitted to have any part in the farther conversion of this people, I rejoice that Hong-seu-chum has set his hand to the plough, and is not inclined to look back. We could not expect perfection in such a man. Neither can we expect a Chinaman to lose his nationality, and think and act just as we from the setting sun do. How great, how wise, how inscrutable, is the scheme of divine providence! The Lord God omnipotent reigneth; let the earth rejoice. How unfathomable is the depth of divine goodness. Let every thing that hath breath praise the Lord. Praise ye the Lord. Amen and amen.

There is no doubt as to the revolutionists at Nankin and elsewhere keeping the true Sabbath, and that too for more than a year after some of them had seen publications setting forth another day as the rest-day of the fourth command.

Yes, we do rejoice in the establishment of a mission by our people in the land of Palestine, and we hope and pray that the blessing of the Shepherd of Israel may rest upon it.

You express a brotherly sympathy for us in the midst of danger and trouble. But our trouble deserves not to be mentioned in comparison with that of thousands in this land. The dark cloud that has hung over Shanghae for a year, instead of being removed, only grows darker. And it is also so with many other cities in this great and populous country. In meeting with the distressed people in the city, I have endeavored to point them to the Great Deliverer from sin and sorrow. The mother of my former teacher, Chung, is in distress and fear, and scarcely desires to live longer. Her mother and sister are also in the city. I have visited them all occasionally during the year of their trouble, and assisted them as I was able.

The principal labor I have performed since my last has been necessarily of a kind not strictly missionary, in the ordinary use of the word, but such as missionaries must sometimes submit to. The time arrived when it became evidently our duty to provide a house for ourselves. But rent was enormously high; besides, scarcely any place could be had; so that renting was out of the question. So I have builded a house. It is 43 by 32 feet outward measurement, with a verandah 6 feet wide on all sides. It has two stories, the first being low, only 8 feet, the other nearly 12 feet. It contains 8 rooms and a stairway, and accommodates tolerably comfortably our two families. The walls were begun about the 7th of June, and we moved into it on the 7th of August—Bro. W. a few weeks later. Together with the lot, it has cost a little over $1300, and no out-houses are yet built. These, however, will cost but little, as I have the brick on hand. I have bought the material and superintended the work all the way through, as I did before. It was necessary for the health of our families that we should have a two-storied house, and being two stories, it must be well built to be safe from the hard winds and harder earthquakes to which we are liable. At the outset I had not learned that lumber was about one-third dearer than usual. If I had built smaller, it would not accommodate our two families, nor would it sell so well. Aside from Mr. Cunningham's donation of $200, and what funds I could manage to put in, I have been obliged to hire $1000 at ten per cent. interest, and have given the security of a mortgage, which is to run two years from the 17th of August last. I will wait a few months to see what will be my prospect of paying for this house without calling for help; the which I greatly desire to do if possible. I have got the house insured for two thousand dollars, about its true value as houses sell in Shanghae.

BRITISH CORRESPONDENCE.

Glasgow, December 8th, 1854.

Painful circumstances have for some time past disqualified us from recording for the *Recorder* what we should otherwise have noted as bearing upon the Sabbath cause. In God's mercy, however, being in some measure lightened of our burden, we would yet recall some of the expressions of British feeling bearing upon that point.

Connected with the working of the New Beer Bill, in its bearing on Sunday, was a case which excited much attention in London. "*The Times*" had spoken with approval of the Beer Bill and its influence on Sunday observance. But the act had only been a short period in force, until a publican adjoining was prosecuted for supplying the *Times* office with beer on Sunday evening, when the men were at work for the issue of the Monday's paper. In *a leader*, singularly blowing hot and cold on Sunday observance, the *Times* declared such interference intolerable. Such is the respect for Sunday! The public must have all the news on Monday at breakfast, and the *Times* must have the profit of a large sale. The men must therefore work on Sunday night, and in order to do so, they must have their usual supply of beer. The law, therefore, that interferes with the publican that supplies them, is intolerable, although a good law for every one else!

On Sunday week not a cab or omnibus ran upon the streets of Glasgow. The drivers had been brought to see that it was a breach of the Fourth Commandment—for they wrought seven days for the wages of six. In this last grievance was the greatest sin evidently; for on the masters making them an advance of wages, and promising some provision—provision not likely to last—for their getting occasionally to church, they resumed, and last Sunday the pews of the several churches were occupied by those who had been driven thither, but those of the drivers were empty as before! If Christians were really in earnest; if they valued the spiritual well-being of others—apart from any obligation of the Fourth Commandment and its rest of the cattle as well as that of servants, a commandment which says not a word about the day of their adoption—surely some means would be taken to see that all was not sacrificed dear to one class, in order that another class should profit. The cab drivers of Edinburgh have also banded together, and have pledged themselves to cease Sunday driving. As little do we expect permanence in their resolution as we did in the case of their brethren. The love of either Sunday or Sabbath sanctification is not in them as a class; while church-goers and ministers would like ill to miss the Sunday cabs from the church doors.

In the Edinburgh Town Council, in October last, the Lord Provost earnestly besought attention to the fact that, as the public houses are now shut on Sunday evenings, and as in winter people cannot walk or stay out in the dark, some plan should be adopted by which heated and lighted rooms would be opened for the poor, provided with collections of moral and religious books for their use. Professor Dick said he thought they ought to have concerts of sacred music, with tea and coffee provided. Baillie Morrison also thought refreshment rooms ought to be opened on Sunday nights, where the poor could get tea and coffee, and read moral and religious books; and the Lord Provost added, that any one was at liberty to open such places. There is, however, a consideration overlooked in this discussion. Those for whom more especially the provision is sought to be made, prefer a newspaper to either the moral or religious book; and many of them must have something lower than even the most secular newspaper, to induce them to read at all. Nor will tea or coffee be universally received as an equivalent for beer or spirits. The latter can be provided beforehand, and private houses will be found with accommodation sufficient to satisfy those whose object is to drink.

At the Evangelical Alliance in October, it was stated by the Traveling Secretary, that the Council had determined to offer a prize of £100 for the best Essay on Sunday Observance. Several of the speakers at the meeting expressed dread of the Crystal Palace being opened on Sunday, and their determination to resist it with all their might. Capt. Young said that every thing relating to Sunday observance hung upon that. "If that object were once gained, they might give up the struggle"—for the opening of Museums and other places of public amusement would necessarily follow. The prediction we believe to be near the truth; and we would have more sympathy with the speaker if he showed that his concern were for the maintenance of God's law, rather than in defense of a human tradition making void the law divine.

J. A. Begg.

CENTRAL ASSOCIATION MATTERS.

To the Editors of the Sabbath Recorder:

My name appears in your paper of June 15, 1854, as one of a Council appointed by the Central Association to visit the churches in Jefferson County, for the purpose of aiding in a settlement of difficulties said to exist among Sabbath-keepers in that vicinity. The time appointed for the meeting of that Council being near, and supposing that some response is expected from them, and none as yet having met my eye, and not knowing whether they will meet or not, I take the liberty to communicate through your paper, if you think proper, a few remarks.

It does not appear, from any thing I have seen, that the Association, in their appointment, have given any specific directions to the Council, whether they are to be governed in action by the Constitution, or are to be advisory to a course in which the Association have no power to direct and control; in which last case, it appears to me, there must first be an amicable agreement of the parties, as to what they will submit, and the manner how the trial shall proceed, before any satisfactory examination can be had, sufficient for the Council to make up judgment on whom the wrong rests. In the absence of such directions and agreement, and from what has been published on this subject, I am in doubt whether the Council can be of any use, as they are considered advisory only, at least by some. Taking this view of the appointment, I should infer that the Association, and the churches complained of, understand alike the Constitution—that is, that the discipline of the churches is not subject to it. The answers of these churches to the letters of the Corresponding Secretary, requesting their coöperation, show, to my understanding, their assent so far as the Council shall act in accordance with the Constitution, and did not mean to further commit themselves at that time; whereas, on the part of the Association, or at least some of those who have written on this subject, they see no prospect of settling this matter, unless these churches will consent to a trial outside of the Constitution—that is, to admit those excluded members to come before the Council with their testimony and pleas, on equal terms with themselves, and submit their acts of discipline to the Council, to be decided on, from the allegations, proof, or testimony adduced by both parties. In yielding to this course of action, it is asserted that the churches complained of would concede the whole ground of defense, and stand self-convicted of the most serious succession of wrongs. If this be the sentiment held by these churches, I can see no possibility of a settlement, nor any facilities offered by which the Council can report satisfactorily to the Association on whom the wrong rests. And should the Council proceed to examine and judge from the records only, we are individually at liberty to judge whether their labors would be any better appreciated than those of a former committee on this subject, and whether, in the result, there would be any prospect of peace being restored.

U[illegible]ve further light in this matter, I cannot cast away my confidence, that as soon as these churches discover themselves in error in their disciplinary acts, they will make the necessary concessions, and preclude the necessity of arbiters. If I am correct in my supposition, that the discipline of the churches *is not subject* to be regulated or governed by the Association, then I can see no reason why the churches will not continue to hold their places in that body until a breach of the Constitution is proved against them. It may be said, that these views of the case present no remedy, but to let patience have its perfect work, till the Constitution shall be amended. If this Council is advisory *only*, with the limited knowledge I possess, I can see no other course for the Council to pursue, than to advise the parties to an amicable agreement to leave out all their differences to the *advisors*, or such other persons as they may agree upon, who shall not be considered a committee of the Association, but one by the choice of the parties, amenable to them only. This truly is a singular position for a Council to be placed in—begging the parties to permit them to sit as their judges—such an one as I have no recollection of ever before being placed in. To "hear with both ears, and then judge," is the true course.

My remarks being based on supposition, principally, may possibly, by some, be considered as pre-judging, which is foreign from my intention, holding myself open to receive any light which may be given in the premises, nor *can* I, from any knowledge I possess, decide on whom the wrong rests, and may possibly be wrong in the positions taken, not knowing what powers the Constitution confers on the Association, or what original rights the churches have reserved, other than what I am informed by a brother present at the adoption of the Constitution. The unpropitious indications and peculiar circumstances, presented to my mind in this matter, are sufficient to prevent my attendance with the Council, if indeed my circumstances and health would permit. Should the majority of the Council meet, I can but wish they may find some way by which the desired object may be consummated. **Joseph Potter.**

SWEAR NOT.

In a recent date of the *Sabbath Recorder*, I find an article headed as above, in answer to questions previously offered through the *Recorder*. For what reasons, or from what source, these queries arose, I know not; but for myself I am not satisfied with the answer to them—neither with the premises taken as conclusions drawn. The scriptures are the source of truthful conclusions; but the fact that God promised to bless Abraham, and in him the families of the earth; that Abraham required an oath of his servant; that Laban raised a pillar, and promised not to go beyond it, and Jacob swore by the fear of his father Isaac; that Jacob swore his son Joseph; that God commanded the children of Israel to not go after other gods, but to fear their God, and *swear* by His name; that the Lord sware that Moses should not go over Jordan; proves nothing in justification of civil or any other kind of oaths, unless it can first be shown, that the examples of these early fathers are confirmed by direct and universal precept, and that what was a sign, and peculiar to the children of Israel, is also binding upon all, in all times and in all ages, especially under the Christian dispensation, and that these have not been abrogated by direct precept. If examples and precepts peculiar to individuals, peoples, and times, are to be our standard, then may we justify polygamy and kindred vices from the examples of the wisest of men, and find ourselves under obligation to erect a temple for the Lord answering all the description of Solomon's, with the golden candlesticks, the tables of shew bread, the altars of incense and burnt offerings, &c., and still be under the most solemn obligation to live out the whole letter of the Mosaic law.

Now, since the first form of an oath given by L. Jones is acknowledged as a sin, (and consequently forbidden by the third command,) so much is gained without argument; although he afterwards concludes, that "judicial oaths and affirmations are not forbidden, and is inclined to the opinion that the humble followers of Christ are the only fit subject to take such oaths or affirmations." I can see no possible necessity or reason for the Christian to take an oath, or vainly call in question the name of God. By virtue of his relation, as a child of God, he is under the most solemn obligations, and has the most important considerations for speaking the truth, under all circumstances, in the court of law and at his fire-side, in public and in private, and to speak and act in reverence to Him who judgeth for all the deeds done in the body. Where, then, is the necessity of his taking the name of God before the juror's bench, by an oath to tell the truth, more than when he calls around him his family, and imparts to them the necessary instructions to prepare them for the responsible duties of life? And if necessary in the court of justice to require thy brother to call in question the name of God before you can believe him, why not require of him the same thing in your church meetings, when transacting business pertaining to the kingdom of Christ upon earth?

That idea, that it is right because [illegible] is the *law of the land*, is a sentiment that would well become a southern nabob, or a doctor of cotton theology, but not well a truth-loving Seventh-day Baptist; for the laws of our land recognize no Sabbath but Sunday, and subject us to a fine for laboring on the first day of the week. That passage was not well chosen to prove that we are bound to obey the unholy enactments of men as the higher power. "Let every soul be subject unto the higher power, for there is no power but of God." That my friend may have more light respecting obedience to the powers that be, I will refer him to Dan. 6: 1, 10. Again, "Then Peter and the other Apostles answered and said, We ought to obey God rather than man." Acts 5: 29. And how am I under obligation to obey, though the laws of the land require me to break one of the commands of God? Who is truly the Higher Power? When Christ, in the sermon on the Mount, refers to the ancient sayings concerning adultery, and declares that whosoever lusteth hath already committed adultery in the heart; and again refers to the saying of old, 'an eye for an eye, and a tooth for a tooth,' and commands to resist not evil, all believe him to mean as he says. But when he refers to the precepts of the former dispensation, and positively forbids all swearing, few are ready to believe that he means all that he says, although it is as plain as any precept of Christ left on record.

With the text chosen by L. Jones to justify judicial swearing, I now propose to show, that all such swearing is forbidden by direct precept of Christ. In Heb. 9: 3 and 7: 21, the verb used in the Greek is a variation of *omnumi*, which is defined to swear, to take a solemn oath. Now these passages were introduced to show that solemn oaths were formerly taken, which is doubtless the case. But this cannot refer to false oaths, for Christ, when speaking of the sayings of olden times (Mat. 5: 33) respecting perjury, uses a verb having a very different sense, *epiorkea*, defined, to add oath to oath, to swear falsely. Christ says, "Swear not at all," (Mat. 5: 34,) which is also confirmed by James, (5: 12,) "Above all things, my brethren, swear not." Here again we find the verb *omnumi*, the same as in Heb. 4: 3 and 7: 21. Now, if the texts in Hebrews prove any thing for the use of solemn and judicial oaths, those of Matthew and James prove that that class of oaths are forbidden to the disciple of Christ by direct and universal precept; consequently those vague suppositions concerning what Christ and James meant must fall to the ground. The use of oaths is not only forbidden by Christ, but it is plainly intimated that yea, yea, and nay, nay, are sufficient for all Christian communication.

In conclusion, I would say, I fail to see the force of that assertion, that business transactions, national and individual, could not be done, or perjured persons brought to justice, without swearing by oaths. S. B.

REV. E. L. ABBOTT.

This distinguished Baptist missionary has gone to his reward. From an obituary notice in the *New York Baptist Register*, we copy the following sketch of his life:—

He did not complete a full course of study. The voice of God and wailings of Pagan woe fell upon his ear, and he could not stay. "Here am I, send me," was the response given to the voice of Jehovah through the Missionary Board at Boston. Well do we remember his touching and powerful farewell address to the students and professors [of Madison University.] To those who had chosen the West as their field of labor, he said, "You, brethren, go to meet the beast with seven heads and ten horns, but I go to contend with Pagan power in the East." And with heavenly animation did he sing, "Yes, my native land, I love thee," &c. Subsequently we mingled in his ordination exercises at New Woodstock. Three venerable men now gone, we believe, were there: John Peck, Alfred Bennett, and Nathaniel Kendrick. Cheerful and happy was the face of our Bro. Abbott on that occasion. Yes, though about to leave a much loved and loving pastor and church, but more than all an aged mother, without the prospect of meeting them again on earth, his countenance beamed with joy. Others wept, but he did not.

Under the benignant smiles of an ever-watchful Providence, he was permitted to leave his "native land," and reach the shores of Paganism. There he labored. There in the wild jungles of the East, and surrounded with the towering and frowning forms and monuments of idolatry, did he witness the displays of almighty power, to save the lost and degraded. But we will not enlarge. In another world it will be seen how much he did for Christ and the heathen.

As the result of much toil and care, his health failed, and he returned home for its restoration. He was accompanied by his two little boys, whose mother had died in a heathen land. And how trying the scenes associated with the death of that wife and mother. We had the facts from his own lips. "She died," said he, "away from fellow missionaries. All who stood by her death-couch, except myself, were natives. After her death, I laid her out with my own hands, nailed some rough boards together for a coffin, and employed some natives to carry her to the grave."

After remaining in this country for a short time, he went again to his chosen field of labor. We saw him on the eve of departure. It was only a few hours after he had looked for the last time as he supposed upon the faces of his motherless boys. The gush of feeling had not yet wholly subsided. There was evidently a pressure at his heart. He was about to enter the moral wilderness alone—to labor around the grave of his wife, and leave the objects of paternal affection to be cared for on the opposite side of the globe. There was enough in this to stir even his manly heart. But he went forth to his work, and faithfully prosecuted it, until his already shattered constitution entirely gave way. In harmony with medical advice, he again visited America—returned to die. His work on earth is done, and he is now we trust "where the wicked cease from troubling, and where the weary are at rest."

LARGE BEQUEST.

The Philadelphia *Ledger* has a letter from Shemokin, Pa., which shows that there is in the world one man sensible enough to be his own executor of that portion of his estate which he designs for benevolent objects. It seems that the Hon. Wm. E. Helfenstein, being in possession of a large body of valuable coal lands in the Shamokin region, and having a heart always open to acts calculated to ameliorate the condition of those in want, determined to dedicate *forever* a portion of his estate for the benefit of the destitute poor of New York, Philadelphia, Baltimore, Lancaster, Carlisle, &c., &c.;—for the endowment of a Free College at Shamokin, and for the benefit of African Colonization.

The land to be devoted to these praiseworthy objects is in two tracts, and embraces about 600 acres of the best anthracite in the State; the one tract, for the destitute poor, is said to be capable of producing 300,000 tuns per annum when properly developed, and the other tract, for the endowment of the College and African Colonization, will yield, it is estimated by competent judges, 150,000 tuns. At a low rental this quantity will bring in a revenue of upward of $100,000 yearly—which is more than 6 per cent. on a million and a half of dollars. One of these tracts has already been leased, and will, the coming year, be put in operation.

The day set apart for the consummation of the design of Judge Helfenstein was Friday, the 22d of December. A number of persons were present from Philadelphia, Lancaster, Harrisburg, Pottsville, Danville, Sanbury, Northumberland, Traverton, and other places, to witness and participate, along with the people of Shamokin, in the interesting ceremonies. Governor Wm. Bigler was one of the guests in attendance.

At 10 o'clock A. M., a procession was formed which proceeded to the land intended for the poor. It is located immediately on the south-west side of Shamokin, and for easy development and facilities of transportation to the main road, is not surpassed by any tract in the region. And having passed over a portion of it, sufficiently to give an idea of its immense value as a coal estate, the ground selected for the College was visited for the purpose of laying the corner-stone of that Institution. The site for the College covers an arrea of 30 acres, on the highest point in the vicinity of Shamokin, affording views of the surrounding country of surpassing beauty and loveliness. At this point the Hon. C. W. Hegins, of Pottsville, introduced Governor Bigler as the person selected to perform the ceremony of laying the corner-stone. The Governor delivered a brief but eloquent and impressive address. He deposited in the stone, the Bible, the Prayer-Book, the several newspaper publications of the Episcopal Church, and the *American* and the *Gazette*, of Sunbury. A prayer was then offered by the Rev. Mr. Washburn, of Pottsville; after which the procession returned to the new hotel.

THE SABBATH IN ILLINOIS.

The editor of the *Sabbath Recorder* will much oblige by giving the following two or three insertions in his paper :—

To the Legislature of the State of Illinois, in the Senate and House of Representatives assembled :—

Your petitioners, inhabitants of ——— and vicinity, respectfully pray that the School Laws of this State may be so amended that all meetings for the election of officers and voting of taxes be held on some other day of the week than the Seventh, and one not observed as a Sabbath by any of the citizens of this State. And your petitioners will ever show due respect.

It is reported, that the School Laws of the State of Illinois will be modified during the approaching session of the Legislature. It is therefore respectfully proposed, that all Sabbath-keepers residing in this State copy the above petition, obtain signatures, and forward the same to their own county representatives, or some other member of the Legislature, at as early a day in the session as practicable. SAMUEL DAVISON, Farmington, Ill.
JOHN R. BUTTS, Southampton, Ill.

RUM-SELLING ON SUNDAY.—The New York Board of Councilmen have recommended for adoption an ordinance designed to secure the enforcing of the excise laws. It makes selling liquor without a license, or selling it on Sunday with a license, a misdemeanor, punishable with a fine of ten dollars, and imprisonment unless that sum is paid. Referring to the ordinance, the *Tribune* says :—

"It is pretty nearly a re-enactment of the State law, which never was and never will be enforced in this city—at least not until there is a great improvement in the character and habits of many of those who solemnly swear, on their induction to office, faithfully to execute all the State and Municipal statutes, and then, for three hundred and sixty-five days in the year, permit ten thousand violations to be done in their very sight, without moving a finger to fulfill their brave oaths."

CHURCH BROTHERHOOD.—The Bishop of Western New York, in his recent address to the Convention of his diocese, thus alludes to this Brotherhood :—

"The establishment of Brotherhoods and Sisterhoods as organizations in the Church, I cannot but regard as alike a needless, cumbersome, and hazardous instrumentality of usefulness—*needless*, as its objects of benevolence can be met by existing parochial agencies faithfully applied; *cumbersome*, as demanding, in time, means and efforts, more than it is likely to yield; and *hazardous*, as forming a church within a church, and what may readily become a sectional, exclusive party organization, proving itself inimical to real unity in the great brotherhood of Christ—that one Holy Catholic and Apostolic Church with which all may well be content."

SUNDAY IN RHODE ISLAND IN 1647.—In the *Newport Mercury* we find an interesting series of historical articles relating to Rhode Island. Under date of 1647, the writer, speaking of the "common law" of that time, says: "The word Sunday or Sabbath is not mentioned—no day is set apart for recreation or religious observance. Faithful to their professions of religious liberty, the legislators of Rhode Island left each individual free to observe what days he pleased, or to omit the observance of any. The subject of religion was not in their opinion within the province of legislation; each individual, and each religious association, were protected in their belief, but not restrained by the Government or laws established."

THE METHODIST CHURCH.—Another breach is expected in the Methodist church. Rev. Dr. Bond, editor of the N. Y. *Christian Advocate*, in noticing the opposition to the appropriations of missionary money to the preachers laboring in the slave-holding conferences, says:—"We have seen strange things in the lapse of three-score years and ten, but this caps the climax of the marvelous; and though we are no prophet, nor the son of a prophet, we venture to predict, that mischief is now brewing in our church—agitations, convulsions, and disruptions, such as we have never witnessed before."

RUSSIAN SOLDIERS.—A London letter, in the New York *Commercial* of 13th in reviewing the operations at the battle of Inkermann, says :—

"The personal conduct of the Russians throughout the contest was such as to create horror and disappointment, and to undeceive all who had hoped that their barbarism had been in some degree mitigated by the period which has elapsed since the career of Suwarroff. They pierced the fallen and wounded, refused quarter, and even tore off the bandages of those who, after temporary aid, had been left for the moment on the field; and these fiend-like habits seem not merely to have been the result of drink upon the common men, but to have been directly encouraged by the officers."

REV. E. L. ABBOTT.—The funeral obsequies of Rev. Elisha L. Abbott were attended at New Woodstock, N. Y., Dec. 20th, by a large and solemn congregation, gathered from that and adjoining towns. His two sons, his only surviving brother and sister, a sister of his deceased wife, with several more distant relatives, were present. Fourteen ministers of the gospel were there, eight of whom took part in the services.

"THE CAROL."—In our notice last week of this new collection of music and hymns for the use of Sabbath Schools, the printers made us say it consists of 28 octavo pages. It consists of one hundred and twenty-eight octavo pages, one hundred and fifty-six hymns, eighty-eight tunes, and six chants. In our next we shall probably print a list of tunes, &c.

Abstract of Proceedings in Congress.

THIRD-DAY, DEC. 26.

In the SENATE, memorials asking relief to be sent to Dr. Kane, were presented. Notice was given of a bill for the relief of soldiers of the war of 1812. The Annual Report of the Coast Survey was ordered to be printed. The bill for a Light-House on Cape Race came from the House, and was referred.

In the HOUSE, the Senate resolution, reappointing Rufus Choate and Gideon Hawley Regents of the Smithsonian Institution, was passed. Mr. Whitfield introduced a bill to aid Kansas in the construction of a railroad in the said Territory. The Judiciary Committee was instructed to inquire into the expediency of preventing by law the importation of foreign paupers into the United States, and report a bill at the earliest possible date. Other resolutions to inquire into the expediency of a Navy Yard at New Orleans; declaring void the Minnesota charter for a Pacific Railroad; and to provide for additional pensions, were passed. A bill was introduced to cede to New York that portion of Massachusetts known as Boston Corners; the bill passed without opposition. The bill granting lands to the States for railroads and education, was postponed for three weeks. Another bill to amend the Land Graduation act, was brought in, and postponed for a week.

FOURTH-DAY, DEC. 28.

In the SENATE, petitions for Harbor Improvements in New Jersey were presented; the bill from the House ceding "Boston Corners" to New York passed. Nothing else of importance was done. Adjourned to Sixth-day, when they will only meet to adjourn to Third-day.

In the HOUSE, the bill authorizing the construction of a subterranean telegraph from the Mississippi to the Pacific, was referred to the Committee of the Whole. The Army and Post-Office Appropriation bills were discussed in Committee, and reported to the House. An amendment to try camels and dromedaries as means of transportation, was ruled out of order. An amendment to carry mails from Independence to San Francisco in coaches, was lost. Both bills were then passed. A bill to provide for Harbor Improvements having been called up, a debate ensued, in which it was stated that no less than one hundred and forty bills for Internal Improvements are stayed by the President's vetoes. The particular bill under notice was referred to the Commerce Committee. Bills were introduced to provide for river improvements, post roads, public buildings, and a geological survey in Kansas. Adjourned to Sabbath-day.

European News.

The U. S. M. steamer Atlantic, with European news to Dec. 16th, one week later, arrived at New York on Sunday afternoon last.

There is no news of the slightest interest from the Crimea. Affairs within and without Sevastopol remain precisely as they were. Occasional shots are exchanged when a mark presents, but the firing has ceased to be continuous on either side. All field and siege operations are suspended by the heavy rains, which have rendered the roads impassable, and filled the trenches of the besiegers with water. The besieged avail themselves of the respite to repair works. Cholera and scarcity prevail within the city.

It is said that if the negotiations now pending do not produce peace, Russia will call out 16 men per 1,000, equal to a million of men, to take the field as early as possible.

From debates in the British Parliament, it appears that the treaty with Austria is conditional, and that it is so framed that Austria may, at the last moment, retire from the alliance, without breach of faith. England is going to enlist German and Swiss auxiliaries, and to transfer a portion of the militia to do garrison duty in the Mediterranean stations, and, perhaps, in the Provinces of North America. The general feeling of the British nation is patriotic, and voluntary contributions for relief of the army flow in with the most lavish liberality. Among the latest shipments is a cargo of plum-puddings for Christmas.

Important Trial and Heavy Damages.

An important railroad case has recently been tried at Norwich, Conn., which occupied more than a week. The plaintiff is Crocker, a sea-faring man, who was ejected from the cars between New London and Norwich. The defendant is the New London, Willimantic and Palmer Railroad Company. The facts are as follows:—In December, 1853, Crocker wanted to go from Norwich to New London. Upon the arrival of the freight-train, he went to the office to procure a ticket, and found the door closed, as is usual on the arrival of the freight-train. The fare is fifty cents when a ticket is bought—without a ticket the charge is fifty-five cents. Crocker went aboard the cars, and when called on by the conductor for his fare, stated that he had applied to the ticket office, but, finding it closed, he had entered the cars with the intention of going to New London, though he had only fifty cents with which to pay his passage. The conductor demanded the additional five cents, otherwise he would be compelled to put him out of the cars. The superintendent, who was on the train, was appealed to, and confirmed the decision of the conductor. Several persons, employed on the train, were now called upon, and assisted in thrusting Crocker out. His knee-pan was broken, but whether by the fall or by his efforts to get upon the train again, after it was in motion, does not clearly appear. He managed, by crawling, to reach a house, three-quarters of a mile distant.

The Judge, in his charge to the Jury, maintained that a Railroad Company was compelled to carry all persons that applied for passage and offered to pay the required fare—that it could make no exceptions, though a passenger may so conduct as to justify the company in putting him out of the cars. Crocker had offered to pay the price of a ticket, and no more; and he claimed that he used all diligence to obtain a ticket, but could not, inasmuch as the office was closed. The Jury were to inquire whether he had reasonable time to obtain a ticket. If he had not, there was a trespass from the beginning, for, in case there was not time, Crocker had a right to go to New London at the price tendered—namely, 50 cents. If he had time, then he was bound to pay the extra charge of five cents. The Judge further charged, that if the Company had any right to put Crocker out of the cars, it was for the Jury to inquire whether only so much force was used as was necessary to effect that object—whether he was kicked, and whether his knee-pan was broken when he was thrust from the cars, or when he attempted to get on again. If he had a right to remain in, he had a right to get on again; and in that case, it mattered not in what way the injury was inflicted, the Company would be responsible for damages. If the defendants acted, through their agents, wantonly, and were reckless of doing injury to the plaintiff, then the Jury would give damages, not only sufficient to compensate the plaintiff for his bodily injury, but sufficient, also, to protect the public from such acts of negligence and wantonness hereafter. The Jury, after several hours deliberation, brought in a verdict of $8,200 damages against the Railroad Company.

"OLD HUMPHREY" IS DEAD.—So says the English correspondent of the *Christian Observer*, who accompanies the announcement with the following account of the man :—

That prolific and most useful writer for the young, known by the cognomen of Old Humphrey, is no more. His real name was George Mogridge—he was a native of Ashted, near Birmingham—and was born in 1787. He was trained to handiwork, but very early his thoughts and aspirations soared above the ordinary engagements of trade. His first attempts at writing were in a local newspaper which met with encouragement. About 1814, he published a tract, "The Sabbath-breaker Reclaimed," which brought him into connection with the Religious Tract Society. Many tracts he wrote about this time marked by great originality, and a happy adaptation to the condition of the working classes. But it was chiefly under the appellation of "Old Humphrey" that he became generally known to the reading public. The pieces to which this name was affixed appeared regularly in a fugitive form in the periodicals of the Tract Society, and were subsequently collected into volumes. Other volumes he also wrote under the names of "Grandfather Gregory," "Old Alan Gray," "The Old Sea Captain," "Old Anthony," "Ephraim Holding," and other aliases too numerous to particularize. When more suited to his purpose, he adopted the feminine gender; hence we have "Grandmamma Gilbert," and "Aunt Upton." His more directly useful class of books were, "Learning to Think," "Learning to Feel," "Learning to Act," and "Learning to Converse." The number of separate publications in the Tract Society's catalogue of which he was the author exceeds 150. He supplied nine volumes to the "Peter Parley" series, independent of a vast variety of articles contributed to the monthly periodicals. Thus years passed away in active and useful literary engagements, until he became a *real* Old Humphrey; and, with advancing age, came weakness and affliction. But "I never think of death," said he, "but I think of heaven—they are so connected in my view." After an illness of ten months, in the 67th year of his age, it pleased God to remove him thither.

THE MORMONS.—A case has just occurred in London, that raises a question of considerable interest and importance—Are Mormons entitled to claim the privileges of Protestant Dissenters in that country? At the Middlesex Sessions, Andrew Hepburn, a respectable looking man, described as well educated, was indicted for a misdemeanor in having wilfully and maliciously disturbed a certain number of persons who had assembled for the purpose of religious worship in a place duly registered according to the statute. It appeared that the room was occupied by the Latter-day Saints, at Stepney, and that one of their preachers was delivering a lecture when the defendant entered, and clamorously interrupted him by calling for the text. For the defense it was argued that the Mormons were not Protestant Dissenters, and that the law could never be construed to protect in worship those who entertained their abominable doctrines. The magistrate gave the decision in favor of the Mormon congregation; but the press in general are much disposed to demur to the propriety of the decision.

"A GUILTY CONSCIENCE NEEDS NO ACCUSER."—Never was the truth of this passage of Scripture more apparent than in a case that occurred yesterday afternoon. Officer Jellison, of the North Police, Boston, was walking down Franklin street, not thinking of his vocation of thief-catching, when, at the corner of Federal street, he came up to Timothy Coffee, a noted young rogue, who no sooner saw the officer than he stopped, and cried out, "If you'll let me go this time, I'll take it back to the store where I got it." The officer put his hands upon him, and, upon inquiry, ascertained that the cape he was wearing was the article referred to. It appeared that he had stolen the cape (which was of the latest style, and worth $25,) from the store door of Richardson, Messenger & Co., corner of Court square, and, putting it upon his shoulders, had walked off with a grace that could not have been acquired in the House of Correction, where he has passed the larger portion of his life. When the officer came so suddenly upon him, he thought he had been pursued, and his consciousness of guilt caused his detection. He was taken to the station house, and before he again walks the streets, will verify the truth of that text of Holy Writ, "The way of the transgressor is hard." [Herald.

WAR SUGGESTIONS.—Among the suggestions now going the round of the British Press, and finding favor with public opinion, are the following: A band of "navvies" with spade and pickax, barrow and boring tools, to throw up intrenchments, and relieve the troops from that laborious duty, and to lay down a line of rails from Balaklava to the camp, for easy transportation and communication with the ships; Colt's revolvers for the rank and file as well as for the officers; and a general supply of cannon-spike and hammers, especially for the cavalry, so that when they carry the enemy's guns, if only for a moment, they can render them unserviceable for the day. The subject of winter clothing is much canvassed. Pea-jackets are declared to be no meet protection against the cutting blasts of the Crimea; sheep-skin coats with the skin outside, such as the Russian peasant wears, buckskin mittens, fur boots and caps, are recommended by those who have had experience of the severities of a Russian or Canadian winter. It is said that the proposed wooden huts above the ground will not answer without stoves, and that the warmer plan would be to live in holes under ground, with the roof slightly above ground, in the same way as the Russians did last winter in the Danubian Principalities. [Tribune.

DEATH FROM HYDROPHOBIA.—A young man named Warren Moore, youngest son of Mr. Daniel Moore, of Orange, died of hydrophobia on Tuesday, the 12th ult. Eight weeks before he had been bitten by a small dog belonging to a man who had often worked for his father, and had sometimes been there with its master. On this occasion the dog was there alone, and got into a quarrel with Mr. Moore's dog. Warren attempted to separate them, when the neighbor's dog bit him in one thumb. Little was thought of it, however, as no suspicions were then entertained that the dog was mad, nor did any symptoms develop themselves till the Saturday before his death, when, on returning from school, he complained of feeling unwell. Next morning his illness continued, but not so as to excite particular attention, as he was about the house. But, as his mother passed him, while he was combing his hair before a mirror, he said to her that that was the last time he should do that, for he was going to die. He also proceeded to give directions as to the disposal of various little matters of his to his several friends. As no serious symptom had yet shown itself, his parents were astonished at this, for they did not think of the bite he had received nearly eight weeks before. But he continued to grow worse, and, in the forenoon, became unable to swallow, and the movement of persons in the room gave him much distress. Medical aid was procured, but it was powerless. On Monday he had spasms, which continued at intervals, with increasing violence, till Tuesday morning, when he died. During his spasms his agony was awful, and his screams terrific. He was perfectly rational when not in the spasms, and requested that he might die on the lounge in the sitting-room, with his head in his mother's lap. A little before his death he motioned to his mother to sit by him; she did so, and he put his head into her lap and soon expired. He was a smart and promising lad, seventeen years of age. [Greenfield Repub.

A NOVEL SCENE.—The ex-postmaster of Boston sends from Germany an account of a dinner to a railway congress, at which a locomotive appeared upon the table, having attached to it a train loaded with dishes of the choicest and most solid food. The succulent train advanced slowly, in imitation of the passenger trains upon all German roads. After having made the tour of the table without stopping, in order to give a view of the good things with which it was freighted, the train again started, making a station in front of each guest, and permitting him to fill his plate according to his appetite and fancy. The trains followed each other in constant succession for two or three hours, departing every time well loaded with comestibles, and always returning empty to the depot.

SUMMARY.

The citizens of Williamsburg and the eastern portion of Brooklyn are about taking action for the purpose of petitioning the Legislature for the passage of an act authorizing the construction of a Ship Canal from the Wallabout Bay, east of the Navy Yard Hospital, through a portion of the Seventh Ward, Brooklyn, and the Third Ward, in Williamsburg, to Newtown Creek, at a point near Troutman's Hotel. It is proposed that the Canal be constructed fifty feet wide, and of sufficient depth to admit ordinary vessels, loaded, in order that such articles as coal, wood, building materials, provisions, &c., can be landed at any point upon the Canal, thereby materially lessening the cost of those articles to the consumer.

The Manchester (N. H.) *Mirror* states that Lucien Ayer, of Plaistow, who, three years ago, was convicted of a State Prison offense in Rockingham County, N. H., and cleared out, being free on bail, returned to Plaistow last Sunday, and on Monday was arrested and sent to Exeter Jail. He has lately been at the head of a wild-cat bank in Kansas, which has been spoken of in connection with the enterprise of that country, as an "institution flourishing under the enterprise of a distinguished son of New Hampshire!"

The New York *Post* says: "On glancing at the daily returns sent to the office of the Chief of Police from the various Wards of the city, we were struck with two facts. The criminal arrests are comparatively *few*, and for trivial, disorderly offenses—and the number of *destitute* persons provided with shelter and lodging during the past twenty-four hours is very great, comprising no fewer than 325 names. This speaks well for the forbearance from crime of the classes that are suffering most from the season and from commercial depression."

The Reform Diplomatic bill now before Congress proposes the following salaries for Foreign Ministers: Great Britain, $17,500; France and China, $15,000; Spain, Russia, Austria, and Prussia, each $12,000; Brazil and Mexico, each $10,000; Turkey, Peru, and Chili, each $9,000; Switzerland, Rome, Naples, Sardinia, Belgium, Holland, Portugal, Denmark, Sweden, the Argentine Republic, New Grenada, Bolivia, Ecuador, Venezuela, Guatemala and Nicaragua, each $7,500.

A coal vender, named Scott, entered the store of John H. Springer, on Main-st., in Providence, on the afternoon of the 25th ult., at about 5 1-2 o'clock, to purchase some clothing, and as Mr. Springer was packing up the goods selected, Scott knocked him down and cut his throat with a razor, inflicting a severe wound, so that his recovery is uncertain. The villain escaped, leaving his hat and pocket-book with his name marked on it, together with the razor.

Three young men, named Wm. Williams, Sidney Miller, and Edward Skillman, have been arrested in Cincinnati, as the robbers of the U. S. Express Company, in that city, a few months since. Another man, named Bazil Estep, arrested for the same offense, has been brought to Cincinnati by the Marshal of Davenport, Iowa. The amount taken from the Express Company, it is stated, amounted to $45,000.

The citizens of Sandusky, O., held a meeting on Saturday evening, 23d ult., and resolved to reimburse R. M. Sloane, Esq, for the amount of the judgment rendered against him, at the late term of the U. S. District Court, for an alledged violation of the Fugitive Law. A committee was appointed to receive subscriptions in aid of the object.

The State of New York is to be enlarged. A bill has passed the House of Representatives, to cede from Massachusetts to New York the 1,800 acres of prize-ring ground, known as Boston Corners. It will undoubtedly pass the Senate without opposition.

Near Amherstburg, Canada, a few days ago, a man was eloping with a young woman, when their sleigh was overturned. The girl's neck was broken, causing her instant death; the man suffered a fracture of the leg, and was taken to a hotel in Amherstburg, where his wife is now kindly attending him, in fulfillment of her marriage vow.

Thomas W. Dorr, or "Governor Dorr," of Rhode Island, whose famous "rebellion" is still fresh in the memory of the public, died Dec. 27th, at Providence. It is said that he had not enjoyed good health since his imprisonment.

Arrison, the man who has been on trial at Cincinnati for sending an infernal machine which killed a man, was convicted of the crime, and sentenced to be hung.

The creditors of James McHenry, it is said, may expect one shilling and sixpence on the pound sterling.

Manchester, the great Cincinnati Broker, has left assets, from which, it is supposed, his creditors will realize six cents on the dollar.

It is said that the steamer Pacific took out 67,000 letters; the largest letter-mail ever conveyed across the Atlantic.

New York Markets—January 1, 1855.

Ashes—Pots $6 50; Pearls 7 50.

Flour and Meal—Flour 9 00 a 9 37 for common to good State, 9 25 a 9 75 for Michigan and Ohio, 11 00 a 12 00 for extra Genesee. Rye Flour 6 62 a 7 75. Corn Meal 4 25 for Jersey. Buckwheat Flour 4 50 per 100 lbs.

Grain—Wheat 2 00 for white and Southern, 2 62 for Genesee. Rye 1 37 a 1 40. Oats 48 a 50c. for Jersey, 54 a 60c. for State and Western. Corn 99c. for Western mixed.

Provisions—Pork 14 00 a 15 00 for new Western prime, 12 75 for old mess. Beef 6 00 a 7 00 for country prime, 9 00 a 11 25 for country mess. Lard 10 a 20½c. Butter 13 a 19c. for Ohio, 19 a 24c. for State. Cheese 10 a 10¾c.

Lumber—16 00 a 16 50 for Eastern Spruce and Pine.

Tallow—12¾c. for prime city.

☞ We commence with the new year to give a weekly commentary on the commercial, financial, and general condition of the country, in a business point of view, embracing in its range the condition of things for the time being, notices of the past, and the prospects of the future, together with hints upon political and domestic economy. If we view in detail the evils of life, we find that a large part of them arise from errors and follies in financial, commercial, and pecuniary matters. The community is now suffering severely from hard times, as they are called. There is a great revulsion in trade, and stagnation in business—a great suspension of industrial operations, and multitudes of workers are thrown out of employment, whose only means of support for themselves and families was their daily earnings, and our community is daily saluted with the cry of suffering and misery from this cause. We read accounts of suicides from despair in consequence of this state of things—one account where a mother was informed of the death of her child from starvation, while she was giving testimony before a coroner's jury as to the suicide of her husband. Is there any remedy for these things? This inquiry shall be the subject of our weekly commentary. Is there not some essential error in our commercial and financial system? We think there is and we shall attempt to point it out, together with the natural and appropriate remedy. The great and radical error of our whole system of business, is the excess of debts. These bankruptcies, failures, revulsions in business, stagnations of productive industry, are the natural and inevitable results of this system. We have perhaps written enough for the introduction of the subject. In our next, we shall make some remarks as to the proper remedy, and the most effective manner of introducing it into general use.

⁂

MARRIED,

In DeRuyter village, Dec. 24th, by Charles H. Maxson, Esq., Mr. BENJAMIN F. REYNOLDS, of Otselic, to Miss LUCETTA SHERMAN, of DeRuyter.

In Greenmanville, Ct, Dec. 25, by Eld. S. S Griswold, Mr. CHARLES W. WHITING to Miss HANNAH J. NICHOLS, both of Stonington, Ct.

In Brookfield, Madison Co., N. Y., Dec. 24th, by Eld. J. Clarke, Mr. WM. G. FITCH to Miss HARRIET PECK, both of the above place.

DIED,

In Hebron, Ill., Nov. 3d, of erysipelas, LEONARD SEAMAN, in the 58th year of his age. Bro. Seaman experienced religion in the 38th year of his age, while a resident of Richland, N. Y., and soon, from "searching the Scriptures," embraced the Bible Sabbath. On settling in Illinois, he attached himself to the Church at Walworth, Wis., where he remained a shining light until called to enjoy that rest that remains for the people of God. He leaves a wife, four children, and a large circle of friends, to mourn their loss. O. P. H.

In West Edmeston, Otsego Co., N. Y., on the 12th of December, WASHINGTON A., son of John L. and Sarah Clarke, in the 16th year of his age. This youth had been subject to fits from childhood until his death.

In Brookfield, Madison Co., N. Y., on the evening of Dec. 24th, of fever, Mrs. ELNORA BABCOCK, wife of Mr. Leonard Babcock, aged 37 years. Sister Babcock experienced religion in early life, and united with the Seventh-day Baptist Church in Lincklaen, N. Y. Subsequently locating in Leonardsville, she united with the 1st Seventh-day Baptist Church in Brookfield, where she remained a worthy member until death closed her pilgrimage. By this mysterious providence, the church is deprived of a devoted member, her husband of a good wife, two children of an affectionate mother, and a large circle of relatives and acquaintances of a much-esteemed friend. We believe that our loss, though irreparable, is her eternal gain. J. C.

In Wellsville, N. Y., on Friday, Dec. 15th, of consumption, Mrs. SARAH YORK, wife of Hiram York, Esq., and daughter of Nathaniel Johnston, aged 27 years.

At Potter's Hill, R. I., Sept. 23d, 1854, of consumption, EUNICE RODMAN, aged 44 years. She was a worthy member of the Pawcatuck Seventh-day Baptist Church.

LETTERS.

Woodworth's Youth's Cabinet.

A New Ballad for Yankee Doodle—by Brother Jonathan.

To every body, far and near,
In all this Yankee nation,
Who'll hear my song, I'd like to give
This piece of information:

Chorus.—The *Cabinet* is just the thing
For merry boys and girls, sir;
There's nothing like it in the land,
That's making such a noise, sir.

Woodworth's Youth's Cabinet (the name
Scarce fits my jingling measure)
Is the young people's magazine,
That yields unceasing pleasure.

Among its rivals, 't is the best;
It beats the whole to pieces;
'T is made by "Uncle Frank," for all
His nephews and his nieces.

It treats of strange and curious things,
In nature and in art, sir;
There's nothing wondrous in the world
That here plays not its part, sir.

It tells its readers, now and then,
Of famous men and women;
Of beasts and birds; of fishes, too,
And of the sea they swim in;

Of travels, voyages, and deeds
Of peril, and of glory;
It chats in prose and poetry,
In fable and in story.

It hunts for curiosities
In near and distant places,
And pictures, racy, rich and rare,
Its treasury embraces.

Its riddles, puzzles and charades,
Too numerous are to mention;
The time would fail me to rehearse
The things that claim attention.

Whoever reads its pages o'er,
(There's no mistake about it,)
Is sure to find, ere he's aware,
He cannot do without it.

'T is issued every month, you know;
And please these facts remember:
The volume now has just commenced,
'T is finished next December.

And by the way, 'twere well to note
Another circumstance, sir:
For one whole year, you've but to pay
One dollar in advance, sir.

So please the money now enclose
To *Woodworth, New York City,
One hundred eighteen Nassau street*—
And I will end my ditty.

☞ The publishers of such newspapers as receive this notice, are requested to give the foregoing ballad (not including this notice) two or three insertions—the first insertion in their literary department. To those who comply with this request, the undersigned will send one copy of *Woodworth's Youth's Cabinet* for two years, or two copies for one year, at the option of the publisher respectively. D. A. WOODWORTH.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of FRANCIS C. WOODWORTH, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year*.

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83⅓ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

Money and post-office stamps may be sent by mail, at the risk of the publisher.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year*.

☞ Send on your list of names for the new volume, with the money, addressed to
D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M. Leave Elizabethport at 8 and 9.45 A. M., 1.15 and 3.30 P. M. JOHN O. STERNS, Superintendent.

Miscellaneous.

Suggestions for Farmers.

From the address of Horace Greeley before the Agricultural Fair of Franklin County, Pa., we copy a few more paragraphs of general interest:—

I will say something of Fertilizers, first guarding against the misconception that I propose any new-fangled compost or preparation as a substitute for the ordinary barnyard manures. I do nothing of the sort. Let every farmer make as much of these as he can, and apply every bushel of it promptly and carefully. There is nothing better than barnyard manures, so far as they go; but they do not go far enough, nor can the farmer afford to bring them from a distance; their bulk renders their transportation too expensive. No farmer can afford to haul such manure ten miles by teams, if it were given to him. But let each man make all he can, carting in muck from the nearest bog or mill pond to double or treble the quantity. And where drawing muck to the yard and drawing it back to the field would be a heavy tax, let him draw it out each fall upon the nearest firm, dry land, apply a bushel of lime slaked with strong salt water to each load of muck; let it stand till spring, and then spread it (not too thinly) on his lands. It will more than repay its cost, to say nothing of the improvement thus effected in the healthfulness of the neighborhood by banishing fevers, and its comfort by expelling musketoes. Make all the manures you can. I don't believe a farmer was ever ruined by over-doing this business. But while they are excellent, I think still more are needed.

Liebig, if I mistake not, regards the application of needed minerals as the chief end of manuring, and first of these minerals he considers lime. Plaster of Paris, or Gypsum, is well known to be composed in good part of lime, but the sulphur which it also contains is an essential element of vegetation. It has the power of attracting and combining with Ammonia, so that the free use of Plaster about our barns and hog-yards prevents offensive odors by retaining and fixing the Ammonia which would otherwise fly off, and which lime would expel. Hence the sowing of pastures with Plaster is advisable, not merely because of the value of the elements which these will attract and retain from the atmosphere. Of two farmers living side by side, one of whom plasters his hill-pastures, and the other does not, he who plasters will enrich his own land at the expense of his neighbor's, which will grow poorer and poorer, through the loss of Ammonia which would otherwise be obtained by it, but which is forced away by the superior attraction of the plastered land. I think plastering will pay almost anywhere; but if your neighbor plasters, you must, or be impoverished.

I do not think so highly of Guano as many who have used it do, though I have realized good results from its use. It seems to me the Alcohol of vegetation, less potent in itself than in stimulating the plants to exhaust the soil of elements which it already possessed. I think Guano has been, or may be, so used as to leave the soil far poorer than it found it. Still, it works admirably on most lands, so far as immediate results are concerned; and I have now a very large growth of turnips, where, but for Guano, I should have had a very small one. But I think Guano too costly for general use, except in a cold, wet summer, when vegetation needs to be not only strengthened but quickened. In ordinary times, a farmer can make, for sixty dollars, a heap of compost which will be worth more to him than a ton of Guano.

You may have heard that our latest hobby about the cities is phosphate. Let me explain it. Phosphate is a combination of phosphate and lime. Bones are composed mainly of lime, but they also contain phosphorus, and cannot be well formed without it. Every ear of corn or pint of milk must likewise have its minute allotment of phosphorus. Now we around New York have been feeding cattle and selling milk and beef until we have eventually exhausted the soil of phosphorus. Every ox or cow sold off to the city has taken away some phosphorus, and the bones which contains it instead of being crushed and returned to the soil which produced them, have been sold off to England to enrich soils which have been producing wheat for hundreds of years, and now yield more than ever before, while our wheat-lands of fifty years ago have given out and would not yield three bushels to the acre. Thus our need of phosphate is great, and we are beginning to supply it. Here the exhaustion is probably far less; but you ought to take care that bones in some form should be returned to the soil to at least as great an extent as they are taken from it.

But I think the most profitable foreign substance to be applied to such soils as yours is potash. Of course, the most convenient form of applying it is that of wood-ashes, where such can be bought; but it is not possible to buy one bushel of ashes where twenty could be applied with profit. I need not advise any good farmer to save carefully and apply judiciously all the ashes he makes or can buy at any price per bushel below that of potatoes—good farmers understanding this already. Nor need I advise him to secure and spend upon his fields every deposit of even leached ashes; for these, though nearly exhausted of potash, contain other elements of decided value.

"But all you recommend costs money," says an old-school farmer; "how are we to pay for such extensive improvements?" I answer:

Cut your farm into halves, sell one of them, and use the proceeds to drain, subsoil, and fertilize the residue. Ten acres thoroughly tilled, yield more and more surely, than forty acres half-fertilized and badly-tilled. We all farm too much land—everybody admits it, yet almost every one persists in it. Farmers seem to imagine that they don't own more than six inches of the surface, and that they will dig into the property of some one else, if they go lower. I beg to assure them, that they can go down two feet without encroaching on the rights of others. But of what each man retains, he is apt to plow and to seed too much. I believe every acre worth plowing should be drained, but I believe very much is now cultivated which never should be plowed, except perhaps once in ten years, in order to seed it with grass afresh. Let the farmer who *will* hold on to his hundred acres or more, keep it nearly all in grass and wood; for timber, though a slow, is a very sure crop. Take up but a few acres at once, cultivate it thoroughly, and lay it down to grass frequently, keeping your crops in constant rotation—that is the true course—and, whenever you till at all, be sure to till thoroughly. I don't believe the farmer who grows less than twenty bushels of corn to the acre averages laborer's wages; I am sure no man habitually grows fifty bushels to the acre, who does not make a profit on his farming. Whatever is worth doing at all, is worth doing well.

But save money also by increasing the size of your fields, and diminishing the number of your fences. This country is covered with a superfluity of fences, and every year renders these nuisances more expensive, as timber grows scarcer. I think an ordinary farm should consist of three fields—two pastures, and all the rest in one lot, with no cattle allowed therein at any time unless in yoke or harness. We pay far too much for the privilege of pasturing our meadows in fall and spring, when all that is thus picked up is more than balanced by the damage done to the ground alone. The English plan of a herdle or movable fence of wire or cord (inclosing perhaps two acres) which four men can lift and remove from place to place, is well adapted to all level lands, and will be introduced here. We are not yet ready for stall-feeding, except very near the great cities, though that will come in time. In one way or another the oppressive fence tax must be taken off the farmer's shoulders. Why should I, who take care of my own stock, be required to pay an extra tax to secure my crops from the cattle of my neighbors? Let each man take care of his own.

From the Charleston Southern Patriot.

A Female Slave Proved to be an Indian, and Freed from Slavery.

Some fourteen years ago, a Mr. Darby, of Chester District, purchased a girl called Lucy, who was carried to that neighborhood by a man named Thompson, said to have been seen in Washington, D. C., as late as 1851, practicing law. The girl had the looks of an Indian, but was sold to him as a negro. She ran away repeatedly, telling her playmates she was an Indian. Some three or four years ago, she was lodged in jail in Columbia as a runaway, and advertised. Her owner came for her, and was required to show his bill of sale, which was not considered altogether satisfactory. Several citizens were impressed by the girl's appearance, and advised the jailer not to give her up, as she evidently was an Indian. He applied to Governor Means for advice, and the Governor directed him to stand a suit, and let the case be decided by an appeal to evidence. Governor Manning also, upon coming into office, expressed an interest in the trial as one involving important rights to the girl.

After long delays by the party claiming her, to procure evidence, the case was tried at the late term. Some three years since an old Cherokee chief visited Columbia, upon hearing that an Indian girl was in jail. He said that fourteen years ago, while his tribe was on the way from North Carolina to Arkansas, an Indian girl, about four years old, was stolen from his party; that great distress was caused to her parents; that she was the child of his sister's daughter, and that her name was Lut-se; that he came to Columbia with the hope of seeing Lut-se, and that, as soon as he laid eyes on her, his heart was rejoiced to see the face of his sister's daughter; that this girl is Lut-se, and she is as much like her mother as her mother's sister's children are like her mother's sister.

The chief's name is Inaluskie. The old man removed eight years ago from Arkansas, and now lives in North Carolina. He was a captain under Gen. Jackson at the battle of the Horse-shoe Bend, where he commanded 130 warriors, and fought with much distinction. Commissions were read from several chiefs of tribes now in North Carolina, stating that a girl named Lut-se was stolen from one of their party, about fourteen years ago. A commission was read of the examination of a Mrs. Carter, the wife of a man who purchased the girl from Thompson, and sold her to Darby.

In this she stated that, learning from her children that the girl said she was an Indian, she called her up and questioned her about it, when she said "No," she was not Indian, but her mother was negro. This was offered as evidence, and strange to say, admitted. But it had the opposite effect of what was intended; as it was clear that among her playmates the girl told the truth, and to her master or mistress she evidently had been taught to say otherwise. Evidence was brought forward that she had for fourteen years been in Chester is possession of Darby, working as a negro, and so considered, although called "Darby's Indian."

The most striking testimony adduced in the case was that by our distinguished, talented and scientific townsman, Dr. R. D. Gibbes. This is not only mine, but the opinion of others. He understands the anatomy of our races as well as I know my multiplication table. As proof of my declaration, he was put upon the stand and called upon to explain the ethnological distinction of races. He was asked to point out the characteristics of the Indian and negro, which he did very minutely and fully, and in a manner to bring conviction to the whole assembled crowd. He exhibited a cast of an Indian skull—an aboriginal—said to be from one in the Academy of Science in Philadelphia, from a mound in Ohio. He explained all its characteristics, and then called up the old chief and interpreter, and showed the identity with their heads. He then compared it and their heads with that of Lucy, and established them all as of the same type.

He then handled a negro skull and demonstrated clearly the peculiarities, and showed by comparison the marked difference between them. He explained the prominent differences in the anatomical structure of the different parts of the body, and gave an exceedingly interesting account of the distinction in the hair of the Caucasian Indian and negro races. He stated a very curious fact, as resulting from microscopical observation, that in mulatto cross the hair of one or the other parent was present, and sometimes hairs of both, but never a mongrel hair; that no amalgamated hair existed, that as often the mulatto had straight hair as kinky. He stated that the microscope revealed that the hair of the white race was, when transversely divided, oval, that of the Indian circular, and that of the negro eccentrically elliptical, with flattened edges; that of the negro was not hair, but wool, and capable of being felted; that the coloring matter of true hair was an internal tube, while in the negro it was in the epidermis or scales covering the shaft of the hair.

In corroboration of his statement that both white and negro hair were sometimes found in the same head, a singular case was mentioned in my hearing by Dr. W. He stated that he once attended a half-breed Indian and negro, who had straight Indian hair. He was ill, and had his head shaved and blistered. On his recovery, when his hair grew out, it was negro hair, crisped and wiry.

These are very curious facts, and of much importance in the distinction of races.

The counsel of the plaintiff proposed and insisted on Dr. Gibbes to give the facts as to the hair of grades of blood; but he said he had not examined by the microscope any but the half-breeds. It is to be hoped that full investigation will be made of this sucject, and the facts published.

On the whole, the evidence set forth by Dr. Gibbes was extremely interesting, and developed some facts I never heard before. There has been but one opinion expressed in relation to it.

The jury decided in favor of the girl's being Indian, and she left Columbia next day with the old chief, on her way to Arkansas, to her parents and friends. Gov. Means was so convinced that the girl was Indian that he was heard to say that, if the case was decided against her, he would buy her and set her free. This feeling seemed to pervade the community, and it is more than probable that had the case been decided against her, the citizens would have freed her.

The Poultry Trade.

The poultry trade seems to have been rather overdone this season. On the 16th of December, this year, poultry was selling in New York for considerably less than at the same date last year—turkeys being 8 a 10c. per lb., geese 7 a 9c., and common fowls 5 a 8c. The following directions to those engaged in preparing for market are furnished by the N. Y. *Tribune*:—

PREPARING POULTRY FOR MARKET.

The first grand preparation should be to make every bird fat, for it is only such that sell quick, at a fair price. The birds should be killed in cold, dry weather, by cutting off the heads, or, in case of turkeys, cutting the veins of the throat with a sharp pen-knife, while the bird is suspended by the heels. In cutting off heads, draw the skin of the neck back, so that it will afterward stretch forward and cover the bone, where it should be tied. Be careful not to break the skin in any other spot. Be sure the birds all bleed freely. Don't scald them. If fat, they can be picked clean while dry. Hang them up by the feet till completely cool or firm. Never feed your fowls just before killing them, thinking to sell a pint of corn by the pound at the price of the meat. You will find it just such a money-making business as the fellow did who stole the skim-milk cheese and hid it in a bag of wool, which the merchant afterward weighed, and charged cheese and all at a wool price. New York poultry-buyers are sharp fellows, and if you stuff with corn, they will cut down prices. You may think you can draw the wool over their eyes, but in the end you will pay for the cheese.

PACKING POULTRY FOR SHIPMENT.

Procure merchants' dry-goods boxes of the best kind—if air tight the better, and clean rye-straw—nothing else, if you have to go forty miles after the rye. Place a layer of straw two inches deep in the bottom, and then put in a tier of bodies of birds, each kind together, every one of them resting upon the breast. Never vary that mode. Now put straw around so that in no place the meat and boards touch, and over the bodies so that the next tier will not touch the lower one, and so on till the box is full. Cover the top with as much straw as you can press down, so as to nail on the lid, which must be fastened with hoops. If you are sure of cold weather you can ship your box by a slow line, for it will keep sweet just as long as it keeps cool. It is safest to send it by express. Mark the destination plain and full.

Be sure never to "draw" any kind of poultry, particularly turkeys and chickens, for the New York market. It makes ten to twenty-five per cent. difference in favor of the former. Other markets require that these birds should be already prepared for the spit.

GAME BIRDS.

These are sent entire. They may be packed in the same way or in barrels. They are frequently sent loose in baskets or crates. If the weather is cold, that will do. They never should be packed, The quantity sent to this market is enormous. The Milwaukee *Sentinel* says that eight hundred and sixty dozen quails have been sent from that town this season.

VENISON.

Deer, if sent entire to market, are simply disemboweled. Most usually the saddle only is sent. In that case, the fore-quarters are skinned, and the skin turned back and wrapped around the hind-quarters and tied. This keeps the meat clean. In selling, all is sold together—skin, meat and legs.

New Law Concerning Marriages in Connecticut.

This goes into effect January 1, 1855. It does away all publishments, which will be a great relief to modest persons intending marriage; and also with the lodging of a certificate of the marriage with the Town Clerk, and paying him for recording the same. Under this law, if a couple wish to be married, they, or one of them, must go to the Registrar, or, in case of his absence or inability, to the Clerk of the town, in which they wish to be married, and give him information in respect to the name, age, birth-place and residence of each of the parties. The Registrar, or Town Clerk, as the case may be, shall then, on payment of twenty-five cents, issue his certificate that the parties therein named have complied with the provisions of this act. Provided, that no such certificate shall be issued, if the persons applying therefor, or either of them, are under the control of parents or guardians, until the Registrar or Town Clerk is certified of the consent of the parents or guardians. The certificate issued by the Registrar or Town Clerk, shall be a license for any Judge, Justice of the Peace, ordained minister, or licensed clergyman, in said town, qualified under the laws of this State, to join persons in marriage, to unite in marriage the parties therein named.

The person who thus unites persons in marriage, must indorse upon said certificate the fact, time and place of said marriage, with his signature to the same, and return the certificate, so indorsed, to the Registrar of the town in which it was issued, during the first week of the calendar month next succeeding such marriage, on penalty of ten dollars. If any Judge, Justice of the Peace, Ordained Minister, or regularly licensed Clergyman, joins any person in marriage without having first received the certificate required above, the penalty is one hundred dollars. Neither this act nor any other on our statute book, says any thing about any fee for uniting persons in marriage.

Railroad Matters.

A Convention representing about thirty railroads, with over two hundred million dollars capital, was held at Cleveland, Ohio, on the 28th November. This was an adjourned meeting of others held in this city, Buffalo, &c., to arrange concert of action, and equalize tariffs of charges, and other things of general interest to all the companies. We find the following, among other things, determined upon:

Discontinuance of the employment of runners to solicit passengers, and to discountenance the employment of such by all roads and steamboat lines, and not to allow any commission, directly or indirectly, for procuring passengers.

No free pass will be given to any freighter, and no return pass to any owner or driver of cattle. Attendants of stock will be carried on the train with the animals, and on no other.

The Convention also resolved that no general pass ought to issue after January 1, by any Company, except to the President, Superintendent, principal Ticket, or Passage and Freight Agents, and Lost Baggage Masters, of roads with which connecting roads have an arrangement.

No pass of one road shall be used by the holder to obtain a pass, by courtesy, of another road. Such passes shall have such directions printed on them.

It was resolved, as the deliberate conviction of the Convention, that the whole system of free passes, except as above, ought speedily to be abolished.

Coupon Tickets are recommended, with one for each road, upon which shall be printed, *not over* eighty pounds of baggage allowed to one passenger, and no responsibility for over $100 value, except by agreement, and for extra pay. The road selling the tickets not to be responsible for losses on any other road.

Emigrant passenger fares are fixed at $11 from Boston or New York to Chicago, and $2 50 per cwt. of baggage over 80 lbs. each passenger. To Cincinnati, $10.

The roads that send the emigrants forward receive ten per cent. out of receipts for extra expenses, and five-elevenths of the total, after deducting the ten per cent.

For shorter or longer distances, the emigrant fare will be in the same proportion.

After January 1, no tickets for emigrant passengers will be received by any of the roads, except those regularly issued from the offices of the companies.

First class passenger fares, upon either of the four great routes to the West, have been established as follows:

NEW YORK TO			
Sandusky	$14 65	Bellefontaine	$16 50
Cleveland	13 00	Dayton, via Xenia	18 00
Detroit	15 00	Dayton, via Galian and Bellefontaine	18 00
Chicago	22 00		
Indianapolis	20 00	Dayton, via Sandusky	18 00
Cincinnati	18 50	Toledo	16 00
Columbus	16 40	Louisv'e, U S M Line	20 50
Shelby	14 75	Louisv'e, Ohio & Miss	21 00
Xenia	17 70	Louisv'e, Indianap'lis	21 00

Improvement of Permanent Meadows.

From the constantly increasing price of hay, farmers are beginning to give the subject of the improvement of grass land and permanent meadows their earnest attention, and we confidently look forward to the speedy introduction of under-draining, irrigating, and top-dressing permanent meadows to an extent altogether improbable but for our well-known go-ahead habits.

The practice of under-draining meadows will appear ridiculous to some who have never witnessed the great improvement in the quality and quantity of the hay produced by it. Under-draining lies at the very foundation of all improvement of meadows. Irrigation and top-dressing are comparatively useless on any meadow surcharged nine months of the year with stagnant water. There are hundreds of thousands of acres which now produce nothing but coarse, innutritious herbage, which by under-draining would become the most profitable land on the farm. And much of such land is so situated that it could be irrigated with very little trouble or expense. A dam on a natural stream, and cutting a few artificial ditches are in many situations all that are necessary to irrigate a large meadow. The English farmers are far behind those of several countries of Europe in irrigation, but they are very far in advance of American Agriculturists, while, from their moist climate, the advantages of irrigation would be supposed to be less than in our dry, but short seasons. There are but few farms in England on which there is not a permanent meadow, more or less artificially watered. And the immense quantity of fodder produced on these lands materially helps to keep up and increase the fertility of the upland portions of the farms. [Rural New Yorker.

Guano and Superphosphate for Corn.

The *American Agriculturist* publishes, from an anonymous correspondent, the results of an experiment with artificial fertilizers on corn. The soil was gravelly loam, sward, and plowed about the 20th of May. The quantity of land allotted to each experiment is not stated. This is to be regretted. The fertilizers and crop are *calculated* to the acre.

The unmanured plot yielded 28 bushels per acre; that dressed with 16 loads stable manure, 35 1-2 bushels; 500 lbs. superphosphate of lime, 46 bushels; 690 lbs. guano, 50 1-2 bushels; 300 lbs. of superphosphate of lime and 640 lbs. guano, 58 bushels; 320 lbs. of guano and 640 lbs. of dissolved bones, (bones decomposed by sulphuric acid,) 51 bushels; 1,040 lbs. guano and 400 lbs. of superphosphate, 74 3-4 bushels; 16 tons stable manure and 640 lbs. of superphosphate 49 1-2 bushels.

The effect of an application of a good superphospate of lime on Indian corn, is what we have long desired to see, as much for scientific as for practical reasons. The above experiments lead us to hope that superphosphate at a reasonable price would prove a profitable fertilizer for corn in the New England States, where it generally sells for at least one dollar per bushel. Thus the retail price of a first class superphosphate in England is $30 per ton. Five hundred lbs. of superphosphate in the above experiment give an increase of 18 bushels. We should get, therefore, an extra bushel of corn for 42 cents. We must not, however, allow ourselves to deduce too much from the result of a single experiment. The cost of the superphosphate here, however, is $50 per ton, and the 18 extra bushels cost $12 50, or 70 cents per bushel. The 690 lbs. of guano give an increase of 22 1-2 bushels. At $50 per ton, therefore, 77 cents worth of guano gives an extra bushel of corn. The experimenter thinks that this will pay. Of course it depends on the price of corn.

Assuming that the experiments are correct, it becomes an interesting inquiry as to what particular ingredients of the manures the increase of corn is due. The superphosphate of lime used contained say two per cent. of ammonia and 18 per cent. soluble phosphate of lime. The guano, if a good article, contained 16 per cent. of ammonia and 25 per cent. of phosphate of lime, a considerable portion of which would be soluble. Now, in the above experiment the superphosphate gives as much increase as the guano, or in other words, two per cent. of ammonia and a certain quantity of phosphate of lime. It follows, therefore, that the increase must be attributed principally to the phosphate of lime.

Oh, for accurate experiments to determine whether this is so or not. Why can not some friend of scientific agriculture apply sulphate of ammonia on one acre of corn, and *pure* superphosphate of lime on another, sulphate of lime on another, and a mixture of the three in definite proportions on others, and determine the matter?

Medical use of Salt.

In many cases of disordered stomach, a teaspoon full of salt is a certain cure. In the violent internal aching, termed cholic, add a teaspoon full of salt to a pint of cold water—drink it and go to bed—it is one of the speediest remedies known. The same will revive a person almost dead from receiving a very heavy fall, &c.

In an apoplectic fit, no time should be lost in pouring down salt and water, if sufficient sensibility remains to allow of swallowing; if not, the head must be sponged with cold water until the sense return, when salt will completely restore the patient from the lethargy.

In a fit, the feet should be placed in warm water, with mustard added, and the legs briskly rubbed, all bandages removed from the neck, and a cool apartment procured if possible. In many cases of severe bleeding at the lungs, and when other remedies failed, Dr. Rush found that two teaspoons full of salt completely staid the blood.

In case of a bite from a mad dog, wash the part with strong brine for an hour, then bind on some salt with a rag.

In toothache, warm salt and water held to the part and renewed two or three times, will relieve in most cases. If the gums be affected, wash the mouth with brine; if the teeth be covered with tartar, wash them twice a day with salt and water.

In swelled neck, wash the part with brine, and drink it twice a day until cured.

Salt will expel worms, if used in food at a moderate degree, and aids digestion; but salt meat is injurious if used much. [Scien. Am.

Grape Culture and Wine Manufacture in Ohio.

The Cincinnati *Gazette* contains a long and interesting article on the grape culture and wine manufacture in that vicinity. It appears that in 1846 there were 83 vineyards in the neighborhood of Cincinnati, containing 248 acres under cultivation, and 114 bearing, and although the crop the preceding year was but a partial one, 240,000 gallons was the yield. In 1852, 1200 acres were in cultivation, 750 bearing; the annual yield was supposed to be 500,000 gallons, and the value of sparkling wine alone $175,000. A bushel of grapes will make from 3 to 3 1-2 gallons of juice. Mr. Buchanan commenced planting his vineyard in 1843; in 1850, from three acres he realized, beside the cuttings, 1640 gallons wine. In 1853 he obtained from five acres 4326 gallons, or 847 gallons per acre. In particular spots there have been obtained 800 gallons from an acre, but 650 gallons is considered a large yield. The demand for Catawba wine is far ahead of the supply, and the quality is constantly being improved, both by the cultivators and those who prepare it for market.

EXTINGUISHING FIRES BY STEAM.—The Peoria *Press* has the following account of the method by which Messrs. Fridley & Lincoln, furniture makers of that place, extinguished a fire recently in their factory:—

"The main building of their establishment is three stories high. The engine used in running the machinery occupies a shed in the rear. The fire was caused by the burning of some lumber which had been placed on the boiler to dry for the use of the workmen engaged in making chairs and other furniture. When first discovered by Mr. Fridley the flames had burst through the roof of the engine-room, and were rapidly fastening upon the main building. Seeing the imminence of the danger, and believing the fire engines would not arrive in time, he concluded by way of experiment, to try the efficacy of a rather novel 'annihilator.' Finding there was a good 'head of steam,' after 'clearing the coast,' he opened the safety valve, and let it 'rip.' And 'rip' it did. Knocking a hole through the roof of the engine-room, and filling the building with vapor, the steam literally followed the rushing flames to the roof of the main edifice, and suddenly and completely subdued the fiery foe. When our active firemen arrived on the ground, they found the work had been effectually done."

The schoolmaster was at a celebration on the Fourth, and gave the following mathematical toast:—The fair daughters of America—may they add virtue to beauty, subtract envy from friendship, multiply amiable accomplishment by sweetness of temper, divide time by sociability and economy, and reduce scandal to its lowest denomination.

It is regarded by some as not a little remarkable that in Massachusetts, a State where the means of education so much abound, a majority of the people should after all turn out Know Nothings!

A runaway slave, heading for Massachusetts, was told he had better return to his master. He replied that he was going to the only master he acknowledged. When asked who that was, he replied, "Massa Chusetts!"

The net accumulation of gold in the United States since the opening of the California mines is estimated at one hundred and thirty-nine millions of dollars.

An obituary very eulogistic on a lady, says: "She was married twenty-four years, and in all that time never once banged the door."

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 3.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7 00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

GEOLOGY AND THE BIBLE.

Copied by request from an article by David N. Lord, editor of the Theological and Literary Journal, entitled "Genesis, and the Geological Theory of the Age of the Earth." [Continued.

But that inference, [that the first chapter of Genesis is mistaken and without authority,] if adopted, cannot be restricted to that chapter. To pronounce the history there given a fiction, because of its representation that the heavens, the earth, and the sea and all that in them is, were created in six days, is to make it logically necessary to deny the inspiration of every other part of the book, and of the law that is associated with it; as that representation was ex pressly reaffirmed by the Most High himself at Sinai, incorporated in the law of the Sabbath, and presented as the reason of the consecration of that day to rest, and was renewed again to Moses, on delivering to him the tables on which it was written. "Six days shalt thou labor and do all thy work; but the seventh day is the Sabbath of the Lord thy God; in it thou shalt not do any work, thou, nor thy son, nor thy daughter, thy manservant, nor thy maid-servant, nor thy cattle, nor thy stranger that is within thy gates. For in six days the Lord made heaven and earth, the sea, and all that in them is, and rested the seventh day, and hallowed it." Exodus xx. 11. "Wherefore the children of Israel shall keep the Sabbath to observe the Sabbath throughout their generations, a perpetual covenant, a sign between me and the children of Israel for ever; for in six days the Lord made heaven and earth, and on the seventh day he rested and was refreshed." Exodus xxxi. 16, 17. It is incredible that God should have thus with his own voice repeated that declaration, on his revealing himself in glory to the Israelitish people at Sinai, and institution of the law, and graven it with his own finger on the tables of stone, if it was not true, if it were such a sheer and enormous error as modern geology represents. It was impossible from his rectitude. There would then have been no conceivable motive for founding the institution of the Sabbath on such a reason. As he had a perfect right to establish it, independently of the consideration whether he created the world and its vegetable and animal races in six days, or any other period, why should he offer his having accomplished it in six days, and rested the seventh, as the reason of his consecrating the seventh as a day of rest, unless he had actually wrought it in those six days? It is infinitely impossible that he should have renewed and ratified that declaration in so solemn a manner, and made it an element of his legislation that was for ever to be kept before the eyes of mankind, if, as geology teaches, it is confuted by his natural works, that are equally open to their inspection; if the strata of the earth which they were soon to explore and read, contain a record which shows that the date of the creation was innumerable ages earlier. It would have been to overthrow his authority, instead of establishing it. If, then, as geology contends, the record on the tables of the law is convicted of falsehood by another record which he has graven in ineffaceable characters on the strata of the earth, it is impossible that that law ean have proceeded from him, and the whole system of legislation associated with it must, like the first chapter of Genesis, be rejected as a fiction. To suppose it can be otherwise, is to suppose that he has, in the most momentous act of his administration, proclaimed a falsehood which was soon to be detected by his creatures, and place them under an inevitable necessity of distrusting his truth, his uprightness, and his wisdom.

Nor does that conclusion terminate at this point. If that announcement from Sinai, and ratification of the history of the creation given in Genesis, is held to be a fiction, it must of necessity lead to the rejection of the whole Pentateuch as a fabrication. If, without any conceivable motive, and against every consideration that would govern a wise and holy being, a misrepresentation so stupendous, and so sure to be detected and exposed, is incorporated in the decalogue itself, both as it is represented to have been pronounced by the Almighty Lawgiver, and written by him on the tables of stone, what certainty can be felt that any of the other recitals or declarations are not equally false? If no trust is to be placed in the awful attestations which God is represented to have given to that part of the law, no other attestations which he is said to have given the other enactments and institutions can be entitled to reliance. Neither visible theophanies, audible voices, miracles, nor prophecies, which are declared to have attended the communication of commands, and to have shown that they were from him, can yield them any corroboration. Instead, it would be absolutely incredible that the whole was not in an equal measure a fabrication.

But the rejection of the Pentateuch as false in its claims to a divine origin and authority, would necessarily draw after it the rejection also of all the other books of the Old Testament; for they all recognize the truth of the Pentateuch, and proceed on its histories, enactments, and institutions, as verities. They exhibit the Israelitish nation as sustaining that relation to God which the Pentateuch represents; and the priesthood, the sacrifices, the covenants, the promises, and the whole system of laws as instituted by God, as that record relates. If they are not his work, it is impossible that the other should be. But their rejection draws after it also as necessarily the rejection of the New Testament; for the latter ratifies, in the fullest manner, all the great historical statements, enactments, and religious institutions of the former, and it is on them that the work of redemption which it reveals is founded. If the Mosaic history, of the creation and fall, the destruction of the ancient world, the adoption of the Israelites as a peculiar people, their deliverance from Egypt, the proclamation of the law at Sinai, institution of the priesthood, sacrifices and rites of worship, and the interpositions, commands, and revelations that are recorded by the prophets that followed, are not from God, it is impossible that the New Testament can be, which everywhere recognizes them as realities, and is dependent on them for its truth and propriety.

The whole Bible, as a revelation, thus stands or falls with the first chapter of Genesis This intimate connection with other parts of the word of God, is, in a great degeee, peculiar to that record of the creation. The histories, narratives, and even the enactments of many other chapters, might be supposed to be supposititious, without necessarily destroying the credibility of the inspiration of the remainder. But the subversion of this, from its incorporation in the law of Sinai, necessarily carries with it the subversion of all that follows.

These considerations sufficiently show, that the contradiction which the modern theory of geology presents to the record of the creation by Moses, naturally leads those who assent to it, to regard that record as erroneous, and prepares the way for a distrust and rejection of the whole Bible. The scepticism which it is known to excite and foster, is not gratuitous and causeless, but the logical result of such an impeachment of that part of the word of God, which is the foundation of all the rest. The question, therefore, between the Bible and that theory, is one of the utmost interest. It is the question whether Christianity is credible and true, or whether it is contradicted and convicted of falsehood by the material works of the Creator. If it cannot be vindicated from the impeachment offered by the geological theory, it cannot be vindicated at all; but scepticism is unavoidable, and nothing is left for those who would be consistent, but to adopt and propagate it. The subject is entitled, therefore, to the most serious consideration of all believers in revelation, and especially of the ministers of the gospel, whose office it is to teach and enforce the doctrines, laws, promises, and predictions of the Scriptures, as communications from God. They cannot, rationally, satisfy themselves with mere presumptions, vague hopes, or undefined impressions, that the Bible is God's word, although it may be contradicted by his works. They cannot consistently act as ministers, unless they can defend it from this imputation and show that it is entitled to be received as a divine revelation. They cannot fulfill their duty to those of their people who have been betrayed into scepticism, or are in danger of becoming its victims, unless able to point out the fallacies and errors of the system which impeaches it, and show that the works of God, instead of confuting or contravening it, are both in perfect harmony with it, and offer it the most clear and ample corroboration.

Under the conviction that the theory which thus conflicts with it, is wholly mistaken, and may be easily refuted, and that its refutation and abandonment are demanded both by the interests of religion and the credit of geology, we shall proceed to point out the fallacy on which it rests, indicate proofs both from the record of Moses and from the earth, hitherto overlooked by geologists, which demonstrate it to be erroneous; and finally suggest the view of the subject, which seems to us to be required alike by the word of God and the facts of the science.

To prepare the way for the discussion, it is important to correct several misapprehensions and prejudices that extensively prevail, and are obstacles to a candid consideration of the question.

In the first place, the language which geological lecturers and writers are accustomed to use, has produced the impression that geology is a demonstrative science, having laws peculiar to itself, that are verified by the facts discovered in the strata of the earth; and thence, that the conclusions which they deduce from the strata, and embody in their systems, are the legitimate results of those laws, and as incontrovertible as the truths that are derived from the axioms or principles of other sciences. No misapprehension could be greater. Geology has no laws that are peculiar to itself. It professedly treats of the nature of the substances that constitute those parts of the crust of the globe that are accessible to our observation, and of the causes or forces to which they owe their present combinations and positions; and those forces are expressly defined as either chemical or mechanical; or those of attraction, by which particles that have an affinity are united in crystals and other solid forms; and those of fire and water, by which they are fused or disintegrated, and transported from one place to another.

Thus, Dr. Buckland says:—

"The history of the earth forms a large and complex subject of inquiry, divisible at its outset into two distinct branches, the first comprehending the history of unorganized mineral matter, and of the various changes through which it has advanced from the creation of its component elements to its actual condition; the second embracing the past history of the animal and vegetable kingdoms, and the successive modifications which these two great departments of nature have undergone, *during the chemical and mechanical operations* that have affected the surface of our planet.

"In tracing the history of these natural phenomena, we enter at once into the consideration of *geological dynamics*, including *the nature and mode of operation of all kinds of physical agents*, that have at any time and in any manner affected the surface and interior of the earth. In the foremost rank of these agents we find *fire* and *water*—those two universal and mighty disorganizing forces which have most materially influenced the condition of the globe.

"The state of the ingredients of crystalline rocks has, in a great degree, been influenced by *chemical and electro-magnetic forces*, whilst that of stratified sedimentary deposits has resulted chiefly from *the mechanical action of moving water*, and has occasionally been modified by large admixtures of animal and vegetable remains."—*Bridgewater T.*, pp. 34—37.

"It is the province of geology to investigate the ancient natural history of the earth. To this purpose geologists must observe the effects of *terrestrial agencies*, both organic and inorganic, which are *now in progress*, in order to understand those which have been performed in earlier periods; they must inquire what changes *now take place* upon the land and in the sea; whether these be due to *mechanical, chemical, or vital agency*; and compare these effects with the monuments of *more ancient revolutions*, and thus endeavor to trace the physical conditions of the globe from the *earliest period* to *the present date*, so as to present a correct history of the successive steps by which it has been brought to its actual state, and made fit for the purposes which it now fulfils.

"In the modern system of nature we recognise two great agencies employed in producing changes on the face of the globe. WATER, which wastes away grain by grain the elevated portions of the land, and deposits its spoils in lower situations, thus ever tending to equalize the levels of the surface. FIRE, which raises matter in masses from the interior of the earth, and thus tends to increase the inequalities of its surface. Both of these agents are chemical; water dissolves, heat fuses; both act mechanically. The mechanical effects of water depend on the general force of gravitation, and ever tend downwards; but the mechanical force of heat is independent of gravitation, and ever struggles to overcome it."—*Phillips' Guide*, pp. 3, 25.

"Geology was defined to be the science which investigates the former changes that have taken place in the organic, as well as the inorganic kingdoms of nature. As vicissitudes in the inorganic world are most apparent, and as on them all the fluctuations in the animate creation must in a great measure depend, they may claim our first consideration. The great *agents* of change in the inorganic world may be divided into two principal classes, the aqueous and the igenous. To the aqueous belong rain, rivers, torrents, springs, currents, and tides; to the igenous, volcanoes and earthquakes. Both these classes are instruments of decay as well as of reproduction; but they may also be regarded as antagonistic forces. For the aqueous agents are incessantly laboring to reduce the inequalities of the earth's surface to a level; while the igenous are equally active in restoring the unevenness of the external crust, partly by heaping up new matter in certain localities, and partly by depressing one portion and forcing out another of the earth's envelope."—*Lyell's Principles*, p. 191.

[To be continned.

LIQUOR PROHIBITION.

From the Message of Governor Clarke to the Legislature of New York.

The subject of the revision of our Excise Laws will demand, and, I doubt not, will receive, your serious attention. To the practical operation of these laws, either through their inherent viciousness, or in consequence of their lax administration, is attributed no small proportion of the drunkenness which afflicts our land. Something of this is undoubtedly attributable to the non-enforcement of our laws, such as they are; but I will not withhold my conviction that the laws themselves are radically defective, and however faithfully administered, must be held justly responsible for the evils which they foster, and in many instances create.

If the consequences of intemperance were confined to its immediate victims, though even then the State would have an interest at stake, there might, perhaps, be less occasion for legislative action. But such is not the fact. Every interest of society which it is the province of Government to protect, is, immediately or remotely, involved in these consequences.

Intemperance deprives the State of the productive energy of thousands of her citizens, and so far diminishes its wealth, impedes its enterprise, and militates against the common good. It is a fruitful source of the pauperism which imposes heavy burdens upon industry and capital; and its intimate relation to crime, and consequently to the burdens which crime imposes upon us, is too obvious to escape your observation. If the purely moral aspects which it presents shall be deemed as not entering within the scope of your duties, its relation to taxation, and its producing causes is clearly within the province of legislation, and demands a degree of attention corresponding to the great issues which that relation involves.

The right to legislate in reference to the traffic in intoxicating liquors will not be denied. Our present Excise System is the fruit of such legislation. It has, in the process of time, undergone many modifications, but its restrictive element, throughout all these changes, has been retained, in subservience to the original purpose of the system, viz: the prohibition of the traffic so far as the public good may demand and the constitutional limitations of the law-making power will permit. All restrictive legislation contains the germ of prohibition—is, in fact, prohibition partially applied—so that what is termed prohibitory legislation, in regard to the liquor traffic, is only the extension of a principle indorsed as sound by successive Legislatures, and its impartial application to all. The object proposed by the founders of our State, when they incorporated the license system into its legislation, has not yet been attained; neither has the constitutional power of the Legislature in reference to it yet been exhausted. With the utmost desire to reach right conclusions in relation to this matter, and to guard against the assumption of powers not conferred by our fundamental law, I have found myself unable to come to any other result than this: that the legislative prohibition of the traffic in intoxicating drinks is not only demanded as a measure of protection to the health, the property, and the lives of our fellow citizens, but that it is also distinctly indicated by the nature and purpose of civil government, and clearly within the limits of its constitutional powers. These opinions, diffidently entertained at first, have been wrought into convictions by a careful study of the limitations and duties of the law-making power, by judicial decisions, nearly or remotely affecting the principle involved, which have been had in the several States that prohibit the traffic in question, and by the dicta of the Supreme Court of the United States, which cover the whole ground in controversy, and leave little room for either cavil or doubt.

That the good results hoped for from the legislation recommended are legitimate to it, several of the New England States, especially Maine and Connecticut, furnish the most gratifying evidence. The steady diminution of crime and pauperism in the States referred to, with a consequent and corresponding reduction of taxation; and the new impulse given to almost all industrial pursuits by the transformation of those who were once a burden upon the State into producers of wealth, constitute an argument in favor of the policy advocated, which, while it carries conviction to the statesman, will be no less appreciated by the multitude, unskilled though they may be in casuistry, but also undebased by appetite and unperverted by interest. If any thing is to be learned from the example of other States, or to be deduced from our own increased experience, it should be made available to our use; and our legislation, upon all subjects, should keep pace with our advancing intelligence, always expressing the highest truth we have received, and reaching forward to the greatest good attainable.

I know of no subject that is likely to elicit your attention, that involves graver and more momentous interests, than the one thus presented for your consideration. That it is hedged about by difficulties which demand the exercise of great prudence, and that it may not always be easy to reconcile conflicting interests with a nice adjustment of the scales of justice, I am not disposed to deny. But, guided by the purpose for which Government was ordained and keeping steadily in view the well-being of society, which always rests on a moral basis, these difficulties will disappear, or be overcome; and you will be able, I trust, so to perfect the details of a bill as, on the one hand, to secure the suppression of a demoralizing traffic, and, on the other, to protect personal rights, and give no just cause of complaint to those whose interests may be affected by the prohibitory legislation which the higher interests of community demand.

A NAME IN THE SAND.

Alone I walked the ocean strand;
A pearly shell was in my hand;
I stooped and wrote upon the sand
 My name, the year and day.
As onward from the spot I passed,
One lingering look behind I cast;
A wave came rolling high and fast,
 And washed my lines away.

And so methought 't will shortly be
With every mark on earth for me!
A wave of dark oblivion's sea
 Will sweep across the place
Where I have trod the sandy shore
Of time, and be to me no more;
Of me, my name, the name I bore,
 To leave no track or trace.

And yet with Him who counts the sands,
 And holds the waters in his hands,
I know a lasting [illegible]
 Inscribed against my name,
Of all this mortal past has wrought,
Of all this thinking soul has thought,
And from these fleeting moments caught,
 For glory or for shame.

THE PRAYING SHOE-MAKER.

Not many years since, there was a poor man in the village where I lived, who with a family of young children and a wife in very feeble health, found it extremely difficult to obtain a livelihood.

He was at length compelled to work by the week for a shoe-dealer in the city, four miles from the village, returning to his family every Saturday evening, and leaving home early on Monday morning.

He usually brought home the avails of his week's labor in provisions for the use of his family during the following week; but on one cold and stormy night, in the depth of winter, he went towards his humble dwelling with empty hands, but a full heart. His employer had declared himself unable to pay him a penny that night, and the shoe-maker, too honest to incur a debt without knowing that he should be able to cancel it, bent his weary steps homeward, trusting that He who hears the ravens when they cry, would fill the mouths of his little family. He knew that he should find a warm house and loving hearts to receive him; but he knew, too, that a disappointment awaited them which would make at least *one* heart ache.

When he entered his cottage, cold and wet with rain, he saw a bright fire, brighter faces, and a table neatly spread for the anticipated repast. The tea-kettle was sending forth its cloud of steam, all ready for "the cup which cheers, but not inebriates," and a pitcher of milk which had been sent in by a kind neighbor, was waiting for the bread so anxiously expected by the children. The sad father confessed his poverty, and his wife in tears begged him to make some effort to procure food for them before the Sabbath. He replied that he had kind friends in the neighborhood who, he knew, were both able and willing to aid him, and that he would go to them and ask relief.

"But first," he said, "let us ask God to give us our daily bread. Prayer avails with God when we ask for temporal good, as well as when we implore spiritual blessings." The sorrowing group knelt around the family altar, and while the father was fervently entreating for the mercies they so much needed, a gentle knocking was heard.

When the prayer was ended the door was opened, and there stood a woman in the pelting of the storm, who had never been at the door before, though she lived only a short distance from it. She had a napkin in her hand which contained a large loaf of bread; and half apologizing for offering it said, she had unintentionally made a larger "batch" of bread than usual that day, and though she hardly knew why, she thought it might be acceptable there.

After expressing their gratitude to the woman, the devout shoe-maker and his wife gave thanks to God, with overflowing hearts. While the little flock were appeasing their hunger with the nice new bread and milk, the father repaired to the house where I was an inmate, and told his artless tale with streaming eyes, and it is unnecessary to say, that he returned to his home that night with a basket heavily laden, and a heart full of gratitude to a prayer-answering God.

[American Messenger.

PAPAL MUMMERY.

The following, from the Roman Catholic paper published in New York, shows that the papal mummeries of priest-ridden Italy are rapidly being introduced into this country:—

The Right Rev. Bishop Bayley, on Tuesday, St. Stephen's Day, blessed a fine chime of bells for the Church of the Most Holy Redeemer, in Third-st. The ceremony was performed immediately after the ten o'clock Mass, when that vast church was crowded from the steps of the altar to the very door. Capt. Smith, with his company of Independent Rifles, was in attendance as a guard of honor. A number of the members of the congregation, who had been most active in procuring these bells had their places immediately by the bells.

The bells are four in number, and are the chime sent from Germany to the World's Fair in this city. The largest of the four, which weighs about 1,500 pounds, was dedicated in honor of St. Michael; the second was in honor of St. Gabriel, the third in size was dedicated to St. Raphael, and the fourth to St. Alphonsus. They are of the best metal, and of the finest workmanship. Each bell has sacred inscriptions and images cast in the metal. The bells were conveniently hung, in obedience to the Pontifical, in the space in front of the Altar railing. The Bishop, in full pontificals, entered the church attended by the Priests and Acolytes, with incense, lights, &c. They chanted the Miserere, and the 53d, 56th, 66th, 69th, and 85th Psalms, with the De Profundis.

Then the Bishop blessed salt and water, saying afterwards the prayer, that when the bells should be bathed therewith, whensoever they should sound, the power of devils, the shades of phantasms, the attack of mobs, the striking of lightnings, the shock of thunders, the ruin of tempests, and every spirit of the storms, might be driven back; and that, when the children of Christian people should hear them ringing, the increase of devotion might grow in them, that hastening within the bosom of their Mother Church they may sing to God, in the Church of the Saints, the new song, coming thither with the sound of the trumpet, the modulation of psaltry, the sweetness of the organ, the exultation of the drum, the gladness of the cymbal; so that, in the temple of His glory, by their pleadings and prayers they may invite the multitude of the army of Angels.

Then the salt being mixed with the water, with the special prayers of the Pontifical, the Bishop began to bathe the bells therewith. When this was done, the Bishop with the Priests chanted the Psalms "Lauda anima mea, Laudate Dominum quoniam bonus, Laudate Dominum de cœtis, Cantate Domino, and Laudate Dominum in Sanctis suis."

Then the Bishop, with the thumb of his right hand, made the sign of the cross on each bell with the holy oil *infirmorum*, and said the prayer invoking the same supernatural effects or terror to the devil and his servants, and of comfort and good inspirations to the people of God, wherever the sound of these bells should be heard. Then wiping off the oil with lint, he began the antiphon, "Vox Domini super aquas multas," and with the Priests chanted the xxviiith Psalm; meantime the Bishop made seven crosses on the outside of each bell with the same oil of the infirm, and four crosses with the chrism on the four sides of each, saying at each time: "May this bell, O Lord, be sanctified and consecrated, in the name of the Father, and of the Son, and of the Holy Ghost. In honor of St. Michael," for the first bell, and so in honor of each patron of the other bells, respectively, in their turn. Then followed another prayer of blessing for the communication of power against the spirits of the air, from the beautiful order of the Pontifical, when, taking thyme, frank incense and myrrh, he put it in censers, and placed these under each of the bells.

The verses, *Viderunt te aquæ Deus, &c.*, were sung from Ps. lxxvi., and the Bishop said the closing prayer, that: Like as the Holy Ghost came down in delight upon the harp of David; and as, while Samuel offered the sucking lamb a holocaust to the King of eternal dominion, the thunder of the heavens repulsed the hosts of the enemy, so, while the sound of these bells shall pass through the air, the Angelic hand may guard the congregation of the church, and perpetual protection keep the minds, the bodies, and the possessions of believers.

Finally, the Deacon sang the Gospel, from the 10th chapter of St. Luke, of Mary, who chose the one thing necessary—as if giving the constant mission to the bells of awakening the attention of all, while engrossed in the cares of the world, to remember that their chief good is in the Church.

THE YORUBAS.

The Yoruba country lies between the Bight of Benin and the Niger, interior from Sierra Leone. Its extent is about 30,000 square miles, and the population 500,000—some say more. The religion of the people is a simple form of polytheism and idolatry. They have an idea of a supreme being, the maker of all things, but imagines that he takes little interest in the things of this world. They offer to him no sacrifices, reserving these expressions of revere[illegible] the inferior deities, whom they rega[illegible]ntercessors in their behalf with the sup[illegible]e divinity. Every fifth day is set apart fo[illegible]the worship of these gods. On these occasions, they bring water for the idols from a neighboring fountain, the priests and priestesses with their immediate followers marching in long procession, with calabashes on their heads, and in the most profound silence. Part of the water is poured out as a libation, and the remainder is reserved for use.

The idols are made of wood, clay or metal, and several of them are generally placed in a particular room in the house, where they receive morning and evening adoration.

The Yorubas sometimes offer human sacrifices. In a time of drought, for example, a slave is adorned as if for a festival, and offered up as a sacrifice to the goddess of the waters; being plunged into the river to propitiate her anger, and to serve as food for herself and her attendants.

The colony at Sierra Leone has often become the abode of Yorubans, rescued from slave ships, and there restored to their native land and to freedom. When Abbeokuta, the capital of the Yoruba district, came to be a thriving and prosperous town, a few years since, the tidings of its prosperity reached Sierra Leone. Many of the exiles there were seized with a desire to return; and, between 1839 and 1842, no less than five hundred left the colony for that purpose. They desired also to carry to their countrymen a knowledge of the religious institutions which they had acquired among their English friends and benefactors.

The Church Missionary Society, embracing the opportunity, took measures to found a mission at Abbeokuta, headed by a Yoruban convert and Christian minister, who had been rescued years before from the hold of a slave ship, and who now returned, in ripened manhood, to proclaim to his countrymen the glad tidings of the grace of God. In six years and a half from the arrival of the missionaries, the church numbered 233 communicants, besides more than 300 applicants for baptism, and 350 adults scholars in the Sunday school. The Yorubans seem a people prepared of the Lord. The doctrine of the atonement is especially referred to by the missionaries, as having extraordinary power among them as the means of conversion. It fills the Yorubans with astonishment, as if it were too good and too wonderful to be believed; and when received, it fills them with love and enthusiasm for a faith which embraces so gracious and divine a revelation. [Macedonian.

PERSECUTION OF THE JEWS.

How literally has the word of God respecting the Jewish nation been fulfilled in the history of that unfortunate people for the last eighteen centuries! They have been scattered all over the face of the earth. By people of all religious creeds they have been regarded with abhorrence and loathing; and from the time when they lent their influence to the crucifixion of the Messiah, their entire history has been little else than a record of the wrongs and persecutions they have suffered. Wherever they have gone, they have been singled out as the victims of oppression. In England, until within less than two centuries, they were regarded as outcasts. All the nations on the continent of Europe abuse them without mercy. For a long time, too, they found no protection in the English law. If any of them accumulated property, some means were found by their enemies professing Christian truth, to strip them of it. They have been accused, and probably with some justice, of being hard with their creditors, and of extorting money by fraud from those whom they had within their power. But the treatment they received, in such a multitude of instances, from those of a different religious faith, was no doubt one of the principal causes of this extortion on their part. Jews who were reputed to be wealthy, were frequently thrown into the prisons of the Inquisition for the slightest offense; and it was usually a very easy matter to procure a sentence against them, when their property was confiscated, to gratify the malice and covetousness of their enemies.

In a great many instances, the Jewish prisoner was put to the torture by the Inquisition, to induce him to tell where he had hidden his gold. Sometimes the poor man, in the consciousness of innocence in respect to the charges against him, would refuse to reveal this secret. Then one mode of torture after another would be resorted to, until the prisoner, writhing under the anguish of the thumb-screw, or some other refined mode of torture, would tell, or profess to tell, where his treasure could be found.

They were formally banished from England in the year 1290; and it was not until about the year 1665, that the edict of banishment was rescinded. A much more liberal policy has been pursued toward them in England, since the time of Cromwell. It is not, however, until the ninth year of the reign of George I. that we can discover any evidences of their being acknowledged by the government as British subjects. An act was passed by parliament at that time, in these words: "Whenever any of his Majesty's subjects, professing the Jewish religion, shall present themselves to take oath, the words, 'on the faith of a Christian,' shall be omitted out of the oath; and the taking of it by such persons professing the Jewish religion, without the words aforesaid, shall be deemed a sufficient taking." Still they are not, even at the present time, admitted to all the rights of citizenship in England. It is only in the new world that they receive the same immunities with those professing the Christian faith.

ANECDOTE.—The following anecdote is told of a celebrated dissenting minister at Cambridge, the Rev. Mr. Robinson:—

Upon one occasion when he was preaching, he dropped the immediate subject of his discourse, and made this observation: "It is a rule with me never to use an expression which the humblest of my hearers cannot understand. I have just made use of the term *ocular demonstration*; I will explain it to you. I look in the table pew, and I see a young man in a blue coat and scarlet waistcoat *fast asleep*." On pronouncing the last two words, he raised his voice considerably, and, all eyes being attracted to the unfortunate sleeper, he added in a lower tone, "Of that I have *ocular demonstration*." He then resumed his discourse in his accustomed manner.

"Virtue maketh men on the earth famous, in their graves illustrious, in the heavens immortal."

The Sabbath Recorder.

New York, January 11, 1855.

British Correspondent—JAMES A. BEGG.

BILLS.—We are now sending bills to those who owe for the Sabbath Recorder. Although these bills are mostly for small amounts, yet in the aggregate they make a large sum, the want of which is seriously felt by the establishment. A prompt and general response to the call for what is due us, would be a most welcome relief.

"BEAR ONE ANOTHER'S BURDENS."

The earnestness with which Seventh-day Baptists inculcate self-denial for the truth's sake, carries the idea that they are themselves a very self-denying people. Perhaps they are; but there is one form of this virtue, which they seem to regard as exclusively the duty of ministers. Let us explain.

The minister, whose gifts would command a pastorate in almost any of the more wealthy denominations, where he would be well provided for as to the comforts of life, and at the same time enjoy extensive opportunities for usefulness, is nevertheless expected to have such a burning love for the truth—for that particular item of the truth which distinguishes us as a people—as to be quite willing to settle down with a small church, in some obscure spot, rarely or ever enjoy the opportunity of addressing large assemblies, and take up with a scanty, not to say niggardly, allowance of food and raiment all his days. His longings for access to the perishing multitudes, to preach to them the way of life, which he might have through the influence of churches worshiping on the first day of the week, must remain ungratified, because a great and important item of divine truth requires him to identify himself with a people with whom the multitudes have no sympathy. He must pinch himself in his wardrobe, and at his table; he must deny himself of those reasonable gratifications which people in comfortable circumstances can enjoy; his feeble wife must be tasked to the utmost, to save the expense of hired labor; in a thousand ways he must be perplexed to keep his wants within his income; and, at death, he must leave his family in poverty. And why must all this be done? Simply because God's truth should be loved and honored more than all other things beside.

Well, far be it from us to say that this is not right. We are as firm in the belief as any others, that not only must the comforts of this life be sacrificed for the truth's sake, but even life itself, if the providence of God so direct. But is it right that ministers should bear all this burden alone? Is it right that they should travel through poverty all their days, in consequence of having renounced the popular way, while their brethren are prospering and laying up a comfortable provision for their families? And is the minister to be denounced, and spoken of as a renegade and apostate, or as one who seeks for the loaves and fishes, because such things discourage him from the practice of what we esteem so important? Should not at least a portion of the blame be laid upon the brethren at large, whose unwillingness to sustain the ministry in such sacrifices, or to give it a reasonable share of their own comforts, goes far to create the deprecated evil.

We are not sure but ministers have been driven from our connection by this unequal state of things, who might otherwise have been retained, and done much good among us. We know of some, who have been on the point of uniting with us, but the prospect was too gloomy. That they should have the self-denial to *practice*, while the brethren would only *preach* it, did not seem to them to augur favorably. They could not think that their opportunities for usefulness would be at all improved by connecting themselves with such a people, and so they turned to find other fields. Nor were these ministers men of small merit. No, nor men of small piety either. They were men, who are now an honor to the stations they respectively fill; and were they with us, comfortably provided for and unembarrassed, would be a valuable acquisition to our denomination.

It is easy to say that these men were not actuated by a proper spirit of self-denial—that they were not men of the true Apostolic spirit—that they should have braved poverty in its worst forms, and counted all things loss for Christ. No doubt they should. But such remarks come with an ill grace from those who are never willing to lose any thing of their own, to compensate, in some degree, the sacrifices they are so ready to enjoin. Besides, when the low state of piety among us is considered; the limited extent to which we are committed to great and important enterprises; the worldly spirit of our churches; the great lack of family religion; and the looseness of many of our brethren with regard to the very Sabbath observance for which they contend so keenly in controversy; together with the lack of good discipline in our churches—it may be questioned, whether those who are called to renounce their connection with other persuasions for the sake of the Sabbath, do not lose about as much as they gain. And while such a state of things continues, how can we expect that God will grant us any important increase?

We trust we shall not be misunderstood. We love the truth which distinguishes us from others, and consider that all the sacrifices we ever made for it are nothing in comparison with that sacrifice which Christ has made for us all. But we have felt, and so have others, that Christianity embodies much precious truth besides the Sabbath. Whatever importance may belong to this institution, certain it is, that talking about it, and discussing its doctrinal and controversial bearings, will not suffice to fill all the cravings of an immortal soul. The hungry spirit needs some other food, and if intercourse with the people of our denomination only results in the conviction that food for the soul is not to be found among them, we need not be surprised if those who seek alliance with us should be still fewer than heretofore. T. B. B.

THE CHURCH:

Her Relations and Responsibilities.

The *Family*, the *State*, the *School*, and the *Church*, are the four great institutions of humanity. These are the great instruments, the great organizations, by which man develops, perfects himself, and prepares for immortality. Man is not made for them, but they for him. They are to be used by him in advancing his great and eternal interests.

In the Family, the being has his origin. Here his powers begin to develop, his wants begin to manifest themselves, and his culture as a physical, social, intellectual and religious being, commences. In the school, while the other powers are or should not be neglected, a special culture is given to the intellectual. The Church, while not opposing or hindering the others, has for its more especial object the development of the religious element of humanity. The largest freedom and the most perfect protection are given to these institutions, with their varied and important interests, by the State. The social principle is the life and centripetal power in the family—the intellectual, is the light and heat of the school—the religious, energizes the church—while the various principles centering in that of citizenship, give life and perpetuity to the State.

Which of these great institutions is the higher—the more spiritual and controlling? Which has great ideas and principles to infuse into the others? Which is the institution, the kingdom, for two worlds—that of time and eternity? The answer is plain—the *church*. What is man? whence cometh he? whither bound? what are his relations? what his obligations? what his destiny?—all questions of primal importance to man, and questions that underlie, impregnate, give significancy to the the church. They lie back of all other questions. In them, all intelligence, activity, and happiness center. All questions of science and art, politics and religion, of friendship and love, of sin and holiness, take their significancy and grandeur from these fundamental questions. For the solving of these questions, history, nature, revelation, come to our aid.

Man, on awakening to consciousness, finds himself a spiritual existence, linked with other and like spiritual existences—joined in a common humanity by a thousand kindred ties. But man looks not upon himself as self-existent, but looks instinctively upward to a First Cause as Creator, and as an ever-present, overruling Providence. This opens to him new and infinite relations. He is also taught to look confidently forward to immortality. Thus the grandeur and importance he beheld in his relations, become infinite in extent. Thus existing, thus related, thus destined, no wonder that around these points cluster, in them center, all realities, all interests. The church is the great embodiment and exponent of these realities and interests.

There is much of exquisite pleasure furnished by the connection of mind with matter—but none compared with that produced by the relations and communings of mind with mind. Spiritual communings and relationships, and love, far transcend in beauty, pleasure, and importance, all that can be given by the sensuous conditions of our being. The church is established to guard and culture spiritual and holy relationships, and love.

There is worth in the treasures of the world—but nothing to be compared with the worth of the spirit. There is beauty in all of the changing scenes of the material world. Beauty everywhere looketh out upon us—but spiritual beauty transcends all the beauty of landscape, of morning and evening, of changing seasons and starry heavens. This worth and beauty is to be preserved and increased by the church.

There is grandeur in mountain, and cataract, and ocean—but it is not comparable with the grandeur of the soul. There is sublimity in the unfoldings of astronomy—but it is insignificant compared to the revelations that have been made to us of one omnipotent, omniscient Creator—with other spiritual existences—connected to him and each other by infinitely enduring and varying relations. All of this grandeur and sublimity cluster around the church.

The church is for the embodiment of the religious element of humanity. Around it cluster all of the interests of man. All other institutions center here. Its principles permeate all relations and conditions of life. It connects two worlds. Its chief foundations are in heaven, its great high priest is there. Man, on being truly admitted within its sacred portals, becomes a candidate for immortality—is already a citizen of a kingdom not of this world, but of a spiritual, a heavenly kingdom. Its constitution and laws emanate from the court of heaven. They receive the sanction of the great and universal Law-giver. The Bible contains this constitution, contains these laws. Upon its principles does the church rest, as upon eternal foundations. Its truths are her truths—its spirit is her spirit. The Bible is placed in the bosom of the church, for its preservation, and for the promulgation of its principles. The church thus becomes the repository of all the great truths essential for man to know respecting Deity, respecting the origin, condition, and destiny of man, respecting Christ and the remedial system, respecting the offices and influences of the Spirit.

It is the mission of the church, with the Bible for her great charter, to develop and infuse the religion of Christ into the heart of the world. It is a spiritual organization, acting with spiritual power on all other institutions. The religious element is embodied in all literature, philosophy, history, and activities of humanity. It is the mission of the church to awaken, energize, develop, control this element. It must proclaim and urge its principles in all the departments of humanity. It must not become subservient to other institutions, but other institutions to it—not in form and ceremony, but in spirit and principle. The church must ever stand in the van of the world's progress, beckoning on humanity to a higher destiny. All benevolent societies, all reform societies, are but sparks thrown off from the church, as the ancient philosophers supposed the spirit of man to be an emanation from Deity, to be in time reabsorbed into Deity. They are so many detachments sent out by the church, where she could not as easily fight with all of her forces. It stands as the great central institution, giving point and significancy to the other institutions, cementing them together into one harmonious whole. Its principles must become their energizing and controlling spirit, or they fail of the great end and aim of their existence. All of the great and fundamental questions appertaining to the interests of society, to the state, or to the individual, are handed over to the church for her solution and application to the individual and to society and governments. The church must be prepared for such responsibilities. *

"SWEAR NOT."

Under this heading, an article of S. S. Griswold appeared in the *Recorder* of Nov. 2, 1854, in which he expresses himself "inclined to the opinion that judicial oaths and affirmations are forbidden the Christian," and closes by proposing the following two questions:

1. Does Christianity forbid its disciples the taking of an oath before the civil magistrate?

2. What is the difference between swearing, or oath taking, and what is termed affirmation?

In an article with the same title, over the signature of L. Jones, in the *Recorder* of Dec. 7, apparently alluding to these questions, an attempt is made to answer them. The same mist through which the writer sees three questions where there are but two, seems to obscure his vision with reference to the whole subject. He quotes numerous passages of Scripture to prove God has set the example of swearing, and authorized "his chosen people" to swear in his name. But all this is foreign to the question at issue. The simple fact that God does this or that does not amount to a license to his subjects to do the same.

That swearing by the name of the Lord was permitted under the former dispensation, is not denied. But there are a number of instances in which the regulations of that dispensation were modified under that of the gospel. In Christ's sermon on the Mount, Matt. v. 31, 32, he proclaims an important modification of the law of divorce. The same is true in the same chapter, verses 38–42, upon the subject of requiting injuries. Other instances might be cited, but these are sufficient to establish the principle. In this same chapter, between the two points mentioned, verses 33–37, this subject of swearing is expounded. "Again ye have heard that it hath been said by them of old time, Thou shalt not forswear (perjure) thyself, but shalt perform unto the Lord thine oaths. But *I say* unto you, Swear not at all; neither by heaven, for it is God's throne. .... But let your communication be yea, yea; nay, nay: for whatsoever is more than these, cometh of evil." What language could be used to give breadth to this prohibition? The Apostle James (v. 12) makes the prohibition equally explicit, unequivocal, and comprehensive. "*Above all things*, my brethren, swear not, neither by heaven, neither by the earth, *neither by any other oath*, but let your yea be yea, and your nay, nay, lest ye fall into condemnation." What feature of these expressions indicates a necessarily implied exception in favor of taking an oath before any tribunal, or under any process? And if, in the absence of an exception, any where in the New Testament *expressed*, an *implied* one can be wrung out of these passages, what prohibition or commandment will fail to furnish one for those who may desire it?

In the article alluded to, it is said, in answer to the second question, (called the third,) "The difference between these (oaths) and affirmation is nothing in substance, only in form." But if this remark be true, it proves too much; for it wipes out all distinction between an oath and a common declaration. But not so. An oath is an affirmation or declaration, with a solemn appeal to some object, expressed or implied, for its truth. Anciently, oaths were taken by various objects, both animate and inanimate. But in modern times, and enlightened countries, the Supreme Being is the only expressed object of an oath, under any judicial or other kindred process. Affirmation differs from this, in being a simple declaration. For this kind of communication, on all occasions where it is proper for us to speak at all, we have the unqualified permission of Christ in the alternative for swearing already quoted: "But let your communication be yea, yea, (affirmation;) nay, nay," (negation;) and that of the Apostle James, where he says, "But let your yea be yea, and your nay, nay.

It may be asked, Where is the essential difference in these two forms of communication, involving the matter of right and wrong? The answer is, that in the appeal made to some object, in taking an oath, we purpose to involve or pledge that object, in some sense for the truth of our statement—a responsibility which we have no right to assume. That this is true, is evident from the reasons given for the prohibition of swearing. Christ says, "But I say unto you, Swear not at all, neither by heaven, *for it is God's throne*; neither by the earth, *for it is his footstool*. .... Neither shalt thou swear by thy head, because thou canst not make *one hair* white or black." This seems equivalent to saying, "You pledge something that is not yours—over which you have no control." James says, "Lest ye fall into condemnation." What clearer ground of condemnation than the assumption of such unwarrantable responsibility? In making a simple affirmation, we pledge only our character—the only thing which may be said to be absolutely our own. T. E. B.

BRITISH CORRESPONDENCE.

GLASGOW, December 15th, 1854.

A recently issued Parliamentary document furnishes the educational statistics of Scotland. From the evidence supplied, it appears that we have in all 4,984 schools, including burgh or parochial and other schools that are endowed and those that are unendowed. The number of teachers in these schools is 7,041, and the number of scholars paying fees is 364,481, and of those receiving gratuitous education is 49,100. The salaries of teachers of the burgh or parochial schools amount to £78,382; other endowed schools £117,844; of unendowed schools £64,621; and of charity schools £10,793. Education is not godliness, but it is such an important handmaid as to inspire those who love the Lord and His cause with deep interest in what pertains to it.

The telegraph this morning announces from Trieste the arrival of the Overland Mail, with news from Canton of date Oct. 27th. The patriot cause was gaining ground, especially in the North. It is to be hoped that some details will be furnished, as little has been heard of their movements near Pekin for a considerable period, although the statement six weeks earlier was that the news in its general tenor was also favorable to the insurgents. At that date the Imperialists had put into circulation a circumstantial account of the retaking of Nankin in June preceding. The fallacy of this was sufficiently demonstrated by the presence there, early in July, of the Rattler and the Styx. Falsehood and cruelty so characterize the present rulers, that we may well desire the change promised by their being replaced by men who love the Word of God—and we hope that the circulation of that word may be taken as evidence that those at the head of the movement do so love it, however much we may have to regret their yet imperfect acquaintance with its truths.

"Rome was intoxicated with joy," on Sunday last, we are informed, by telegraph. The center of apostacy was thrown into ecstacy by the Pope's promulgating the immaculate conception of the Virgin Mary—not the conception of her Son and Lord, but her own conception—to be an article of the faith, and his denunciation that all who deny it are heretics. Thus it is that the system progresses, step by step, to its monstrous completion; and thus it is that all liberty to believe what God may reveal is withdrawn from Rome's votaries. What any man, even within her pale, might last week have avowed as his faith without fault, he will this week be branded as a heretic far maintaining, although God's word remains the same. If Rome had her former power, the heretics would even be exterminated, in order that universal observance of her dogmas might be maintained—and Protestants will still point to such forced observance as argument for what she retains of Rome's error, against what is plainly revealed in the divine word.

The Evangelical Alliance have advertised for their Sunday Prize Essay—MSS. to be sent in by October 1st, 1855. Not the slightest indication appears in the intimation of their requirement, that the Alliance is aware of any change having been made at any time in the day of God's appointment. As if they recognized the commandment of God calling for the sanctification of the seventh day in all its integrity, they intimate that the Essay is "to be written with special view to circulation among the higher classes of the community"—that it "will be expected to bring into view the theories which have prevailed in regard to the Sabbath—the *scriptural authority and obligation* of the Sabbath [Sunday, of course]—the history and advantages of the Sabbath—the present *actual* extent of Sabbath desecration in our own and other countries—the extent of such desecration as *compared* with what it has been—the causes to which it is attributable, and the moral means by which it may be counteracted." And "it is wished that the whole subject of the Sabbath may be clearly and fully dealt with," *so dealt with*, of course, as to conceal the fact that the Alliance itself is making void the law of God upon the subject by their own traditions.

Some time ago considerable hope seemed to be entertained by our Sunday observing friends, that Popish France was about to follow strictly their example. In Paris, an Association, with President, Vice-President, &c., was formed, and some were induced to close their shops, in compliance with the directions of the Association. A Mr. C. Cochrane went from England to help and encourage the movement; and he had interviews with Romish Bishops, and even with the Archbishop of Paris, as well as with the Government Minister of Marine. Mr. C. found the members of the Association pledged not to work "on Sundays *or fete* days;" and afterwards "a numerous committee of ladies was formed under the direction of the Jesuits." "Medals were struck off on the occasion; on one side was an altar, with *a Latin* quotation from the fourth commandment"—a fact which might supply a hint to some amongst ourselves who seem very desirous to have men suppose that the first day, rather than the seventh, is spoken of in that commandment. It would be easier managed if the quotation bearing on the subject were given only in a language which the people could not understand. Even the Jesuits, however, some times fail in their endeavors; and although fete days conjoined with Sundays answer well their system, they have overshot the mark. From the statements made of the design of Government to enforce Sunday observance, the *Moniteur* was directed to announce, "Never has the Government had this thought." More recently the Imperial views on the subject might have been inferred from the fact that the camp at Boulogne had military mass on Sunday morning, and the games of bowls, lots, and dancing in the evening. In the present fitting out of the armaments for the Crimea, no respect whatever is paid to Sunday in France; and even in English dock-yards work goes busily forward on Sundays in preparing to send forth the armaments of war. As covetousness leads the subjects to disregard God's authority in times of peace, so the ambition of rulers leads them to set at nought the authority of men, by which that of God has been overlaid. But the calamities which both occasion, in the righteous judgment of God, may lead some to seek back to the law and to the testimony for guidance from above. J. A. BEGG.

REVIVAL IN SOUTH KINGSTON, R. I.

SOUTH KINGSTON, R. I., Jan. 1, 1855.

To the Editors of the Sabbath Recorder:

It is always cheering to the followers of Christ to learn that *His* cause and kingdom are progressing in the salvation of souls. I therefore send you these lines for a place among the records of passing events on the pages of the *Sabbath Recorder*.

Some two years are passed away since H. H. Baker came to this place for the first time, to interest himself in the welfare and salvation of this people, by "holding forth the word of life." He then commenced a series of meetings in the district school-house, and soon the house was filled to overflowing, and precious souls began to inquire what they must do to be saved. After holding meetings for a number of days, and the house being too small, through the invitation of members of the Baptist Church, the meeting was moved to Perryville meeting-house. After continuing there a few days, Bro. Baker was taken ill, and by the Providence of God forbidden to continue his intended labor of love. It was with deep regret (on the part of many friends of the cause,) that he had to leave before the good-begun work was completed; and to encourage hope, he left a pledge behind, that if a house of worship could be erected, he would return, if it was the Lord's will, and perform the work he had intended at his first visit. This pledge stimulated the friends of the cause here to make an effort to build a house; and although the ability of this church is feeble, yet other friends have been numerous, who have contributed liberally for this object, which (thanks be to God and them) has been successful. And some eighteen days ago Bro. Baker came back to fulfill his *pledge*; and the result is a glorious one, if we may judge from the fruit that is already seen. After preaching some thirty sermons more, he was reminded that his labors must cease; although his spirit was willing, yet his flesh became weak, being afflicted with erysipelas, and he gave notice that on the last evening of the year he would preach his farewell discourse, and requested those who had been reclaimed from their wanderings in sin and rebellion against God, during his labors at this time, to be seated in the house by themselves, so that he might advise them, especially, in regard to their future walk. About fifty persons presented themselves. In view of the work, I can truly say, it is marvelous in our eyes, to see strong men, who three weeks ago were using their tongues in bold blasphemy, whose tongues are now heard in the congregation in prayer and praise to that God whose name they have profaned—to see men that have been demoralized by strong drink, filling their habitations with cruelty, now giving evidence of being clothed, in their right minds, and sitting at the feet of Jesus—to see the great fear that has seized ungodly men, so that none dare openly oppose—are things that have transpired in this community, so that the power of God is manifest beyond all contradiction. Although Bro. Baker leaves this morning, the meetings are not to be stopped, for I think it would take more than one man's absence to stop them. May the Lord continue His power to save, until all within the reach of mercy may embrace His salvation. Pray for us.

Yours in the Gospel, H. CLARKE.

A correspondent at Gilbertsville, Otsego Co., under date of Dec. 11th, says, that for several weeks past there have been gratifying indications of a work of grace in that place. It commenced in the Presbyterian Church, and "a goodly number of the precious youth have been made to hope in God's pardoning mercy, besides some heads of families. The work has extended to the Baptist Church.

THE LAST PAPAL WONDER.—The Roman Catholic paper of this city begins as follows a notice of the decision of the Council recently held at Rome:—

The glorious news has reached us, that on the 8th of December Pope Pius IX., of immortal renown, in the presence of the Cardinals and Princes of the Church, declared it an Article of Di[illegible]he MOTHER OF GOD, OUR [illegible]ADY, WAS CONCEIVED WITHO[illegible] ORIGINAL STAIN. The doctrine which is now promulgated as an article of faith, and which henceforth it will be heresy not to receive, has long since been believed by all pious Catholics. But this dogmatic definition of its truth and character is a favor beyond. It has given joy to the world, and is it too much if we expect from it the pacification of the nations, and a general prostration of heretical and persecuting forces? It is a year of sorrows that has preceded its announcement. Pestilence has stalked abroad over the earth. Cruel, bloody, and causeless war, has carried mourning into tens of thousands of Christian homes. Famine has been standing at the door, and a general distress, not altogether unaccountable as to its sources, has disarranged the business and the worldly wealth of the multitudes. The Church, too, and her members, have been persecuted. In the midst of these chastisements, we must say it, men have not returned in their hearts towards God. They have forgotten his hand, and have vainly sought remedies in natural ways. The very depths of human misery and anguish have plead before the Throne of God for a more powerful intercession; and the Holy Ghost, the Comforter, has taught by His Church truths that the world in earlier ages was not able to bear. A new banner is raised on the walls of our salvation. It is set up by a strong hand, and one that cannot fail. When the soldiers see a new standard advanced by the orders of their chief, they prepare assiduously to follow it. The reason of our great exultation at this new definition is, because the saints and the holy ones of past ages, who have defended this doctrine, who desired to live that they might see it defined, have predicted that this declaration would be followed by a time of great rest and advancement to the Holy Catholic Church. New graces were to be kindled in the hearts of the faithful, and new multitudes were to flock from the paths of error into the great highway of God's truth.

RELIGION IN THE UNIVERSITY OF VA.—A correspondent of the *Religious Herald* writes that there are about 500 students in this institution, of which one-fifth are professing Christians. Every Sunday afternoon there is a prayer-meeting, attended by from 80 to 100 the week for the same purpose.

students. There are smaller gatherings during

It was no part of the scheme devised for the government of the University, by its chief founder, its "Father," as he styled himself, that the religion of Jesus Christ, in any of its forms, should be invoked, or relied on. An experiment was made whether a literary institution amply endowed by the States, and emblazoned with the prestige of great names, could afford to dispense with the offices of religion. With all its advantages, it proved a failure—a signal and instructive failure. Years ago, the professors and students, under a consciousness of the necessity of religious influence in the institution, requested permission of the Board of Visitors to be allowed to employ a chaplain, to be supported by private contributions from themselves. Since that time a chaplain, selected in order from each of the four largest denominations in the State, has been regularly employed; and the effect has been equally gratifying on the prosperity of the University, and the interests of religion. "Man proposes, but God disposes."

WESTERN FEMALE SEMINARY.—Much has been doing successfully for the building up of institutions for the young men of the land, but this is the first Female College attempted beyond the Alleganies. Located near *Oxford*, O., it has a commanding position, in the midst of 30 acres of ground appropriated to its use, and a substantial brick building, 76 by 102 feet, and five stories high, is erected, and nearly completed; subscriptions have been already secured at the West for the building and the endowment of the Institution, amounting to $80,000; the plan is highly popular; but the present money panic interferes with the collection of the subscriptions; scores of pupils all over the West are preparing to enter it next September; it is to be emphatically a Seminary for the people, of all classes and conditions, all its facilities being offered to the young women of the West for $60 per annum.

CURATIVE HOSPITALS FOR INEBRIATES.—Efforts are being made in different States of the Union for the establishment of curative hospitals for inebriates. On this subject the eminent Dr. Benjamin Rush, good medical authority, says: "To the account of physical remedies, I shall add one more, viz., the establishment of a hospital in every city and town of the United States for the exclusive reception of hard drinkers. They are as much the objects of public humanity and charity as mad people."

NEWSPAPER CHANGES.—The New York Chronicle (Baptist) begins the new year with a new dress, in an enlarged form, and under the editorship of Messrs. Pharcellus Church and Jay S. Backus, in place of Messrs. Judd and Maclay. The New York Recorder is soon to be united with the New York Baptist Register, under the title of Recorder and Register.

YEARLY MEETING OF THE NEW JERSEY CHURCHES.—The Yearly Meeting of the Seventh-day Baptist Churches of New Jersey commenced on Sixth-day, Dec. 22d, with the church at Marlboro. The introductory discourse was preached by Elder James Bailey of Plainfield, N. J., who labored in connection with Elders W. B. Gillett and D. Clawson during the meeting. The meeting was quite interesting and well attended. The churches were well represented. By request, the yearly meeting for 1855 is to be held with the church at New Market, N. J.

J. C. WEST, Secretary.

A KANSAS MEETING-HOUSE.—Mrs. Nichols' lately of Brattleboro, Vt., writes to a Milwaukie paper of the opening of the first place of worship at Lawrence, Kansas, by a Woman's Rights lecture delivered by herself.

"This 'meeting-house' is 64 by 20 feet' and constructed first of poles, or small round timbers, and is simply the sharp roof of a Yankee cottage, having a ridge pole through the center, and its sides resting on the ground, so that it stands upon the ground for all the world like the roof a building. The poles run up the length of the building, horizontally, and are some 16 inches apart, and supported by rafters where the poles [illegible]; over these, on the outside, is a thick thatching of prairie hay, tied by cotton twine to the poles. Of course the inside of the building presents to the eye only hay and poles, the hay escaping in single straws rather freely, and tickling the faces that get too near the sloping sides. Bundles of prairie hay were freely strewed upon the floor (ground,) and my audience ranged themselves *'a la Turk,'* till no aisles remained between the desk and entrance. There were a number of boxes and trunks belonging to some of the last party, who have to lodge there till they get up tents or log houses to live in—and on these the women were seated on one side near me. My desk was constructed of two tool chests, piled one on the other, and lighted by two glass lanthorns suspended at equal distances from cross poles, and threw their light in the faces of the auditors. It was a novel scene, and I enjoyed it as I have seldom done a lecture occasion."

ARTESIAN WELL.—Charleston is at last successful in her Artesian Well—an enterprise that has been prosecuted for six years, amid perplexities and obstacles of the most serious kind. The *Mercury*, of the 18th, says: "On Friday, the well discharged five gallons a minute. On Saturday it had increased to ten gallons, and yesterday the flow was equal to twenty gallons a minute, or nearly thirty thousand gallons in twenty-four hours. We examined the well on Saturday evening. The water was very turbid, and deposited about one-fourth of its bulk in a fine gray sand. Yesterday it had worked itself almost clear, but the water had a light cloud in it, and a faint smell of sulphuretted hydrogen. It is too early to determine whether the stream will permanently retain any disagreeable qualities; but of this we are happily assured, that it will afford a copious supply of water to the city, useful for many important purposes, even if not fit for drinking." This well is between 1,200 and 1,300 feet—not so deep by one thousand feet as the Artesian Well of Belcher & Bro., of St. Louis.

NEW YORK STATE GOVERNMENT.—Governor Clarke and Lieut. Governor Raymond were duly inaugurated on the 1st of January. The Senate remains organized as last winter, except that the Hon. Henry Raymond, Lieut. Governor elect, succeeds Hon. Sanford E. Church as President *ex officio*. In the Assembly, the candidates for Speaker, Clerk, Sergeant-at-Arms, &c., selected by a Whig Caucus the evening previous, were all elected by majorities of about two to one. De Witt C. Littlejohn of Oswego is the Speaker elect. R. U. Shearman of Utica is reëlected Clerk. The Message of the Governor is of course too long and too sectional for us to print entire; but some extracts from it will appear in our paper.

REVIVAL AT RICHBURG.—A letter from Eld. Leman Andrus informs us of a pleasant revival at Richburg, Allegany Co., N. Y. Thirteen persons had been baptized.

RELIGIOUS INTELLIGENCE.

The Russellville (Tenn.) *Herald* says that Bishop Soule remarked, in the session of the Conference on Thursday morning, the 26th, when the report of the Committee on Temperance was up for consideration, that he was now seventy-four years of age, and that he had *yet to learn how whiskey tasted!* He said he was not a member of any temperance organization, but was satisfied that the use of alcoholic liquors was hurtful in the extreme, and a great curse to any nation, and he desired to see the manufacture and sale of the same entirely prohibited.

The Associate Reformed Presbyterian Church has adopted a rule in the Synod, that the significant appendage, "D.D.," shall not hereafter be attached to the names of any of their ministers. A writer in the *United Presbyterian* thinks this is as it should be, but proposes that the reform be carried farther. He thinks "Rev." is more objectionable than D.D.

A Committee of Christians exists in Rome, denominated by themselves the "Roman Committee for the publication of the Bible." The committee consists of seven persons—five residing in Rome, and two for the kingdom of Piedmont. It is estimated, such is the desire for the scriptures in Italy, that many thousand copies will scarcely supply the exigency of a few provinces.

Died, on board of the steamer "Washington," Dec. 24th, Mrs. Rosanna, wife of Rev. Horace Foot, missionary of the A. B. C. F. M. in Syria. Mr. Foot, with his wife and child, had left the mission in pursuit of health, and she died on the day the steamer arrived in New York. Her friends in Ohio had the mournful pleasure of looking on her changed countenance, and committing her mortal remains to their last resting-place.

G. B. Proctor reports, in the *Western Recorder*, the results of a protracted meeting. "There were fourteen professions and twelve additions to the Church by experience and baptism. Among the latter was a lady who had been a member of the Methodist Church for five years. She came forward and said she had never been baptized, and wished to join the Baptist Church and be baptized. A Baptist Church was constituted here about five weeks ago, with seventeen members—it now numbers thirty-four."

Within twelve months, one hundred and twenty Burmans have been baptized, two new churches planted, and two preachers ordained to the pastoral office, besides hundreds of Karens.

Out of *nine* persons recently added to the Palmyra Church by baptism, *seven* were or had been members of a Sunday-School.

There is in Savannah, Georgia, a colored preacher in the Baptist church, at the advanced age of 98 years—Mr. Marshall.

Abstract of Proceedings in Congress.

THIRD-DAY, JAN. 2.

In the SENATE, the only matter of general interest was the discussion of Mr. Brodhead's bill granting bounty land to certain officers and soldiers who have been engaged in the military service of the United States.

In the HOUSE OF REPRESENTATIVES, the Diplomatic and Consular bill was reported, and postponed for a week. The bill to amend the Public Lands Graduation Act of last session was taken up, the question being on amendment to limit its benefits to citizens, and those who have declared their intentions to become such. After a short sparring about Know Nothings, the bill and amendment were recommitted to the Public Lands Committee. President Pierce's Veto of the Internal Improvement bill of last session was received, read, and referred to the Committee of the Whole. Mr. Mayall made a speech against the Reciprocity Treaty, and gave notice of a bill for the mutual benefit of both parties. The bill to prevent the introduction of foreign criminals and paupers was reported.

FOURTH-DAY, JAN. 3.

In the SENATE, the reading of the President's River and Harbor Veto occupied the early part of the session. After some resolutions asking information, the Bounty Land bill came up. Nothing was done beyond refusing to strike out the word "minor."

In the HOUSE, the morning was spent on the bill to amend the Graduation act. An amendment giving land at 14 1-2 cents per acre, on condition of actual cultivation, was not disposed of when the House went into Committee on the Swamp Lands bill. Mr. Keitt made a speech against the Know Nothings. Mr. Clingman made a long speech in favor of mediation to settle the war in Europe, leaving the mode of conducting it to the President. Mr. Bayly replied that he was desirous of seeing peace, but was not prepared to go for mediation.

FIFTH-DAY, JAN. 4.

In the SENATE, a memorial from citizens of Massachusetts was presented by Mr. Sumner, setting forth the evils arising from immigrants, and particularly from Roman Catholics; and asking Congress for a head tax of not less than $250 on each foreigner arriving in this country. The memorial was referred to the Committee on Judiciary.

In the HOUSE, the bill for the relief of the purchasers and locators of swamp and overflowed lands was passed after a very stormy debate on the Know Nothings.

SIXTH-DAY, JAN. 5.

In the SENATE, the Military Academy Appropriation bill was passed. Mr. Badger moved to adjourn to Third-day, which the Senate agreed to do. The Soldiers Bounty Land bill was made the special order for Third-day. The remainder of the session was spent on the Judiciary bill, and an amendment making a Judicial Circuit on the Pacific Coast was adopted.

In the HOUSE, the Nebraska Delegate, Napoleon Bonaparte Giddings, was sworn in. After ordering the printing of 20,000 extra copies of the President's Veto of the River and Harbor bill, the House took up private bills, which occupied the time until the hour of adjournment.

SABBATH-DAY, JAN. 6.

The SENATE was not in session.

In the HOUSE, a resolution excluding the Public Printers from the benefit of the extra compensation resolution of last session, was adopted. After a personal explanation by Mr. Clingman and some private bill business, the House adjourned to Third-day.

European News.

Our European dates are to Dec. 23d.

In regard to the war there is nothing decisive or important. Around Sevastopol skirmishes occur almost daily, but there has been no general fighting. Both parties appear to be strengthening their works.

Since the siege began 20 British troops have deserted to the Russians.

Russian deserters say that provisions and ammunition were becoming scarce in Sevastopol, but there was no famine for either.

It was observed that the Russians were arming their ships in Sevastopol harbor, probably to attempt a surprise by sea.

The London *Morning Chronicle* publishes, that on the 14th, at Vienna, the ratifications of the triple treaty were exchanged. A report prevailed at Vienna, that Russia accepts the four points as a basis for peace negotiations; but the razing of Sevastopol or the reduction of the Black Sea fleet will never voluntarily be ceded. If an inoffensive equivalent should be proposed, Russia promises acceptance.

The treaty between Great Britain and Japan is very favorable. Sir James Sterling attempted to obtain similar terms for France, but the Japanese Minister refused. A special French Mission will be sent.

The New Year has been inaugurated in Wall-st., by the announcement of several important failures, which have shaken and materially checked the growing confidence which had been fostered by the freedom from financial disasters of the last week or two. The announcement of the failure of Messrs. Wadsworth & Sheldon was followed by that of Messrs. Belcher Brothers, very extensive Sugar Refiners of St. Louis, carrying down Messrs. Foster & Stephenson and Mr. W. G. Ray, Commission Merchants of this city, who have become embarrassed by large advances made to the St. Louis house. An extensive Boston house, it is also expected, will be obliged to suspend, as it is also under large advances. The liabilities of Messrs. Belcher & Co. are about $2,000,000, and the estate, it is feared, will not pay over 30 or 40 per cent.

The Jury brought in a verdict against the New London, Willimantic & Palmer Railroad Company, and in favor of Crocker, the plaintiff, of $8,291. The Court was of opinion that the sum was too large, and sent them out again. They subsequently came in with $7,260. But the Court considered this rather excessive, and sent them out once more. This time they brought in $6,500, which was accepted, and entered as the final award.

A California paper states that a trip from there to Honolulu is getting quite the fashion—going down and stopping there a fortnight, amid the bananas, oranges and pine-apples; paying a visit to the volcanos and other natural curiosities; and returning in ten to fifteen days.

Mrs. Maria C. Zorn has filed a petition in the Fifth District Court, New Orleans, for a divorce from her husband, Charles Frederick Pothoff; her complaints being, his drunken and intemperate habits, his inability to sustain her, and his absence from the State as a fugitive from justice; he having stolen three watches from three individuals, and fled before they could make affidavits against him—all of which, she thinks, entitle her to a divorce, without having first obtained a separation from bed and board.

In the case of John Holland vs. the town of Cranston, R. I., to recover damages for injuries sustained by the plaintiff in falling from an embankment in consequence of defects in one of the town roads, the jury in the Circuit Court returned a verdict in favor of the plaintiff for $5,250. The case had been on trial for eight days before Judge Pitman. At a former trial the plaintiff obtained a verdict for $2500, which was set aside and a new trial granted. So says the *Literary Echo.*

Conrad Bush, of Pompey, Onondaga Co. died at his residence on the 21st ult., at the advenced age of 102. Mr. B. served in the American army throughout the war of the Revolution, as we learn from the Syracuse *Standard*, and was personally acquainted with Washington, and many other leading spirits of the Revolutionary period. At the time of his death he resided on lands which he received from Government for services rendered his country.

In the Supreme Court, the case of Nehemiah H. Stone vs. the Boston and Maine Railroad for $10,000 damages for injuries from an accident on the road at the time President Pierce's son was killed, the jury returned a verdict for defendants after an hour's absence. The case has occupied nearly nine days. The *Post* states that the defendants once offered to settle with plaintiff by paying him $5,000.

A. T. Stewart & Co., New York, have opened a soup kitchen, in the basement of their store, on the Reade-st. side, where a large cauldron of soup is prepared and dealt out by a detachment of the clerks, to all who apply, between twelve and two o'clock.

Dr. Robert M. Graham, convicted of the manslaughter of Col. Loring, at the St. Nicholas Hotel in August last, and sentenced to the State Prison for seven years, has been taken from the Tombs and conveyed to Sing Sing. It is understood that Graham will be placed in the medical department of the prison as assistant physician.

The number of Immigrants arriving at our ports during the year just closed was 313,747—an increase of 30,415 over the arrivals of 1853.

Nearly 200 persons have been discharged from the Bible House, New York. Cause—Want of funds to pay them if kept on.

New York Markets—January 8, 1855.

Ashes—Pots $6 75; Pearls 7 50.

Flour and Meal—Flour 8 81 a 9 06 for common to good State, 9 12 a 9 62 for Ohio, Michigan, and Indiana, 11 00 a 12 00 for extra Genesee. Rye Flour 6 25 a 7 25. Corn Meal 4 31 for Jersey. Buckwheat Flour 4 00 a 4 75.

Grain—Wheat, 2 05 a 2 20 for white Canadian and Southern. Rye 1 37. Barley 1 34. Oats 55 a 61c. for State and Western. Corn 1 03 for Western mixed

Provisions—Pork 12 00 for old prime, 14 00 for new mess. Beef 6 00 a 7 00 for country prime; 8 75 a 11 25 for country mess. Lard 10½c. Butter [illegible] a 18c. for Ohio, 19 a 24c. for State. Cheese 10 a 10¾c.

Hay—94c. per 100 lbs.

Lumber—16 00 a 16 50 for Eastern Spruce and Pine.

Potatoes—3 50 a 4 00 per barrel.

Seeds—Clover 10 a 11c. per lb. Timothy 2 75 a 3 00 per bushel. Flaxseed 1 85 per bushel.

Tallow—12¾c. for City rendered.

Wool—28 a 30c. for native, 42 a 45c. for American Saxony Fleece.

☞ There are indications of a better condition of things in business affairs. The arrivals of specie from California are beginning to exceed the export to Europe. If this continues, financial affairs will soon become more sound, solid confidence will be restored, and business will gradually begin to move in its accustomed channels. The *Courier and Enquirer* says:

"The intimate connection between the Dry Goods Market and the financial condition of the country, has never been more apparent than during the current year. For the last six months of the year 1853, and the first six months of the present year, the importations of dry goods from Great Britain and the Continent were enormously large, and contributed materially to the stringency of the Money Market throughout the entire year 1854. During the past six months, however, there was a sensible diminution of imports, resulting for the whole year in an aggregate of $81,785,458 thrown upon the market, against $90,535,780 for the calendar year 1853, and only $62,522,296 for the year 1852.

"The disturbance of the Money Market by these excessive importations was not the only effect produced. It will be apparent even to the casual observer, and is painfully palpable to the American manufacturers, that their interests are severely affected by thus crowding the product of foreign labor upon our markets. The people of these States have accumulated, under the advantages of great mechanical skill and industry, over eighty millions of dollars as capital in the manufacture of cotton goods; thirty millions in woolens; employing in both branches over one hundred and thirty thousand male and female operatives; yielding, in 1850, more than one hundred and four millions worth of cotton and woolen goods. These are highly important interests, and should not be neglected by the American statesman and legislator.

"We should, in the first place, protect our own industrial associations, our own capitalists, our own market, and then aid, as far as we can, the foreign laborer. But there is no reason why we should import silk goods to the extent of thirty-one millions, and woolens to the value of twenty-five millions, as we did last year; thereby driving large numbers of our manufacturing capitalists into insolvency, and their operatives into idleness. Such, however, is virtually the case at present. The number of failures in Rhode Island and Massachusetts, during the present year, among their manufacturers, is very great. Massachusetts alone has invested forty millions of dollars in woolen and cotton manufactories, and Rhode Island eight millions. An examination of the price current shows that out of forty-five mills, quoted indiscriminately at Lowell, Lawrence, etc., whose stocks stand at $30,300 par, are worth in the market only $13,500, or less than 45 cents per dollar. This affords no encouragement for capitalists in this branch of industry, although it is for the benefit of the Southern planter that his cotton should be manufactured in New England. Every dollar's worth manufactured at home is a benefit to the home market and to the whole country."

The *Courier* thinks a high tariff would lessen importations, give employment to our own countrymen, and establish an independent equilibrium between receipts and expenditures, and thus bring about "good times."

We would suggest, that the enforcing of cash payments would be a much more natural, effectual, and beneficial mode of preventing excessive importations, of nourishing and sustaining our own industry, and of building up our domestic manufactures upon a solid basis. Without this, protective tariffs will be vain and futile. The excesses of the paper and debt system will drown out our domestic manufactories, in spite of any thing that can be done by a protective tariff.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS,

FOR THE USE OF

SABBATH SCHOOLS, SOCIAL RELIGIOUS MEETINGS, AND FAMILIES.

COMPILED BY LUCIUS CRANDALL.

All the week we spend	35
Almighty Maker, God	71
As flows the rapid river	72
At life's early morn	93
Again returns the day of holy rest	94
Along the banks where Babel's	95
Awake, my soul, to joyful lays	105
A song, a song of gladness	110
A mourning class, a vacant seat	116
Bless the Lord of Life forever	27
Come, let our voices join	15
Come, join our celebration	45
Creation's God! with tho't elate	56
Come, thou long-expected Jesus	65
Children of Zion! what harp-notes	73
Come, let us ascend	75
Come, where our father lies low	88
Come, thou Fount of every blessing	98
Come to the mercy-seat	99
Come, children, come, in early	105
Dark night away hath rolled	27
Eternal Spirit, source of light	63
Friends of freedom, swell the	104
Flung to the heedless winds	14
Fain, O my child, I'd have thee	120
Glory to God on high	71
Go when the morning shineth	72
Guardian of souls, throughout my	117
Hail! lovely power, whose bosom	19
Happy the spirit released from its	19
How painfully pleasing the fond	20
How pleasant 'tis to see	50
Hark ye, O list to the sorrow	21
How cheering the thought	25
Hark! those happy voices saying	26
How pleasant thus to dwell below	32
How sweetly on yon tranquil	43
Hark! what mean those holy	65
How sweet to reflect on those joys	83
How short and how fleeting	89
How oft on the ocean of life	89
How sweet on thy bosom to rest	89
Hail! to the Lord's Anointed	96
How dear to my heart	46
In search of enjoyment	25
I never was a favorite	30
It is not that my lot is low	34
I'll awake at dawn on the Sabbath	41
In the hour of keenest sorrow	39
I would not live always	66
I quit the world's fantastic joys	87
Joyfully, joyfully, onward I move	18
Let children learn to sing	14
Lord, when we bow before thy	16
Let worldly minds the world	42
Lie up nearer, brother, nearer,	37
Let the proud veil of darkness	47
Lord, dismiss us with thy blessing	64
Lord, grant me stronger faith	112
Lord, let our prayers to thee	116
Life is the time to serve the Lord.	123
My father raised his trembling	16
May the grace of Christ	36
My soul before thee prostrate lies	62
My days of youth, tho' not from	77
My faith looks up to thee	82
My Father knows my feeble frame	87
Now let our voices join	71
Now to heaven our prayers	76
Now I lay me down to sleep	43
O, Thou, to whom the grateful	13
O, Zion, tune thy voice	15
Oh! sweet is the first breeze	21
O, for the wings of the bright	35
Onward! onward! band victorious	37
O come, come away, the Sabbath	38
Oft in the stilly night	40
Oh, blest art thou whose steps	43
O, Pleasure, thy aspect is bright	52
Oh! soft sleep the hills	58
O, Thou, who hearest prayer	78
Oh, tell me, thou life and delight	79
Oh, weep for those that wept	95
O, tell me where the Dove has	103
O, how happy are they	117
Placed on the verge of youth	57
Praise God, from whom all	119
Rouse ye at the Saviour's call	104
See, daylight is fading o'er earth	21
See the leaves around us falling	39
Star of the morn, whose placid ray	63
Spirit! thy labor is o'er	67
Sing, sing, his lofty praise	82
Serene, I laid me down	99
Sinners are bending	102
Soft be the gently breathing notes:	116
That awful day will surely come	13
The hours of Sabbath morn	14
Though dwelling with strangers	22
The Prince of Salvation in triumph	26
Tell me, wanderer, wildly roving	39
The vernal flowers their beauties	42
To thee, in youth's bright morning	44
They have gone to the land where	54
To mark the sufferings of the babe	57
Take heed that ye despise not one	59
This world is all a fleeting show	61
The Lord is my Shepherd	66
This earthly globe, the creature	68
Tell me, ye winged winds	69
The praises of my tongue	71
The Lord is my Shepherd	79
There is a place of waveless rest	80
Thou sweet-gliding Kedron	84
The Lord into his garden comes	86
Tell me the tale of the friends	88
There is an hour of peaceful	97
The Assyrian came down like the	100
The evening was glorious	101
The Bible! the Bible!	106
The day is past and gone	107
To thee, O blessed Saviour	108
This vast assembly now convened	111
Thou great Instructor, lest I stray	113
To-day the Saviour calls	114
This book is all that's left me now	114
The voice is hushed, the gentle	116
Thou, who didst stoop below	121
Upon my father's new-closed grave	16
We know what the Sabbath-day	22
When shall I see the day	23
While with ceaseless course	29
Who are these in bright array	29
When shall the voice of singing	45
We bring no glittering treasure	45
Weary of wandering from my God	63
When for eternal worlds we steer	70
When nature was sinking	74
When shall we meet again	78
Where are the friends that to me	88
When the calmness of evening	90
We have met in peace together	98
We won't give up the Bible	109

When blooming youth is snatched	122
While shepherds watched their	124
Ye servants of God	51
Young man, indulge thy passions.	60
Ye angels, who stand round the	85

Extracts from the Preface.

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 50 cents for a single copy; 35 cents per copy by the dozen. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent, No. 9 Spruce-st., New York.

MARRIED,

At Berlin, on the 23d ult., by Rev. O Cushing, Mr. WM. GREEN to Miss CHARLOTTE POTTER.

At Elmira, N. Y., on the evening of the 25th ult., by Rev. Thomas K Beecher, Mr. J. H. TITSWORTH, of Plainfield, N. J., to Miss E. H. LEWIS, of the former place.

At Potter Hill, R. I., Dec. 28th, by Eld. C. M Lewis, Mr. JONATHAN LILLIBRIDGE to Miss MARTHA POTTER, both of Westerly.

At Alfred Center, Dec. 30th, by Eld. N. V. Hull, Mr. LORENZO D. COLLINS to Mrs. VIENNA ALLIS, all of Alfred.

At the Baptist Church in Berlin, N. Y., on the evening of the 31st ult., by Rev. Wm. W. Smith, Hon. GEO. T. DENISON to Mrs. SARAH ARVILLA GREEN, all of Berlin.

In Genesee, on the 1st inst. by Eld. Leman Andrus, Mr. ALBERT K. CRANDALL to Miss LOUISA E. MAXSON.

In Alfred, Allegany Co., N. Y., January 1, 1855, by Eld. J. Kenyon, Mr. H. W. BENJAMIN to Miss MARTHA JANE LANGWORTHY, all of Alfred.

DIED,

At her residence in Berlin, Rensselaer Co, N. Y., Nov. 17th, Miss LOIS BURDICK, in the 68th year of her age. Sister Burdick united with the Seventh-day Baptist Church in Berlin when in her eighteenth year, and remained an exemplary member until her death.

In Verona, N. Y., Dec. 19. 1854, an infant, aged five weeks, only son and child of William W. and Angeline Warren. D. P. C.

In North Stonington, Ct., Jan. 1, 1855, SUSAN H. BURDICK, daughter of Zebulon Burdick, aged 34 years.

In Westerly, R. I., Jan. 3d, HOSEA BARBER, aged 82 years, lacking 1 month and 19 days. He has left an aged widow and a large family to mourn their loss. He came to his grave at a full age, as a shock of corn cometh in its season.

LETTERS.

L P Babcock, C M Lewis, D P Curtis, S S Griswold, B Clarke, Ray Green, E Konigmacher, N V Hull, M Slater, L C Rogers, S Clarke, J B Clarke, Ichabod Babcock, H P Burdick, Geo B Clarke, Eli Forsythe, Wm B Maxson, J R Satterlee, Geo S Crandall, John Whitford, E R Clarke, T F West, E R Crandall, Daniel Coon, H A Hull, L Andrus, A C Stannard, Paul M Barber.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of FRANCIS C. WOODWORTH, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year.*

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83⅓ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year.*

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

Miscellaneous.

Items from the Battle Field.

Daring Exploits.—Major Goodwin, 41st Regiment, was surrounded by the enemy, and two of them dashed up to his horse; he deliberately shot them; and, spurring his charger, broke through the thick crowd, but just as he deemed himself secure, a daring Russian came against him with his bayonet advanced. The Major quietly waited until he was close up, and shot the man dead on the spot. Lieut. Col. Haly, who received three severe wounds, but happily not dangerous wounds, was deemed by the enemy their prisoner; but he had no idea of traveling during the cold winter in Russia, so he raised his sword, and cutting down three of those about him, escaped to his regiment, to the delight of every officer and man.

Wearied with Slaughter.—I cannot depict my feelings when we returned. I sat down completely exhausted and unable to eat, though deadly hungry. All my uniform, my hands, my very face, were bespattered with blood. It was that of the enemy! Grand idea! But my feelings—they were full of that exultation which it is impossible to describe. At least twelve Russians were sent wholly out of the "way of the war" by my good steel alone, and at least as many more put on the passage to that peaceful exit by the same excellent weapon. So also can others say. What a thing to reflect on! I have almost grown a soldier philosopher, and most probably will one of these days, if the bullets which are flying about so abundantly give me time to brush up.

Death of Gen. Strangways.—A shell came right in among the staff—it exploded in Capt. Somerset's horse, ripping him open; a portion of the shell tore off the leather overalls of Capt. Somerset's trousers; it then struck down Capt. Gordon's horse, and killed him at once, and then blew away Gen. Strangways' leg, so that it hung by a shred of flesh, and a bit of cloth from the skin. The poor old General never moved a muscle of his face. He said merely, in a gentle voice, "Will any one be kind enough to lift me off my horse?" He was taken down and laid on the ground, while his life-blood ebbed fast, and at last he was carried to the rear. But the gallant old man had not sufficient strength to undergo an operation, and in two hours he had sunk to rest, leaving behind him a memory which will ever be held dear by every officer and man of the army.

Return from Battle.—Most thankful we were to escape out of the horrible scene, and most grateful at being preserved through it. For about five hours we had been under a heavy fire, and were besides tired with the hard work, especially as we had had no breakfast. It was awful to see how the men and horses were torn and mangled by the shot and shell, which came furiously through us; but the most painful thing was to hear the wounded men groaning in their agony, and calling on you by name for assistance, which it was out of your power to afford. Of about 90 officers and men who went into action, 23 were killed and wounded; seven wheels were more or less disabled. When the battery returned to camp, I went back to look at the number of the dead horses, &c. I saw some Russian field carriages, which had been deserted, four ammunition carts, two limbers, and one gun-carriage; the gun itself had been saved by dragging it with ropes along the ground. The number of dead and wounded along the Inkerman road was sickening; they seemed to me far more numerous than at Alma.

From a Private Soldier.—Our men fell by dozens—horses and men blown into the air, and we ran every one through we could get at. We had to cut our way through thousands of them. I cannot tell you the horrors we went through, but all I can say is, we have only about fifty men left out of the regiment. We have lost half of our officers. Poor Spence was killed, and in fact dozens that you have seen before we left Old England; but we were driven to desperation, and fought like madmen, and, thank God, I have escaped thus far among the few, and hope, by putting my trust in the Almighty, I shall get through it, and hope you will make yourself easy about me. If it should please the Lord I should fail, I hope I shall go to a better world, so you must not fret about me. Don't take any notice if you should not hear from me; I am safe and sound when I write this letter. I must conclude, as I am stealing five minutes. Pray for me. I am happy. God bless you until we meet again. I remain your only son. God bless you all. Eliza, don't despair about our situation—I don't; so I hope neither you, mother, nor father will.

Making Character.

The following excellent thoughts upon character, are from the "Elements of Character," a work recently published by Crosby, Nichols & Co., of this city. As the following extracts show, the volume strikes at the root of the matter:—

Many persons confound reputation with character, and believe themselves to be striving for the reality of the one, when the phantasy of the other alone stimulates their desires. Reputation is the opinion entertained of us by our fellow-beings, while character is that which we really are. When we labor to gain reputation, we are not even taking the first step toward the acquisition of character, but only putting on covering over that which is, and protecting it against improvement. As well may we strive to be virtuous by thinking of the reward of heaven, as to build up our characters by thinking of the opinions of men. The cases are exactly parallel. In each we are thinking of the pay as something apart from the work, while, in fact, the only pay we can have inheres in the doing of the work. * * * * *

So far as we habituate ourselves to contesy and good breeding because we shall stand better with the world if we are polite than if we are rude, we are cultivating a merely external habit, which we shall be likely to throw off as often as we think it safe to go without it, as we should an uncomfortably fitting dress; and our manners do not belong to our characters any more than our coats belong to our persons. This is the transient side of manners. If, on the contrary, we are polite from an inward conviction that politeness is one of the forms of love to the neighbor, and because we believe that in being polite we are performing a duty that our neighbor has a right to claim from us, and because politeness is a trait that we love for its own inherent beauty, our manners belong to the substance of our character—they are not its garment, but its skin, and this is the permanent side of manners. * * *

The virtues all lock into each other. They cannot stand alone. Like the stones of an arch, no one of them can be wanting without making all the rest insecure. That character alone is trustworthy in which each virtue takes its relative position, and all are held in place and confirmed by the key-stone of a living faith in the great central fact, that there is a God of infinite goodness and truth, whose commandments are the laws of life in this world and the world to come.

Value of Science to Practical Men.

When our Lieutenant Maury was in Europe last year for the purpose of extending the knowledge of his improvements in navigation and of obtaining the concerted action of the governments and commercial men of Europe in aid of still further improvements, the London *Athenæum* published an interesting article on the subject, from which we make the following extracts:—

Lieutenant Maury, so long ago as 1842, conceived that it would be useful to science if the masters of American vessels could be induced to keep their log-books in an improved fashion. Practical men shook their heads at the idea. He wished them to record the set of currents, the depths of the ocean bed, the heat of the water. They did not see his purpose, and for a long time they gave him little assistance. Materials nevertheless slowly grew in bulk under his eye; he compared the information which he obtained with older logs; and at the end of six years he announced his first practical discovery—a new route to Rio.

Practical men still shook their heads. They who had crossed the line a hundred times were not to be taught navigation by a person who spent his days in star-gazing, or poring over old logs. It was not easy, therefore, to get a sailor bold enough to venture on the new route; for seamen, more strongly wedded to tradition than perhaps any other body of professionals, were afraid of the Great Belt of Calms near the equator, and of a bugbear of a current setting on Cape St. Roche, in South America. At length a bolder than the rest proposed to sail under Lieutenant Maury's directions; and the consequence was that he reached the line in twenty-four days instead of forty one. He had sailed nearly as the crow flies, instead of running seven or eight hundred miles out of the direct course to avoid imaginary dangers.

After this great discovery, Lieutenant Maury had little trouble with the seamen. To use his own words: "Navigators now for the first time appeared to comprehend what it was I wanted them to do, and why." It was this "why" that had made them indifferent. They could see no advantage in recording the minute details asked for by the astronomer, and they failed in many cases to give themselves the trouble. Lieutenant Maury's next service was shortening at various points the route to California. He succeeded in reducing the entire sea-voyage from 180 to 100 days. It is with such practical recommendations in his hand that the American astronomer has now come to offer to Europe a share in the glory and the benefits of a larger, more systematic, and more minnte ocean survey than has ever before been made.

In the pamphlet now before us, Lord Wrottesley has put the case in a very lucid and interesting way, adducing some facts in proof of the value of scientific knowledge, even when it would not seem to be practically available. The story of Franklin and his thermometer is a good instance of this kind. Franklin, as every body knows, was great at experiments. He had a passion for ascertaining facts, whether isolated or other. When crossing the Atlantic he had been in the habit of dipping his thermometer into the sea, and nothing the record. These simple experiments, though he had no notion of their special importance at the time, caused one of the great internal revolutions in America, transferred the trade and wealth of Charleston to New York, from the South to the North, from the slave States to the free. This important transfer was effected thus:—

"When Doctor Franklin was in England, the merchants of Providence, Rhode Island, petitioned the Lords of the Treasury (it was before the recognition of Independence) that the Government packets that usually sail from Falmouth to Boston, United States, might in future sail from London to Providence; and they supported the prayer of their petition by the allegation that the average passage from London to Providence was fourteen days less than that from Falmouth to Boston. Now, Falmouth and Boston being between London and Providence, this statement seemed rather startling; and Doctor Franklin, who was always on the alert when his country's interests were at stake, hearing of it, sent for Capt. Folger, an old New England whaler, who happened also to be in London at the time. The old captain immediately accounted for the fact that had puzzled the doctor. 'The London packets,' said he, 'are commanded by New England masters, who know some thing about the Gulf Stream; the Falmouth by Englishmen, who know nothing about the matter.' This hint was enough for Doctor Franklin. He had either previously or subsequently taken the temperature of the Gulf Stream, and had found it considerably higher than the surrounding ocean; dipping a thermometer into the sea, therefore, showed when you entered it and left it. He and the old captain laid down its limits according to the best of the existing information on the charts, and the result was a complete change in the course taken by vessels trading between England and America."

By using or avoiding the Gulf Stream, as circumstances required, for which the thermometer served the purpose of sextant, the distance between London and New York was shortened from sixty to thirty days. In this way, New York became nearer to England than Charleston. It grew into the point for all vessels bound to the New World to touch at, and so assumed the importance of a great commercial depôt. Charleston lost its chance of ever growing into the metropolis of the Republic; and, to use the words of Lieut. Maury, "all these results are traceable to the use of the water thermometer at sea." This is an answer to be pondered by those who affect to sneer at the temperature registrations of the Dolphin.

The Gulf Stream—Franklin's observation of which led to such important results for America—is still a comparatively unknown ocean current. Yet it is one of the most interesting streams in the world, and for European American commerce, it is far the most important.

Paper Making.

Few persons have an adequate idea of the immense amount of capital and labor employed in the manufacture of paper. And it is only by a recourse to figures and reliable statistics, that a just conception of the nature and extent of the business can be approximated. The rate at which the consumption of the article increases, has far outstripped the most extravagant anticipations that could have been entertained, and has opened the eyes of manufacturers to the startling fact that the source from which they have derived the material necessary for the manufacture of paper, and which they had regarded as unfailing, has been comparatively exhausted—to such an extent, at least, as to render them no longer able to keep pace with the demand. Rags which at one time proved a serious incumbrance to house-keepers, and were thrown out with the daily offal, are now becoming not only sought after, but an article esteemed almost precious.

This state of things had been foreseen, and the proprietors of the London *Times*, knowing the effect an advance in the price of paper growing out of a scarcity of rags would have in diminishing their profits, offered a reward of $25,000 for the discovery of a cheap and perfect substitute for rags as a material for the manufacture of paper. Many experiments have already been tried, and though, as yet, without entire success, we may still reasonably hope, in view of what has already been accomplished, that ultimately the desired result will be attained. What man has done in the past inspires the belief that his genius is capable of further and greater achievements, that indeed whatever his physical and intellectual wants may crave as essential to the grand progressive movement in favor of the true interests of his race, will in time be procured and brought within the achievement of science and art. We trust that the check experienced in meeting the demand for paper will soon be removed, as great inconvenience has already been suffered, particularly by the press. Many proprietors of newspapers have been compelled to reduce the size of their sheets, and in some instances to suspend the publication of their paper altogether. We know of no more perilous undertaking, in a pecuniary point of view, than to attempt, at this time, the establishment of a newspaper.

We have at present in the United States 750 paper mills, which, it has been estimated, manufacture 270,000,000 pounds of paper a year, valued at $27,000,000. Allowing that one and a half pounds of rags are required to make one pound of paper, we have 405,000,000 pounds of rags consumed in one year, which, at the rate of four cents a pound, are worth $16,200,000, and if we add to this the cost of manufacturing, which, with interest on fixed capital, insurance, expenses, &c., has been found to be $4,050,000, and the cost of labor, making an aggregate of $23,635,000 as the actual expenditure in manufacturing paper worth $27,000,000, we find the measure of profit by no means unreasonable, and which might even be considered small, were not the manufacturer comparatively free from those sudden changes that affect the manufacture of cloth and metals. If a substitute for rags be discovered, which will keep the supply of paper fully up to the demand, we can readily perceive that a tremendous impetus will be given to the manufacture. [Balt. Amer.

Runaway Slaves.

The Syracuse *Chronicle* of Dec. 27th gives the following account of the adventures of two fugitives from the patriarchial institution:—

Isaac and Henry were owned by the same master, and were taken to a public house to be sold. They were soon disposed of, and their new master put them into a room together, saying, "I suppose, boys, you will not make me any trouble?" Isaac, a large, noble-looking fellow, by the way, answered very meekly—"Oh no, we came here without any trouble, and we mean to go away without any." The new owner (a trader) was satisfied with the answer, and left them. No sooner was he gone than the two slaves carried out their threat to go away without trouble; and the "uncertain riches" of the new proprietor walked off into the woods. The modus operandi of their living here it might not be altogether judicious to explain. Their residence in the hut they built was of two weeks' duration. Then they were discovered, and a party of armed men proceeded to capture them. The slaves were busy at breakfast when they were summoned to surrender, and told that if they came out they would be shot down on the spot. Isaac seized a broad-axe and Henry a dirk, which they had obtained by hook or crook, and dashed out. Their hut was on the bank of a stream, and into the stream they plunged. The party fired on them, wounding them both severely. Isaac's arm was filled with shot, and the weapon dropped from his hand. But the spirit of liberty was not yet quenched, and they attempted to escape, pursued, of course, by the rapacious man-hunters.

After a long and noble effort to escape, they were at length overcome by fatigue and numbers, and retaken, and at once conveyed to the jail, where they were confined in the second story. Sad, indeed, was their condition. Henry was sick from his wounds, so that he could do nothing, and Isaac's arm was so injured that for two weeks he was unable to use it. There was, it seemed, no escape but in suicide. But the spirit that burned in the bosoms of our fathers burned also in the bosoms of these black men, and, as soon as Isaac's arm could be used, they set about executing the plans their heads had conceived. Here, again, we leave the reader to surmise the modus operandi. Suffice it to say that, after two weeks of almost incessant labor, they were again breathing the air of heaven. Sixteen long and weary miles did they walk on the night of their escape, and again took up their residence in the woods. How deeply could they realize the truth of the sentiment, that man's greatest enemy is man. The habitations of human beings were shunned and dreaded more than death; they sought and found safety in the deep silence and dark abodes of nature.

Thus, when men are unkind and oppressive, God's paternal hand is over us, and in his presence we feel there is infinite love and mercy. They remain in retreat for two months, and intend to pass the winter in their residence; but they found that, from certain indications among the poultry yards, the slaveholders began to suspect that the woods were inhabited by the missing negroes, and determined upon a "drive"—i. e. a man-hunt, with dogs and guns. The negroes were to be "taken at first sight"—i. e. shot dead as soon as seen. They now thought it best to leave their winter residence in the South, believing that a colder climate would be more congenial with their feelings.

On a plantation near them was an old man, named Kit, who had a perfect Legree for a master. About this time he had received two most unmerciful floggings on two successive days, and he began to be "discontented with his lot." He applied to our heroes for counsel, and became a hero with them. They all remained in the woods over Sunday, and on Monday night took up their line of march. The usual method of night-traveling and day-resting was pursued; and, after three weeks' energetic exertion, they reached the depot in this city.

Henry showed more than a hundred shot in his body, and Isaac bore honored wounds, or wounds that would he honored if borne by a Hungarian in the same cause. They are now beyond the reach of American republicanism.

New System of Phonotopy.

The following is an exact copy, except the very original handwriting of a business letter received by a firm in New York:—

—— Village, Tompkins Co., Nov. 4, 1854.

Mr. V. and Com. Deer Sur, i am round the kontry kinsiderabel a cellin an nu invent ed yanke blad churn, made of stun, witch allers kepes clene and swete and dont want no skowrin, i have traded in Oct. 273 ov them churns for munny and truk, an i hav bin a thinkin o goin inter the bge an chiken bisnes ginurely an some on my nabors tould me u was advancin on truk, neowi kin cend deown bi the eri an rale rode weakly, sum vensun, buter and egs, wat der u think bukweet wil fech. Clovur sede an wule kin be got for redy munny, how du u think i wud do on huny and be swax. thar is a hepe ov turkees and geas and sum dux, hoges haint a goin to get very fat on akount o no corne, thar wil be more shotes than larje hoges dride apels an peeches an apel sas wil be plentee, buter an chees is hi sufin kin be dun in herkry nuts an mapel shugar an som kuntry make ov saseges, wat are tha wurth, farm stok is lo, yung criters is a celen at onny price, wat is lasis duin with u, wat kin u du in pelts and caf skins, sheap tha ar killin on em of, on akount ov them bein to costive to kepe in the wintur, things in genril wil be high in the pervision line, how much munny kin u spar me to trad with in the abuv, on wat kin u advanc me on the kine ef provisions i hav namid, plese to rite me an let me no. rispektively,

Mr. Vanber ure carman nose me.

The Barber's Son.

In a speech, recently delivered at the Sherborne Literary Institution, by Mr. Macready, that gentleman said: "The first time I visited Canterbury, I wished of course, to see the Cathedral. A gentleman there by the name of Austin, the surveyor and architect of the building, accompanied me. He had redecorated almost the whole of the interior, and had restored the dilapidated portion of the western front. He was the artificer of his own fortune, and had raised himself to this position from a state of almost actual destitution; he had formerly been the servant of a friend of mine, and when he reached Canterbury he had not half a crown in his pocket. He directed my attention to every thing worthy of notice. It was opposite the western front that he had stood with me, before what seemed the site of a small shed or stall, then unoccupied, and said, 'Upon this spot a little barber's shop used to stand. The last time Tenderden came down here, he brought his son with him, and it was my duty of course, to attend them over the Cathedral. As we came to this side of it, he led his son up to this very spot and said to him, 'Charles, you see this little shop; I have brought you here on purpose to show it to you. In that shop your grandfather used to shave for a penny. This is the proudest reflection of my life. While you live never forget that, my dear Charles.' And this man, the son of a poor barber, was the Lord Chief Justice of England. For the very reason, therefore, that the chances of such great success are rare, we should say, spare no pains in improving the condition of those whom accident may depress, or fortune may not befriend."

Next Year's Campaign.—The London *Times*, which has constantly declared that Sevastopol *must* fall, now postpones that event until next year. It says:—

"There does not appear, so far as we can see, any hope of bringing the struggle in the Crimea to an immediate termination. Before our army can be sufficiently reinforced to attempt any thing effective in the field, the season will have arrived when the rage of man must be suspended in deference to the severity of the elements, and the business of mutual destruction must wait for its recommencement for the first opening of Spring. Our main care must be now to preserve our army in health and spirits till the opening of another campaign, when a victory will be to those who have best availed themselves of the Winter for the purposes of reinforcement. We believe that if it shall turn out, as we apprehend it will, that we are compelled to desist from the active operations of the siege, we shall at any rate be able to renew the campaign next year with a decided superiority of force, which will allow us thoroughly to invest the place, and thus to push on the seige with a certainty of success."

An Incident.—One day, recently, a gentleman connected with one of the first produce and commission houses in Montreal, left the St. Lawrence Hotel in the 5 o'clock morning stage for Watertown, on his way to the West for the purchase of produce. His trunk was strapped on to the rack of the sleigh behind. At a watering-place, about six miles on the way, it was discovered that the trunk had got loose from the strapping, and was only held by the strap passing through one of the handles, and had been dragging in that manner until it was knocked open and its contents principally gone. It was made known that the trunk contained $20,000 in Canada bank-bills, put up in packages of from $2,000 to $5,000 each. Upon returning along the road, scarcely yet day-light, the owner and those accompanying him found to the amount of $10,000, and, on arriving here, soon learned that a Mr. Southwarth (a colporteur) had found a package of $2,000, which was returned. Again returning upon the road, a laborer on the railroad was fallen in with, on his way to the village, with the balance of the loss, $10,000, having found it on his way to his daily toil. The gentleman, with commendable liberality, having regard to the honesty of the finders, presented the honest laborer $50 and to Mr. Southwarth $30.

Ice Houses.—At a recent meeting of the Farmer's Club in New York, Paul Stillman presented a plan of an ice-house, designed by A. S. Lyman, a mechanic at the Novelty Works, for which he has applied for a patent. It is to be built above ground, and the sides and roof formed ten inches thick, by a succession of four sets of studs, lathed and plastered, so as to make a wall of air-tight chambers—outside of this a coat of ordinary siding, with shingled roof. At the bottom of siding an open space of an inch is left to carry a current of air up and under the shingles, out of the ridge. The ice is to be placed in a cube of not less than ten feet square, upon a tight floor, six feet above the ground floor. The ice is held away from the sides of the building by studs, so as to leave a space all around, and so arranged that the cold air from the ice will fall down upon one side, between the plastered wall and the wall of the refrigerating room, where, as it becomes rarified, it will pass under the floor, and up the other side, out through a ventilator in the roof. In this room also ventilated, fresh provisions can be kept any length of time; the air is cold and dry.

Great Men.—Mr. Tunis Van Pell has now in his possession a much worn document containing the weight of some of the revolutionary worthies. It is dated West Point, Aug. 19th, 1783:—

Gen. Washington weighed 209 lbs.
Gen. Lincoln weighed 224 lbs.
Gen. Knox weighed 280 lbs.
Colonel Henry Jackson weighed 238 lbs.
Lieut. Colonel Huntingdon weighed 232 lbs.
Lieut. Colonel Cobb weighed 182 lbs.
Lieut. Colonel Humphreys weighed 221 lbs.
Lieut. Colonel Creaton weighed 166 lbs.
Colonel Swift weighed 219 lbs.
Colonel Michael Jackson weighed 252 lbs.
Average weight 214 lbs.

VARIETY.

During this year there has been launched from the New York shipyards 88 vessels, with a total measurement of 80,130 tons; and there are now on the stocks 17,423 tonnage. At Williamsburg and Green Point the number of vessels launched and on the stocks is 49, with a tonnage of 40,075; and at Hoboken 13 vessels and 3,775 tonnage. With the exception of 1853, this has been the largest average tonnages for any preceding year.

No trait of character is more valuable in a female than the possession of a sweet temper. Home can never be made happy without it. It is like the flowers that spring up in our pathway, reviving and cheering us. Let a man go home at night wearied and worn with the toils of the day, and how soothing is a word dictated by a good disposition! It is sunshine falling on the heart. He is happy, and the cares of life are forgotten.

In Holmes' *American Annals*, under the date 1799, we read: "A telegraph on an improved plan was invented by Mr. Jonathan Grout, of Belchertown, in Massachusetts, and set up between Boston and Martha's Vineyard, places ninety miles apart, at which distance a question is asked and an answer received in less than ten minutes.

From the annual report of the Comptroller of New York, the estimated expense of the Police force of this city for the year 1855, is nearly nine hundred thousand dollars. The force comprises over a thousand officers—the Chief receiving a salary of $2,500 per annum; the captains $1,000; lieutenants $800; and privates $600.

The Catholics of Milford refused to obey the commands of their priest. The priest threatened to excommunicate them if they attended the lecture of Mr. Doheny, a Meagher man. They felt indignant, and attended the lecture. One of them, through the columns of the Milford *Journal*, denies the right of Pope or Priest to interfere in their political affairs.

A gentleman some four months since lost a pocket-book containing $275 in bills in the Morris canal at Montville, which was recovered a few days since in a brook, to which it had washed through a waste weir. About $75 were lost by the clasp of the pocket-book rusting off, but the remaining bills are in good condition.

The State of Vermont is intersected by 400 miles of railroad, which have probably cost up to the present time $24,000,000, or $50,000 a mile. Their construction has doubled within the last ten years the value of the taxable property of the State.

One of the most remarkable replies we remember ever to have heard is attributed to Mr. Oulton, the barrister. Some one in his hearing used the hackneyed sarcasm, that between the churches of England and Rome there is but a paper wall. "True," said he, "but the whole Bible is printed on it."

A young man in the employ of the Centra Railroad Co. was thrown from a hand-car near Plainfield, on Saturday, Dec. 23d, and both his legs broken—one in two places. The accident was caused by some part of his clothing being caught in the wheels.

Bayard Taylor, the traveler, says that he prefers Mexico for the beauty of its scenery, Germany for its society, California for its climate, and the United States for its government.

The losses by fire in New York city for the past year have been six millions of dollars, against one hundred and fifty thousand in Boston, which is only one-fourth the size of New York.

Among the numerous suggestions as to the future appropriation of the Crystal Palace, a writer in the *Times* proposes to turn the Palace into a market!

The Erie Railroad directors have determined to reduce the wages of their employés. A strike has occurred in consequence.

The lieutenant governors of the State of New York and Massachusetts are both practical printers and editors.

There are more than 120,000 Jews in the United States.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7 00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. Sands, retail by Rushton, Clark & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

GEOLOGY AND THE BIBLE.

Copied by request from an article by David N. Lord, editor of the Theological and Literary Journal, entitled "Genesis, and the Geological Theory of the Age of the Earth." [Continued.

He [Dr. Buckland] holds not only that all the facts which it is the province of the science to explain are to be referred to these causes, but that they are to be regarded as having been produced by an agency of essentially the same energy as that by which they are now giving birth to similar effects; as the result "of one uniform system of change in the animate and inanimate world," that has been in progress "from the remotest periods," and is to continue through all future time.—P. 188.

"The materials of this inquiry are objects and actions; the result constitutes inferences; and these are retrospective, as well as present and future. The retrospect is the material for a theory of the earth.

OBJECTS.

"The objects are the materials of the earth; the materials are rocks and fragments. Rocks and the larger fragments are composed of earths or of minerals, and of animal and vegetable matters compacted. They are compacted by *mechanical approximation*, or *by chemical action*, or by both united.

ACTIONS.

"Actions are the results of *animal and vegetable life and destruction*, of *water* and the force of *gravity*, or of *fire*. By organic production and destruction its objects become portions of the fragments, or form strata, or parts of these. By water and gravity the solid rocks are broken into fragments, and deposited on the land or beneath the water. By water animal remains are mineralized, and vegetable ones bituminized. Fire acts in volcanoes which are visible or invisible. It elevates the superincumbent materials of the earth, whether solid or otherwise.

RETROSPECT.

"The inferences from objects and actions connect the present with the past. The fragments and the solution of the former rocks and earths in former water, produced the present stratified rocks. The effects of former fire produced the unstratified rocks with the consequences attributed to them. Former races of living animals and vegetables in different waters and on different lands, produced the objects of this nature now found in rocks and fragments. The successive connexions of distinct parallelisms among the stratified rocks infer as many distinct conditions of the globe. The time requisite for the production of stratified rocks, and for the reproduction of animals and vegetables, implies long intervals between each condition.

"With respect to the future, it is inferred that the present actions are tending to produce a new condition analogous to that which is just past."—*J. McCulloch's Geol.*, vol. i. pp. 11–15.

"A practical observer . . . needs no labored argument to satisfy him that if the stratified rocks were deposited *in the manner the work is now going on, immense periods* of time were requisite. Even if he admit, what we are not disposed with some geologists to deny, that *the causes now in operatien* did formerly *act with greater energy than at present;* yet he will still see the necessity of allowing periods of time vastly extended to form the fossiliferous rocks, unless he admit without proof that the laws of nature have been changed."—*Hitchcock's Geology and Revelation*, p. 20.

Some geologists hold the necessity of regarding the rate at which those causes are now generating their several effects, as the measure of the rapidity with which they produced them at all former periods as so imperative, that to deny it were to strike from our hands all means of reasoning respecting them.

"All agree that the deposition of thick beds of limestone or clay replete with the exuviæ of successive generations of marine or terrestrial animals, interrupted too by several periods of convulsion, during which the existing races were in many cases destroyed, and new ones afterward substituted, could not have been accomplished, consistent with the *present laws of nature*, within a very short space of time. And if it be said that the processes which produced them may be imagined to have proceeded *at a more rapid rate, and in a different manner at that period*, than they do at the present, we reply that such a supposition *would strike at the root of every species of evidence;* for if the author of nature should have imparted to the constituents of the globe those characters and relations which at the present time would result from the operation of known causes continued during a period of at least a certain duration, and yet have chosen to employ other agencies, of whose character and laws we know nothing, or have accomplished the whole by the immediate fiat of his omnipotence, there then is an end to all reasoning on the subject."—*Literary Gazette*, 1834, p. 771.

They thus unite in regarding the effects which they attempt to explain as not only produced by the chemical and mechanical forces that are now giving birth to somewhat similar changes on the earth's surface, but by agencies of essentially the same energy as those which they are now exerting.

Geology has no laws, therefore, that are peculiar to itself, as the laws of optics are to light, and of gravity and motion to the phenomena of the solar system. In chemistry, experiments are made by which it is ascertained what substances have such an affinity for each other as to enter into combination; what the circumstances are in which their attractive powers act, what the proportions are in which they unite, and what the forms are which they assume. In like manner, experiments have been made with bodies dropped from a height, and projected into the atmosphere, by which it has been ascertained what the motions are of bodies in space acted on by gravity, and by gravity and a projectile force; and the laws of those motions, taken as indicating the laws of all material bodies moving in space, have been generalized and employed in the solution of the movements of the bodies of the solar system. But no analogous experiments are made in geology, by which it is ascertained from what quarter materials must be drawn to form such strata as those of which the transition carboniferous and tertiary systems consist, or what the periods are which are required for their formation. No laws, consequently, can be deduced from the strata themselves by which it can be demonstrated, that vast periods have been employed in their deposition. They present no data from which that conclusion can be scientifically deduced. If drawn at all as a logical conclusion from a premise, it must be from an assumption or hypothesis, not from an ascertained fact, or demonstrated law of such formations.

Geology, indeed, has no axioms, or generalized facts whatever, except those, first, which respect the materials of which the different strata of the earth consist; secondly, the relations which they sustain to each other, or the order in which they are superimposed; and thirdly, the agents or media through which they were formed and placed in their present positions; and *they* furnish no means of a scientific demonstration of a different and higher class of truths, such as the existence of the world through an immeasurable round of ages. The fact, for example, that the strata are often very numerous and of great thickness, that they consist of certain substances, and are arranged in a specific or uniform order, is no basis for the logical deduction of such a conclusion, just as the fact that the great pyramid of Egypt consists of a certain series of stones, of certain specific characters, and arranged in a certain order, is no logical ground for the inference that a vast series of ages was occupied in its erection—inasmuch as the time required for its formation did not depend on the magnitude of the effect, but on the measure of the forces by which it was accomplished.

It is not, therefore, a demonstrative science, in the usual sense of the term. Its facts do not furnish the media of deducing a set of general laws peculiar to itself, by which all the phenomena of which it treats can be explained. And consequently, it cannot, by possibility, furnish a scientific confutation of the Mosaic account of the creation. The fancy of such a demonstration is a mere fallacy, veiled under the forms of a philosophical induction; and stated arithmetically, is simply equivalent to the following problem in the rule of three:—As the depth of the primary strata or any one of them is to the period which was employed in its formation, so is the depth of the whole series to the periods which their deposition occupied—in which, as the second term, on which the problem turns, must be arbitrarily assumed, or guessed on only probable ground, the result, instead of being scientifically demonstrated, is necessarily a mere deduction from a conjecture, and without value.

Geology, accordingly, in place of a systematic body of truths deduced from a few primary axioms of laws, that are demonstrated by experiment, and furnish a scientific solution of all the phenomena presented by the strata of the earth, consists only of facts or truths that are ascertained by *observation*. It is no more a demonstrative science than any other branch of knowledge that is acquired solely by that method, such as the topography of countries. The investigation of the fallen capitals of Assyria, by Botta, Layard, and others, and their theories respecting their date and destruction, presents a very exact parallel to it. Instead of an affair of axioms or laws, it is simply a question of substances and their relations and conditions, that is determined by inspection. It is entitled, therefore, to the name of a science in no higher sense than that it presents a minute and accurate description of the elements of which the crust of the earth is composed, the order in which the strata are arranged, their depth and extent, and the vegetable and animal relics that are imbedded in them, and in some instances gives a probable hypothesis of the sources whence their materials were drawn, the means by which they were originally arranged horizontally, and the forces by which they have since been modified in structure, and thrown into their present conditions. To accomplish any thing beyond this, to demonstrate that the date of the creation was infinite ages ago, is wholly without its sphere. It might almost as well be assigned the task of determining any other question with which it has no logical connexion.

Another impression that needs to be corrected, to which the language and representations of writers on the subject have given birth, is, that no person can be competent to offer objections to the theories that are formed respecting it, except professed geologists themselves. An attempt by men of other other pursuits to controvert their deductions, and especially by expositors and theologians, is treated as an ill-judged and absurd intrusion into a sphere for which they can have no qualifications—as nothing else indeed than an attempt to solve the problems of one branch of knowledge by the principles of another with which it has no affinity. It is, accordingly, often met by mere appeals to prejudice, repelled with sneers as unworthy of consideration, or denounced in terms of discourtesy and passion quite inconsistent with the calmness and impartiality of philosophers who regard themselves as able to verify their doctrines by scientific processes, that have the force of unanswerable demonstration. That the works that are usually quoted as specimens of the ill-judged attempts of "the divine and man of letters" to treat of the subject, such as those of Penn, Nolon, and Cole, betray a very unfortunate inacquaintance with many of the topics which they discuss, and indulge in unjustifiable imputations on those whom they assail, we shall not deny. That they undertook a task for which they were inadequately qualified, is no ground, however, for the conclusion that no others who are not professors of the science can be warranted in discussing it. Great as their errors are, they are not greater than those into which some of the geologists of their period fell; nor do the asperities in which they indulged transcend those that have disfigured the controversies which geologists have waged with each other. The objection is absurd indeed, in the absolute form in which it is often presented, inasmuch as the question whether an argument against the geological theory is entitled to consideration or not, must depend on its character, not on the class from which it proceeds.

In the first place, this opposition to the criticism of their theory by any except of their own profession, is chargeable with much the same inconsideration and injustice which they impute to the divines who venture to arraign their doctrines at the bar of the Bible, and show that they contradict the history God has there given of the work of creation. For it certainly lies within the proper province of the sacred interpreter and theologian to ascertain what the import is of the record in Genesis, and of other parts of the sacred volume which treat of the creation, and to determine whether the dogmas of geology contravene it or not. They do not step out of their sphere in that part of their labors. It is their proper and peculiar province. They are equally in their sphere also when, on finding that the teachings of the sacred word are contradicted by the speculations of geologists, they point out the error, and defend the Bible from the inferences which might otherwise be drawn against its inspiration. It is a task to which their profession directly calls them, and which they cannot refuse to fulfill, without a gross dereliction of their office. When, therefore, their objectors charge them in doing this with transcending their proper profession, they are themselves guilty of the unfairness which they unjustly impute to them. It is the mere geologist, plainly, who quits his proper sphere, when he attempts to decide that the record of the creation in Genesis is not inconsistent with his theory of the age of the world—not the philologist and theologian who ventures to decide that it is. How is it that geologists have any higher right to determine what the meaning of the first chapter Genesis is, than divines have to pronounce on the true theory of geology? How, indeed, is it that they have an exclusive title to treat of the subject, while divines are guilty of transcending their province, when they venture to interpret and maintain what God has revealed respecting the creation? This important question seems not to have occurred to these objectors; but while in effect denying to divines the right not only to treat of geology, but even to interpret and teach the word of God, which is the peculiar business of their office, they themselves not only claim it as their special function to treat authoritatively of geology, but usurp the right also of determining the philological meaning of the inspired history of the creation, which lies out of their peculiar sphere.

This objection, then, to the interference of divines and philologists with the subject, so far as the interpretation of the first chapter of Genesis, and a protest against the theories of geology which contradict the testimony God has there given, are concerned, should be withdrawn. It is not only unauthorized and unjust, but is more obnoxious to the charge of illiberality and intolerance than the most intemperate denunciations in which "the divine and man of letters" have indulged, whom they spurn with so much contemptuousness and resentment.

In the next place, the objection indicates an unfortunate misapprehension of the premise from which geologists deduce the vast age they ascribe to the world. They proceed in it as though they were a class of direct and specific evidences of the existence of the earth through vast periods, graven, as it were, on the strata themselves, that can be learned only by inspection, in the same manner as the number, position, depth, and contents of the strata themselves are. But that is altogether mistaken. The age of the strata is not to be ascertained by the hammer or pickaxe, by chemical analysis, by touch, or by inspection. The chronology which they represent as inscribed on the rocks, instead of being wrought by the finger of the Almighty, is the work in a great measure of metaphor and fancy. The strata themselves are not, in fact, the premise from which they deduce the age they ascribe to the earth. They furnish no direct data for such a conclusion, as may be seen from the form the argument from them assumes, as in the following premise and conclusion.

The strata which have been deposited since the creation of the earth are numerous, and in many places of great depth, and are interspersed with vegetable and animal fossils, which indicate that much time was occupied in their formation. Therefore the creation itself must have taken place innumerable ages ago.

But this inference is plainly irrelevant to the premise. There is nothing in the facts stated in the proposition that can generate such a conclusion. Inasmuch as the period occupied in the deposition of the strata is not determinable from their number, depth, and contents, but depends on the species and energy of the agents by which they were formed; to treat the inference from such an irrelative premise as a truth established by scientific deduction, is an extraordinary inaccuracy. Instead of being graven in legible characters on the strata themselves, or directly deduced from the facts of geology, their alleged chronology of the world is in reality drawn from *a mere hypothesis* respecting the forces or processes by which the strata were constituted, as is seen from their argument when expressed in a syllogistic form.

Each of the several strata deposited since the creation of vegetables and animals, having been formed by essentially the same forces as are now in activity, and thence by a very slow process, must have occupied a long period.

But in many localities the series of separate beds amounts to several hundreds and even thousands.

Therefore the period which the deposition of the whole series has occupied, must be immense beyond computation—a round of innumerable years—myriads and millions of ages.

This, or an equivalent proposition, is the only one from which that conclusion can be logically deduced. It is not possible to frame a major excluding the element of time, that shall be a logical ground for the induction of such an age of the earth. But here the inference is drawn plainly, not from the number, dimensions, and contents of the strata, but from an hypothesis respecting the nature of the forces and processes by which they were formed. Take away that hypothesis, and the inference becomes, like the other, a non sequitur. But that hypothesis is not found graven on the rocks, nor is it legitimately deduced from them, as there is nothing, as we shall hereafter show, in the strata themselves that compels or authorizes the assumption that they were formed by a slow process, but instead, their structure indicates that they were deposited very rapidly, and under the agency of forces immensely more energetic than those of the fire, water, and chemistry that are now in activity.

As the inference of the age of the world which geologists dignify with the name of a scientific induction, is thus drawn from *a premise that lies out of the facts of geology*, and is a fallacy, it is plain that philologists, and "the divine, and man of letters," if logicians, are as competent to detect its deceptive character, and criticize and confute it, as though they were practical geologists. It is entirely within their sphere as reasoners. A minute inspection of the strata of the earth is not requisite to it. Though an intimate acquaintance from observation with all the great facts of the science must naturally give a more vivid apprehension and realization of them, yet it is not necessary in order to avoid the error into which geologists themselves have fallen, of confounding them with an hypothesis respecting the processes of their formation. It is not the great facts themselves of geology, let it be considered, that are in question. It is not a direct and logical deduction from those facts even. It is only a deduction from an assumption respecting *the causes* to which they owe their origin, which men "of letters" and theologians capable of distinguishing a fallacy from a legitimate induction, are as adequate to confute as those of any other profession. That this consideration, which, of itself, overturns their theory respecting the age of the world, should have been overlooked by geologists, and an objection thus confidently urged which indicates such a misapprehension of the point at issue, is truly singular, and shows that however eminent they may be in their peculiar shere, it is not the part of prudence to acquiesce in their deductions and hypotheses, without an examination of the grounds on which they rest.

But in the third place, the objection, if legitimate, is applicable in a large degree to geologists themselves, and invalidates their speculations as effectually as it can the views and reasonings respecting them, of those who are not of their profession. For what share of the facts on which geologists professedly found their theories, have they severally themselves observed? Not one probably in fifty, perhaps not in five hundred. It is physically impossible that such a writer, for example, as Sir Charles Lyell, should have personally inspected all the localities of which he treats, all the processes he describes, and all the facts which he alleges in support of his theories. Of the localities, those of South America, the islands of the Pacific and Indian Oceans, the seas, rivers, lakes, mountains, and plains of Eastern Asia, to say nothing of many others, he has never seen. Of the processes, many have extended through centuries, and could not have been inspected through their whole period by a single individual; and many of the facts had their date ages ago, and are not now within the sphere of observation. And so of other writers. Instead of relying exclusively on their own personal investigation, they avail themselves of the observations and discoveries of others, and build their speculations with as much confidence on the facts of which they thus gain a knowledge, as on those which they derive directly from their own examination. And this is as legitimate, as safe, and as indispensable, as it is in mineralogy, chemistry, geography, history, or any other branch of knowledge. It were to impeach geologists themselves of inaccuracy, and invalidate their reasonings, to suppose that the descriptions they give of the facts they have severally observed, are not intelligible and entitled to reliance. What claims can their systems have, to be regarded as scientific deductions, if the facts on which they professedly found them are of a doubtful nature, or questionable reality? They are not, however, generally obnoxious in any measure to doubt. The number of practical geologists during the last thirty years has been very large; many of the most important localities have been explored by the most competent observers, and their descriptions are distinguished in a high degree, by minuteness, intelligibleness, accuracy, and fully justify the use that is made of them by such authors as Lyell, La Beche, Murchison, Buckland, Conybeare, Phillips, McCulloch; and together with theirs, and the works of other eminent writers, furnish the most ample means to such as are not professed geologists, of an accurate knowledge of all the great facts of the science, and just judgment of the validity of the inductions that are founded on them. Were it otherwise; were a practical acquaintance with all the facts that are made the basis of theoretical geology necessary, there is not a solitary treatise on the subject, that would not be in a large measure obnoxious to the objection, and as unworthy of consideration as the counter speculations are of the mere "divine and man of letters." This objection is thus in every relation ill-considered and unfortunate.

[To be continued.

Better than Novels.—"Two years ago," says a colporteur in Tennessee, "I called at a blacksmith's shop, where I found the smith a very profane man. When I asked him if he would buy some good books, he replied with an oath, that he would like some novels. I told him that I had better books than novels, and having the Pilgrim's Progress in my hand, I told him I would make him a present of it if he would read it and stop swearing. He was astonished at the proposition, and said if I would give it to him, he would pledge his honor that he would not swear any more, or if he did that he would pay for it. Six months after, I saw him, when he told me that he had sworn one oath, and burst into tears on account of it, saying that he was a lost sinner unless he found favor with the Lord. From that time he began to seek the pardon of his sins. I met him again a month ago, when he told me that the reading of the book had been blest to him. He had professed religion, and was trying to lead a Christian life. He said he had no use for novels now, but purchased several books, among which was the Pilgrim's Progress." [Am. Mess.

From the London Athenæum.

THE JEWISH PILGRIM.

Are these the ancient holy hills
  Where angels walked of old?
Is this the land our story fills
  With glory not yet cold?
For I have past by many a shrine,
  O'er many a land and sea,
But still, O! promised Palestine,
  My dreams have been of thee.

I see thy mountain cedars green,
  Thy valleys fresh and fair,
With summers bright as they have been,
  When Israel's home was there;
Tho' o'er thee sword and time have past,
  And Cross and Crescent shone,
And heavily the chain hath prest,
  But thou art still our own!

Thine are the wandering race that go
  Unblest through every land,
Whose blood hath stained the polar snow,
  And quenched the desert sand;
And thine the homeless hearts that turn
  From all earth's shrines to thee,
With their lone faith for ages borne
  In sleepless memory.

For thrones are fallen—nations gone,
  Before the march of time,
And where the ocean rolled alone
  Are forests in their prime,
Since Gentile ploughshares marred the brow
  Of Zion's holy hill—
Where are the Roman eagles now?
  Yet Judah wanders still.

And hath she wandered thus in vain,
  A pilgrim of the past?
No! long deferred her hope hath been,
  But it shall come at last;
For in her wastes a voice I hear,
  As from some prophet's urn;
It bids the nations build not there,
  For *Jacob shall return.*

O! lost and loved Jerusalem!
  Thy pilgrim may not stay
To see the glad earth's harvest home
  In thy redeeming day;
But now resigned in faith and trust,
  I seek a nameless tomb;
At least beneath thy hallowed dust
  O give the wanderer room.

THOMAS REID, THE METAPHYSICIAN.

Dr. Thomas Reid, author of the "Inquiry into the Human Mind," was originally a clergyman, though, his talents not lying that way, he never acquired any reputation in his profession. The following anecdote of him strikingly proves the inapplicability of his powers to the pulpit, and shows how some things which we may wish forgotten, may be hereafter urged against us:

In a parish close to Old Aberdeen lived a kind of half-idiot who had an amusing memory, so that he could repeat any sermon which he heard, even after years had elapsed; and his great pleasure was in listening to sermons and repeating them. When Reid, as an elderly man, visited his old University of King's College, he heard of this man and was anxious to see him. He went accordingly with the man's laird, who introduced Reid, and requested the man to give a specimen of his powers by repeating the sermon of the preceding Sunday.

"I dinna ken," said the man, "if I can do that; but I'll tell you what I can do; I'll let ye hear the sermon that your freend here preached in our kirk many years syne. *Atweel, he was a puir hand.*" Reid did not much relish the proposal; but when he heard the man begin, and repeat correctly a sermon which he had actually preached there about twenty years before, and which was really a miserable production, he turned on his heel, without waiting for the conclusion of this remarkable proof of memory.

GRATITUDE—HOW TO INCREASE IT.

The tide of gratitude increases as it flows. When we render thanks to God for one mercy, a second presents itself to view, then a third, then others successively come to our remembrance. The goodness and the mercy of the Lord are, like the mighty deep, unfathomable. His acts of love are innumerable, and constant, therefore, should be our thanksgivings:

"My soul, in pleasing wonder lost,
  Thy various love surveys;
Where shall my grateful lips begin,
  Or where conclude Thy praise?"

Gratitude increases as we offer thanks, and mercies multiply as we contemplate them. A poor woman had fallen into a melancholy and murmuring frame of mind. She made no effort to check the temptation, but considered that she "did well to be angry" and to complain. Her minister tried every argument is his power, but to no purpose. He spoke to her of temporal and of spiritual mercies, but no response of gratitude was awakened. She said that *she* had "nothing in body or soul to be thankful for." Lifting up his heart in prayer to God for wisdom, he inquired, "Does not your neighbor's husband drink when he is out, and beat her when he comes home?"

"Yes," was the only reply.

"Does *your* husband do so to you?"

"No," was the reluctant answer."

"Well, then, should not you thank God that you have a kind husband?"

No reply was returned. The inquiry was several times repeated, till an assent was obtained. The minister said he would not leave, till she promised to thank God for this mercy, night and morning, upon her bended knees. Having at last obtained her promise, he said to her at parting, "I have now shown you one thing which you have to be thankful for, and you must keep your promise till I see you again." Intentionally delaying his return, several days elapsed before he revisited her dwelling. But what a different woman met him now.

"O," she exclaimed, "I have longed to see you; I have wished to thank you. For a morning or two, I did as I promised, but I did not rightly feel what I said. Then, one day, when I was thanking God that I had a kind husband, I thought I should thank Him that I had healthy children; and when I was thanking Him for that, I thought I should thank Him that I had bread to put into their mouths; and when I was thanking the Lord for that, I thought that I should thank Him that I had clothes to put upon their backs, and a house to cover their heads; and so, sir, when I was thanking God for one thing, another came into my head, and another still, and now I know not where to stop, or how to thank Him enough; and I feel so happy."

Thus gratitude increases with use. The more thankful we are, the more thankful we shall become, and the more we shall have to be thankful for. The truly humble, spiritual mind, will learn the lesson of thankfulness from the most common things, yea, even from the most revolting.

JOHN WESLEY'S OLD AGE.

There is no sight more refreshing and instructive than a cheerful, active old man. Let us look in upon Wesley in his hale old age.

The excellent Alexander Knox met him a few years before his death, and declared that every hour spent in his company afforded him fresh reason for esteem and veneration.

"So fine an old man I never saw. The happiness of his mind beamed forth in his countenance; every look showed how fully he enjoyed

'The gay remembrance of a life well spent.'

In him, old age appeared delightful, like an evening without a cloud."

It would not have been difficult to identify that old man anywhere, whether in London, or any of the cities of his sojourn, or in his travels. Few, however, would have judged him to be what he was, from his external appearance merely. Little of the daring innovator was there in his mien. In some distant part of England you might have seen a man pursuing his journey resolutely on horseback, and showing by the book in his hand that he grudged to lose a single moment of time. You might have seen the same man walking with firm step through some town or village, giving proof in every motion that he had work to do. His stature was under the middle size, his habit of body thin, but compact. A clear, smooth forehead, and aquiline nose, an eye of piercing brightness, a complexion of perfect healthfulness, distinguished him among all others. Even his dress was characteristic—the perfection of neatness and simplicity, perhaps with a little touch of primness; a narrow plaited stock; a coat with a small upright collar—his clothes without any of the usual ornaments of silk or velvet—combined with a head white as snow to give the idea of a man of peculiar primitive character.

One book he always carried with him in his journeys beside the Bible. It is his diary. Would we learn what view of life the old man takes, we can seem to look over his shoulder on his eighty-sixth birth-day, and read what he has written. June 18th, 1788, he writes:—

"I this day enter on my eighty-sixth year. And what cause have I to praise God, as for a thousand spiritual blessings, so for a thousand bodily blessings also? How little have I suffered yet from the rush of numerous years!"

After mentioning a few marks on the infirmities of age, he declares that he feels no such thing as weariness either in traveling or preaching.

"And I am not conscious of any decay in writing sermons, which I do as readily, and I believe as correctly, as ever.

To what cause can I impute this, that I am as I am? First, doubtless, to the power of God fitting me for the work to which I am called, as long as he pleases to continue me therein; and next, subordinately to this, to the prayers of His children.

May I not impute it as inferior means—first, to my constant exercise and change of air. 2. To my never having lost a night's sleep, sick or well, either on land or at sea, since I was born. 3. To my having sleep at command, so that whenever I feel myself almost worn out, I call it, and it comes, day or night. 4. To my having constantly, for about sixty years, risen about four in the morning. 5. To my constant preaching at five in the morning, for about fifty years. 6. To my having so little sorrow or anxious care.

Even now, though I find pain daily in my eye, or temple, or arm, yet it is never violent, and seldom lasts five minutes at a time. Whether or not this is sent to give me warning that I am shortly to leave this tabernacle, I do not know; but it is one way or the other. I have only to say—

My remnant of days
  I spend to his praise
Who died the whole world to redeem;
  Be they many or few,
  My days are his due,
And they are all devoted to Him."

So it proved three years afterwards. In 1791, March 2d, he breathed his last, with a hymn of praise on his lips. With the little strength remaining, he called out to his friends who were watching his departure, "The best of all is, God is with us;" and could only whisper the first two words of a favorite psalm, "I'll praise, I'll praise —." His friends were left to finish the lines, for Wesley's voice was to be heard no more.

[Rev. Samuel Osgood.

Anecdote.—It is often made a subject of complaint that ministers of the Gospel participate in political matters. An anecdote of a Rev. Mr. Field, who lived in Vermont several years ago, contains a good reply. As the reverend gentleman went, at a time, to deposit his vote, the officer who received it, being a friend and parishioner, but of opposite politics, remarked: "I am sorry, Mr. Field, to see you here." "Why?" asked Mr. F. "Because," said the officer, "Christ said that his kingdom was not of this world." "Has no one a right to vote," asked Mr. F., "unless he belongs to the kingdom of Satan?"

The Sabbath Recorder.

BILLS.—We are now sending bills to those who owe for the Sabbath Recorder. Although these bills are mostly for small amounts, yet in the aggregate they make a large sum, the want of which is seriously felt by the establishment. A prompt and general response to the call for what is due us, would be a most welcome relief.

DISCOURAGEMENTS TO MINISTERS.

We alluded, last week, to the discouragement given to ministers in our denomination by the insufficiency of their compensation, and showed that it operated to deter those of other denominations from entering our fellowship, as well as to prevent promising young men of our own from engaging in the work. Because ministers are influenced, in any degree, by such things, the over-zealous among us denounce them with severity, as being men who are not willing to sacrifice every thing for Christ. We have no wish, certainly, to uphold ministers in a temporizing spirit, nor do we suppose that such a spirit is at all justified by the gospel. They *ought*, most unquestionably, to embrace and preach the whole truth, at whatever cost. Still, it should be remembered, that ministers are but men; and though they may be supposed, from their profession, to be men of piety, their piety is like that of all the rest of God's children—it has its infancy as well as maturity. And though the requisition of God's word is, that men renounce father and mother, wife and children, houses and lands, and even their own lives, for the gospel's sake; and though this requisition is laid upon them from the very beginning of their discipleship; yet it is not in accordance with the usual method of His providence to lead them through such severity of discipline, while their piety is yet in its infancy. It is true, we walk by faith, not by sight; but, as some old writer quaintly observes, we do, at first, need the crutch of sense to help us along, and it is not till after we are well matured, that we can cast this crutch entirely away. Even ministers are not generally so matured in piety, as to have no sort of regard whatever to the comforts of life. They, too, want the crutch for a while; and though it may be God's purpose to take it from them eventually—that is, when they become strong enough to walk without it—we are not to denounce them as unworthy, because they have not yet attained that state.

Now, for us to say that we will have no ministers except those whose piety is so completely matured that they are ready for the severest trials, is, to say the least, a very questionable policy. Yet we do say it, practically, when we offer them such fare as imposes these trials upon them. If we can hold out nothing of an inviting nature—nothing that promises any comfort to the flesh—nothing but poverty and perplexity, and perhaps ill usage too, is it not saying to the weaker portion of them, We do not want you? Certainly, it is.

Among all whom God has called to serve Him in the ministry, there are comparatively few, perhaps, so strong in the faith, that they will at once, as soon as duty is made known to them, imitate Paul, and other men of extraordinary piety, in their sacrifices for it. Nevertheless there are many whose piety is genuine, and who will, under the discipline to which their Heavenly Father subjects them, eventually attain to all that can be asked or desired. They are men who love the cause of truth, notwithstanding all their seeming inconsistencies. They are men who are disposed to work diligently in the vineyard of the Lord. They have some eye to the comforts of this life, it is true; perhaps these have more influence with them than, according to the strictness of the gospel, they ought to. Still, they are men whom the Master has called.

As we have said before, so we say again; we believe we have lost some valuable men, because we were not in a condition to offer them any other condition of life but one calling for such sacrifices as they were not yet prepared to undergo. Ministers should be placed above want, so far as it is possible for the churches to place them in such a condition. They have discouragements enough without having that of poverty to grapple with. And if those who, in the opinion of our over-zealous brethren, evince too much of a disposition to shrink from trials, were taken by the hand, soothed, encouraged, and enabled by the liberality of our people to withstand them, we believe they would eventually attain to as much of a self-sacrificing spirit as the best of us, and in the mean time be accomplishing much good. T. B. B.

RECENT DEATHS.—English papers announce the death of three distinguished men, whose liberal principles made them objects of interest in this country. One is Lord Dudley Stuart, the friend of Poland, and the patron of her exiled sons. He may be said to have died in the service of Poland. His Lordship though in somewhat feeble health, went to Sweden three months ago, and had a long audience with the King at Stockholm. He was taken ill with typhoid cholera on the 17th of October, from which he appeared to have recovered; but on the 11th December he was attacked by inflammation of the lungs, and died on the evening of the 17th. Another is Frederick Knight Hunt, the principal editor of the London *Daily News*, the leading liberal paper of Europe. The third is Prof. Edward Forbes, late of King's College, London, well known by his valuable contributions to science, and particularly to geology.

GAMBLING, LOTTERIES, AND "GIFT ENTERPRISES."

Webster's definition of gambling is, "Gaming for money." He also defines game, "An exercise or play for amusement or winning a stake." Staking, by the same authority, is "putting at hazard;" and to hazard is to expose to chance; to venture. In a more comprehensive sense, then, gambling may be defined thus: Risking or staking money, or any other consideration possessing value, upon the result of a game, or any occurrence involving contingency or chance, with the expectation of gain, and the full understanding that the gain of one party to the concern must depend upon the loss of another.

Of the radical wrong of such a practice, there can be no reasonable ground of doubt; because it is a virtual repudiation of the inexorable law of morality, which makes productive or useful labor the condition of honest gain; and the extent of one's devotion to the practice, is a true index to the height of his quarrel with that ancient and wholesome declaration, "In the sweat of thy face shalt thou eat bread." The wrong of such a course of life may also be clearly seen in its effect upon the moral condition of those who follow it. The ripe scholar in the "profession" is abundantly prepared for the commission of the most revolting crime. The evils of the system have become so serious and menacing, that laws more or less stringent have been enacted to suppress it. It requires a very low grade of character to undertake its open defense, yet many better people, and even Christians, are witnesses of its incipient development without feeling any sense of alarm.

A lottery is "a scheme for the distribution of prizes by chance." The plan runs thus: A certain number of tickets are struck, and a price fixed upon them. The sale of these tickets is effected by publishing a list of prizes which each one will entitle the holder to stand a chance for drawing. Though a few of these prizes are of sufficient value to create a fever for the *chance* of drawing them, thus making a ready sale for the tickets, they amount in the aggregate to a small proportion of the sum realized from the sale. When every thing is ready, the drawing takes place; and when it is over, the principal part of the money is pocketed by the proprietors; a few lucky or favorite ticket holders have drawn the balance; and the main body of those who have contributed to the fund, furnish an apt illustration of the old adage, "A fool and his money are soon parted."

It requires no remarkable acuteness to see, that the vital principle of this system, and that of the most barefaced gambling, are identical, and their moral tendency the same. Wherever the standard of morality has reached a sufficient elevation, it has been appropriately classed with other public nuisances, and laws enacted for its abatement. Under the broad light which has revealed its loathsome character, the Christian, especially, should blush with shame at the thought of giving it support or countenance. But since legislative enactment has joined the increasing light of morality in setting the stamp of infamy upon *this*, as upon other forms of gambling, an effort is made to clear the custom-house of both, with this contraband article on board, under the very harmless label of "Gift Enterprise."

The following is the *modus operandi* of this game: The fund is raised by the sale of a newspaper, an engraving, or some other article, at a price beyond its actual cost, sufficient to satisfy the avarice of the proprietors, besides a portion appropriated to "gifts." These "gifts" are equal in number with the articles sold; and a very few of them are valuable in proportion to the magnitude of the enterprise; the remainder being a mere trifle. Each purchaser of an engraving, a year's subscription to the paper, or whatever the commodity may be, receives it, accompanied with a *ticket* which will insure a gift, and *may be* a very valuable one. Thus, in the specious pretense of raising the fund by the sale of something supposed to possess value, and in the matter of insuring a nominal "gift" for every ticket, and, perhaps, in some other trifling points, this plan differs from a lottery; but the principle is the same. Explain it, and excuse it, and christen it as you may, and the principle of gambling is there.

These operations, varying in magnitude from the petty scheme of the country daguerrean to the "Mammoth Gift Enterprise" of the New York Weekly Leader, whether they come under the laws for the suppression of gambling and lotteries or not, are constantly multiplying, and seem to proceed with impunity; blowing out their pestiferons breath through almost every post office in the country, in the form of flaming advertisements and hand-bills. Some, and perhaps many, who would shudder at the idea of gambling, and even professors of religion and church members, have, no doubt, been so far blinded by the very modest name and drapery under which this abomination has been concealed, as to become party to it. Young men in particular are liable to be caught with this enticing bait, as "the small sum of two dollars will not only pay for a whole volume of a newspaper," (which, perhaps, is not fit to have in a family,) "but a *chance*" among hundreds of thousands, "to draw a splendid 'gift;' perhaps a house and lot in New York city *valued* at $12,000."

It is high time for the friends of a pure morality, and especially for those of religion, and for the religious press, to speak out upon this subject, raising a note of warning that shall break the spell of this enchanter, and arouse the unwary to the danger of its polluting touch. T. E. B.

"CONFLICT OF AGES"—NO. 5.

"The Misadjustment."

The science of geometry demonstrates that should two parallel lines commence a divergency, however small, yet if they are continued, such divergency becomes unmeasurable. The same principle may be applied to ethical science. It matters not how minute the deviation from the path of rectitude at first be, if such deviation be continued, an almost infinite departure from truth will one day be obtained. Thus, that apparently trivial moral divergency of pristine man, has resulted in a distance from the parallel of truth almost equaling the infinitude of space.

The fatal "misadjustment" of Christianity, Mr. Beecher considers involved in the simple and plausible assumption, *"that men, as they come into this world, are new-created beings, instead of new-born beings."* Mr. B. thinks that creation and birth impose very different circumstances on the creature—the first admitting a fair probationary state, while the last cannot. Therefore, as justice and right demand such a fair probationary state, he finds that *new-born* beings cannot enjoy what justice and right demand. "The doctrine of a forfeiture of right by the imputation of Adam's sin," Mr. B. thinks, "can never escape the charge of involving, not merely injustice, but falsehood also;" and that "free agency is of necessity so imperfect as to involve such atrocious developments as those which make up the history of this world, is at war with well-known facts." Mr. B. thinks the whole conflict arises from the assumption that men, as they come into the world, are *new-created* (instead of new-born) beings, and that the "principle of honor and right relates *solely* to new-created beings" but not to *new-born* beings.

The conflict deepens. Justice, honor, and right, demand for all men a fair trial; and all new-born being involves such circumstances as absolutely forbid it. This is what Mr. B. calls the "misadjustment" of Christianity—a theory implicating the Creator, and ruinous to the creature. Hence Mr. B. sets himself to work and produces his somewhat novel *Readjustment*.

By his plan of "readjustment," Mr. B. supposes that "the advocates of the deepest views of human depravity can hold their views, and yet not war with the principles of honor and right, and that the advocates of honor and right can retain them in full, and yet not conflict with the facts of human depravity and ruin."

Mr. Beecher's readjustment of Christianity seems to involve, if not identify, the Platonic philosophy of psychology, viz., "that the soul of man was derived by emanation from God; but that this emanation was not immediate, but through the intervention of the soul of the world—that the relation which the human soul, in its original constitution, bears to matter, is the source of moral evil—that when God formed the universe, he separated from the soul of the world inferior souls, equal in number to the stars, and assigned to each their proper celestial abode—that these souls were sent down to earth, to be imprisoned in mortal bodies, hence arose the depravity and misery to which human nature is liable—that the soul is immortal, and by disengaging itself from all animal passions, and rising above sensible objects, to the contemplation of the world of intelligence, it may be prepared to return to its original habitation." Plato lived some four hundred years before the Christian era.

Mr. B. supposes all souls to have been created spiritual beings, in the spiritual world, with full and perfect capabilities of understanding and obeying those divine laws under which they were placed—that a part of these spritual intelligences preserved their original uprightness by obedience, and for such obedience were confirmed in a state of perfect innocence and happiness—that another portion of these spiritual intelligences disobeyed the commands of their Creator, and for such disobedience were doomed to descend into mortal bodies, both as a punishment, and also as affording the only way by which any of them could ever be restored or saved. Hence the creation of a material earth, corresponding to the nature of such fallen spirits, on which mortal bodies could dwell, and in which mortal bodies these fallen spirits should be forced to dwell, as in part expiatory, and in part as affording the only means of salvation. Hence all the salvable arrangements of the incarnation, Holy Spirit, means of grace all for the purpose of saving some few at least of those fallen beings, and raising them up to glory in the heavenly state; whilst the rest, who were not reclaimed by this process of spiritual incarnation, are to be doomed to the endless turmoil of perdition.

Such, I think, is the theory of Mr. B. It will be seen, that it differs but little from the system as taught by Plato, a heathen philosopher, some four centuries before Christ. *Origen*, one of the fathers of the Christian church, who was born in the year 145 after Christ, held also to the pre-existence of human souls; also, that such souls were condemned to animate mortal bodies in order to expiate faults they had committed in a pre-existent state; and that after long periods of time the damned shall be released from their torments, and restored to a new state of probation; and so on until the universe will be purged from sin, and universal holiness and happiness prevail. Thus, as early as the second century one of the greatest of the Christian fathers and writers held the final restoration of all human and spiritual intelligences. It will be perceived, that Mr. Beecher's theory is not a modern notion, but that it is older even than Christianity itself, which he aims at readjusting. Mr. B. claims the great Augustine as virtually holding his view of pre-existence, as well as some others. By Mr. B.'s theory, we who have thought ourselves as real human beings, commencing existence at our birth, are in fact those fallen spirits. Thus Satan, Beelzebub, Moloch, Chemosh, Balaam, Astaroth, Astarte, Thammuz, Dagon Rimmon, Osiris, Isis, Orus, have all had their dwelling (or are to have) in human bodies. Milton surely deserves our thanks for his nomenclature and classification of them ere their descent. But which of those arch-apostates dwells in me, I must leave for others to judge. I only can say, that although he was of small mental calibre, yet he was a Titan, if not a Gargon, in innate depravity and deformity.

S. S. GRISWOLD.

"CONFLICT OF AGES."—In reply to all letters directed to me, making inquiry relative to the above book, I would say, that I doubt not that Bro. Utter will procure and forward the book to all who may request him thus to do. I am glad to learn that the selections published in the *Recorder* have excited an inquiry in the minds of many. Should they be the means of disenthralling one honest soul from a false theology, I shall feel abundantly rewarded for my trouble. Prove all things; hold fast the good. S. S. G.

CENTRAL ASSOCIATION MATTERS.

To the Editors of the Sabbath Recorder:—

As we hope soon to permit you to distribute the above head, I will request you at least once more to insert an article under it, designed to remedy the evils which have grown out of the frequent use made of it; as to these articles must be attributed in part the failure of a large number of the Council appointed by the Association to appear, though it is true that the directions or instructions of the associational act were necessarily but partial, owing to the circumstances in the case. The difficulties presented by Bro. Potter, in giving the reason for his non-attendance, doubtless more or less affected the minds of every member. Still, it was supposed by some, that a basis for action would be settled without serious difficulty.

The disappointment experienced by the brethren of Jefferson County, was apparent and general, as well as of those in attendance; and the desire was every where expressed, that there night be no obstacle to their meeting and attempting the duties assigned them at some future time; to facilitate which, the Church of Adams have adopted a basis for the action of the Council, in which the Hounsfield church will concur, as I am confidently assured, and with which the aggrieved or independent church will be satisfied; and I am authorized to say no obstacle will be interposed to a just and satisfactory investigation by any *plea* which has been or may be made before the Council by the Hounsfield brethren.

With these assurances, I have accepted the duty of laying their *Resolution* before the public, and especially for the attention of the members of the Council appointed, and request their consent to meet the churches at the time they have designated, and communicate their assent to me, at DeRuyter, that the parties may also be timely apprised. To this I will also add, that notwithstanding the accusations and recriminations which have been so current, there are many valuable brethren affected, who must suffer grievous wrongs, and in which their posterity will be affected, and the prosperity of the churches measurably destroyed, unless relieved by this Council, as it is improbable one so generally satisfactory will again be selected, if indeed any. Yours Truly,

JOHN MAXSON.

DERUYTER, N. Y., Jan. 9, 1855.

Whereas, the Seventh-day Baptist church of Adams is now suffering under charges seriously affecting its reputation as a Christian church, and as these charges have received so much of the attention of the Central Association as to induce the appointment of a Council to endeavor to make a settlement of the difficulties which have for some time afflicted the brethren of Jefferson County, in which this church is implicated; and whereas, the time appointed for session of said Council has transpired, and they have not appeared, and the causes which induced their appointment still exist, greatly to the annoyance of our peace, and to some extent affecting our prosperity and the harmony of this church with the churches of the Association; therefore, *Resolved*, That we request the Council designated to meet with this church on the second Fourth-day of February next, and investigate the acts and proceedings of this church—allowing the church to join the issue with any member of the Central Association in any charges such member may present affecting the purity of its acts and discipline, agreeably to the rules of the Gospel and of the Central Association; and we will aid and co-operate with said Council in prosecuting such investigation, and will submit to their advice and counsel in endeavoring to effect a satisfactory adjustment or settlement of any difficulty existing between this church and any person or persons justly aggrieved; and we will pay our proportional part of the expense.

Adopted unanimously by the Seventh-day Baptist church of Adams, Jan. 7th, 1855.

A. M. WHITFORD, Clerk.

From the fourteen Slave States, including the District of Columbia, the American Board of Commissioners for Foreign Missions last year received $8,121 63. From Hampshire County, Mass., the same Board received $6,219 40. Comment is unnecessary.

SUNDAY LIQUOR-SELLING.—New York city has a new Mayor, who is illustrating the old maxim that a new broom sweeps clean. Soon after his inauguration, Mayor Wood opened a book for complaints of all kinds, requiring his attention, or that of the police. He also gave notice, that the law against selling liquor on Sunday would be strictly enforced. Thus far he seems to keep pretty close to his promises, encouraging the hope that New York will soon cease to be, the scene of drunkenness on Sunday. If Mayor Wood should succeed in closing all of the rum-shops on Sunday, he will doubtless contribute not a little to the enactment of a law to close them on the other days of the week. With this prospect before us, we are glad to see the success which attends his efforts.

PRACTICAL PHILANTHROPHY.—Among the numberless exertions for the relief of the poor this winter, the *Independent* notices with approbation those of citizen Lindenmuller, No. 118 Chatham street. This true philanthropist dealt out in one day more than a thousand portions of soup, bread, etc., to all colors, nations, and tongues. He says, "The only question I ask is, 'Are you hungry? Are you poor?' I put my hand on my heart and say, Is he my fellow-creature? Yes. No matter for the color of his skin; I do not care what is his language, or what is his religion; he is human; he is hungry; I will feed him."

On inquiring of one little boy, with a very dirty face, he was told that the boy's mother was a washerwoman. "Go home, my boy," said he, "and tell her to wash your face and hands, and then come and get your dinner. I will feed the poor; I will not feed the dirty; water is free and plenty for the poor."

On serving out the last ration he remarked: "If I had more means, all this waiting crowd should be feed—none should go hungry from my door."

Another of Mr. Lindenmuller's projects is to sell the poor articles of food without profit. Bread at 4c. a pound; flour 5c.; meat 2½c.; salt 1c., etc.

MORE TROUBLE AT ERIE, PA.—The papers inform us that an assemblage claiming to be authorized by the Borough of Erie, Pa., have broken up the track of the Erie and North-East Railroad Company, where it crosses certain streets in that borough; while another assemblage, claiming to be somehow authorized by the local authorities of the township of Harbor Creek, (eight miles this side of Erie,) have torn up the rails and ploughed up the track of the same Railroad where it crosses a road in that township. The Erie and North East Road, though of itself but twenty miles in length, forms a part of the Lake Shore Road from Buffalo and Dunkirk to Cleveland, Toledo, and Cincinnati—in other words, connecting New York and New England with Ohio and the Far West. These two separate acts of destruction cause an interruption of eight miles in the chain of Railroad communication aforesaid, compelling the numerous passengers on that route, with the heavy mails, and the long trains of cattle, swine, &c., to be turned out of the cars at one end of the break, and conveyed by wagons or driven to the other, there to be reloaded and sent on their journey, after incurring serious delay, exposure and suffering.

MONUMENT TO THE MURDERED BUTLER.—The citizens of Louisville have erected a monument to W. H. G. Butler, the teacher shot by Matt. Ward. It is an elegant piece of workmanship, built of Italian marble, and about ten feet in height. The inscriptions on its sides are as follows:—

"Wm. H. G. Butler, born in Jefferson Co., Indiana, Oct. 3d, 1825; died at Louisville, Ky., Nov. 2d, 1853."

On the reverse:

"A man without fear and without reproach; of gentle and retiring disposition; of clear and vigorous mind; an accomplished scholar; a devoted and successful teacher; a meek and humble Christian."

On the north side:

"He fell by the hand of violence in the presence of his loving pupils—a martyr to his fidelity in the discharge of duty."

On the south side:

"This monument is erected by his pupils and a bereaved community, to show their appreciation of his worth, and to perpetuate their horror at his murder."

AMENDING THE CONSTITUTION.—A resolution to amend the Constitution of the State of New York was offered in the Assembly, and laid over under the rule. It is as follows:—

"That the following amendment to the first section of article second of the Constitution of the State of New York be proposed, by striking out the first sentence of said section, comprising the following words: 'Every male citizen of the age of 21 years,' and inserting as follows, in place thereof: 'Every male of the age of 21 years, who shall have been born a citizen of the United States of America, or who shall have been a resident of the United States of America for the full term of 21 years.'"

Amending the Constitution is rather a slow process now-a-days. In order to do so, the amendment must pass each house by a majority of all the members elected, then lie over until the next Legislature to which Senators are elected, pass each house of the new Legislature by a majority in each, and then be submitted to the people, when, if it gets a majority of the votes cast, it becomes a part of the Constitution. Thus from three to four years will elapse from the proposition to the consummation. [Tribune.

A LUCKY NEGRO.—Gabriel L. M. Renfran, said to be a bright intelligent negro, owned near New Orleans, and hired out by his master as a steward on steamboats on the Lower Missisippi, is the lucky holder of ticket No. — in Jones's great gift enterprise, and has drawn the *farm* valued at $25,000. He has, in a well-written letter, notified the committee of his condition, and accepting of their cash offer. He requests them, personally, to secure the freedom of himself and family first, and then pay him the balance over the expenses to start him in the world. The appeal is thrilling and affecting.

RELIGIOUS INTELLIGENCE.

The annual renting of pews in the Plymouth Church, Brooklyn, (Rev. Henry Ward Beecher, pastor,) occurred on Tuesday evening, and with success which forbids even the mention of a tight money-market. 178 seats were taken at a premium (for only one year) of $1,343 50. The amount of pews rented, premiums included, was something over $10,000. There are about 120 seats in the back part of the house, and in the gallery, yet unrented, which, if taken as they always have been, will yield a total revenue of about $13,000.

The Hon. Wm. Rufus Putnam, of Marietta, Ohio, died on Monday, Jan. 1, aged 88 years. He was the son of Gen. Rufus Putnam, who established the first permanent white settlement north-west of the Ohio in 1788. The deceased settled in Marietta in the fall of 1790, and has since continued to reside there. In 1801 he was elected one of the Representatives from Washington county, (then embracing nearly one-fourth of the present State,) to the Territorial Legislature. He filled the measure of an honest, useful man, and died respected by all who knew him.

We have received the catalogue of the Union Theological Seminary, N. Y. City. It shows in the Senior class 26 students, in the Middle 32, and in the Junior 38, making in all 96; also, resident licentiates 2. Three are from the old world, two being from Turkey, and the other from Greece. A Choctaw, also, is numbered among them. The New England States furnish 18 students, New York 44, and the States west and south of New York 31.

The English Church Missionary Society, it is said, has an annual income of £120,000, or about half a million of dollars. Its mission agents now include about 290 Europeans, exclusive of their wives, spread over its stations, north, south, east and west, all over the heathen world; its native-born catechists amount to 1,000; its communicants number near 16,000, and its scholars near 50,000.

According to the New Hampshire Register for 1855, there are in that State 563 ministers connected with the different denominations, as follows: Roman Catholic 1, Presbyterian 6, Episcopalian 9, Unitarian 11, Universalist 25, Christian 44, Baptist 76, Methodist 105, Freewill Baptist 106, and Orthodox Congregationalist 180. All but 45 of this number are marked as having a pastoral charge. These statistics will give one minister to about every 6,000 of the population.

The N. Y. *Recorder* says that there has been quite a good work of grace in some of the Canadian churches. At Bloomsburg, Elder Stothart has recently baptized thirty. At Forestsville, where Elders M'Dorman and Williams have been laboring for a few days past with good success, eighteen have been added by baptism. In First Houghton Church, six have been received by baptism; and there is a good prospect in old Townsend.

The Louisville *Herald* states that the collections of the Old School Presbyterian Board are fearfully small, and that almost every church visited by the agents is trying to put them off, and when collections are made, they fall below those of previous years. These are sad betokenings for the missionaries, for the feeble churches, and, more than all, for the churches that the Lord hath blessed with comparative abundance.

The sum of $50,000 is now being raised to endow the Episcopal Theological School of Virginia. The institution has given a Bishop to the Diocese of Louisiana, and missionary Bishops to China and Africa, has furnished clergymen for every Diocese in the Union, and has sent forth all the American Episcopal missionaries now in foreign lands.

We have received a call (says the Boston *Telegraph*) from a gentleman who has just arrived from Lawrence, Kansas Territory. He says the settlers at that place are comfortable, contented and happy. Three papers are soon to be established there, all of which will go for making the State free from slavery. Gov. Reeder is popular with the anti-slavery people.

Rev. J. H. Snow was dismissed from the pastoral charge of the Congregational Church and Society at South Hadley Falls, by an ecclesiastical council, on the 15th Dec. He received from his people, as a parting gift, a kind note, with expressions of regard and remembrance, enclosing the sum of $225. The young ladies' circle also presented him $100.

$250,000 have been received by the Collegiate and Theological Society of the West, since its organization, eleven years ago, exclusively from the East, and a still larger amount has been raised at the West. It has been the means of bringing eleven very important institutions of learning from a state of feebleness and despair to that of vigor and permanence.

Dr. Potter, the Provisional Bishop of the diocese of New York, has requested that his salary may be five thousand dollars a year, and not six thousand, as voted by the Convention. He thinks the former sum quite enough for his necessities, and he is not willing to accept more.

Judge Helfenstein's Donation is really the donation of the age. The coal estates donated, on the 22d inst., at Shamokin, by Judge Helfenstein, for the benefit of the destitute poor of New York, Philadelphia, Baltimore, etc., are said to be worth one million and a half of dollars; and, when fully developed, will pay a rental greater than the interest on that amount.

We regret to record the death of Rev. Dr. Kitto, widely known and esteemed as the editor of the "Pictorial Bible" and author of numerous works in illustration of the sacred text. Dr. Kitto died at Canstadt, near Stuttgard, on the 25th Nov., in the 51st year of his age.

The annual catalogue of the Theological Seminary at Andover for 1855, contains a list of 110 students, viz. 9 resident licentiates; Senior class, 39; Middle class, 35; Junior class, 31.

A letter to Dr. Durbin states, that all the missionaries connected with the Methodist Episcopal Church in China will probably withdraw from the empire by the close of the present year.

The tearing up of railroad tracks near Erie, Pa., is now an established winter pastime. Great fun was had Jan. 8th, at Harbor Creek, where a portion of the Lake Shore Road was destroyed.

187746770884736

General Intelligence.

Abstract of Proceedings in Congress.

THIRD-DAY, JAN. 9.

In the Senate, the business was unimportant. The Old Soldiers were invited to occupy floor-seats in the Senate. A bill for the construction of the Pacific Railroad and Telegraph was presented. The bill to reorganize the army was reported, with amendments. The Judiciary Reform was then discussed until adjournment.

In the House of Representatives, the morning hour was used up in discussion upon the bill to amend the Graduation Act. The amendment, charging 14 1-2 cents per acre, was before the House, but no vote was taken upon it. The Pacific Railroad bill was taken up in Committee. Mr. Latham spoke in favor of lines of Mail Steamers to Asia, and of the Railroad itself. He occupied the time until adjournment.

FOURTH-DAY, JAN. 10.

In the Senate, among the petitions presented, was one to improve Savannah Harbor, and one to provide against the difficulties arising from the abolition of flogging at sea. Notice was given of a joint resolution to send one or more vessels to the relief of the Kane Expedition. Debate on the Judiciary bill, and an Executive Session, closed the day's business.

In the House, the bill amendatory of the Land Graduation act, was announced as first in order, to which was pending the amendment giving a homestead—160 acres, at 14 1-2 cents per acre—on condition of actual settlement and cultivation. A sharp discussion ensued, and, finally, the amendment went overboard by a vote of 72 to 93, and the bill itself followed—68 to 95. The Homestead bill then came up as amended by the Senate, but nothing was done with it.

FIFTH-DAY, JAN. 11.

In the Senate, the first business of importance was the bill to increase the pay of Members of Congress, upon which an hour was spent in speeches, but without coming to a vote. The Judicial Reform bill was then taken up and talked about until the hour for *Executive Session.*

In the House, the bill to reform the Diplomatic and Consular System was introduced. The Pacific Railroad bill was next taken up, when Mr. Chandler, of Philadelphia, made a set speech against Know Nothingism. Mr. Chandler is a Roman Catholic.

SIXTH-DAY, JAN. 12.

In consequence of the death of Senator Norris, nothing was done in either House beyond the customary preparations for the funeral. Both bodies adjourned to Second-day.

European News.

The week later news from Europe, being to Dec. 30th, was received in New York on the 11th inst.

One event of the week is the speech of the Emperor of France, which makes no allusion to any prospect of peace, and is followed up by a loan of five hundred millions of francs. There has been an important diplomatic conference at Vienna. The bill for the enlistment of foreigners into the British service is passed into law.

Affairs around Sevastopol remain unchanged. There has been some skirmishing, but no general fighting. Meanwhile the soldiers of all parties are suffering sadly from the bad weather and the advance of the season.

A letter from Sevastopol, dated Dec. 7th, says: Out here we are perpetually being told by the London journals that Sevastopol is in ruins, its streets choked with dead, and the few wretched inhabitants and defenders that yet survive falling, by hundreds, a prey to war, pestilence and famine. Now, there is not one particle of truth to justify these extreme statements. Sevastopol is *not* in ruins; and, what is more important still, its defenses are four times stronger and more vigorous than the first day we opened fire.

Another letter, about the same date, says: The mortality among the Turks has now assumed all the dimensions of a plague. Every sense was offended and shocked by the display, day after day, in the streets, of processions of men bearing half-covered corpses on litters at the busiest hour of the day, and Col. Daveney at last gave orders, or rather granted permission, that the Turks should bury their dead on the hill-side, over the town. Yesterday, ere evening, upward of seventy bodies were carried to their long home, and deposited in shallow graves not above a few inches deep, and were left with a shovelful or two of earth and pebbles over them, as close together as they could be packed. To-day the same process is going on. The dead are frightful to look upon—emaciated to the last degree, with faces and heads swollen and discolored, and drops of blood stealing down from nose and ear; there they are, lying out in ranks on the hill-side, while the living, who seem soon about to follow them, dig their graves. I can count 35 bodies already on the ground, and it is early in the day; over the hill-side come men bearing more litters. Ere the body is interred, the clothes are taken off and laid at one side, an officer in attendance decently washes the corpse with water, pours a little of the same fluid down the throat, and composes the limbs, and, after a few words of prayer, the Mussulman is placed beside his fellows. As the result of such a mode of burial would be the outbreak of some all-destroying pestilence, the commandant of the place has ordered it to be discontinued, and the Turks must bury their dead outside the town, in the valley, in graves four feet deep.

Some idea of the suffering to which the poor soldiers around Sevastopol are subjected, may be gathered from the following extract of a letter dated Nov. 30th:—

The siege is still dragging its slow length along; but, as far as I can see, without any prospect of immediate success. The weather has been very bad—nearly constant rain—and the roads are in such a dreadful state that it is impossible even to bring up provisions from Balaklava, much less guns; all ours in the batteries are dismounted or burst, and I do not think we have twenty in a serviceable condition. I was in the trenches the day before yesterday, for day-work. We parade at a quarter to five and come off at seven; for night-work, we parade at a quarter to five, and come off at seven in the morning. We parade in the camps, and march down a mile and a half through a ravine, till we get under the trenches. The road down is above the ancles in mud and wet, and we are always wet in the feet before we get there. The trenches are in a very bad condition; no attempt at draining, and the men have to sit up twelve hours in the wet. It is really shocking work for both men and officers. They get wet through, have no dry things to put on; the tents leak, and they lie down in mud. The cholera has broken out again very badly; 33 of our men have died these last three days, and they are carrying to the hospital fast. Most of them, indeed all, are those we brought out with us in the draught. It seems quite like murder sending fresh troops out to this climate at this time of the year. The 46th have lost 90 men the short time they have been out here, and the 62d, 70; the 9th came from Malta two days ago, and they are knocking up fearfully. The men are in such a state of desperation, that they say, when going to the trenches: "They would rather be shot by the Russians, than come back and die by inches." Lord Raglan expected to take the place at once, and so, instead of making preparations to hut the men at once while there was wood, allowed it all to be burnt, and now the order is issued, we have no materials to work with, and, I am afraid, no means of transport to bring up the wood for fuel, which, they say, is being sent from Sinope and Scutari. I am giving you a gloomy picture of affairs out here, but no more so than, I think, is justifiable by a careful consideration of all the *pros* and *cons.*

The *Journal* of St. Petersburg contains an order relative to the forwarding of gifts to the wounded in the Crimea. Officers are appointed to visit the wounded of the fleet, to administer relief in money and comforts, to take their instructions respecting the care of their families, to take charge of their letters, and otherwise to administer aid. Sixty Sisters of Charity have been sent as nurses.

A ukase, dated Dec. 13, orders a levy of 10 men in every 1,000 throughout the eastern half of the Empire, to commence on the 15th February, and be completed by the 15th of March. Jews are not exempt.

A Russian ukase is published, ordaining that whoever shall, after a battle, commit acts of cruelty on the wounded or unresisting, shall suffer the punishment of death.

California News.

The U. S. M. Steamer North Star, from Aspinwall, arrived at New York on the 10th inst., bringing San Francisco papers of Dec. 16, and treasure to the amount of $1,119,623.

On the morning of the 31st ult., about 4 o'clock, a heavy gale from the northward sprung up at Aspinwall, which resulted in great loss of life and property in that port. The brig Flying Cloud, of New York, dragged her anchors, and went ashore at the head of the bay, where she bilged, and in a short time became a total wreck. The captain and crew left the vessel in a boat, which capsized when but a short distance from her, and the captain and seven of the crew perished in the breakers. Mr. Riley, the mate, and two of the crew, succeeded in reaching the shore. All this took place in sight of the inhabitants of the town, but the sea would not admit of an attempt at a rescue. The Brig Alvaro, of New York, dragged her anchors, was thrown on a reef, and then through the splendid wharf of the U. S. Mail Steamship Company, almost destroying the wharf, and making a total wreck of the brig.

The time of the completion of the Panama Railroad is no longer doubtful; the rails will all be down by the middle of this month, and the passengers that leave New York by the North Star, 20th inst., will have the pleasure of making the transit from ocean to ocean behind the iron-horse.

From the San Francisco papers, the following summary of the week's news is prepared:—

It has been proved by experiment, that tobacco of a very superior quality can be raised in some portions of California.

The telegraph line between Stockton and Sonora will be completed by the 1st January. Thirty-three miles of wire are already laid.

A bridge 805 feet in length, across Trinity River at Grass Valley, has just been completed.

A man named John S. Stephens, traveling in the vicinity of Marysville, was attacked by two mounted Mexicans, and robbed of $4,500 in gold dust.

A rich claim was struck at Caldwell's Garden, on Shaw's Flat, from which $4,000 were taken out in two days, and the claim afterward sold for $5,000. The purchasers washed out a cart-load of dirt, which yielded $950.

The Russian ship Kamschatka, from Sitka, entered at San Francisco, with a cargo of fish, proves to be a privateer, manned with a crew of 120 men, and furnished with 10 brass guns. She is a taut-looking craft, capable of seriously annoying the French and English merchantmen she may chance to fall in with.

From the Isthmus, we learn that the Revolution in New Granada has been wound up by the total defeat of the rebels, after an obstinate resistance. Among the killed in the Constitutional army, is Gen. Herrera, whose loss calls forth a universal feeling of sorrow in Panama.

Fire and Loss of Life.

On Sabbath morning, Jan. 13th, Waldenfield, the family residence of Mr. John A. Haven, in the Twelfth Ward of New York, was entirely destroyed by fire, and three of his daughters—young ladies in years, and remarkable for their beauty and accomplishments—perished in the flames, or by suffocation. The details of the catastrophe are of the most afflicting character. It appears that, on Friday night, almost immediately after retiring, Mr. Haven's attention was attracted by the unusual heat which pervaded his sleeping room; but, unfortunately, attributing this to the carelessness of the servants in not properly attending to the ventilators, he did not institute any particular search. About 3 1-2 o'clock in the morning, however, he was aroused by a dense smoke, which filled the chamber, and convinced him that a fire had broken out in the house. He immediately alarmed the other inmates—all of whom were thus enabled to effect their escape from the burning mansion. But, unfortunately, four of Mr. Haven's daughters, through some unexplained motive, were induced to reënter the house, and before they could again retreat, three of their number perished in the flames. The fourth was saved by her brother-in-law, Mr. J. M. Hopkins, aided by Mr. Connelly, Jr.; she was rescued through the second story window, and when taken out, appeared to be lifeless. Subsequently, however, she recovered, and is now out of danger. The name of this young lady is Anna Langdon Haven; the bodies of two of her sisters, named respectively Ann Mary Haven and Grace Dublois Haven, were soon after recovered; but six or seven hours clasped before the corpse of the remaining one, Miss Sarah Langdon Haven, could be taken from the ruins. It was indeed a heart-sickening sight, and one which caused many a strong man to shed tears while contemplating its sad details. Two of the young ladies appeared to be sleeping, so calmly had they died; while of the third, there was left but a charred and undistinguishable form.

[N. Y. Tribune.

SUMMARY.

The *Tribune's* St. Thomas correspondent gives the details of a singular outrage committed on an American steamer by the subordinate authorities of that port. It appears that the Benjamin Franklin, which had been chartered by the Royal Mail Steamer Company, to take the West India Mails, in the absence of one of the regular vessels of the line, was fired into as she was leaving the port in the evening, and considerably damaged. The pretense made for her detention was that she had not a regular permission to leave the harbor after dark. The affair was at once taken up by the American Consul, Major Helm, and appears to be in the process of amicable adjustment.

Elihu Burritt, the well-known philanthropist, has issued the first number of a magazine, called the *Citizen of the World,* of which he has assumed the editorial charge. The periodical is devoted to the principles with which the name of the editor is identified, and will aim at an impartial view, in the light of human brotherhood, of the institutions and enterprises which affect the common welfare of nations as a family, and the rights and duties of a man as an individual being. It is to be published monthly by George W. Taylor, Philadelphia.

We learn from the Lawrence *Courier*, that a large number of operatives have lately been discharged from the employ of the Bay State Mills, caused by the general depression of business; that, in one department, (wool-sorting,) where 116 men are generally employed, they have all been discharged, with the exception of seven or eight. Various other departments are being partially stopped, as the machinery becomes free from the yarn and cloth with which they are encumbered. The prospect now is, that about one-half of the works will be stopped for a period.

Gov. Wright, of Indiana, in his Message to the Legislature, takes strong ground against the free banks, and says the Legislature will be wanting in duty to an outraged people, if they fail to adopt prompt measures to suppress the unjust and disreputable practices of the banks—the circulation of the free banks having been reduced to the extent of $5,000,000, and of the State banks to $1,000,000, within the year—the contraction chiefly taking place within six months—being more than one-half of the paper circulation of the State.

The Mobile *Tribune* relates a fight which took place some time ago in a quiet lake near Choctaw Bluff, between an alligator and a gar, in which the latter singular fish came off victorious, having chawed the leg, and with his sharp teeth cut the throat, of his antagonist. We are told the curious fact that the surface for a wide space around was covered with every species of fish and a number of alligators, all seemingly attracted by the noise made by the combatants, and spell-bound in contemplating the conflict.

A dispatch dated Boston, Tuesday, Jan. 9, 1855, says: Jacob F. Brown, a Messenger in the New England Bank, hung himself from the window of his house, in Bowdoin-st., this morning. The rope broke, and he fell to the ground, which killed him instantly. He is said to be a defaulter for six or seven thousand dollars to the New England Bank, of which he was Messenger. He was 28 years old, and very respectably connected.

A dispatch dated Washington, Monday, Jan. 8, 1855, says: At the parade of the Old Soldiers, to-day, the appearance of Thurlow Weed, with a cockade in his hat, created a great degree of interest. He served in the War of 1812 as Quartermaster's Sergeant; and to-day he met with the very Quartermaster, after a separation of twenty-five years. Gen. Leslie Coombs, of Kentucky, and Col. Harvey Baldwin, of Syracuse, both veterans of the war, made eloquent and affecting speeches.

The Poughkeepsie *Press* informs us that a woman named Ford, and her child, aged six years, were burned to death at Newburgh. It appears by the evidence received by the coroner, that the mother was a woman of intemperate habits, and that she had retired to bed with her daughter, leaving a lighted candle near her couch. From the candle, undoubtedly by accident, the fire was communicated to the bed-clothes, resulting in the above horrible calamity.

Dr. Graham, who is now at Sing Sing, is said to have had a serious difficulty with the officers. He was selected, on account of his professional knowledge, to prepare and administer the prescriptions of the attending physician. Among the medicines there was a quantity of brandy. With this the Doctor made free, and was crazy drunk, raving up and down the hospital room, brandishing a knife, and threatening the lives of any who might molest him.

The Burlington (Iowa) *Telegraph* of Jan. 1st says:—Late on Saturday afternoon, three children, two girls and a boy, were seen to fall through an air hole in the ice, opposite Ogden & Copp's commission house of this city, and were drowned. The unfortunate children were those of Mr. Owen McCallen. The girls were aged respectively twelve and seven, and the little boy about five years. The eldest is supposed to have lost her life in her affectionate but vain attempt to save the little sister and brother.

Potatoes are said to be natives of South America. They were unknown in Europe previous to the sixteenth century. Queen Anna, wife of James I. of England, had them upon her table as a luxury, that cost two shillings (45 cents) a pound. We now think five cents a most extravagant price; and so it is, compared with other eatables; and yet potatoes are considered not only a luxury, but a necessary of life.

A dispatch dated Boston, Wednesday, Jan. 10, 1855, says:—The Evening *Telegraph*, in a postscript this afternoon, states that a warrant was issued to-day by U. S. Commissioner Charles L. Woodbury, for the arrest of John Jackson, an alleged fugitive slave, who, it is said, escaped from his owner, Capt. Fox, of Virginia. The *Telegraph* adds, that the Vigilance Committee got wind of the proceedings and started Jackson off immediately for Canada.

The Hon. George Hall, on Monday, 2d inst., entered on his duties as Mayor of the consolidated city—Brooklyn, Williamsburgh, and Bushwick. The population of the city as now constituted, is estimated at 250,000, which transfers it from the seventh in rank, to the third city in the Union. The area of territory embraced within its limits amounts to about twenty-two square miles. The value of real estate assessed within this area in 1854, is estimated at $88,923,081.

As illustrative of the severity with which the present commercial distress presses on the people generally, we learn that in Williamsburgh there is a very general moving of two families into one tenement "In consequence of this movement," says the writer, "I have about forty tenements empty, and I would, as a matter of interest, be glad to let them at half price."

The Message of the Governor of Pennsylvania was sent to the Legislature the other day. The receipts of the Treasury for 1854, were $6,666,000; expenses, $5,425,000. The receipts from public works exceed the expenses by $736,000. The Governor recommends a revision of the Liquor License laws.

Camp meetings are said to have originated among the Presbyterians of Kentucky. The first meeting was held near Gooseberry River, in July, 1800. The ministers present were Messrs. McGrady, Wm. McGee, and a Mr. Hoge.

The tax of Nicholas Longworth, Esq., of Cincinnati, amounts this year to thirty thousand three hundred and twenty-eight dollars. That is the amount he has paid into the Treasury this year, as the tax upon his property. It is a fortune within itself.

The expenses for the city government for the ensuing year will be about $4,350,324; the revenue from markets, water, &c., $2,329,260—leaving a deficiency of $2,023,000 to be made up by taxation.

A model return upon a writ was recently made by a deputy-sheriff in Morgan County, Ind. It was: "Sarved the within, but was fit with brick-bats by the woman, so that I couldn't sarve it!"

S. M. Booth, editor of the Milwaukee *Free Democrat*, has received the sum of $2,500, from one Henry Burchard, who took the liberty of cowhiding said Booth some months since.

The Ohio *Statesman* mentions that the Fund Commissioners of that State have purchased the Stocks of the Canal Bank of Cleveland. Bill-holders will lose nothing.

In New Haven, of 56 prosecutions under the liquor law, 52 have been sustained, and the fines have put about $1,500 into the town treasury.

The kind-hearted of Hartford, Ct., undertook to raise $3,500 as a Christmas fund for the poor. They missed—and raised $3,780, all in private donations.

The most valuable crop in the United States is that of Indian Corn, being nearly three times as valuable as wheat, and more than three times as valuable as cotton.

The Convention of Soldiers of the War of 1812 met at Washington January 8th, and in the afternoon paid a visit to the President.

The Howard Association of New Orleans has voted $2,000 for the relief of the Poor in New York.

Wendell Phillips delivered a masterly lecture, (in the Anti-Slavery Course,) at the Broadway Tabernacle, Jan. 9th.

The Trenton, N. J., daily papers have increased their price of subscription from $3 to $5.

The last accounts from the Rev. Dr. Duff give the pleasing intelligence that his health continues to improve.

MARRIED,

In Leonardsville, N. Y., Jan. 1, by Eld. W. B. Maxson, Mr. G. H. Hewitt, of Marshall, N. Y., to Miss Martha H. Jewett, of Sangerfield.

By the same, at the same time and place, Mr. Horace Worthington to Miss Laverna Preston, both of Edmeston, N. Y.

In Richmond, R. I., Jan. 1, 1855, by Eld. P. S. Crandall, Mr. Stephen W. Babcock, of Hopkinton, to Miss Mercy A. Barber, of Richmond.

On the 1st inst., by Eld. Elias Burdick, David Johnston to Lydia C. Maxson, both of Truxton, Cortland Co., N. Y.

In Alfred, N. Y., Jan. 6th, 1855, by Eld. H. P. Burdick, Mr. Joshua Davis to Miss Emily Shaw, all of Alfred.

At Clarence Union Hotel, Dec. 24th, by Eld Rowse Babcock, Mr. Charles H. Dunn, of Akron, to Miss Mary Ann Lockman, of the same place.

DIED,

At the residence of Dea. Clark Crandall, in South Kingstown, R. I., Oct. 17, 1854, Mrs. Eunice Reynolds, widow of Mr. James Reynolds, aged 87 years.

Also, at the same place, Jan 3d, 1855, after a long and painful illness, Geo. N., youngest son of Dea. Clark Crandall, in the 8th year of his age.

In Walworth, Wis., Sept. 5th, 1850, of typhoid fever, Nathan L. Maxson, aged 19 years and 6 months. Sept. 4th, 1854, Dwight D. Maxson, aged 14 years and 3 months. Sept. 26th, Adelia M. Maxson, aged 21 years and 6 months. In Leroy, Boone Co., Ill., Nov. 23d, Charlot M., wife of John Wilson, aged 26 years and 2 months, having left a husband and three children to mourn their loss. Nov. 26th, Charles L. Maxson, aged 10 years and 5 months. All children of Asa L. and Julia Ann Maxson, who out of nine lovely children have given five (and four of them in less than three months time, through the same disease,) to the silent embraces of death. Yet they murmur not at the hand-dealings of the Lord, but manifest a disposition to "be still and know that He is God." But may they not say, in the language of Job, "Let me alone, that I may take comfort a little before I go whence I shall not return, even to the land of darkness and the shadow of death?" In the death of Adelia, the youth of our community, as well as the church, have lost one who was ever ready to vindicate with cheerfulness the claims of the gospel. Sister Wilson was also a member of the Seventh-day Baptist Church at Walworth, and although she lived remote from the church, yet her devotion to the 'commandments of God and the faith of Jesus' was such that she 'shone as a light in a dark place.'

Nor does our mournful tale of death end here. On the 26th of September, in hope of a better resurrection, died Harriet D. Basset, daughter of N. L. and Adelia Basset, in the 18th year of her age.

Also, Sept. 27th, Louisa B. Reed, wife of N. J. Reed, in the 36th year of her age, having left a husband and two children to mourn their loss. In the death of sister Reed we have lost one who was 'ready to every good work.'

"These all died in faith." O. P. H.

New York Markets—January 15, 1855.

Ashes—Pots $6 75; Pearls 7 25.

Flour and Meal—Flour 8 75 a 9 00 for common to good State, 9 00 a 9 62 for Ohio, Michigan and Indiana, 10 75 a 12 00 for extra Genesee. Rye Flour 6 50 a 7 75. Corn Meal 4 75 for Jersey. Buckwheat Flour 4 00 a 4 25 per 100 lbs.

Grain—Wheat 2 05 a 2 12 for Western mixed, 2 50 a 2 62 for white Genesee. Rye 1 37 a 1 40. Barley 1 25 a 1 35. Barley Malt 1 50. Oats 50 a 53c for Jersey, 57 a 62c for State and Western. Corn 1 04 a 1 05 for Western mixed.

Provisions—Pork 13 00 for new prime, 14 00 a 14 50 for new Western mess. Beef 5 50 a 7 00 for country prime, 8 50 a 11 00 for country mess. Lard 10 a 11c. Dressed Hogs 6 a 6½c. Butter 11 a 18c for Ohio, 18 a 24c for State. Cheese 10 a 10¾c.

Hay—94c a 1 00 per 100 lbs.

Potatoes—2 62 a 2 75 for Pinkeyes, 3 00 a 3 50 for Mercers and Carters.

Seeds—Clover 12 a 12½c. Timothy 2 75 a 3 00 for reaped. Rough Flaxseed 1 82 a 1 85.

Tallow—12¾c for Butcher's Association.

☞ There appears to be abundance of money for those who have the means of obtaining it; that is, for those who have capital, or undoubted securities. But the distress among the workers is unabated. One of the daily papers has the following:—

"While thousands of workmen are unemployed, and narrowly escape starvation, incredible to relate, a most buoyant state of things exists in the higher financial circles. What a contrast! Soup kitchens in Reade street, and—if financiers are to be believed—overflowing banks in Wall-street. Crowds promenading Broadway with woful banners calling for work, and starving wives and children in hovels on the East river—while the magnificent bankers and merchants down town carelessly put their hands in their pockets, and subscribe four millions to aid an embarrassed railroad. Only think—within a quarter of a mile, Mr. Stewart feeds 1,200 able bodied starvelings, and twenty or thirty operators agree to pay out in hard cash, without a prospect of return, four millions of dollars—enough of money to relieve all the distress. The contrast beats fairy land hollow. Universal ruin on one side—a plethora of money on the other. Starving workmen and overgorged bankers. Fathers of families, honest, steady men, vainly begging for four dollars a week to buy bread; insolvent railroads coming forward and getting four millions at a swoop! How can the workmen be persuaded that the state of the times renders it impossible for their employers to pay them the same wages as formerly, when a loan like this can be negotiated?"

There must be something radically wrong in the system of business where such a condition of things can take place. Can this error, or these errors, be pointed out? And when found, is there any effectual remedy? This inquiry shall be the subject of the following remarks. As a means of order, system, regularity and stability in business, we want a reform in our

MEASURE OF VALUE.

A true and correct measure of value is absolutely necessary for the establishment and maintenance of justice and equity in financial, commercial, and business transactions. Without it, all exchanges of goods and property are uncertain and precarious—partaking more or less of the nature of a lottery. The great regulator of value is the relation of demand and supply to each other. An article of use for which there is a demand, is cheap when it is abundant, and dear when it is scarce. In order, then, to measure value, we must use an instrumentality of real value, that will measure or test the abundance or scarcity of that of which we would ascertain the value. In order to test the abundance or scarcity of any item of produce or merchandize, we should compare it with an article which is as near as possible fixed and specific in quantity. There is no article in nature that is susceptible of being used as an universal measure of value, that is absolutely fixed and invariable in quantity. Not having a perfect measure, we must take that which comes nearest to it. Gold and silver, stamped by the government into coin, (which is merely a certificate of the weight and fineness of the metals,) come the nearest to a perfect measure that can be found. They are of intrinsic and universal value, in all parts of the world. They are imperishable and indestructible. The annual product bears so small a proportion to the quantity on hand, as to be comparatively unfelt in the markets of the world. It is almost certain, that the framers of the Constitution intended to establish gold and silver coin as a circulating medium, and as a measure of value. The establishment of banks of issue of paper money, without any law limiting and regulating the amount of issue, totally changes the character of our currency as to fixedness, or nearly so as to quantity. Hence it is no longer a measure or test of the abundance or scarcity of other articles of merchandize. The characteristic of a measure of value is broken up and destroyed. We have no correct measure of value in this country. Business is undergoing a constant succession of fluctuations and uncertainties. It has no character of certainty and permanence. At one time, we are in a wild delirium of extravagance and excess; the country and business are moving forward with railroad speed; every body is thrifty and prosperous, getting rich; anon we are brought up all standing, with a tremendous crash—bankruptcies and failures, stagnations of business, suspension of productive industry, thousands of workers thrown out of employment, to starve or subsist on charity. All this is unnatural and unnecessary. Business ought to be regular and uniform, or nearly so; with ebbs and floods, to be sure, but occuring from obvious and natural causes, which can be calculated upon with a considerable degree of certainty. The operation of the paper money system on the business of the country is analogous to that of alcoholic drinks upon the human system—at one time, in a delirium of extravagance and excess and then overtaken with all the horrors incident to debauched nature and exhausted vitality. It requires a resolute moral restraint and self-denial to effect a reform in the one case as in the other. It is extremely difficult for the intemperate drinker to deny himself the fascinating stimulations, and to confine himself to simple nutritious food and diluent drinks. So also is it very difficult for the man who has long been in the habit of anticipating his income, and consuming before he has produced, to confine himself to that which he has actually earned or paid for. This is an exceedingly important question in a moral point of view. It would require a volume to do justice to the subject. It has generally been considered simply as a question of national wealth, or general progress in material prosperity; but the moral considerations are a thousand fold more important. A thorough reform is absolutely necessary for the safety of our republican institutions, and the moral welfare of the community, particularly of the industrious, producing classes, of small means.

Mayor's Office, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the jurisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

To Printers.

A NEW EDITION OF THE SPECIMEN BOOK OF BRUCE'S NEW YORK TYPE FOUNDRY, was published in September, 1853, and will be given to those proprietors of Printing Offices who will send for it, or it will be forwarded to them by mail on receipt, in advance, of fifty cents for the postage.

In it are exhibited many articles never before shown; there have been added to the Foundry new varieties of Roman Types from Nine-line Pica to Pearl various imitations of Writing, a great number of fancy founts borders, both plain and illuminated, labor-saving rules and a complete foundry of German.

The types now manufactured are cast from a new combination of great durability, and are usually kept on hand in large quantities. Every fancy fount is sold by weight, and at the printed prices, which are from ten to twenty-five per cent. less than those of some other foundries. All other printing materials are furnished at manufacturers' prices, either for cash or credit.

Printers wishing to open accounts with me, or whose dealings have been long suspended, are requested to accompany their orders with city references to prevent delay.

Printers of newspapers who choose to publish this advertisement, including this note, three times before the 1st of August, 1854, and send me one of the papers, will be paid for it in type when they purchase five times the amount of their bill from me, of my own manufactures, selected from my specimens.

GEORGE BRUCE,
51-3 13 Chambers-st., New York.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of Francis C. Woodworth, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year.*

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83½ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year.*

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

Miscellaneous.

Public Education in New York.

From the Message of Gov. Clark.

Among the subjects which will require your attention there is none of more importance than the system of public education of the State. The magnitude of this interest has always been felt and appreciated by the people, and the State has shown, from the earliest period of its existence, an earnest desire to provide the means for the adequate instruction of all the children within its limits. For a long time the system pursued was based on the assumption that education was mainly a matter of personal interest, and that the duty of providing it devolved exclusively upon parents; the instruction of the children of those whose poverty would not permit them to incur the expense of it themselves, being made to depend upon public charity.

The inefficiency of this policy, its failure to accomplish the object aimed at, and especially its direct tendency to create distinctions hostile to the spirit and character of our institutions, led to its abandonment; and a system, based upon the principle that the State is even more deeply and permanently interested in the education of its children than their parents, and that the expense of providing it should be borne by the aggregate of the property within its limits, was adopted in its stead. Under the existing law, therefore, the State assumes the charge of public education—committing its direction to local officers, and paying the cost of it out of its own treasury. The system is comparatively new, and some practical defects are as yet exhibited in its workings; but they are such as spring chiefly from the failure to give full and complete development of its fundamental principles, and may easily be remedied by judicious legislation. The system itself is believed to be thoroughly rooted in the confidence and favor of the people.

The whole amount of money apportioned by the Superintendent of Public Instruction is $1,055,000, of which $800,000 was raised by a general tax, and $255,000 from the income of the Common School and United States Deposit Funds. The whole amount expended for Public Schools is $2,566,609 36, of which $1,929,884 49 was applied to the payment of teachers, and $47,657 06 for the District Libraries. The whole number of District Schools reported for the year is 11,798; and the whole number of children in the State of the age required to draw public money, 1,156,709. There have been 877,201 in attendance upon the District Schools; in Academies under the supervision of the Regents of the University, 37,406; 34,279 in unincorporated Private Schools, and 4,568 in Colored Schools. The average number of months during which the Schools have been kept in the several Districts, is eight. The number of volumes in the District Libraries is 1,571,270.

These results exhibit a gratifying increase in the number attending the District Schools over the previous year. But it will still be seen, that of the whole number of children of suitable age in the State, there are 309,508, or nearly *one-fourth* of the whole number, who do not attend the District Schools, and 233,255, or about 20 per cent. of the whole number, who do not attend any school. In view of the provision that has been made for the express purpose of securing the education of all, this proportion is much too large, and indicates some defect in the system pursued—because it does not completely attain the object at which it aims. That it does not, may be partly due to the mode of distributing the public funds. By the existing law, two-thirds of the public funds are distributed among the various districts of the State in proportion to the whole number of children of a specified age within their limits, whether they attend the schools or not. If the apportionment of the public money were made to depend upon the number attending school, and upon the regularity of their attendance, it would become the interest of the citizens generally to promote the regular attendance of all the children within their limits.

An amendment of the law which should give it this direction would, I believe, tend to secure, more fully, the desired result. The law is defective, also, in that it fails to carry out fully and completely the principle on which it is based. Education in the District Schools is not yet entirely free. If the cost of the Schools in any District exceeds the amount of money received from the State, the deficiency is made up by a rate-bill, assessed upon those who send their children to school; and those who are unable to pay this assessment are relieved at the public expense, and thus become the recipients of public charity. The worst element of the old system is thus preserved, and the fundamental principle of the new law fails of its application in its most essential point. Education is still regarded as a matter of charity and not of right; and so long as this continues to be the case, in any degree, or to any extent, it will detract from the full measure of usefulness which the system is designed to secure. This evil in the system can be remedied only by making the schools entirely free.

The attention of the Legislature should also be directed to measures for improving the character of the schools, for increasing their efficiency, and for elevating and extending the instruction which they impart. In a State where every citizen should take an active interest in the administration of public affairs, and may be called upon to perform the highest duties of public life, it is important that popular education be carried to the highest point which the means of the State will allow. It has been objected to the system of Free Schools, that people do not prize that which costs them nothing, and that relieving individuals from the expense of educating their children will diminish their interest in the subject, and lead them to relax the vigilance which is essential to the highest excellence in the Public Schools. There is undoubtedly some force in the suggestion, though experience shows that it is much less than is sometimes supposed. But whether it be more or less, it is entitled to consideration, and provision should be made for obviating the objection in any system of education which the State may adopt.

An obvious mode of doing this is by means of an active and intelligent supervision, by which the schools shall be regularly visited and their discipline examined by competent officers selected for that purpose. Various attempts have been made to supply this, but none of them have hitherto proved entirely successful. The agency provided by the present law is that of town Superintendents; but it is found more expensive and less efficient than is desirable, and gives rise to local dissensions, injurious to the successful working of the general system. Similar objections led to the abandonment of the system of County Superintendents, for which the present agency was substituted a few years since. Unless the principle of visitation can be more effectually reconciled with public sentiment, and made more economical and effective than it has been hitherto, the end which it is designed to secure must be sought by other means.

The connection of our Common Schools with the higher institutions of learning—with Academies and Colleges—making them all, in fact, parts of one great system—could not fail to contribute essentially to their elevation, and bring the means of a thorough and complete education within the reach of all. In the city of New York, where the Free School system of the State has been, perhaps, more completely developed than in any other section, the benefits of substantially such a union are very conspicuous. A Free Academy has been added to the system, in which a large and competent corps of professors and tutors has been provided, a plan of study extending over five years, and embracing all the branches of study pursued in the best colleges of the country has been adopted, scientific apparatus, libraries, and all the aids requisite for study have been furnished, and the general discipline and course of instruction have been made in all respects of the highest and most efficient character. Pupils who shall have attended any of the District Schools for eighteen months, maintained throughout a good standing and character, and passed a satisfactory examination in certain specified studies, are admitted to the Academy and entitled to the full enjoyment of its advantages, free of all expense.

The Academy has been in operation only three or four years, and the average number of its students is over four hundred. The attendance shows that its benefits are fully appreciated. But besides the thorough and most useful instruction conferred upon so large a number of the children and youth of the community, its most marked advantages are seen in the influence which it exerts upon the Common Schools—stimulating their teachers, trustees, inspectors and pupils alike to a generous rivalry, increasing their vigilance and their industry, and rendering them zealous and emulous in sending the best pupils to the Academy, whose facilities for education are the prize for which all may alike contend.

While I am aware that large cities afford facilities for such a system which cannot be fully enjoyed in the rural districts, I think that something may be done throughout the State in this direction. A voluntary beginning, indeed, has already been made in some sections, by the establishment of Union Schools; and their success shows that the system is not wholly practicable. I think that the time has come when higher purposes and broader views may be entertained in regard to our system of State education; and that our Academies may be brought into a more direct and immediate connection with the general plan, and thrown more widely and more freely open to the advantages they are intended to confer.

The character of their instruction should be elevated and its range extended; and they should be more completely furnished with apparatus and the means of imparting knowledge in those sciences which are of the most service in practical life. By making free admission to the thorough and complete education they would then afford the reward of excellence in our District Schools, a stimulus would be furnished which could not fail to be felt beneficially upon their discipline and character. It would be highly desirable to bring the Colleges of the State into harmonious connection with such a plan, so that they might become more directly recognized as members of our general system of State education, and as essential to its completeness and perfection.

Shaffner's World-Girdle Telegraph.

We announced, several months since, the departure of Tal. P. Shaffner, Esq., the editor of the *American Telegraphic Magazine*, for Europe, to make arrangements for the construction of a telegraph around the world. He has recently returned from his expedition, the results of which possess more than ordinary interest.

We learn from Mr. Shaffner, that his recent tour in Europe was undertaken for the purpose, first, of acquiring a thorough knowledge of the different modes of telegraphing and constructing lines in the old world; secondly, to negotiate with the Danish Government for the exclusive right to lay a line over Greenland, Iceland, the Faroe Isles and Denmark, for the term of one hundred years; thirdly, for the acquisition of similar rights over Norway, Sweden and Russia. With these and other rights, which he proposed to himself to secure, the success of his plan to girdle the world with the electric telegraph no longer appears visionary or impracticable.

The route of his proposed line is as follows:

Starting from the coast of Labrador, the width of the sea to Greenland is about five hundred miles. From the point of landing, the line is to extend underground around Cape Farewell to a point on the east coast of Greenland, favorable for a submarine connection with Iceland. A subterranean line across to the eastern coast of that island will connect with a submarine wire running to the Faroe Isles, and thence to Norway, landing at or in the vicinity of Bergen. Mr. Shaffner informs us that the land and climate of Greenland and the isles are well and even better adapted to the construction of the telegraph than those of the United States. Greenland abounds with mineral wealth, and he thinks the telegraph will tend to develop the unappreciated resources of that country. By this route there will be no submarine section of more than five hundred miles, and the loss or failure of one section will not destroy the others. In a line direct from Ireland to Newfoundland the failure of any part occasions a loss of the whole.

After landing on the coast of Norway it is intended to run the line to Christiana, the capital of Norway, and from thence branches to Copenhagen and Stockholm. The Danish Government has bound itself to furnish proper connections with the Governments on the continent and Great Britain. Consequently it will not be necessary to run a cable from the Faroe Isles to the Shetlands, Orkneys and to North Scotland. Treaties with the Emperor of Russia contemplate the extension of the line from Stockholm, in Sweden, to St. Petersburg, across or along the coast of Finland. By the construction of this section America will be able to transmit intelligence direct to Russia, and thus establish most intimate relations between the subjects of the Czar and the sovereigns of the United States.

Leaving St. Petersburg, Mr. Shaffner proposes to run his line to Moscow, or connect at the latter place with the imperial lines already in operation—thence to Kazan across the Ural Mountains, into Asia, passing through Orusk, Kolivan, Kausk, Oudinsk to Iskoutsk, near Lake Baikal. This is near the great tea country in Chinese Tartary, whence the Russian tea is brought overland on wagons. The trade in this tea, which is said to be the best in the world, is very large, and the telegraph, it is supposed, will tend to increase it materially.

From Iskoutsk it is intended to run the line to the sea of Ochotsk, either north to Yokoutsk, or south with the Amour River, and thence along the coast of the Sea of Ochotsk to Ismsk, and across the Gulf to Cape Utkoloka, Kamtschatka, and thence along the Almetian Isles to Aliaska Peninsula or Cooke's Inlet, in North America. From this point the line will be run along the Pacific Coast to Oregon, and south to San Francisco, California. This range is entirely south of the latitude of St. Petersburg, and, in fact, the line can be carried around by the Behring Straits, and be south of the Arctic Circle.

From San Francisco Mr. Shaffner proposes to run the line along the best route to the Salt Lake, and thence to the western boundary of Missouri, where it will intersect the existing section of the California line, built by him a few years ago. Joining the great lines in America, the earth will be girdled with one continuous and unbroken flame of electric light.

In the ocean or submarine department of the great work, Mr. Shaffner has associated with him Mr. John W. Brett, who has been the projector and successful constructor of the vast ranges of submarine and subterranean lines of the old world.

The consummation of this great enterprise will be productive of consequences which the human imagination strives in vain to realize. It will enable us to communicate daily with every civilized nation on the face of the globe, and many not so civilized, for as soon as possible after the completion of the main trunk, branch lines will be extended to Japan, Pekin, Nankin, Canton, and other cities of China.

We are informed by Mr. Shaffner, that he expects but little trouble in maintaining the line through Russia in Europe, in Asia, or America. The roads are good and well improved—the climate is most favorable for the enterprise, and, with the aid of the Emperor, he thinks there will be no formidable hinderance. The military system is very perfect throughout the Empire, and will constitute an ample guarantee against any troubles which telegraphic science cannot provide against.

In the negotiations of Mr. Shaffner in Europe, he has been singularly fortunate, and his efforts have been crowned with flattering success. Depending upon his energy, he has succeeded where the most skillful diplomats might have failed. He informs us that he had one great element of strength; that was, he was an American. His Majesty the King of Denmark intimated to him that he would not have considered the proposition had it come from a citizen of any other nation; but he informed Mr. Shaffner that he granted the patents under the belief that there were no obstacles in nature that could be a barrier against the genius and enterprise of his countrymen. [Evening Post, 5th.

Winter Butter.

In many parts of our country the art of making good butter in winter is very imperfectly understood, and by some dairy-women, thought to be entirely impossible. But it can be done in December as well as in May. The plan of doing it is this: The cows should be stabled and fed on sweet hay and other provender. Instead of keeping the milk in a warm place, it should be put in a cold one, and no matter how soon it freezes, because freezing it will separate the cream much more perfectly than it will rise without this atmospheric temperature, and it can then be taken off with less trouble. And when the cream is churned the churn should not be placed very near a fire; the ordinary heat of a kitchen would be sufficient. Too much warmth destroys both the complexion and the flavor of butter. In the winter, butter, it is evident, requires more time in churning than in summer, but when patience assists the laborer, the task is made no task at all.

Butter cured with half an ounce of salt, quarter ounce of saltpetre, quarter ounce of moist sugar, pounded, used in the proportion of an ounce to each pound of butter, will be found to keep good a longer time, and have a more delicious flavor, than when salted in the ordinary way. [Phil. Dol. Newspaper.

Corn the Staple Crop of Ohio.

Mr. Mansfield, in an address to the Highland County (O.) Agricultural Society, at its late Fair, thus speaks of their great staple, and the necessity for improvement in its culture:

"In this State, and in the whole Valley of the Ohio, Kentucky, Illinois, Indiana, and Tennessee, are raised 280,000,000 bushels of corn—one-half of the whole raised in the United States, and three times as much as are raised in the same States of wheat, oats, barley, and potatoes, together. Corn is, therefore, the great staple of the Ohio Valley; and if we can improve its culture, we add more than in any other way to the products of agriculture. Is that impossible? In examining the statistics of this State you will find some facts bearing strongly on this point, and quite startling to the curious inquirer.

We find, first, that the average product per acre is 37 bushels, namely, 1,664,429 acres producing 61,171,282 bushels; the highest being 50 per acre, in the counties of Butler, Warren, and Fayette; and the lowest 20 bushels, in the counties of Huron, Wayne, and Williams.

We next find, by turning to the proceedings of agricultural societies, that 150 bushels per acre have been repeatedly raised, and that 100 bushels is no uncommon crop. Thus we have two facts worth consideration, the sum of which is, that the average corn crop of Ohio is only one-fourth of what it might be under high cultivation, on the same breadth of land. Is this a state of things that ought to exist? But some one will ask, in the popular language, Will this superior cultivation pay? Will superior cultivation pay its costs? If it will not, your agricultural societies ought not to exist. No premiums should ever be offered, and you should be contented to let dock, thistles, and iron weed grow where they will, and leave nature alone to raise crops. Why, gentlemen, it is only on the supposition that superior cultivation is valuable, that you attempt any agricultural improvement.

But it is not to be denied, that in the Pioneer State, in the period when lands were clearing up, it was the doctrine, that nature should be left to do the work of growth; for lands were cheap and labor dear. But Ohio has passed that period—at least as regards farms. Farming land is worth $20 per acre, on an average, and there is too much capital in land to lie idle. The time has come for high cultivation; the time has come when it will pay; when, if rightly applied, culture put on land will pay better than any other species of human labor."

Frost as a Manure.

We know of no treatment so directly beneficial, for almost every class of soils, as that of throwing up land in narrow ridges in the fall or early winter. There are few soils worth cultivating at all, that do not contain more or less materials which can be made available to plants by the combined action of air and frost.

Take two plots of heavy soils, side by side, and let one lie unmoved till spring, while the other is deeply plowed in autumn, and the result will be very visible in the spring crop. But the manner of plowing is important. To secure the greatest advantage, a single furrow should be thrown up and another back-furrowed directly upon it so as to produce a high ridge, then another ridge is to be made in the same manner with a deep dead furrow between the two. The process is to be continued thus through the whole field, so that when finished it will present a surface of high ridges and deep dead furrows succeeding each other, about once in two or two and a half feet. If prepared in this way, the frost will penetrate far downward, loosening and disintegrating the soil below the furrows, while the ridges will crumble down, and as they will not hold water, the air will circulate freely through them, decomposing the mineral portions, and conveying in ammonia and other gases. This operation will be equal to ten or more loads of good manure upon clay or compact soils.

In the spring it will only be necessary to run a plow once or twice through the center of each ridge, and then level the whole down with a heavy harrow.

Another advantage in this process, is that when land is thus prepared it dries out and warms several days earlier in the spring. Again, there are some soils that are exhausted upon the surface, but which contain poisonous substances in the sub-soil. If this subsoil is thrown up in contact with the air and frost during winter, these poisonous compounds, usually proto-sulphate of iron or manganese, will be destroyed or changed to a harmless form, during the winter.

The above practice is especially to be recommended in the garden. One of the most successful cultivators of an acre of ground in our acquaintance, digs it up in the fall to the depth of three or four feet, making deep trenches and high ridges, so that the whole acre appears to be covered with high winrows of hay placed closely together.

We strongly urge every farmer who has not tried this method, to lay out their plans now for experiment in this way, on a larger or smaller scale, during the present season. [American Agriculturist.

Galls on Horses.

Some horses are more predisposed to galls than others, but even the most liable to injury in this respect may by care be kept perfectly sound. Bad harness is the great cause of galls. In order to save a few shillings in re-stuffing an old collar, getting camel's-hair pads, or, perhaps, a new collar, many a valuable horse has been materially injured, and ever afterwards particularly liable to sore shoulders. The collar should be frequently examined, inasmuch as it is very likely to become hard and lumpy. A little pounding will generally remove the difficulty, and render the collar soft. If the horse is known to be predisposed to sore shoulders, camel's-hair pads should always be used. Heavy and unsteady work is also a frequent cause of galls. A man unused to labor can easily blister or gall his hands, while he who labors habitually suffers no inconvenience. So it is with horses; they have, perhaps, done little or nothing during the winter, and, when the busy season comes on, they are put to "breaking up," or other heavy work, and, as a natural consequence, their shoulders are galled. Could any other result be expected? Light work, till their shoulders are hardened, would be a more humane and profitable course.

Bathing with salt and water is a good thing to harden the shoulders. Some prefer to bathe the shoulders in the morning, previous to going to work; but we think it is better to do it at night, and wash it off with cold spring water in the morning. Otherwise the particles of salt are apt to adhere to the collar or to the hair, and act somewhat as would fine sand in a person's boot. A few minutes' labor, night and morning, is all that is required, and it can not be better applied.

In case of actual sores, or where the skin is broken, it is desirable that the horse be allowed to rest a few days; but if this is impossible, the collar must be so padded as not to touch the sore. It would seem essential that the sore be covered in some way, so as to keep out the dust and prevent flies from troubling it. We never found any thing answer the purpose in this particular. If any of our readers have been more fortunate, we should like to hear from them. A solution of alum is good to bathe the sore with, but we prefer white vitriol, (sulphate of zinc.) We know of nothing so cooling or healing. A tea-spoonful should be dissolved in a pint of water, and the sore be kept constantly moist with it. For this purpose, it will be necessary to take a bottle of it into the field with you, and to keep a moistened rag on the sore all the time. Act on these hints, and your teams shall praise you. [Rural New Yorker.

The late Dr. Kitto, when a boy, was removed from a work-house to become an apprentice to a shoemaker. His master was a coarse tyrant. The poor boy appealed to the magistrates. His written statement was marked by a striking propriety of sentiment and diction. The indentures were cancelled, and he returned to the work-house—to him a welcome refuge. He was not idle there. In 1823, his talents and capabilities being better understood, he was enabled, by the kindness of two gentlemen of the neighborhood, to publish a small volume of essays and letters, and was replaced in a position less unfavorable to self-improvement.

New Plan of Breaking-in Horses.

A new system of breaking-in horses, by means of a very few lessons, and so as to preserve all their precious qualities, has come into use, and what is singular is, that the author of it is a lady, named Isabelle. Having a great liking for horses, Madame Isabelle some years ago began studying the different systems employed in breaking-in horses, and came to the conclusion that they were more or less defective. She then sought for a plan of her own, which should render the horse more tractable, by developing its intelligence; and she succeded in discovering one so perfect that the most restive horse is reduced to obedience in a very short time, and without the slightest ill-treatment. Her plan, as is almost always the case with things really useful, is very simple. She begins by making the horse carry his head high, and perpendicularly, whereby she prevents the weakness caused by the constant binding of the neck, gives free play to the muscles in the neck, and allows full action to be exercised over the mouth. Then she places on the horse a surcingle, surmounted by an iron rod about fifteen inches long, which is bent about four inches forward at the summit. On each side of the rod are placed four rings, destined to receive the reins, according to the height that may be desired. The horse soon gets accustomed to the check, and it exercises a great moral effect on him. He places his head in such a manner as not to suffer from the bit in the mouth, and thereby soon gets accustomed to being held in hand by his rider or driver. The surcingle also promptly accustoms him to adopt the best movements, and to advance when desired without offering any resistance. The breaker-in remains at the left of the horse, and is armed with a whip with a spur in it. After forming her system, Madame Isabelle went into Germany, and practiced it with marked success on horses belonging to Prince de Lichtenstein, at Vienna. From Vienna she went to Russia, and there stopped two years. In the course of that time she rendered completely docile all the most restive horses of the model cavalry regiment at St. Petersburg, as well as those of the Emperor Nichols. Recently she returned to France, and, having explained her plan and stated its results to the Minister of War, she was, by the special direction of the Emperor, who was consulted, authorized to practice it on a number of young horses of the regiment of guides, and with an equal number of recruits who had recently joined the regiment. The lessons were given under her direction at the riding-school of the Ecole Imperiale d'Application d'Etat Major. After the fifteenth lesson, the horses manœuvred with the tranquility and precision of old troop horses. A few days ago, Colonel Fleury, who commands the regiment, manœuvred the horses and recruits, and every one of the usual cavalry movements was admirably executed. [Mark-Lane Express.

Farming in Illinois.—A correspondent of the Vermont *Chronicle*, who writes from Macoupin County, Illinois, a section of country about sixty miles from St. Louis, says:—

"President Sturtevant of Illinois College—the most intelligent man with whom I have conversed in the State—expresses the opinion that farming in this region is as profitable as wholesaling in New York city. One thing is certain, the latter would not stand a single day if it were carried on as loosely and with as niggardly a use of capital. Many farmers in central Illinois are clearing their thousands and tens of thousands *per annum*. It is said that one in an adjoining County, (recently, if not now, living in an old log house scarcely fit for a railroad shanty) has received a barrel of silver coin for a single crop. Mr. Strong, of Morgan County, has one farm of eight thousand acres, and another of five thousand, under most judicious cultivation. His profits are estimated at $50,000 to $100,000. Should present prices and facilities for transportation continue, there is no limit to the wealth to be poured into Central Illinois. A man of the least energy can scarcely fail to share in the profits of such a state of things; while industry, intelligence, enterprise, thrift, and capital, are at an enormous premium."

Basswood Paper.—Mr. Beardsley, of Albany, is bringing his invention of the manufacture of printing paper from basswood to perfection. He has produced some remarkably fine specimens, made by hand. He has just sent a tun of the pulp to a paper-mill at Little Falls. From this a batch of paper will be made, on which a daily paper of Albany will be printed before long. We saw some specimens recently which had been printed on, and the body was firm, and the color white. The impression of types upon it was strong and clean. Mr. Beardsley is confident that he can make even better paper than this from spruce, cedar, and some other woods. The experiment seems to be a triumph in invention, which will inaugurate a revolution in the manufacture and price of paper.

An Indian had gone to Albany one cold winter's day and got very drunk. On his way home he became completely overcome, laid down, and was frozen to death. His tribe was at that time much disposed to imitate the habits of white men, and accordingly held an inquest over the dead body. After a long pow-wow, they finally agreed to the verdict that the deceased came to his death 'by mixing too much water in his whisky, which had frozen in him and killed him.'

In the County Court sitting at New Haven, Ct., Jesse W. Rose, being on trial for assault with intent to murder, was defended on the ground of insanity; and while Judge Blackman, the counsel for the prisoner, was examining a witness to prove the defense, Rose suddenly raised his arm, and with a back-handed blow knocked his own lawyer over. Such a practical demonstration of mental imbecility was conclusive upon the Court and the State's Attorney, who immediately withdrew the case, and Rose was remanded to jail, to be taken care of as an insane person.

A letter from St. Petersburg says: "Mr. Baird's iron foundery is in full work again. He has contracted for five screw-engines, four of 300 and one of 400 horse-powers, and actually received £50,000 in advance, without depositing any guarantee—an unusual thing with Government contracts. The Americans (the same who have had so much to do with the Moscow Railway) are building a great many gun-boats and screws; and Colonel Colt has been, or is still here, with his machinery to make revolvers."

New York and Erie Railroad.

On and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A. M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists, everywhere.

The Sabbath Recorder.
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

WONDERFUL DECISION—GLORIOUS NEWS.

Rejoice, O heavens; and shout for joy, O earth! Let it be shouted from the mountain tops, and let the valleys ring, echo and re-echo with the gladsome news! Let the ships on the Atlantic and Pacific oceans, and on every sea, bear the news to every land! Let every man, woman and child, on the face of the earth, have a holiday! Let there be a universal jubilee! The great day is at hand, when the sword shall for ever be put up in its scabbard, and a mighty pile of implements of war shall be consumed to ashes. Gaunt famine and raging pestilence, and the awful miseries which have long cursed mankind, have now found an effectual antidote. Peace, plenty, and prosperity, and every good that man can crave, are on their way. The late decision of a holy conclave, called by Peter's direct successor, consisting of two hundred inspired men, Cardinals, Archbishops, Bishops, and Princes of the only true church, has laid the firm and everlasting basis for such glorious results. Oh, blessed men, and still more blessed doctrine. Who dares to be heretical enough to reject what two hundred such men, in twenty hours, have pronounced an infallible truth? Surely, the man who has temerity enough to dispute the least item of it, is worthy of burning. So thinks a writer of that most liberal and Christian periodical, the *Freeman's Journal* of New York, and no doubt all that purely Christian body who discussed and settled the dogma of the Virgin's immaculate birth.

Ah! Mr. "Freeman," the Protestants of America laugh at your anathemas, and bid defiance to your faggots and fires. They do not believe any of the farces and fabrications of your church, and never will. Nor do the men who manufactured the doctrine, though they come so far, and from all parts, to concoct and decide upon it. Is it possible that men of common sense, and of well informed minds, could sit seriously to discuss such a farce as this? The learned men in the Papal Church do not get up such fallacies to believe and act upon, but to gull the ignorant masses, and to hold them and bind them to their religion. The whole system of Popery is of the same nature—the marvelous revelations, and miracles, and relics—the gorgeous ceremonies—the ludicrous and imposing attire of the priesthood—the burning of incense and candles, and the holy water—all are to deceive a superstitious people, and bring them into subjection to their superiors. There is something at the bottom of all, which the whole herd of ecclesiastics believe in—aye, the profits. As one of the Popes said in Luther's day, when the sale of indulgences was at its climax, "What a profitable thing is the fable of this Jesus to us." Is it credible—is it possible—that learned and well-informed men should believe for a moment the fable of the immaculate conception of the Virgin Mary? Is not all this "ado about nothing" in reality to keep up the faith of the ignorant and credulous masses in Mother Church? Oh, what a wonderful set of right reverend fathers in God, and holy cardinals, and noble bishops, to bring out such an idea, after long and deliberate consultation—an idea, too, which had been buried up in obscurity for ages! Surely, they must be under plenary inspiration! Ah, but they do not believe a word of it, nor of any such fabrications. Nor is it too much to say, that if they could not extract the money from the pockets of the poor blind Catholics, they would soon denounce all as a fallacy. But so long as they can conjure the cash out of the Catholic's purse, they will rack their ingenuity to find out the wonderful to sustain his credulity. What difference to any one, whether the Virgin Mother was of immaculate birth or not? We know enough about her Son according to the flesh, to inspire our confidence in Him as an efficient and almighty Saviour, and that is enough for the world to know and believe.

The great and unremitting efforts and consultations and sacrifices and contributions of the real Christian world, of all sects, have the enlightening and renovating of mankind in view. They want to bring men to the knowledge of the truth, and to bow to the sceptre of the Prince of Peace. All their organizations and plans and associations are designed to bring men to believe the gospel, and pursue a holy life. But when did any of the Church of Rome aim at such an object? When did they ever attempt to circulate the word of God, and put it into every man's hand, to read and judge for himself, either in Christian or heathen lands? When did they ever meet together, two hundred in number, at the command of his holiness the Pope, to consult upon the best plans of extending the kingdom of Christ in the world? Never. Nor will they ever aim at any thing but to mystify, and thus bewilder the minds of men, and lead them into total darkness, worse, because more fatal, than Egyptian darkness. Surely, God has given them over to believe a lie, and to a course of life which must end in a fearful doom. Their deeds of darkness will one day come to the light—aye, in this world too, for the light is traveling fast, and will soon make such a disclosure of their abominations as will awaken the execrations of the world at large. When God in his providence shall open those dens of iniquity—convents, nunneries, and inquisitions, (by what means we know not)—what a sickening scene will present itself to the gaze of an astonished world, both Catholic and Protestant! By some mysterious spell, which binds the Catholic mind, they are incapable of being convinced that any wickedness is committed in those institutions; but the sun will penetrate more secret recesses, and their universal disgust will be the inevitable result. God will surely bring them into judgment in the end. O, what an overwhelming storm of wrath awaits them, and what a deep damnation will be their portion! May God in his mercy deliver them from their delusion, and bring them to repentance, that they may escape the lowest hell.

GEORGE R. WHEELER.

SALEM, N. J.

For the Sabbath Recorder.

THE SECOND COMING OF CHRIST—NO. 5.

BY B. CLARK.

"Unto them that look for him, shall he appear the second time, without sin unto salvation."

I take some farther notice of the transfiguration of Christ on "the holy mount." As this was an example of "the Son of man coming in his kingdom," (Mat. 16: 28,) and as this example was given to encourage and strengthen the faith and hope of the Christian, surely, it would seem proper that we should take particular notice of it. What, then, may we learn from the vision of the holy mount? 1st. That the coming of our Lord Jesus Christ, with power and great glory, (of which we speak,) is not a cunningly devised fable, but a well-authenticated fact; as Peter said, (2 Peter 1: 16,) "For we have not followed cunningly devised fables, when we made known unto you the power and coming of our Lord Jesus Christ, but were eye-witnesses of his majesty. For he received from God the Father honor and glory, when there came such a voice to him from the excellent glory, This is my beloved Son, in whom I am well pleased. And this voice which came from heaven we heard, when we were with him in the holy mount." 2d. From the circumstance of two of his saints (Moses and Elias) appearing "in glory," with him—Moses who had fallen asleep, and Elias who was translated—we learn that "when Christ, who is our life, shall appear, then shall the saints also appear with him in glory"—both the sleeping saints who sleep in Jesus, and also those living saints which are changed or translated at his coming. 3d. As Peter, James, and John, knew Moses and Elias, so it appears that the saints will know each other in the kingdom of God. 4th. As Moses and Elias "appeared in glory and spake of his decease which he should accomplish at Jerusalem," (Luke 10: 31,) so the raised and the changed saints will talk with our blessed Redeemer in his heavenly kingdom of his redeeming grace and dying love. They will sing a "new song, saying, Thou art worthy to take the book, and to open the seals thereof, for thou wast slain, and hast redeemed us to God by thy blood, out of every kindred, and tongue, and people, and nation; and hast made us unto our God kings and priests; and we shall reign on the earth." 5th. And as "Peter said unto Jesus, Master, it is good for us to be here," so it will be with us, if we may be permitted, through the grace of the Redeemer, to stand with that happy company on the mount Zion—we shall say, "It is good for us to be here." 6th. And as Peter said, "Let us make three tabernacles, one for thee, and one for Moses, and one for Elias, not knowing what he said," so it will be said, "Behold, the tabernacle of God is with men, and He will dwell with them, and they shall be his people, and God himself shall be with them, and be their God. And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying; neither shall there be any more pain; for the former things are passed away." (Rev. 21: 3, 4.) 7th. "And as he prayed, the fashion of his countenance was altered, and his raiment was white and glistening," (Luke 9: 29,) so it will be his *praying* followers that will be permitted to join the company of the redeemed on the mount Zion. 9th. And as this vision on the holy mount was to be kept secret till after the Son of man should be risen from the dead, we are to understand, that this kingdom of Christ and his saints is to be an immortal kingdom, or a kingdom of immortals that have been raised from the dead at the "first resurrection," and such as have been changed at his coming. For it was after Christ was risen that he said, "All power is given unto me, in heaven and in earth," (Mat. 28: 18.) And David also said, (when speaking of the wicked, Ps. 49: 14,) "The upright shall have dominion over them in the morning;" that is, in the morning of the resurrection. (I was once mistaken in supposing there would be a *temporal* millennium before the first resurrection.) It is evident, from the following scriptures, that "the saints shall judge the world," and have "power over the nations," *not before, but after,* the first resurrection. Compare Luke 22: 30; 1 Cor. 6: 2; Jude 14, 15; Rev. 2: 26, and 3: 21, and 20: 4, 5; Dan. 7: 27.

MORE ABOUT PROPHECY.

To the Editors of the Sabbath Recorder:—

Since you have admitted an argument from the pen of B. CLARK to have a place in the *Recorder* of Dec. 1st, in which he attempts to disprove some points which were laid down as *land-marks* of divine truth, *without argument,* in my article on certain prophecies, of Nov. 19th, I suppose you will admit me, as by natural right, to reply. These points are, that the second advent, the general resurrection of both righteous and wicked, the burning of this present earth, and the final judgment, will *all* take place at one and the same time.

In the first place, he entirely overlooks an important qualifying expression, and argues as though it were not there. It is the *general* resurrection, &c., that was affirmed; and *not* the resurrection of all men who have ever lived and died. Those who came out of their graves after Christ's resurrection, (of whom he speaks,) may have been taken with Christ home to glory, as the first fruits of the great harvest, to die no more, and yet be no objection to my position. But we are left entirely in the dark in relation to this question. We know not whether they arose to die no more, or whether they died again, like Lazarus and many others, to remain with the rest of the dead till the final resurrection. But it being after Christ's resurrection, the former is the most probable conclusion. But the prophet Daniel tells us expressly, that "many of them that sleep in the dust of the earth shall awake, *some to everlasting life, and some to shame and everlasting contempt,*" when it can have no reference to the *general* resurrection. (Dan. 12: 2.) And, if he can prove that it *does* mean the general resurrection, he will then also prove my position; for here both righteous and wicked are to be raised at one and the same time. This disposes of one limb of his argument to do away the plain and obvious meaning of John 5: 28, 29—"The hour is coming, in the which all that are in the graves shall hear his voice, and shall come forth, they they have done good unto the resurrection of life, and they that that have done evil unto the resurrection of damnation." In regard [illegible] the expression, *many of,* cannot mean *all.* But here are *all* that are (that is, that shall be at that time) in the graves; and a mixed multitude of righteous and wicked. Now, we find him in a dilemma; and he can take which horn he chooses. If he applies this to the resurrection of the righteous, *at least* 1000 years in advance of the resurrection of the wicked, where are these wicked to be raised from? when none after that can be in the graves. And, if he applies it to *his* resurrection of the wicked, *at least* 1000 years after the resurrection of the righteous, how come the righteous back in their graves again to rise *in the same hour* with the wicked? when an hour, *even in prophetic time,* cannot extend much beyond the limits of two weeks.

His next argument that claims any attention is based on 1st Thess. 4: 16—"The dead in Christ shall rise first." There could not be a more manifest misapplication of scripture than is seen in his forcing this text into a comparative representation of the resurrection of the righteous and wicked. There is nothing said, *no,* not even an *allusion,* to the resurrection of the wicked in this connection. If we had light from no other source, we could not gain from this passage any knowledge that such a thing would ever be. The contrast is here drawn between those saints who shall live on the earth at that time, and saints in their graves; and the Apostle is simply teaching, that the living saints shall not get into the celestial state in advance of the saints in their graves—that the latter shall rise first, before the living saints will be changed; which change will then take place, and all the saints go up together to meet their Lord. It would occupy too much space to pursue the argument in detail. Only let the reader bear in mind, that the word *prevent,* in our version, always means *to anticipate, or go before,* and read the whole connection carefully, and no further argument will be necessary.

His allusion to 1st Cor. 15: 23, is another useless attempt to sustain his position; for here, also, the apostle's whole theme is the saint's resurrection, with no reference to the resurrection of the wicked. Though it is just as true that the wicked die in their old relation to Adam, as it is that this old relation to Adam remains to the Christian, so far as his outward man (the body) is concerned, yet it is *not at all* in reference to the wicked that he speaks; for, in regard to the corresponding parallel, the wicked are not made alive—*raised from the dead* IN CHRIST. And one *all* is just as broad as the other. And all that are raised—"made alive" "*in Christ*"—will then reign in glory. The following verse says, "Then cometh the end, when he shall have delivered up the kingdom to God, even the Father," &c. The final judgment is a work that belongs to his mediatorial reign. And immediately upon the events of this day of the saints' resurrection, his mediatorial kingdom is to be delivered up to the Father, with the express statement, "*Then cometh the end.*" But it seems that my opponent is for having another resurrection and judgment *after the end*—at least 1000 years after. And what trumpet, *after* the LAST, is to call them to judgment? for that which is to call the saints from their graves is emphatically called "THE LAST TRUMP." Verse 52.

Now we have sufficiently disposed of all his arguments, except what he draws from the 20th chapter of Revelations, which we have reserved for the last. And we observe, *first,* that it would be well to wait till the meaning of John's prophetic visions is more generally understood and acknowledged, before we undertake to prove and establish doctrines from any part of them entirely incapable of proof from the plain teachings of the Bible. In my judgment, and in the judgment of some of our most clear-headed and able divines, there is no sound reason for supposing that this scripture teaches, or represents, a literal resurrection of the bodies of any persons from their graves. If we admit that it does, then, by the same rule of interpretation, we must expect that Jesus Christ will come riding on a literal white horse, and a literal sword darting out of his mouth, and shedding the blood of his enemies; and that his followers will ride on literal white horses, in war-like array, to follow up the battle. And, by this rule of interpretation, the world should have seen Ezekiel's wheels rolling about long before this time, full of literal eyes, seeing and marking out their way. And, also, an endless variety of wonders, by this rule, must appear, to fulfill the prophecies, such as never were, and of course never will be. But, in regard to these prophetic visions, the truth is, that while the prophets describe things just as they saw them in their visions, the things they saw were but hieroglyphics representing other things which *were* to take place. Concerning the prophet Elijah, (called Elias in the New Testament,) the Jews were much more excusable for expecting he would come in his own proper person, and appear among men, before the coming of Christ. But he, speaking of John the Baptist, tells us, "If ye will receive it, this is Elias which was for to come." And in the same sense, the old martyrs will be raised, in the fulfillment of this prophecy. As John appeared "in the spirit and power of Elias," so the saints then living will appear in the spirit and power of the ancient holy martyrs; and the rest of the dead will not live again till the 1000 years are fulfilled. Though some wicked men may have a being on earth all this time, yet, in a corresponding sense, they will not live again TILL the end of this period. Their wicked power and influence will not be acted over again *till* the end of this period, and then, it *will* be. And I [illegible] what a host of wicked men would make before the flaming eye of Jesus Christ, in all his uncreated divine glory, surrounded by his saints, transformed, as far as possible, into his image, there attempting to make war upon these saints? But so it must be, if my opponent's theory be sound; for he will hardly say that Jesus will again veil his glory to mingle with sinful men. And, unless he does, a mortal man can no more live in his presence than we can live in devouring fire.

But it would be easy to show that this is no general resurrection of the saints, even admitting that the very thing described in recording the vision is to take place, in the most literal sense. My space, however, will not admit of going into it in detail. We only observe, *first,* that only the martyrs are embraced in this description; and *second,* that it is not their whole persons, for the soul of a man cannot be the whole man, take the word in what sense you please. If it means the soul, in our popular sense, then the *body* is not embraced; and if it means the body, (a sense which, according to Pickering, was never given to the word by any but the Stoics,) then it would be their bodies *without their souls.* And it cannot mean *person* here, (a sense in which the word is often used,) for then there would be the same absurdity as for us to say, *the person of a person.* If he had intended to bring to view their whole persons, he would have said, *And I saw the souls that were beheaded,* &c., and not *the souls of them,* &c., or he would not have used the word *souls,* and said, *I saw them* that were, &c. And no such things can be said of a single passage in the Bible, where a literal resurrection is intended.

And now I will leave the subject for the present, intending to bring forward some of the direct proofs in another article at some future time—not that I feel any ambition for having the last word, for when I have presented a sufficient amount of evidence in support of my position, I intend to trouble myself no further with those who still choose to differ with me.

ELIAS BURDICK.

TRUXTON, Dec. 31, 1854.

THE BROWN TOWEL.

"One who has nothing, can give nothing," said Mrs. Sayres, the sexton's wife, as the ladies of the sewing society were busily engaged packing the contents of a large box, destined for a Western missionary.

"A person who has nothing to give must be poor indeed," said Mrs. L., as she deposited a pair of warm blankets in the already well-filled box.

Mrs. Sayres looked at the last-named speaker with a glance that seemed to say, "You, who never have known self-denial, can not feel for me," and remarked, "You surely think one can be too poor to give."

"I once thought so, but have learned from joyful experience that no better investment can be made, even from the depths of poverty, than lending to the Lord."

Seeing the ladies listening attentively to the conversation, Mrs. L. continued, "Perhaps, as our work is finished, I can do no better than to give you my experience on the subject. It may be the means of showing you that God will reward the cheerful giver.

"During the first twenty-eight years of my life I was surrounded by wealth, and not until I had been married for nine years did I know a want which money could satisfy, or feel the necessity of exertion. Reverses came with fearful suddenness, and before I had recovered from the blow, I found myself the wife of a very poor man, with five little children dependent upon our exertions.

"From that hour I lost all thoughts of any thing but the care of my family. Late hours and hard work were my portion, and to my unskilled hands it seemed at first a bitter lot. My husband strove anxiously to gain a subsistence, and barely succeeded. We changed our place of residence several times, in hopes of doing better, but without improvement.

"Every thing seemed against us. Our well-stocked wardrobe had became so exhausted that I felt justified in absenting myself from the house of God with my children, for want of suitable apparel. While in this low condition I went to the church one evening, where my poverty-stricken appearance would escape notice, and took my seat near the door. An agent from the West preached, and begged contributions to the Home Missionary cause. His appeal brought tears to my eyes, and painfully reminded me of my past days of prosperity, when I could give from my abundance to all who called upon me. It never entered my mind that the appeal for assistance in any way concerned me, with my poor children banished from the house of God by poverty, while I could only venture out under the friendly protection of the darkness. I left the church more submissive to my lot, with a prayer in my heart that those whose consciences had been addressed might respond. I tried in vain to sleep that night. The words of the text, 'Give, and it shall be given unto you; good measure, pressed down, and shaken together, and running over, shall men give into your bosom,' seemed continually sounding in my ears. The eloquent entreaty of the speaker to all, however poor, to give a mite to the Lord, and receive the promised blessing, seemed addressed to me. I rose early the next morning, and looked over all my worldly goods in search of something worth bestowing, but in vain; the promised blessing seemed beyond my reach.

"Hearing that the ladies of the church had filled a box for the missionary's family, I made one more effort to spare something. All was poor and threadbare; what should I do? At last I thought of my towels. I had six, of coarse brown linen, but little worn. They seemed a scanty supply for a family of seven, and yet I took one from the number, and putting it in my pocket, hastened to the house where the box was kept, and quietly slipped it in.

"I returned home with a light heart, feeling that my Saviour's eye had seen my sacrifice, and would bless my effort to do right.

"From that day [illegible] in business. In a few months our means increased so that we were able to attend church, and send our children to the Sabbath-School, and before ten years had passed, our former prosperity had returned fourfold. 'Good measure, pressed down, and shaken together, and running over,' had been given us.

"It may seem superstitious to you, my dear friends, but we date all our successes in life to God's blessing following that humble gift of deep poverty.

"Wonder not that from that day I deemed few too poor to give, and that I am a firm believer in God's promise, that he will repay me with interest even in this life all we lend to him."

Glances of deep interest, unmixed with envy, were cast from the windows at Mrs. L., as, after bidding the ladies adieu, she stepped into her luxurious carriage.

Her consistent benevolence had proved to all, that in her prosperity she still retained the same Christian spirit, which in her days of poverty had led to the bestowal of the *brown towel.*

"Well," exclaimed Mrs. Sayres, "if we all had such a self-denying spirit, we might fill another box at once. I'll never again think I am *too poor to give.*" [Independent.

THE WORSTED STOCKING.

A TRUE STORY.

"Father will have done the great chimney to-night, won't he, mother?" said little Tom Howard, as he stood waiting for his father's breakfast, which he carried to him at his work every morning.

"He said he hoped all the scaffolding would be down to-night," answered his mother, "and that'll be a fine sight; for I never like the ending of those great chimneys—it's so risky—and thy father's to be the last up."

"Eh, then, but I'll go and see him, and help 'em to give a shout afore he comes down," said Tom.

"And then," continued his mother, "if all goes right, we are to have a frolic to-morrow, and go into the country, and take our dinners, and spend all the day amongst the woods."

"Hurrah," cried Tom, as he ran off to his father's place of work, with a can of milk in one hand and some bread in the other. His mother stood at the door watching him as he went merrily whistling down the street, and then she thought of the dear father he was going to, and the dangerous work he was engaged in, and then her heart found its sure refuge, and she prayed to God to protect and bless her treasures.

Tom, with a light heart, pursued his way to his father, and leaving him his breakfast, went to his own work, which was at some distance. In the evening, on his way home, he went round to see how his father was getting on. James Howard, the father, and a number of other workmen, had been building one of those lofty chimneys, which in our great manufacturing towns almost supply the place of other architectural beauty. This chimney is one of the highest and most tapering that has ever been erected; and as Tom, shading his eyes from the rays of the slanting sun, looked up to the top in search of his father, his heart almost sunk within him at the appalling height. The scaffolding was almost all down: the men at the bottom were removing the last beams and poles. Tom's father stood alone on the top. He looked all round to see that everything was right, and then, waving his hat in the air, the men below answered with a long, loud cheer, little Tom shouting as heartily as any of them. As their voices died away, however, they heard a very different sound—a cry of alarm and horror from above! "The rope! The rope!" The men looked round, and coiled upon the ground lay the rope, which, before the scaffolding was removed, should have been fastened to the chimney, for Tom's father to come down by. The scaffolding had been taken down without their remembering to take the rope up. There was a dead silence. They all knew it was impossible to throw the rope up high enough to reach the top of the chimney; or if they could, it would hardly have been safe. They stood in silence and dismay, unable to give any help or think of any means of safety.

And Tom's father. He walked round and round the little circle, the dizzy height seeming every moment to grow more fearful, and the solid earth further and further from him. In the sudden panic he lost his presence of mind, and his senses almost failed him. He shut his eyes; he felt as if the next moment he must be dashed to pieces upon the ground below.

The day had passed as industriously and swiftly as usual with Tom's mother at home. She was always busily employed for her husband and children in some way or other; and to-day she had been harder at work than usual, getting ready for the holiday to-morrow. She had just finished all her preparations, and her thoughts were silently thanking God for her happy home and for all the blessings of life, when Tom ran in; his face was as white as ashes; and he could hardly get his words out. "Mother! Mother! he canna get down."

"Who, lad? Thy father?" asked his mother.

"They've forgotten to leave him the rope," answered Tom, still scarcely able to speak. His mother started up horror-struck, and stood for a moment as if paralyzed, then pressing her hands over her face, as if to shut out the horrible picture, and breathing a prayer to God for help, she rushed out of the house.

When she reached the place where her husband was at work, a crowd had collected round the foot of the chimney, and stood there quite helpless, gazing up with faces full of sorrow. "He says he'll throw himself down," exclaimed they, as Mrs. Howard came up. "He is going to throw himself down."

"Thee munna do that, lad," cried the wife, with a clear, hopeful voice; "thee munna do that. Wait a bit. Take off thy stocking, lad, and unravel it, and let down the [illegible] Jem!"

The man made a sign of assent, for it seemed as if he could not speak; and, taking off his stocking, unraveled the worsted thread, row after row. The people stood round in breathless silence and suspense, wondering what Tom's mother could be thinking of, and why she sent him in such haste for the carpenter's ball of twine.

"Let down one end of the thread with a bit of stone, and keep fast hold of the other," cried she to her husband. The little thread came waving down the tall chimney, blown hither and thither by the wind, but at last it reached the outstretched hands that were waiting for it. Tom held the ball of string, while his mother tied one end of it to the worsted thread. "Now pull it up slowly," cried she to her husband, and she gradually unwound the string as the worsted thread gently drew it up. It stopped—the string had reached her husband. "Now hold the string fast, and pull it up," cried she, and the string grew heavy and hard to pull, for Tom and his mother had fastened the thick rope to it. They watched it gradually and slowly uncoiling from the ground, as the string was drawn higher.

There was but one coil left. It had reached the top. "Thank God! Thank God!" exclaimed the wife. She hid her face in her hands in silent prayer, and tremblingly rejoiced. The rope was up. The iron to which it should be fastened was there all right; but would her husband be able to make use of them? would not the terror of the past hour have so unnerved him as to prevent him from taking the necessary measures for his safety? She did not know the magic influence which her few words had exercised over him. She did not know the strength that the sound of her voice, so calm and steadfast, had filled him with—as if the little thread that carried the hope of life once more, had conveyed to him some portion of that faith in God which nothing ever destroyed or shook in her true heart. She did not know, that as he waited there, the words came over him, "Why art thou cast down, O my soul? and why art thou disquieted within me? Hope thou in God." She lifted up her heart to God for hope and strength. She could do nothing more for her husband, and her heart turned to God and rested on him as on a rock.

There was a great shout. "He's safe, mother, he's safe," cried little Tom. "Thou'st saved me, Mary," said her husband, folding her in his arms. "But what ails thee? Thou seem'st more sorry than glad about it." But Mary could not speak, and if the strong arm of her husband had not held her up, she would have fallen to the ground—the sudden joy, after such great fear, had overcome her. "Tom," said his father, "let thy mother lean on thy shoulder, and we will take her home." And in their happy home they poured forth their thanks to God for his great goodness; and their happy life together felt dearer and holier for the peril it had been in, and for the nearness that the danger had brought them unto God. And the holiday next day—was it not indeed a thanksgiving day?

[illegible]

You are always welcome to call upon God; over the throne of grace is written—"Behold, now is the accepted time."

Bills.—We are now sending bills to those who owe for the Sabbath Recorder. Although these bills are mostly for small amounts, yet in the aggregate they make a large sum, the want of which is seriously felt by the establishment. A prompt and general response to the call for what is due us, would be a most welcome relief.

A SUBJECT FOR CONSIDERATION.

We have, sometimes, doubted whether it were worth the trouble to say any thing about a certain practice, which obtains in many of our churches; perhaps, in the great majority of them. It may be, that pastors themselves will not thank us for agitating the subject, inasmuch as a change of the prevailing custom would only render their duties still more onerous. Indeed, we have no doubt, that they would, generally, prefer to have nothing said about it, since it is a thing which appears not to be productive of any serious evil, and may be regarded merely as a question of order, rather than as one vitally affecting the welfare of the cause. Well, be it so; but if such be the nature of the question, we infer that a few thoughts upon it can do no great harm, and if any of our readers think them silly, they are welcome to laugh at them.

The practice to which we refer, is that of setting aside the Pastor, at the business meetings of the church, and appointing some one of the members to serve in the capacity of Moderator. We look upon it as a violation of gospel order. If the Pastor is not the chief officer of the church, we have greatly erred in our understanding of the New Testament. He is represented as taking the "oversight" of the flock, (1 Pet. 5: 2,) as "ruling over" it, (Heb. 13: 7, 17, and 1 Tim. 5: 17,) as being "over it in the Lord," (1 Thes. 5: 12.) The epistles to Timothy and Titus abound with instructions as to their "behavior in the house of God," which proceed on the supposition that they were presiding officers in the churches for which they respectively ministered. When the Apostle directs them what to do with heretics, (Tit. 3: 10,) how to ordain elders, (Tit. 1: 5, and 1 Tim. 3: 1–7,) what kind of deacons to secure, (1 Tim. 3: 8,) how to deal with widows in securing for them the charities of the church, (1 Tim. 5: 3–16,) and so on; he treats of things which involve the *discipline*, or *business*, of the church, and seems to take for granted, that in their character as presiding officers they will bring these matters of business before the churches, and see that they are attended to in an orderly way. If they were not Moderators, by virtue of their office as Pastors, it is inconceivable why he should have addressed such instructions to them. The epistles to the churches of Asia were addressed to the "Angels" (that is, Pastors) of the churches. The evils which Jesus Christ sets forth as existing in some of those churches, involve matters of *discipline*—just such *business* as comes before churches at what are called "church-meetings." If the "Angel" was not the presiding officer—the Moderator—it is somewhat singular that John was commanded to direct the epistle to him. It should rather (as it seems to us) have been directed to the person who sustained that office.

It is conceded, we suppose, that the Pastor is entitled to take the "oversight" of the church in dispensing religious instruction. Preaching sermons, visiting the sick, comforting the afflicted, admonishing those that err, guiding the inquirer, visiting from house to house—these are duties which are devolved upon the Pastor as his appropriate work, and he is expected, not only to take the lead in them, but to bear, in a great degree, the burden of them. These are duties, which are looked upon as more particularly *spiritual*, while matters transacted at church meeting are regarded as belonging to a different department, with which the Pastor, as such, has nothing to do. But we are not aware of any Scriptural authority for such a distinction. The spiritual welfare of the church consists in its discipline, as much as in any thing else. Indeed, there can be but little business properly before any church, which does not in a greater or less degree, affect its spiritual condition.

It may be objected to our view, that many Pastors are not qualified to act as Moderators—that they do not possess a tact for business—do not understand parliamentary forms—and that some of the private members are, in these respects, better fitted for the office than the Pastor. We apprehend, that a vain passion for what is called the "*parliamentary*" style of business, is one great cause of this innovation upon gospel order. The simplicity of the kingdom of Christ does not suit those who have been accustomed to the proceedings of legislative bodies, and so they aim at imitating them. But however true it may be, that ministers are unacquainted with parliamentary forms, they ought to be supposed to have a good acquaintance with church order as developed in the New Testament. It is, or ought to be, a part of the Pastor's study to investigate the principles upon which the primitive churches were constituted, and the order in which their business was done. And is it too much to assume, that one who makes such things his study is better acquainted with them than those whose time is mainly occupied with other pursuits? We do not believe, that the most accomplished civilian, with all his expertness in parliamentary forms, is as well qualified to preside over the meetings of a Christian church as a plain gospel minister, whose whole knowledge of business is derived from the Scriptures of the New Testament. Accordingly, our conviction is, that the Pastor is, and of right ought to be, by virtue of his office, the Moderator at all church meetings. If he is Pastor of the church, he is Pastor of all its meetings.

We do not suppose, that the practice we have animadverted upon has, so far as our people are concerned, originated in any desire to rob the pastoral office of what is due to it. And for the most part, our pastors themselves are so well satisfied with any arrangement that relieves them of a part of their burdens, that they choose to keep silence on this question. As long as no great abuses grow out of the practice, they probably think well to let it rest. But for our part, we cannot help feeling that there is something a little out of joint, when the proceedings of a church meeting fail to show who is the Pastor, or whether there is any at all. T. B. B.

EDUCATION.

"What sculpture is to a block of marble, education is to a human soul," is a remark of the SPECTATOR, and should ever be borne in mind. The philosopher, the mechanic, the man of genius, together with the wise and good, often lie hid and concealed for years, which a proper education at a proper time would have brought to light at an early day, and thus secured its advantages, not only to themselves but to others.

How anxiously and ardently do parents toil to provide for the future wants of their children, neglecting to store their minds with useful knowledge, and forgetting that the industrious and virtuous education of their children is a better inheritance for them than a fortune, secured "by public stocks," or a large "landed estate." "To what purpose," said Crates, "to heap up great estates, and have no concern about what manner of heirs you leave them to."

But little thought, or care, is bestowed by parents in selecting the books from which the great mass of children receive their early impressions. As you enter the railroad car or the steamboat saloon, you will observe almost every gentleman or lady busily engaged upon some novel fresh from the pen of a "Dickens" or "Eugene Sue," containing some deep-laid plot, filled with romantic incidents, and ending with an awful tragedy. These works are purchased as traveling companions, but are carried home to become the parlor literature, and works for the centre table. It is said that Zenophon commended the Persians for the prudent education of their children, who would not suffer them to effeminate their minds with amorous stories and idle romances, being sufficiently convinced of the danger of adding weight to the bias of corrupt nature.

The sciences to which their attention should be chiefly directed, are natural and moral philosophy, for these images and beauties both of nature and virtue; they shew us what we are, and what we ought to be; to which we may add mechanics, agriculture, and navigation. Most other studies come in as diversions, to recreate the mind and expand its powers, thereby furnishing the adjectives of thought, with which to embellish the language of life.

Many parents are apt to think that if their sons have completed a few terms at some of our higher institutions of learning, and have obtained perhaps a graduate's diploma, therefore they are qualified to fill any or all of the important stations in the political or commercial world; or should their daughters have attended a boarding school sufficiently long to be enabled to speak a little French, and understand how to dance a polka, and know how to behave in the presence of great persons, then they are prepared to fill those high and noble positions in society which give tone and spirit to the age; "while," says Dr. Fuller, "a good education is necessary to a sound judgment and good manners."

In some there is such a natural barrenness, that like the sands of Arabia, it would be a herculean task to cultivate or improve them to any great extent; and there are others, who will never learn any thing, because they understand every thing at once; while there are others who seek diligently for that pure fountain of knowledge that will be valuable in after life. Many there are, who in consequence of inability are deprived of those inestimable privileges enjoyed by the rich; yet not a few of these go a great way in the path of learning by themselves. Heraclitus, the philosopher of Ephesus, had no master or tutor, but attained to great knowledge by his own private study and diligence. Elihu Burrit, the learned blacksmith, has by his own industry become celebrated as a man of letters. Though these should be no rule, yet they are examples to those who have not the advantage of schools.

While, on the one hand, we see that

> "Shallow draughts intoxicate the brain,"

yet, on the other,

> "That drinking largely sobers them again."

So that those who are the best educated, either by their own industry unaided, or otherwise, are the best calculated to produce a salutary influence, and be of service to the world. In the language of Milton, "The end of learning is, to know God, and out of that knowledge to love him, and to imitate him, as we may the nearest by possessing our souls of true virtue." H. H. B.

Christians in Madagascar.—In the chief city of Madagascar and its immediate vicinity, there are a thousand persons who are known openly to be the disciples of Christ. These all regularly attend divine worship on the Sunday and during the week, sometimes by day and sometimes by night. Besides these, considerable numbers are known in other places. Many of them are judicious and prudent men, holding very important offices on account of their acknowledged integrity. During the long-continued persecution, at least a hundred persons have suffered death, besides a still larger number who are loaded with chains or living in exile. Notwithstanding the unfavorable circumstances, the number of converts continues to increase, and persons of high rank and noble birth are among the most zealous Gospel laborers.

REVIVAL AT CLARKVILLE, N. Y.

CLARKVILLE, Jan. 18th, 1855.

To the Editors of the Sabbath Recorder:—

Presuming that intelligence concerning the prosperity of the cause of Christ would interest all the lovers of Zion who read the *Recorder*, I forward to you the following brief statement of the visitation of God's saving grace and power among the inhabitants of this village and surrounding community. In this work the Seventh-day Baptist and First-day Baptist churches in this place have been united. The first indications of increasing interest were witnessed in our weekly prayer-meetings; which were increased as the interest grew. About eight weeks since, we commenced preaching evenings, which was continued nearly every night for seven weeks; which, together with—in a very good degree—the united labors of the members of both these churches, under God's great blessing, has resulted very encouragingly. The first Sabbath in January I had the happiness of burying in baptism into the likeness of the Saviour's death, fifteen willing candidates; nineteen have also been baptized into the fellowship of the Baptist church; and there are others who will go forward soon. To God, from whom all blessings flow, we would ascribe all the praise. J. CLARK.

MISSIONARY CORRESPONDENCE.

Within a few days past, a letter has been received from Bro. W. M. Jones, dated Jaffa, Palestine, Nov. 22. It gives but little additional intelligence. Bro. Saunders had been sick, and Bro. Jones had spent several days in ploughing and sowing wheat for him. He also expresses a greater desire for the salvation of Jews and Mahomedans.

A letter has also been received from Bro. S. Davison, giving an interesting account of the cause in Illinois. He is now under appointment as missionary of the Society. We give his letter entire, for the information of all our brethren. J. BAILEY, Cor. Sec.

FARMINGTON, Ill., Jan. 3, 1855.

To the Executive Board of the Seventh-day Baptist Missionary Society:—

DEAR BRETHREN,—I supposed your quarterly meeting was later in the month, until I got last week's *Recorder*, when it was too late to forward my Report in season for your meeting at New York.

I have supplied the church in Farmington weekly from the first of August until some time in October, when I received your [illegible] of appropriation and appointment as your missionary in Illinois. Since then I have regularly supplied the churches at Southampton and Farmington alternately. At Southampton I preach twice on the Sabbath regularly. At Farmington we are so located that we cannot get a congregation together twice on the Sabbath. I frequently preach somewhere on the first day of the week, occasionally at other times. I expect to go hereafter once a month to Camp Grove, and brother Anthony Hakes once a month. During the quarter I have visited the brethren at Glen Creek, near Lewiston, once. We have in the vicinity of Farmington two adult male persons candidates for baptism. We have now no water suitable for immersion; I accordingly procured the privilege of using the baptistry of the Baptist church at Canton, but when the time came, our friends preferred waiting for water in our vicinity. In this vicinity there are several persons who have embraced the Sabbath; one a Baptist minister, with whom I became acquainted four years ago. He and his wife, I think, will be steadfast observers of the holy institution of Jehovah. He has been a Baptist colporteur. There are in this vicinity twenty families of Sabbath-keepers; seven families near Lewiston; seventeen at Southampton; and six at Camp Grove; in all, sixty, on my field of labor, extending on a zigzag line of more than sixty miles.

I recently received a letter from Elder Lewis A. Davis, who with a number of other families resides in Clinton county, Iowa. In his letter he says: "On Sabbath day, 9th of December, I had the pleasure of immersing five persons in a small stream that runs through our settlement. We have in these parts twenty-one persons, Sabbath-keepers, who are, or have been, members of churches, and those five who have been recently baptized; and one family of first-day people who have declared their intention to keep the Sabbath. We are making arrangements to organize a church, which will perhaps take place about the middle of next month, (January.) We shall be happy to see you here about that time. We have meetings from house to house every Sabbath day."

I lately had a visit from Bro. William Davis, of Sullivan, Sullivan Co., Indiana, and a letter from him since his return. When on my Bible agency, I visited them, and preached for them. They have been members with the church of the Disciples for several years, without molestation, but during the past year they have been publicly attacked by their preachers, and accused of being stumbling-blocks, because they work on first-day when their circumstances require it. He therefore publicly withdrew his membership, and they now request me to inquire if they can be supplied with Seventh-day Baptist preaching at least a part of the time. Can the Board give them any encouragement?

The church and congregation at Southampton have purchased a building, formerly occupied as a dwelling house, and have now fitted it up for a meeting-house and select school, until they can build a new one.

The cause, on the whole, is making some progress, and needs more labor than I can perform. Yours affectionately, S. DAVISON.

LIQUOR PROHIBITION IN NEW YORK.

In the Legislature of New York, that portion of the Governor's Message which relates to Intemperance was referred to a Committee, by whom a majority and a minority report have been presented.

The minority think that the laws now on the statute book, if enforced, would to a great extent do away with the more public evils of intemperance; at any rate, that a bill might be framed which would meet the exigencies of the case, and yet not be obnoxious to the objections that arise against the majority bill—which would define what is a common drunkard, punish him, and forbid the sale of liquor to him; prohibit the sale of liquors to minors and women; specify the manner ni which liquor might be sold to be drank on the premises of the seller; impose penalties for the adulteration of liquor, &c.

The majority present an out-and-out prohibition bill, of which they give the following analysis:—

Only two principles enter largely into it. These form its basis, and pervade its entire frame-work. They are, first, *prohibition*, with its exceptions; and second, *search*, with its attendants—seizure, forfeiture, and destruction. These embodied, and all else in the bill is mere detail, so arranged as to form a simple and direct plan for carrying them out.

The ordinary modes of procedure are made applicable, to the extent they can be consistently with the idea of a somewhat summary proceeding. Two processes are authorized—one for the arrest of any person violating the act, and the other for searching for and seizing any liquor kept in violation of any provision thereof. Neither can issue except upon oath, establishing probable cause—the same required in all other criminal cases as the basis for issuing warrants. The execution of these processes is the same as in other criminal cases. The person arrested and property seized are brought into Court, and a trial thereupon is had, differing in no respect from the ordinary mode, except the preliminary examination is waived, either party having a right to adjournment for a reasonable time to prepare for trial. If a trial by jury is desired, it must be demanded at the time of joining issue. After trial, an appeal may be taken to the same tribunal, in substantially the same manner, and conducted as now provided. The domicil of the citizen cannot, by the provisions of the bill, be searched, until after a regular trial and conviction, and then only for the period of one year thereafter.

Your Committee have now briefly described the entire proceeding under the bill, except a few collateral provisions, introduced to aid in detecting violations, and to enforce the penalties imposed. The remainder is devoted to defining the duties and fixing the fees of officers.

ROMANISM AND COMMON SCHOOLS.

In the Legislature of New York, on the 15th of January, Mr. Whitney presented the following petition, which is numerously signed. It is understood that quite a number of these petitions have been circulated, received signatures, and are now in the hands of Senators, who will present them as occasion offers:—

To the Honorable, the Legislature of the State of New York:

The undersigned, voters of the City and State of New York, beg leave respectfully to represent to your Honorable Body, that they view with deep alarm the pernicious influences that are brought to bear upon the minds of our youth, in the Common Schools of the State, and especially in the City of New York, through the introduction of sectarian teaching, the exclusion of the Holy Bible, the suppression of historical truths, and the inculcation of ideas at variance with the principles of American Republicanism.

Your petitioners aver as a fact, that Roman Catholic teachers are employed in some of the public schools of this State, to the exclusion of Protestant teachers; and when it is known that the inculcation of the peculiar tenets, superstitions and servility to the priesthood of that faith, is declared by them to be an indispensable ingredient in the education of the young, the fact is self-evident, that such teachings are employed in utter disregard of all rules to the contrary, and beyond the casual or indifferent scrutiny of those appointed to supervise these primary institutions of popular instruction.

That by this process, the common school fund, which is derived by tax from the whole people, but almost exclusively from Protestants, for the purposes of *literary* education among the rising generations, irrespective of creed, is perverted to *sectarian* and anti-republican uses; and that, while a participation in the use of this fund is denied to the schools of all other denominations of Christians, it is, in effect, not denied to the Roman Catholic.

This your petitioners declare to be an act of injustice toward the contributors of this fund, as well as dangerous to the best interests of the future of the State; they cannot believe that either the nature of the fund, or the interests of the State, will warrant or justify the application of any portion of the School money to sectarian instruction, yet they claim that, if any one religious sect is permitted to use this fund, either directly or indirectly, all other sects ought, of right, to enjoy the same privilege.

Your petitioners aver as a further fact, that some of the public charitable institutions in and near the City of New York are also under the control of the same anti-republican influences, and that persons of Protestant faith, who are, from necessity, compelled to take refuge in those institutions, are required to submit to the *regime* of Papal authority.

Your petitioners believe that the entire spirit of our free institutions, though in no sense sectarian, is distinctly and unequivocally anti-Papal, from the very nature of the fact that the Papacy is anti-republican; and the latter having declared itself openly hostile to the whole system of public instruction as carried on in this State, denouncing our Public Schools as "places of infidel education," it follows as a natural consequence, that it cannot become a disinterested dispenser of the Fund, or a suitable and impartial instructor of the rising generations under that system; and, as your petitioners believe further, that it is the duty of legislation to protect the said School Fund against every *covert*, as well as against every overt act of perversion or abuse, they earnestly pray your honorable body to pass an act: First, withholding the School money from all sectarian institutions; second, forbidding sectarian instruction in the Public Schools and Seminaries of the State; and, third, declaring the Holy Bible, as read by our forefathers, without note or comment, to be a standard reading-book in all those institutions of public instruction.

New Way to Raise a Church-building Fund.—The Prussian correspondent of the *Independent* says that the Roman Catholics in Muskau, a little town in Lausitz, desired to build a church, but having no means of their own, they have issued shares, varying in value from five silver grotiens to one hundred thalers. The following is a literal translation of the conditions upon which these shares are offered for sale in Berlin and other places. It is made from one of the bonds, which cost five silver grotiens, or twelve and a half cents:

"The holder of this bond has a share in the building of a Catholic Church at Muskau, to be erected for the honor of God, as well as in the fruits of Grace which are to proceed therefrom. Muskau, the birth-day of Mary, 8 September. [Signed by the Curatorium.]

"*Decree.*—The Catholic Church congregation at Muskau, by the grace of the most Reverend Lord Prince Bishop Henry of Breslau, being in possession of a pastor, a teacher, and a school-house, but without a house of worship, and being too poor to build one, propose to erect a church upon shares, and have accordingly made the following decree.

"§1. The capital necessary for the building of the church shall be derived from shares to be issued upon the Bank of Catholic Love and Charity.

"§2. The dividends will be paid to the holders when due, by the Almighty God, to whose glory and honor the building shall be constructed, (in accordance with Prov. 19: 17, and with Matt. 25: 40.) Also yearly, for all the shareholders, a sacred mass shall be offered, and the same shareholder shall be recommended to the intercession of the Virgin Mother of God, as the Patroness of the House of God about to be erected.

"§3. The payment of the shares, the congregation has entrusted to the Great Treasurer of Heaven and Earth, who, according to His wise and just account, will redeem at its full nominal value every share, either immediately, or upon the entrance of the possessor into Eternity."

National Popular Education.—The Board of National Popular Education held its [illegible] annual meeting in Hartford, Ct., on the 10th of January. From the Report presented on the occasion, the following statistics are gathered:—

Forty-four teachers were sent out during the year—more than one-half of them to places west of the Mississippi. Whole number sent out since the spring of 1847, 394. Number deceased, 17—of whom only four have died during the last three years. Returned 124—of whom 44 have gone back to the West to remain. Of the returned still in the East, several intend to go back this year. Now in the West, 297—of whom 105 are married—several of them still teaching, and all of them in positions of much influence and usefulness.

Of the teachers sent out, Vermont has furnished 103; Massachusetts, 99; New York, 71; Maine, 38; Connecticut, 32; New Hampshire, 30; and other States 21. There have been sent to—Indiana, 113; Illinois, 90; Missouri, 44; Wisconsin, 31; Iowa, 29; Michigan, 22; Ohio, 17; Oregon, 6; California, 5; Texas, 3; and the remainder to Western Pennsylvania, Minnesota, Kentucky, Tennessee, North Carolina, Mississippi, Alabama, and Arkansas.

Prospects in China.—*The Spirit of Missions* for Dec. says: "The last mail brings advices from Bishop Boone, dated Shanghai, 13th July, the tenor of which goes to strengthen the apprehensions which have, of late, been excited as to the tendencies of the present insurrection. The whole seems to be given up to the wildest and most deplorable anarchy, under rulers whose partial knowledge of the truth seems only to have added fuel to fanaticism, and who, at the same time, seem to be indisposed to any further friendly relations with foreigners. We have been slow to admit this view of the case, for there had been much in previous events to inspire hope; but recent developments have tended greatly to shake this confidence."

Missionaries.—Rev. J. L. Lyons, of Montrose, Pa., and Mrs. C. N. Lyons, of South Berwick, Me., for the Syria Mission; and Rev. J. A. Plummer, of South Berwick, Me., and Mrs. E. B. Plummer, of Bloomfield, N. J., for the Armenian mission, recently embarked at Boston for Smyrna. Dr. Nutting, of the Assyrian, and Messrs. Goodell, Parsons and Richardson, of the Armenian mission, arrived at Smyrna, Sept. 27, after a pleasant passage of forty-eight days from Boston. Rev. W. A. Macy sailed from Boston a few days ago for the mission at Hong Kong, China.

Geology.—The publisher of the *Literary and Theological Journal* has notified us that he intends soon to print in the form of a book those articles on Geology from which we have been copying for two or three weeks past, and that he would prefer not to have any portion of them copied into a newspaper. Of course we are bound to respect his wishes in the matter. Our readers must, therefore, wait the appearance of his book for the remainder.

Employment for the Poor.

The Address of the American and Foreign Emigrant Protective and Employment Society, has already produced its anticipated fruits. Numerous letters have been received within the last few days at the Society's office, requesting that portions of the surplus labor of our city may be removed into the neighborhood of the writers. These letters are on file, and open to the inspection of any disposed to examine them. The Board of Managers have to deplore an exhausted Treasury. One thousand dollars, placed in their hands, could be at once advantageously employed to defray the traveling expenses of suitable persons, desirous of obtaining employment, to the locations where their labor is desired and needed. It would undoubtedly be the best investment of charitable funds that could be made. In all cases the beneficiaries are required to refund the amount thus advanced out of their future earnings, and their employers are engaged to see that this is done. This very day a respectable American mechanic—a wheelright—applied to the Society for aid to remove himself and family to the country, where employment and a home awaited him, but the boon could not be granted him.

The managers take this opportunity of inviting the friends of humanity in the country to aid in this work of benevolence. The support of the destitute poor now in the city of New York who cannot be removed is taxing to the utmost the charity of the citizens. Let those communities where labor is wanted form Associations, collect funds, and remit them to the society, and the pledge will be given that, if not restricted to country or creed, careful selections will be made of moral and industrious persons to fill the stations to which they may be invited. A good opening is offered to those wanting employment who have means sufficient for their removal, of doing so, as in removing under the auspices of the society, care will be taken to prevent imposition or disappointment, and every facility and information will be extended to each.

MORTIMER DE MOTTE,
NEW YORK, Jan. 12. Cor. Sec.

Calico and Charity.—A New York lady who moves in a high circle, was desirous of giving a private party in such form as to benefit Mr. Pease's Mission at the Five Points. Accordingly she issued cards of invitation to her friends, accompanied with a notice that each lady in attendance would be expected to appear in a *calico* dress, which she was requested on the following day to send in for distribution among the poor women connected with Mr. Pease's establishment. The party came off on the evening of Jan. 15th, and was attended by about four hundred persons, the ladies, all but one, being dressed in calico. The next day those dresses were sent to Mr. Pease, who acknowledges through the daily papers the receipt of them, and estimates their value at $1,500.

Christian Review.—The "*Christian Review*" has been transferred from Messrs. Colby & Ballard to Rev. James J. Woolsey, 117 Nassau street, lately the Financial Secretary of the American and Foreign Bible Society. Rev. Drs. Turnbull and Murdock, of Hartford, are to continue as editors. A very strong list of contributors is published, comprising not only the leading minds of the Baptist, but of every denomination. Price, $3 per annum. The subjects treated of in the January number are, Dr. Schaff's Apostolic History, Modern Lyrical Poetry, Mental Philosophy, the Nazarenes, Party Spirit in America, the Noachian Deluge, and Divine Providence.

Debts and Expenses of New York.—The Mayor of New York, in a recent message, stated that the permanent debt of the city is $8,779,441, showing a decrease during the year of $460,246. There is also a funded debt of $1,154,000, payable in annual installments of $150,000. The amount raised by tax last year was $4,845,386 07. The amount to be raised in 1855 is set down at $5,918,693 25.

Departure of Missionaries.—The bark Storm sailed on Monday, Jan. 8th, for Hong Kong. The Rev. E. Wentworth, D. D., accompanied by his wife and son, is a passengre. He goes out to join the mission family in China under the care of the Methodist Episcopal Church.

"The Visitor."—Subscribers for the *Sabbath-School Visitor* will allow us to remind them, that now is the time to get up lists and send in orders for the year 1855. The February number will soon be issued; previous to which, those who desire to have complete files should make their wants known at this office.

The Protestant Church of France now mourns for M. Verney, the distinguished preacher in Paris, who has just died in Strasburg, to which place he had been called by the Presbytery of the Confession of Augsburg, to defend certain valuable privileges which the Protestant seminary had enjoyed for centuries, and which Jesuit influence wished to wrest from them. M. Verney had quitted the bar for the study of theology, was advanced in years, and was widely known in the great Parisian world. He died suddenly in his pulpit, after having finished an eloquent discourse.

It gives us pleasure, says an exchange, to make record of a revival of religion in the Baptist Church at Wakefield, R. I., of which Rev. N. A. Reed is pastor. Mr. R. writes that "God has been at work for some time, and more than forty are rejoicing in hope, twenty-three of whom I have already baptized; others are waking, and some inquiring. In another part of the town the second church are revived, and other congregations seem to be blessed."

One thousand Testaments were put in circulation at Ningpo, China, in a single day, at a literary examination in that city. There was no less than 6,000 or 8,000 literary men present, from all parts of the country.

The Treasury of the A. H. M. S. is still much embarrassed. Unless soon relieved, many of the missionaries must suffer, and the present scale of operations be materially reduced.

General Intelligence.

Abstract of Proceedings in Congress.

SECOND-DAY, JAN. 15.

In the SENATE, the joint resolution in favor of sending relief to the Arctic Expedition under the command of Dr. Kane, after a short debate, was passed. The annual ocean steam mail appropriation bill, which was defeated at the last session by the refusal of the Senate to concur in the recommendations of the Committee of Conference, was taken up, debated at some length, but finally postponed indefinitely. The rest of the day was spent upon the Judicial Reform bill, and in Executive Session.

In the HOUSE OF REPRESENTATIVES, a question of privilege in relation to the refusal of W. B. Chase to give testimony before the Select Committee appointed at the last session to investigate the subject of bribery in the House, was the subject of considerable discussion, after which the House went into Committee on the Pacific Railroad bill, debated the same, and then listened to a speech from Mr. Stephens, of Georgia, who labored to show the great superiority of slave-labor in Georgia, over free-labor in Ohio, and incidentally advocated the acquisition of Cuba. Mr. Boyce strongly opposed such acquisition.

THIRD-DAY, JAN. 16.

In the SENATE, the House bill for the sale of Rock Island, Illinois, came back with amendments, which were agreed to, and the bill passed. A bill making appropriations for works heretofore commenced in Maine, also passed. Mr. Seward presented a memorial from the survivors of the war of 1812, which was referred to the Committee on Pensions. The bill to change the manner of paying members of Congress, was taken up and discussed at length.

In the HOUSE, the Pacific Railroad bill came up in Committee of the Whole, and was debated at length by Messrs. Benton, McDougal and others, but no progress was made.

FOURTH-DAY, JAN. 17.

In the HOUSE, a bill appropriating $300,000 for the extension of the General Post Office, was passed. The bill to change the compensation and manner of paying members of Congress, was discussed; also, the Judicial Reform bill, which, after various motions, was finally postponed, and the Senate adjourned.

In the HOUSE, a letter was received from Rufus Choate, resigning his office as one of the Regents of the Smithsonian Institute. The Pacific Railroad bill was taken up in Committee of the Whole, and debated at length, Messrs. Bishop, Perkins, Mike Walsh, and others, participating in the discussion.

FIFTH-DAY, JAN. 18.

In the SENATE, the robberies and murders committed by the Indians on the Western frontier were the subject of a Message from the President. The subject of the Smithsonian Institute was brought up by Mr. Choate's letter of resignation, presented by the Vice-President, when several gentlemen took occasion to free their minds in regard to both the letter and its author. The letter was finally laid on the table. The Senate then adopted the bill remitting fines on passenger-vessels in certain cases of conflicting decisions. The Judiciary Reform bill was postponed to next Congress; and, after some talk on the Bounty Land Laws, the Senate adjourned.

In the HOUSE, Messrs. Upham, Witte, Taylor of Tennessee, Wells and Duryea were appointed a Select Committee to look into the affairs of the Smithsonian Institute, with the view of ascertaining and reporting whether they have been properly managed. The Pacific Railroad bill was taken up in Committee. After a lengthy debate, the enacting clause was stricken out of the original bill—Ayes 84, Noes 49. The Committee then rose, and the bill was reported to the House. An effort was made to lay it upon the table, but the House voted down the proposition—also, a motion to strike out the enacting clause. The Senate bill, providing for three separate roads, was offered as a substitute; but before any vote was taken, the House adjourned.

SIXTH-DAY, JAN. 19.

The SENATE passed the Cape Race Light-House Bill; also, the bill to pay Commodore Jones the sum of which he was deprived by the Court-Martial of 1851; also, the House bill for the relief of the heirs of Baron De Kalb. A joint resolution to establish a weekly express mail between St. Louis and San Francisco was read twice and referred to the Post Office Committee. After some talk at the Bounty Land bill, the Senate adjourned to Second-day.

In the HOUSE, leave was asked to introduce a bill for the suppression of Indian hostilities. The Pacific Railroad bill was then taken up, and many speeches made. The friends of the bill could not agree on a plan so as to secure unity of action. Some want three roads, others one grand trunk with two branches. The effort to commit the subject to a Select Committee of thirty-one, proposed by Mr. Benton, was rejected, and nothing definite agreed to.

SABBATH-DAY, JAN. 20.

The SENATE was not in session.

In the HOUSE, the Pacific Railroad Bill was the principal topic of discussion. Motions to lay it on the table, and to refer it to a Committee, were negatived. The question was then taken on the amendment providing for a Grand Trunk Central Railroad and Telegraph Line, from some point on the western boundary of Arkansas, Missouri or Iowa, between lat. 36° and 43°, with two branches, one to memphis and the other to some good point on Lake Superior. This amendment was adopted, 104 to 91, and subsequently the bill passed to a third reading, 104 to 97.

CALIFORNIA NEWS.—We have another week's intelligence from California, by the Northern Light, which arrived at New York, Jan. 15. She brought over half a million in gold. The miners are delayed in their operations by the want of water, and the effect of the long-continued dry weather is felt in all branches of business. Still, a cheerful feeling was prevalent throughout the community, and the disastrous results of the last drouth were not anticipated. We have an unusually large record of accidents and crimes. On the eve of the sailing of the steamer, it was announced by telegraph, in San Francisco, that the town of Vallicito was nearly destroyed by fire. In Southern California, there was a rumor of revolution in Sonora and Chihuahua, and from the well-known state of opinion with regard to Santa Anna in those Departments of Mexico, many were inclined to give credence to the report.

European News.

The steamer Canada, with European dates to Jan 6th, arrived at Boston on the 19th. The following summary embodies all the news:—

At Vienna, negotiations were pressed by the Western Powers, while Prince Gorchakoff asked for and obtained a fortnight's delay, to obtain instructions from his Government.

From Sevastopol comes the story that the Allies were to open a two-days' fire on the 25th, at the close of which they were to make an assault. Menchikoff, however, telegraphs, that up to the 26th nothing remarkable had occurred. Omer Pasha was ordered to the Crimea by the Sultan. The army was suffering greatly from wet weather, but reënforcements were arriving. Vigorous sorties continued to be made, resulting, as usual, in great loss to the Russians. The Czar's two sons, Michael and Nicholas, were to return to the Crimea on the 7th. Admirals Dundas and Hamelin were both in Constantinople on their way home. The feeling against Lord Raglan continues. Lord Cardigan had left for England, and Gen. DeLacy Evans had retired in disgust. The *Times* was attacking Lord Raglan vigorously on the ground of incompetency. At the latest accounts it considered the Marquis of Dalhousie to be the only man equal to the War Department. The Russians were advancing in Asia, and Trebizond was threatened. Mecklee Pasha had been appointed to the command of the army in Asia. In Spain the British meet with little encouragement in enlisting troops, and Switzerland has entirely refused to permit it. Italy is restless; there were riots in Carrara, and the theaters were closed in Brescia and Verona to prevent an outbreak.

"Murder Will Out."

The Troy *Whig* of Jan. 16th gives the particulars of the arrest of a man charged with murder committed ten years ago. It seems that in the summer or early fall of 1844, one Plumb Martin purchased of Mr. Van Rensselaer, the Patroon, a farm in the town of Grafton, Rensselaer Co., and soon after went on the land to cut wood. Elijah Smith, of the same town, was employed by Martin to cart the wood from the lot, in company with M., who was driving another team with loads of wood. While thus engaged on Thursday, Dec. 19, 1844, when near the house of Potter Maxon, on the turnpike, Martin and Smith were surrounded by a party of about fifty men, disguised as Indians. They seized the horses by the bits, and ordered the men to stop. Smith resisted, and jumped off his load with an axe in his hands, which he brandished in self-defense. He was immediately seized by the "Indians," who formed a ring around. Upon his offering further resistance, one of the "Indians" drew a pistol and shot him down. Smith fell mortally wounded, and was taken to a neighboring house, where he soon after died. Previous to his being taken to the house, the Indians dispersed.

The murder caused great excitement at the time throughout the State. It was thought to be the commencement of high-handed outrages, secretly determined upon by the Anti-Renters, to attain their ends. Efforts to ferret out the man who fired the pistol, led to the arrest and examination of several persons—all of whom were discharged. The examination of the accused lasted nearly two weeks before the Police Court of Troy. The District-Attorney, however, was, much against his will, finally induced to abandon efforts for the apprehension of the guilty party, as likely to prove entirely fruitless.

A personal or neighborhood quarrel has recently occurred in Grafton—the principal parties to which are Benajah Allen and Joseph A. Martin. Martin charges that Allen is the man who murdered Smith. Upon his affidavit, Justice Ransom, of Lansinburgh, issued a warrant for the arrest of Allen, and he was brought to Troy, and lodged in jail. He is about 40 years of age.

Wisconsin.

In his Message at the opening of the session of the Legislature of Wisconsin, Gov. Barstow says, that no State presents greater inducement to the various industrial classes than Wisconsin. The exports during the past year, including lumber and minerals, have exceeded the sum of $13,000,000. No State suffers less than Wisconsin from the effects of the commercial revulsion. The Governor represents the finances of the State to be in a flourishing condition, although it would appear that the expenses for the year 1854 were between thirty and forty thousand dollars more than any previous year, yet the aggregate, for general purposes, for that year was evidently some forty thousand dollars less than for 1853. This is accounted for by the fact that upward of $80,000 more than in any previous year for such purposes, were appropriated for the erection of a State Prison, Lunatic, Deaf and Dumb, and Blind Asylums—including the moderate appropriations made for the benefit of the State Agricultural and Historical Societies.

The School Fund is large, and the claim of the State upon the General Government has been amicably adjusted, and the State gains 125,000 acres for the School Fund. The educational interest should meet with every legislative protection. He cautions the Legislature to make provisions against the monopoly of the school lands by speculators. An instance of such attempted monopoly occurred during the year 1853, when a few parties combined, and bought in connection upward of 130,000 acres; and also during the last year, a single individual purchaser appears upon the books of the department as the proprietor of nearly 60,000 acres; and in sundry other instances similar operations, on a similar scale, have occurred.

Some time ago the project was started of erecting in New York a grand building for musical and operatic purposes. It was estimated that $200,000 would be ample for building such a house as would be an ornament to the city, and furnish suitable accommodations for the best Opera and Ballet. Of this amount, about $195,000 was subscribed and paid in. Instead of $200,000, by reason of extravagant management, the house has cost about $340,000, and the concern is saddled with a debt of about $150,000—of which $50,000 is pressing.

CURIOUS CASE.—A curious and romantic case was argued last week before the Surrogate of New York. It was that of the estate of Jeanne Dulux, formerly a French milliner in Broadway, and more recently a capitalist and money-lender in William-st., who died last autumn quite suddenly, though at an advanced age, leaving an estate worth not less than $100,000, accumulated by avarice, lucky investments, and shrewd management. This large property is claimed by one Ferrie, from Cincinnati, a hairdresser by trade, and apparently above fifty years old. He was brought up by Madame Dulux as her nephew, but now asserts that he was her son by an early marriage, which took place amid the troubles of the French Revolution of '93, and which she afterward concealed. That he really is her son, was clearly made out on the trial, but the Public Administrator, acting in behalf of unknown heirs, contends that it is not proved that he is her legitimate son, born in wedlock. The evidence goes back to the Revolution, and involves some complicated and curious points of French law and social usages.

LOSS OF A CHINA SHIP.—The clipper ship Tingqua, Capt. Whitmore, sailed from Shanghai for this port, Sept. 16. She struck on the outer shoal of Hatteras, on the night of the 12th inst., in thick weather, and was abandoned by the captain and crew twenty-four hours afterward. When they left, her stern was knocked off, and part of her bottom out. Capt. Whitmore and part of the crew arrived at New York, on Wednesday night, in the schooner R. L. Meyers, from Washington, N. C.; the remainder of the crew got on board two other schooners. The ship was a fine one, of 668 tuns register; was built in New Hampshire, in 1852, and was owned by and consigned to Oliphant & Sons, of this city. The vessel was valued at $45,000; freight about $20,000, and the cargo—consisting principally of teas and silks—at from $300,000 to $350,000. The ship and freight are insured in Wall-st. for $60,000. The greater portion of the cargo is insured abroad.

SUMMARY.

Commodore Vanderbilt has proposed to the Postmaster-General to establish a new line of ocean steamers between here and Liverpool, running every fortnight, alternately with the Collins line, so that there shall be a weekly mail service by American ships on this great international route. Mr. Vanderbilt offers to furnish large and swift vessels, and to receive from the Department only $16,000 for each trip, or some $4,000 less than the British Government pays the Cunard line, and not quite half what the Collins line receives under the existing contract.

The *Tribune* of the 13th, says: Many inquiries are made why good qualities of butter are so high in price at the present time. The reason is, that some six thousand firkins of butter have been put aboard vessels for California within the last thirty days, in this port, and some four thousand in Boston—making a total of over ten thousand firkins of sound quality, and good yellow color, the best in market. It is thought the present high price of butter diminishes the home demand, or consumption, fully one-half the usual quantity.

The South Carolina Legislature, at its last session, chartered a College for the education of Females. Petitions for the incorporation of a similar institution have been introduced into the Legislature. The petitioners ask that a fund be set apart from the proceeds of the sales of the swamp lands, and an institution be established under the fostering care of the State, which shall give to its daughters the same opportunities for acquiring a liberal education, that are now offered to its sons by the State University.

A dispatch dated Syracuse, Thursday, Jan. 11, 1855, says: An omnibus that runs between here and Manlius, containing twelve to fourteen passengers, was overturned when near this city—the horses taking fright and running away. A. W. Spencer, an esteemed and well known merchant of Cazenovia, was killed; and Levi Martin, of Syracuse; Eben Dowell, of Manlius; Jas. McCumber, of Cayuga; and J. C. Smith, of New York, were seriously injured.

The Reform Diplomatic Bill now before Congress proposes the following salaries for Foreign Ministers: Great Britain, $17,500; France and China, $15,000; Spain, Russia, Austria and Prussia, each $12,000; Brazil and Mexico, each $10,000; Turkey, Peru and Chili, each $9,000; Switzerland, Rome, Naples, Sardinia, Belgium, Holland, Portugal, Denmark, Sweden, the Argentine Republic, New Grenada, Bolivia, Eucador, Venzuela, Guatemala and Nicaragua, each $7,500.

The London *Standard* of the 22d of December says: "Miss S. Stewart has concluded an arrangement with her trustees by which the sum of $10,000 is given to endow an Episcopal church at Port Glasgow, securing £300 a year to the rector and £100 for a curate. A magnificent church, having chancel and nave, will be finished by Whit-Sunday, 1856, by the same lady, which will cost her £5,000 to £6,000 additional."

The Washington *Globe* says that Major Geo. Bonn, chief of the staff of the British army, who, on the 5th of November, was killed in the engagement before Sevastopol, was one of the officers severely wounded at the battle of Bladensburg in 1814. He remained several weeks in Washington and Georgetown, during which he received many kind attentions from the citizens. He was a Scotchman by birth.

On the 10th inst., two valuable diamond pins were stolen from the store of Messrs. Tiffany & Co., in Broadway, which, together, were valued at $4,000. The robbery was adroitly effected, in the presence of several of the best clerks, whose attention the thief managed for a moment to divert. Officer Bowyer was set upon the track of the missing property and managed to obtain the restoration of both diamonds.

We have seen, within a day or two, says a New York paper, several specimens of Photographic Copying of Bank Notes, which, though not of such perfect execution as to deceive even a novice, are yet enough to excite grave apprehensions as to the influence of the new art in aiding counterfeiters.

The Milwaukee *Sentinel* says that Judge Miller and District-Attorney Sharpstein have been arrested, and held to bail in the sum of $5,000 each, to appear before the County Court on the first Monday of February, and answer the suit brought against them by S. M. Booth, for false imprisonment.

The Detroit *Tribune* of the 15th, says that a Miss Gibson, from Maysville, Ky., passed over the river on that day, having arrived in safety by the underground railroad from Toledo; and adds that: "What makes this case one of unusual interest is the fact that Miss G. is as white as any of our lady readers who will con this paragraph. Unless informed of the fact, no one would have the remotest suspicion that she had a drop of negro blood running in her veins. Her eyes are blue, her hair brown, her complexion fair and clear. She is very intelligent, and her appearance really prepossessing."

The Newark *Eagle* says that the bill to supress intemperance in New Jersey, introduced in the House of Assembly, is similar to that of last year. The bill is to go into effect on the 1st of December, 1855, provided that at the annual fall election the people may express their assent or dissent to it by ballots; and if a majority of ballots shall be found by the State canvassers against it, the law shall not go into effect.

Sympathy for the unemployed poor appears to be thoroughly aroused in New York. The officers of the Association for Relieving the Condition of the Poor, announce the amount of relief and appropriations for the month of December last as $15,133 30, which sum has been distributed among 4,279 families, embracing 17,264 persons. The Soup Houses are daily distributing nourishment to thousands.

Alderman Fox offered a resolution to the Board of Aldermen of New York on Thursday, that in consequence of the large number of pilfering and begging children kept from the public schools, by reason of their not having clothes, that a Special Committee be appointed to take into consideration the establishment of Ragged Schools, or recommend measures whereby said children may be educated. This resolution was immediately adopted.

Intelligence from Mexico, seventeen days later than previously received, has come to hand. Santa Anna still holds his power, and, according to the journals, is likely to hold it forever. The rebels everywhere flee before his arms, and glory follows in his footsteps. The Indians still continue their inroads in Sonora and other northern territories, and highway robbers abound on the great roads, especially in the West.

Three New London vessels lately obtained thirty thousand seals in the Ochotsk Sea, and together with the oil they secured in the voyage, their cargoes were valued at $130,000. One of these vessels was absent from San Francisco less than six months, and yet her cargo is valued at $60,000.

The bark Emily Banning, of Wilmington, Delaware, now at the Atlantic dock, Brooklyn, is receiving on board three of the Nautilus Submarine Company's diving apparatus, etc. She is to sail in a few days for the Pacific Ocean, on a pearl fishing expedition.

Mrs. Pope, widow of the late Rev. Mr. Pope, who was for many years the pastor of the Congregational Church in Spencer, completed her 100th year on the 9th ult. She enjoys most excellent health, reads without glasses, and converses freely upon the events of the Revolution, which she well remembers.

Captain Ethan A. Allen, the last surviving son of General Ethan Allen, of the American Revolution, died at his residence in Norfolk Co., Va., on the 6th inst., in the 77th year of his age. He was born in Vermont, graduated at West Point, entered the United States Army in 1804, and left it when the army was reduced in 1821.

The Ulster *Republican* announces the death of John Van Buren, a resident of Kingston, and a prominent member of the Bar of Ulster County. He was 57 years of age, and, with one exception, the oldest lawyer in the county. He has been a member of the State Legislature and of Congress.

J. B. Gough, the celebrated temperance lecturer, now in Europe, has received an invitation to visit Australia. A large sum, it is said, has been promised him by way of remuneration. It is supposed he will be induced to go.

The Jury, in the Supreme Court at Boston, in the case of Miss Emmons against the city, for damages received by falling through a coalhole on the sidewalk, gave a verdict in favor of the plaintiff, and fixed the damages at $4,000.

The telegraph brings us some particulars of a serious riot on the Buffalo and Brantford Railroad on Friday, Jan. 19th. One person was killed, and several were wounded.

The Vermont *Chronicle* says that only five hundred out of the forty or fifty thousand clergymen there are in the United States, received the degree of D. D. last year.

The Presbyterian Church in West 13th street, New York, under the charge of Dr. Burchard, was destroyed by fire on Monday morning, Jan. 8th.

A dispatch dated Milwaukee, Monday, Jan. 15, 1855, says: S. M. Booth has been found guilty of assisting the escape of the fugitive slave, Glover.

The *Fireside Journal* is a new weekly paper at Boston, under the editorial care of Elizur Wright, and full of ability, life and interest.

A Prohibitory Liquor Law was reported in the lower branch of the New Jersey Legislature, Jan. 16th.

A shock of an earthquake was experienced in different places in New Hampshire and Vermont, Jan. 16th.

There are thirty Americans in Berlin, Prussia, attending the lectures of the University.

Sixteen newspapers have been suspended in San Francisco.

New York Markets—January 22, 1855.

Ashes—Pots $6 75; Pearls 7 25.

Flour and Meal—Flour 8 50 a 8 75 for common to good State, 8 75 a 9 18 for Michigan, Indiana, and Ohio, 10 50 a 11 50 for extra Genesee. Rye Flour 6 50 a 7 50 for fine and superfine. Corn Meal 4 75 a 4 81 for Jersey.

Grain—Wheat 2 05 a 2 12 for Western mixed, 2 28 a 2 32 for white Ohio, 2 55 a 2 60 for white Genesee. Rye 1 36 a 1 39. Barley 1 25 a 1 38. Oats 52 a 54c. for Jersey, 60 a 62c. for Western. Corn 1 04 a 1 05 for Western mixed. White Beans 1 56 a 2 00.

Provisions—Pork 13 00 for new prime, 14 25 for new mess. Beef 5 50 a 7 00 for country prime, 8 50 a 11 00 for country mess. Dressed Hogs 6½c. Lard 10c. Butter 11 a 18c. for Ohio, 18 a 24c. for State. Cheese 9½ a 10½c.

Hay—94c. a 1 00 per 100 lbs.

Lumber—15 00 a 15 50 for Eastern Spruce and Pine.

Potatoes—2 50 a 2 75 per bbl. for Western reds and pinkeyes, 3 00 a 3 50 for Mercers and Carters.

Seeds—Clover 10½ a 12c. Timothy 2 87 a 3 00 per bushel for reaped. Flaxseed 1 85 for 56 lbs.

Tallow—12½c. for Butchers' Association.

☞ We have stated it as our opinion, that the hard times, the bankruptcies and failures, the disorganization and suspension to so great an extent of productive industry, was caused mainly by an excess of the debt system—that these consequences were the natural and inevitable results of the causes referred to. The debt system prevails almost universally. It is blended and interwoven with nearly the whole business of the country, and has become so far a matter of habit and usage, that it is extremely difficult to carry on any kind of business without becoming involved in it. Our importers buy goods in Europe on credit; the country merchants buy of the importers on credit, to sell in turn to consumers on credit; the produce of the farmer is brought to market on credit; in short, it is but one successive chain of debt, debt, debt. In addition to these, we have a debt system by law established, in the shape of chartered companies, which are authorized to deal in debt, and draw interest on their debts, thus bringing the credit of the State and the force of law to uphold and extend the system.

One of the natural results is, that individuals and communities buy and consume faster than they produce and sell. This brings embarrassments, bankruptcies, failures, loss of confidence, stagnation of business, distress, *hard times*. We are now in one of these crises. The better opinion seems to be, that we have 'touched bottom'—that there will be a gradual rise or improvement from this time. The arrival of gold from California is now greater than the export to Europe. If this continues, we shall have a certain improvement.

It would be the part of wisdom to provide, if possible, against the recurrence of this condition of things. How is this to be done? The only effectual—indeed, the only possible—way of preventing a recurrence of these evils, is to make a change from the universal debt system to the "pay-as-you-go" system, by all—Governments, States, corporations, companies, and individuals. This may be much easier said than done; yet by resolution and perseverance it can all be brought about. The General Government has set the example, in carrying on all of its collections and disbursements on the cash system, in what is called the constitutional or sub-treasury system. The collection and disbursement of the United States revenue in cash, instead of in paper promises, has exerted an immense checking and balancing influence upon the whole business of the country. If it has not been sufficient to prevent excess, it has greatly diminished it, and arrested the inflation much sooner than it would otherwise have been done; and the same influence will assist to bring on a substantial reaction and revival. This influence having been found to be so good, we should go further in the same direction, and establish the cash system for the States, cities, corporations, companies, and individuals. By this means we shall establish a system of business that will be solid and uniform, and that can be depended upon. This will be particularly beneficial to the industrious and middle classes, or those with moderate means.

* *

MARRIED.

In Genesee, N. Y., on the 1st inst., by Eld. Lemuel Andrus, Mr. ALBERT K. CRANDALL to Miss LOVISA E. MAXSON.

In Williamstown, N. Y., Jan. 16th, by Rev. S. P. Gamage, Mr. C. D. POTTER, M. D., of Adams Center, N. Y., to Miss ELECTRA AYERS, of the former place.

In Brookfield, Madison Co., N. Y., Jan 16th, by Eld. Joshua Clarke, Mr. CHARLES BEACH to Miss LYDIA LADD, both of the above place.

DIED.

At Nassau, on the 4th inst., Mr. ALPHEUS O. BURDICK, formerly of Berlin, in the 59th year of his age.

At his residence in Stonington, Ct., on First-day, January 7th, BENJAMIN BURDICK, aged 78 years, 4 months, and 18 days. He leaves an aged companion and six children to mourn his loss. But their loss is his gain. Sermon on the occasion by Eld. A. B. Burdick; text, Job 14: 14—"If a man die, shall he live again?"

In Verona, N. Y., on the 10th inst., Mrs. DELANA BURDICK, wife of Royal Burdick, aged 35 years and 6 months. Consumption had long wasted her frame, and during the last few months her sufferings were intense; but she felt that for her "to die was gain." She *was* a member of the Seventh-day Baptist Church of Otselic, but *is*, we trust, joined to the church triumphant in heaven, where "the *weary* be at rest."

P. P. C.

At Unadilla Forks, Jan. 16th, of consumption, Mrs. MARIETTE GREEN, aged 43 years. Sister Green professed religion about twelve years since, and although her mind was much clouded during most of her last illness, yet she left her friends the comfortable hope, that her mind became clear, and that she took her leave of earth in peace.

J. C.

JOHN O. STERNS, Superintendent.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 50 cents for a single copy; 35 cents per copy by the dozen. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of FRANCIS C. WOODWORTH, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year*.

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83⅓ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's postoffice, is only *six cents a year*.

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

☞ The publishers of such newspapers as receive this notice, are requested to give the foregoing [illegible] (not including this notice) two or three insertions, the first insertion in their literary department. To those who comply with this request, the undersigned will send one copy of *Woodworth's Youth's Cabinet* for two years, or two copies for one year, [illegible] of the publisher respectively. D. A. WOODWORTH.

Miscellaneous.

The Birth-Day.

BY GRACE DE LA VERITE.

There is a story told of some little girls, who, wishing to give their mother a pleasant surprise on her birth-day, decked her bed on the preceding eve profusely with flowers, the exhalations of which proving too powerful for her, she was found in the morning—the anticipated morning of joy—a corpse!

Two little maids in council sat quite gay,
Their little fingers how they should employ,
So to give the greatest joy
To their sweet mother on her next birth-day.
"With berries bright, and flowers," they said, "at night,
Our mother's bed we'll deck where she's asleep;
But our secret let us keep;
In morning it will give her such delight."

Then arches, festoons, wreaths of every shade,
Of flowers of gorgeous hues, they swiftly raise;
These fair forms receive much praise,
But fairer she who underneath was laid.
Now 'neath the leaves of these false flowers there lay,
Like malice hidden by the flatt'ring tongue,
Juices poisonous and strong,
Which darkly working held a deadly sway!

O! little ones, ye knew not of the harm
Which lurks beneath the fairest, softest form;
Nor had heard that the wild storm
Is oftentimes preceded by a calm.
O! little ones, ye knew not much of grief,
When ye arrayed the parent couch with flowers,
Now, how sad will be long hours!
But motherless! your pleasures will be brief!

Fair children, wake ye never up from sleep!
From this first, endless sorrow be ye free,
And no morrow ever see!
Why should such tenderlings wake up to weep?
For softly has that mother's spirit passed,
From all has passed that to her heart was dear,
Through the sweet *excess of care!*
She'd known more love than can for mortals last!
[Christian Diadem.

A Modern Slave Auction.

A recent number of the Vermont *Caledonian* contains a letter giving the following description of a slave auction in Columbia, South Carolina:—

Being acquainted with men and women auctions only from reading, I determined, however painful it might be to the feelings, or revolting to the moral sense, to be a witness at this one. Accordingly, about fifteen minutes before the appointed hour, I left my hotel, and while yet within some distance of the Court-House, I already heard the loud, deep voice of the slave-auctioneer, as he appraised his chattels, and rattled out—'Six hundred and fifty—no more than six hundred and fifty for this likely negro fellow—fifty-six—six hundred and sixty,' &c. This was early on Monday morning. Scarcely had the echoes of the high anthem that peeled from the Episcopal organ and choir, a few hours before, yet died away. Hardly had the swell of the sweet tune that rose from Dr. Palmer's Presbyterian Church yet murmured to the stars. And the unartistic, but loud and clear psalm shout that ascended from the throats of a thousand Baptist negroes the preceding Sunday eve had as yet hardly had time (if time it takes) to mingle with the triumphal and eternal chorus of the harps of heaven. Having so lately heard all these, with what harsh and grating discord did the horrid voice of the man-seller shake the heavens and strike upon my ear.

Is it, O man, with such discordant noises,
With such accursed instruments as these,
Thou drownest Nature's sweet and kindly voices,
And jarrest the celestial harmonies?

Of the auctioneer himself, I shall say nothing. As has been said of a kindred horror, so would I say of him, 'Forever undescribed let it remain.' The sale took place on the steps of the Court of Justice (ironically so called.) Of the seventy-five or one hundred persons that composed the bidders and on-lookers, such a collection is seldom seen this side of Erebus. There were groups of the petty merchants of the town, hard, close-fisted, money-loving, mean-looking men. There were a number of the poor Clay-Eaters, from the Sand Hills, who were easily distinguishable by their cadaverous, ashen-white and half-human appearance. There were the gross, vulgar and lecherous youths of the town. There were semi-souled bog trotters, whose brogue (anything but 'rich') and countenance told the delight with which they saw the 'nagers' get what they deserved. There were two or three shrewd Jew speculators, with a broken foreign accent, who seemed to have more *monish* to bid on *the image of God at auction* than they could afford to expend upon the poor synagogue they have here. And, (must I tell it? or shall I go backward and hide the shame?) there was a professed minister of God, with the badge of his order round his throat, and who, but a sun previous, had offered salvation and heaven to all. Bidding was tolerably swift, and competition keen. The first negro offered was a very dark middle-aged man, of, I should judge, about forty years of age, whose care-worn, broken-down and dispirited countenance and deeply-wrinkled brow, intimated that the toil and trouble of at least twice forty years had been compressed into his brief existence. He went off at a pretty fair price. By and by another was put on the block—went off still better. A middle-aged woman then mounted for her turn. She had a vacant, careless, stupid look—and as the auctioneer praised up her high qualities, a [illegible] grin would now and then flit across her countenance. He declaimed about her, and continued repeating her praises, as 'This splendid seamstress and cutter, Lucretia. She is a splendid seamstress and cutter. As a sewer and cutter, I am told Lucretia has no equal—besides being valuable as a housekeeper,' &c. She was knocked down to a man who I learned is going to keep a tavern. The next that came upon the steps was the last to be sold. She was a young woman, who (her owners and auctioneer said) was just 18 years of age; she was of a dark olive color—not near so swarthy as the others had been. She had a very fine forehead, pleasing countenance, and mild, lustrous eyes. The auctioneer took off her hood, to show her countenance, and, when she replaced it, again took it off; and, in appraising her, by word and action appealed to the lowest and basest passions of the assembled crowd. She clasped to her bosom a light-colored, blue-eyed, curly, silken-haired child, only ten weeks old, and who, young as it was, seemed to cast a terrified look on auctioneer and bidders. 'The next is the girl Adeline. Gentlemen, did you ever see such a face, and head, and form, as that? (taking off her hood.) She is only 18 years old, and already has a child—a male child—ten weeks old—will consequently make a valuable piece of property for some one. She is a splendid housekeeper and seamstress.' The big tear stood glistening in the poor girl's eye—and, at every licentious allusion, she cast a look of pity and of woe at the auctioneer, and at the crowd—which was responded to only by a loud, unfeeling, and brutal laugh. She was knocked down to—I know not who, for my eyes were too dim to discern. She descended from the Court-House steps, looked at her new master, looked at the audience, looked fondly into her sweet child's face, pressed it warmly to her bosom—with the auctioneer's hard-hearted remark ringing in her ear, that '*that* child wouldn't trouble her purchaser long.' I made my way to my temporary home, overpowered with a chaos of horrors. And when I entered the hall of the house, the merry glee and loud laugh of the female inmates at their own trifling wit and silly jokes, too plainly announced to me the fact that the dark-eyed and ebony daughters of the golden-rivered land of the plantain, find but few on earth who will shed for their sorrows a sisterly tear. Surely, the sweet and blessed virgins of the heavenly land will descend at times to comfort their woful hearts—while God himself will 'gather their tears in his bottle.' EGO EMAUTON.

A Slave Case in Louisiana.

The New Orleans *True Delta* gives the particulars of a "Suit for Freedom," before the First District Court, involving the fate of eighteen human beings. The case, as reported, we give in full—for the incidents are curious, and the laws, as recited by the Judge, are worth study:—

"The suit was brought by a negress named Eulalie and her children and grandchildren, in all numbering eighteen. It was alledged in the petition, that the parties plaintiff had enjoyed undisputed possession of their liberty for forty-five years prior to the close of 1852, when they were forcibly taken from their homes and finally given into the custody of Messrs. Daniel A. Long and Zachariah S. Mabry, who claimed them as their slaves. When the suit was first instituted, defendants declined to answer, and filed an exception, denying plaintiffs' right of action in the premises. Judge Larue, who was then presiding over the First District Court, sustained the exception, and the petition was consequently dismissed. Thereupon, the plaintiffs took an appeal to the Supreme Court, and the result was that Larue's decision was reversed, and the case was remanded back for trial on its merits. The testimony shows that Eulalie was owned by Simon Porche, of the parish of Pointe Coupee, and more than forty-five years ago *Porche permitted her to marry Henri Olivere, f. m. c., the natural brother of Madame Porche.* She then, with the consent of her master, left his plantation and went to reside on a farm owned by her husband. This farm was on an island in False River, near Mr. Porche's plantation, and for forty-five years Eulalie and her offspring were permitted to enjoy all the rights of free persons, no attempt being made during all this time to reduce them to a state of bondage. About thirty years ago, Madame Porche became the sole legatee of her husband, and always evinced great affection for Eulalie and her children, and made frequent attempts to have them emancipated by the Police Jury, in order that they should be entirely and forever free. This is specially testified to by her attorney, who was often consulted on the subject prior to Madame Porche's death. Indeed, fearing that after she died they might be reduced to slavery, she made a nominal sale of them to a relative, under the express stipulation that he should emancipate them. This relative betrayed, as it would appear, the trust reposed in him; and it is by his act that the petitioners were subsequently held as slaves. On behalf of plaintiff, it was contended that all property in them has long since been prescribed by Art 3,510 of the Civil Code, which says: "If a master suffer a slave to enjoy his liberty for ten years during his residence in the State, or for twenty years while out of it, he shall lose all right of action to recover possession of the slave, unless said slave be a runaway or fugitive." On the other hand, it was contended that the article above quoted is in conflict with Art. 185, which declares "That no one can emancipate his slave unless the slave has attained the age of thirty years, and has behaved well for at least four years preceding his emancipation;" and being so in conflict, is wholly inoperative. The Supreme Court, in deciding the exception in this very case, holds the following language in relation to Art. 3,510 of the Civil Code: "This provision, we are told by counsel, is merely idle, without meaning or applicability, and can, in no way, affect the right of the master to reduce his slave into actual possession at any time. We would not feel ourselves at liberty, under any circumstances, to disregard such a clear expression of legislative will as is contained in that article, and we see nothing in the relation subsisting between master and slave, or in the law, which undertakes to regulate the *status* of the slave in reference to his rights and privileges as a free man, incompatible with the prescriptive title to freedom which he may acquire under that law. * * The law recognizes this as one of the modes in which a slave may acquire his freedom. This reasoning is cited and relied on by Judge Robertson, who states that the article (No. 3,510) is derived from the old Spanish law which runs as follows: "If a slave enjoy his freedom during ten years while his master is in the country, or twenty years while he is out of it, and the master, during that time, hath instituted no suit touching his slavery; and if the slave acted in good faith, believing that he was free, he cannot, thereafter, be claimed as a slave, neither by his master nor any one for him, and if he be so claimed, he may avail himself of the prescription and obtain his freedom." Judge Robertson, on this, remarks: "It is clear from the proof, that the owners of Eulalie never attempted to interrupt her possession of liberty during forty-five years, and no one else could have done it, either by suit, or by force. After she had lived in freedom for ten years, in the presence of her owners, their failure to exercise any of the authority, rights or powers of a master during that period, gave her a prescriptive right to her freedom, of which neither the master, nor any other person, could, by any process, deprive her. Our laws point out several methods by which a slave may become free, and because they differ, they are not on that account to be construed as conflicting with each other. Where the slave is emancipated it is done by the will and act of his master to effect that end, which can only be effected by complying with all the formalities of the law. Where prescription has run in favor of the slave's liberty, he becomes free by operation of the law, which thus punishes the negligence of the master, and the slave is forever placed beyond the master's control. Although he may not have all the legal privileges of an emancipated slave, he is yet free, and is subject to the laws of the State alone, and may be dealt with as a free person according to the laws providing for the regulation of that class of persons.

Our laws, copying the liberality of the late Roman laws, are exceedingly jealous where the liberty of any one is concerned, but in the other States of the Union, where the institution of Slavery exists, many checks and restrictions are opposed to the emancipation of slaves, and the authority of the master is guarded with great care. Wheeler's law on Slavery, 386 *et seq.* If Eulalie is entitled to her freedom, the children follow the condition of the mother. C. C. 196. After this survey of the premises, it appears to the Court that the conclusion is irresistible in favor of the freedom of the plaintiffs. It is, therefore ordered, adjudged and decreed, that the prayer of petitioners be granted; that they be set at liberty, and that defendants be forever enjoined from molesting them."

Early Days of Silas Wright.

A friend who was an old acquaintance of the late Hon. Silas Wright, related to us an anecdote of that distinguished man, which he received from his own lips, and as we have never seen it in print, although it may have been, we give it to our readers.

Mr. Wright left his home at an early day to "seek his fortune," having, by way of earthly possessions, a fine horse, saddle and bridle, a pair of saddle bags, a small stock of clothing, and five hundred dollars in money, which was in bills, and was deposited in his saddle-bags. He took a westward course, and in traveling one day, he overtook a man with a wagon and furniture, and an old span of horses, apparently emigrating. There was nothing particularly attractive at first viewing the person or equipage, but on closer inspection, Mr. Wright discovered the daughter of the emigrant, a very beautiful young lady, evidently refined and intelligent. They journeyed onward towards Geneva, chatting cosily together, when suddenly the old gentleman recollected that he wished to get his money changed at the Geneva Bank, and to enable him to reach that place before the close of bank hours, he proposed that Mr. Wright should take his seat beside the beautiful daughter, and allow him to mount Wright's horse and hasten forward. Ardent and half smitten by the charms of the young lady, he gladly accepted the proposition, and leaping from his horse, allowed the old man to mount and make off with all his worldly possessions, money included, without a thought.

"Rapidly the hours of Thalaba went by," while these two young and gifted beings pursued their course, quite leisurely it may be surmised, towards their journey's destination. On arriving at Geneva, Mr. Wright drove to the principal tavern, left the lady, then, and for the first time, a shade of anxiety crossed his mind for the safety of his horse and his money. He went to all the public houses, but could hear of no such man as he described; he beat up to the quarters of the cashier of the bank, and learned to his additional concern, that such a man had called at the bank and endeavored to get some money changed, which he had declined doing, as the notes which were offered were *counterfeit!* Our future statesman then came to the conclusion that he had made a crooked start in life. About fifty dollars in value of old furniture, a dilapidated wagon and a span or worn-out horses, for a new wardrobe, a fine horse, and five hundred dollars! Aye, but then there was the pretty daughter—but her he could not keep as personal property without her own consent, and without money he hardly wanted a wife. He was at his wit's end, and had just concluded to make the best of a bad bargain, when the old man made his appearance with horse and money all safe! It turned out that the money which the cashier had thought to be counterfeit was not so, and the mistake had given the old man some trouble, to go some distance to find an acquaintance who might vouch for his respectability in case of trouble, and this occasioned his mysterious absence. In the sequel, the beautiful daughter became the wife of the future statesman. [Detroit Advertiser.

What It Takes to Feed London.

In a late number of the *London Quarterly Review*, we find an article of considerable interest, in which the writer attempts to convey to the mind of the reader an idea of the immense amount of food consumed by the people of London, and the manner in which it is procured and conveyed to their very doors. It may rightly be supposed that the sum total of a year's consumption is marvelous, when it is remembered that London has two and a half millions of inhabitants. The aggregate cannot be comprehended. Small idea have we of the bulk of the many billions of fish, of every size and sort, which are but one item in the account. Figures do not make us realize—they only make us marvel.

The writer is profuse of statistics in the course of the paper, till, at the conclusion, he attempts to give the reader a conception of the aggregate yearly consumed by the Londoners, in the following novel manner:—

If we fix upon Hyde Park as our exhibition ground, and pile together all the barrels of beer consumed in London, they would form a thousand columns not far short of a mile of perpendicular height. Let us imagine ourselves on the top of this tower, and we shall have a look-out worthy of the feast we are about to summon to our feet. Herefrom we might discover the great northern road stretching far away into the length of the land. Lo! as we look, a mighty herd of oxen with loud bellowing are beheld approaching from the north. For miles and miles the mass of horns is conspicuous winding along the road ten abreast, and even thus the last animal of the herd would be seventy-two miles away, and the drover goading his shrinking flanks considerably beyond Peterborough. On the other side of the park, as the clouds of dust clear away, we see the great western road as far as the eye can reach thronged with a bleating mass of wool, and the shepherd at the end of the flock, ten abreast, and the dog that is worrying the last sheep, are just leaving the environs of Bristol, 121 miles from our beer-built pillar. Along Piccadilly, Regent street, the Strand, Fleet street, Cheapside, and the eastward Mile End Road line for 7 1-2 miles, streets and causeways are thronged with calves, still ten abreast; and in the great parallel thoroughfares of Bayswater, Oxford-st., and Holborn, we see nothing for nine long miles but a slowly-pacing, deeply-grunting herd of swine. As we watch this moving mass approaching from all points of the horizon, the air suddenly becomes dark—a black pall seems drawn over the sky—it is the flock of birds—game, poultry and wild fowl, that, like Mrs. Bond's ducks, are come to be killed; as they fly wing to wing and tail to beak, they form a square whose superfices is not much less than the whole enclosed portion of St. James's Park, or 51 acres. No sooner does this huge flight clear away, than we behold the park at our feet inundated with hares and rabbits. Feeding 2,000 abreast, they extend from the marble arch to the round pond in Kensington Garden—at least a mile. Let us now pile up all the half-quarter loaves consumed in the metropolis in the year, and we shall find they form a pyramid which measures 200 square feet at its base, and extends into the air a height of 1,263 feet, or nearly three times that of St. Paul's. Turning now towards the sound of rushing water, we find that the seven companies are filling the mains for the day. If they were allowed to flow into the area of the adjacent St. James's Park, they would, in the course of twenty-four hours, flood its entire space with a depth of 30 inches of water, and the whole annual supply would be quite sufficient to submerge the city (one mile square) 60 feet. Of the fish, we confess we are able to say nothing. When numbers amount to billions, the calculations become too trying to our patience. We have little doubt, they would be quite sufficient to make the Serpentine one solid mass. Of ham and bacon, again, preserved meats, and all the countless comestibles, we have taken no account—and, in truth, they are little more to the great mass, than the ducks and geese were in Sancho Panza's celebrated mess—"the skimmings of the pot."

A Prisoner at Sevastopol.

The last day I was in the trenches, while a slight skirmish was going on in front, and in a covered way I met one of our riflemen and a Russian rifleman walking slowly together. As I came nearer, I saw the Russian was limping along in pain, resting his hands on our fellow's shoulder, who, with two rifles under his arm, and a pipe in his mouth, was walking easily and coolly along, evidently giving his wounded opponent some good advice, which I have no doubt was all the better relished for not being understood. Struck with the singularity of their appearance, I waited till they approached, and asked the rifleman how he got his prisoner? "Is it where did I get him, Sir?" said he, with an accent of indignant surprise; "faith, I shot him with my own two hands." "When did you shoot him?" I required. "When? I shot him down there of course," said he, pointing to the "ovens," where there had been a slight skirmish. "He was down there behind a wall, Sir, taking aim, with only his legs out, when I hit him with my last round in the knee; and I've got his pipe, Sir, and I've got his bacca, Sir, and all I wants now is his boots, and I'm leading him to the hospital, when I can take 'em off him comfortable." Having said this much with a droll earnestness to which no words can do justice, he quietly resumed his way toward the rear, assisting and helping his poor wounded prisoner, who during the whole time of the dialogue had been bowing cap in hand from one to the other, as if to implore our mercy and protection.

Carrots for Milk Cows.

Mr. Abner Haven, of South Framingham, Mass., communicates to the *Rural New Yorker* the following experiment to test the value of carrots for milk cows:—

"I have (April 15) seven cows in milk—one calved in June, the rest in September and October. I raised eighty bushels rutabagas and four hundred bushels carrots, and fed them to my cows, commencing the first of December. I gave them about 2 1-2 bushels per day, at noon, the rutabagas first, and when they were all fed out, the same quantity of carrots. I found, when I had fed the latter a few days, that my cows were each giving from two to three pints of milk more per day than when fed on rutabagas. I was feeding my cows, meanwhile, with cut hay and 2 lbs. oil cake and meal, and 2 1-2 lbs. wheat screenings, ground.

The thought struck me, that I should like to know the value of carrots for making milk; so I selected the cow that calved last for the trial. I weighed the hay, meal and carrots, and fed perhaps 27 lbs. of hay, 4 1-2 lbs. of mixed meal, and 22 lbs. of carrots, and she gave 35 lbs. of milk per day. I then left off the carrots and gave the same amount of meal, and all the hay she would eat, which was 33 lbs. per day. After feeding so for a week, I found she gave 23 lbs. of milk per day. I then gave her the carrots as before, and in eight or ten days she came up again to 35 lbs. of milk per day.

This shows that carrots are worth to me to feed cows 82 cents per 100 lbs. Hay is worth $20 per ton in the barn, and at 3 cents per quart, or one cent per pound for milk; 6 lbs. less hay, and 12 lbs. more milk, gives 18 cents for 22 lbs. of carrots. My carrots are all gone now, or I would try one or two more cows. Next winter I hope to have another opportunity for experiment."

Where Cork Comes From.

Cork is nothing more nor less than the bark of evergreen oak, growing principally in Spain and other countries bordering the Mediterranean; in English gardens it is only a curiosity. When the cork tree is about fifteen years old, the bark has attained a thickness and quality suitable for manufacturing purposes; and after stripping, a further growth of eight years produces the second crop; and so on at intervals, for even ten or twelve crops. The bark is stripped from the tree, in pieces two inches in thickness, of considerable length, and of such width as to retain the curved form of the trunk when it has been stripped. The bark peeler or cutter makes a slit in the bark with a knife, perpendicularly from the top to the bottom; he makes another incision parallel to it, and, at some distance from the former; and two shorter horizontal cuts at the top and bottom. For stripping off the piece thus isolated, he uses a kind of knife with two handles and a curved blade. Sometimes after the cuts have been made he leaves the tree to throw off the bark by the spontaneous action on the vegetation within the trunk. The detached pieces are soaked in water, and are placed over a fire when nearly dry; they are, in fact, scorched a little on both sides, and acquire a somewhat more compact texture by this scorching. In order to get rid of the curvature, and bring them flat, they are pressed down with weights while yet hot.

The Telegraph in Europe.

The Holy See and the King of Naples have just entered into a Convention of thirty-one articles, to regulate telegraphic correspondence between their respective dominions, which is published in the official journals. Like all other governmental measures in these countries, it exhibits the most zealous distrust of the people. After prescribing necessary rules for the establishment and economy of the lines, its agents, &c., it is provided that either government may at any moment suspend, for an indeterminate time, the working of a line, and moreover, that the superintendents must be made acquainted with the names and characters of individuals who offer communications, and that no dispatches which in their judgment may be contrary to the security of the State, to its religion, to good morals, or public order, can be accepted. Communications cannot exceed 100 words, and must be written in Italian, with indelible ink, and without erasures or abbreviations. With these restrictions, the public can use the telegraph at all times and hours, night or day, including Sundays and Fetes. The tariff of prices prescribes about 5 cents (American) for each word in a dispatch of 25 words, (the lowest number to be reckoned,) for a distance of 100 miles, and 10 cents for 200 miles. The charge is doubled for 50 words. The rate is most favorable for 100 words.

Telegraphic lines are multiplying rapidly throughout Southern Europe. They are of course all in the hands of the governments, and as yet, are chiefly used by their own agents, the bankers, and richer classes. All parts of the extensive empire of Austria are thus in connection with Vienna. Her Hungarian system already extends to Belgrade and Hermanstadt, the nearest point to the seat of war, and will be completed in a few days to Bucharest. Turkey and her allies are about connecting it with Constantinople, via Varna, Shumla, &c. When these lines are completed, the press and governments of Paris and London will hold daily communications with the seat of war. Russia has ordered the line from St. Petersburg to Moscow to be continued to Odessa and Sevastopol.

Austria has now 3,000 miles of telegraph in operation, Prussia has 4,000, and Switzerland a proportionably greater number. The Swiss have in fact more telegraphic lines than any country on the continent, allowing for the difference in territory. But all Europe together cannot equal the 17,000 miles of wires which are spread over the United States. The wires in these countries generally run through leaden tubes under the ground, and not on tall poles, as with us. The sub-marine Mediterranean line is now nearly complete; so that the islands of Corsica, Sardinia, and Malta, and the French possessions on the African coast, will soon be brought within the line of telegraphic correspondence.

Coloring Corn.

A French farmer has succeeded in giving to maize or Indian corn any color he chooses, by the following plan: "Having received from China a specimen of a pearl white color, the grains of which were very small, but very beautiful, he was desirous to obtain the same grain but of other colors. For this purpose he planted by the side of some of the American maize of a red color, and the result was a crop of grain of a pink tint, with some of a blueish, and others of green color. He made a similar experiment with the maize of Tuscarora, the grain of which is as white as Carolina rice, and he thus obtained a crop, the ears of which were about fourteen inches in length, and the grains of a blue color. Another time he planted some maize of the color of amber among some of the black maize of Syria. The ears attained the length of 22 inches, and the grain was of different colors. The yellow maize, on being planted near some of the brown maize of Central America, produced some of dark brown color, which ripens eight days sooner than the other sorts. The farmer now possesses one hundred and fifty-three different varieties of maize, and his object in continuing his experiments is not only to change the color at will, but also to obtain varieties which will ripen earlier, as well as larger and longer ears, and thus increase the produce."

LARGE OR SMALL SEED POTATOES.—By an experiment carefully conducted at the North American Phalanx, the following results were obtained:—

1. Large whole seed, 29 lbs., 14 oz., produced 174 lbs.
2. Large potatoes cut in halves, 15 lbs., 15 oz., produced 124 lbs.
3. Large potatoes cut in quarters, 7 lbs., produced 98 lbs.
4. Medium potatoes, whole, 19 lbs., 3 oz., produced 146 lbs.
5. Medium potatoes cut in halves, 9 lbs., 6 oz., produced 88 1-2 lbs.
6. Medium potatoes cut in quarters, 4 lbs., produced 67 lbs.
7. Small potatoes, whole, 9 1-2 lbs., produced 117 lbs.
8. Small potatoes cut in halves, 6 lbs., produced 84 lbs.

The percentage of potatoes to the seed used was greatest on the quartered large potatoes.

The following figures indicate the value of marketable potatoes, at 50 cents per bushel, on an acre for each sort as above:—

1	$111 66	5	$56 33
2	78 33	6	43 33
3	61 66	7	73 00
4	94 66	8	53 33

Repetitions of the experiment have all been in favor of large uncut potatoes for seed. [N. Y. Tribune.

NEW FOOD FOR SHEEP.—Whilst I was at Geneva, I observed every one collecting carefully the fruit of the horse chestnut, and on inquiry I learnt that the butchers and holders of grazing stock bought it readily at a certain price per bushel. I inquired of my butcher, and he told me it was given to those sheep in particular that were fattening. The horse-chestnuts were well crushed, something in the way, so I understood, that apples are previous to cider being made. They are crushed or cut up in a machine kept solely in Switzerland for that purpose; then about two pounds weight is given to each sheep morning and evening. It must be portioned out to the sheep, as too much would disagree with them, being of a very heating nature. The butchers told me that it gave an excellent, rich flavor to the meat. The Geneva mutton is noted for being as highly flavored as any in England or Wales. [E. D. Agri. Ga.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.
Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

THE FOOTPRINTS OF JEHOVAH IN THE AGES OF REVELATION.—NO. 1.

Prefatory Remarks.

I do not profess to be a learned philosopher—neither geologist nor naturalist—yet for some fifty years I have read the works of philosophers, geologists and naturalists, and such writers as Thomas Chalmers, Thomas Dick, and John Pye Smith, and others it would appear ostentatious to enumerate. I have read them with great pleasure, and some profit. When I was a lad, and when a young man, my admiration of them was much greater than it is now I have had fifty years of reading and reflection. I then thought they had made wonderful discoveries. Who that loves eloquence, sublime and lofty flights of fancy, can do otherwise than admire such discourses as Thomas Chalmers' "Sketch of the Modern Astronomy," "The Modesty of True Science," "On the Extent of the Divine Condescension," "On the Knowledge of Man's Moral History in the places of Creation," "On the Sympathy that is felt for Men, amongst the higher orders of intelligences? These were preached in the Tron Church, Glasgow, and when I was a boy came out, a single sermon at a time, in pamphlet form. I read them with great avidity. They had their use; they met the boastful pretensions of shallow-pated philosophers on their own ground, and brought down their infidel castles with thunder drawn from their own aerial systems. But now that forty years have passed away since they were first published, the conjectures then indulged are not realized; and astronomers, Christian and sceptical, have modified their inferences and changed their ground. In his sermon, "A Sketch of the Modern Astronomy," there is this paragraph:—

"Who shall assign a limit to the discoveries of future ages? Who can prescribe to science her boundaries, or restrain the active and insatiable curiosity of man within the circle of his present acquirements? We may guess with plausibility what we cannot anticipate with confidence. The day may yet be coming, when our instruments of observation shall be inconceivably more powerful. They may ascertain still more decisive points of resemblance. They may resolve the same question by the evidence of sense, which is now so abundantly convincing by the evidence of analogy. They may lay open to us the unquestionable vestiges of art and industry and intelligence. We may see summer throwing its green mantle over these mighty tracts, and we may see them left naked and colorless after the flush of vegetation has disappeared. In the progress of years, or of centuries, we may trace the hand of cultivation spreading a new aspect over some portion of a planetary surface. Perhaps some large city, the metropolis of a mighty empire, may expand into a visible spot, by the powers of some future telescope. Perhaps the glass of some observer, in a distant age, may enable him to construct the map of another world, and to lay down the surface of it, in all its minute and topical varieties. But there is no end of conjecture; and to the men of other times we leave the full assurance of what we can assert with the highest probability, that your planetary orbs are so many worlds, that they teem with life, and that the mighty Being who presides in high authority over this scene of grandeur and astonishment, has there planted the worshipers of his glory."

When a youth, studying the philosophy of the heavens, I could never forget this and many other beautiful flights of Dr. Chalmers' fancy. When, examining the moon through a large telescope, my teacher directed to the truly interesting variations of its surface—here land and there water—here shade and there sunshine—here mountain and there the plain—on one occasion, I was sure I saw nebulæ, or cloud, pass along the brow of the mountain—and I imagined that Chalmers' conjectures would be realized in my day. Some twenty years ago Richard Adams Locke, acting on Chalmers' conjecture, gave Herschel his beautiful magnifier, by which he made "Discoveries in the Moon." Interesting beings, in sylvan beauty, beside flowing streams, and pyramids of crystal, and flocks of sheep equaling the best Leicestershire breeds, worshiped with a triangular symbol the Maker of all this glory. With what emotions of pleasure the admirers of Chalmers' conjectures receievd those "Discoveries." But when it was confessed to be a "Grand Hoax," how flat their conjectures fell to the ground! Since then, when conversing with a professor of the sciences in a western academy, I was equally surprised to have him tell me the moon had no atmosphere, no water, and is not inhabitable, and *astronomers* never believed it was. It is, said our mentor, "it is a great cinder!" Oh, Chalmers! oh, Chalmers! who shall realize thy conjectures? The nearest planet to earth is proved to be a great cinder!

When I think of these things, words cannot express the thankfulness of my heart, that Jehovah has given us a well-authenticated history of creation, of providence, and of redemption. It is, indeed, an inexpressibly great privilege, that man has not to inquire of the sun, nor of the moon, nor of the stars, nor to read the dumb stratified series of earthy substances, such as rocks, sands, gravels, coal-beds, beds of petrified vegetable, or the deposits of silver and golden ores, to learn the Maker of earth, the origin or the times of mankind, or of the institutes of religion.

Jehovah, our Maker, is our teacher; in one page of that well-authenticated record of the history of creation, there is more certain knowledge given respecting the origin of the earth and of man, than all the philosophers, astronomers, materialists, or geologists have found out without it in six thousand years! It is only by conjecture, analogy, and inference, that they speak to man; but the instructions of the Bible are direct; it is the record of facts communicated by Divine Wisdom, through intelligent, faithful historians. It is Divine Wisdom personified that says, (Proverbs, 8: 22–36,) "Jehovah possessed me in the beginning of his way, before his works of old. I was anointed from everlasting, from the beginning, before the earth was." "Now therefore hearken to me, O ye children."

This voice we propose to regard in our future communications. S. D.

SECOND ADVENT, RESURRECTION, &C.

To the Editors of the Sabbath Recorder:—

I now take up my pen to present some of the direct proofs that the second advent, the general resurrection of both righteous and wicked, the burning of this present earth, and the final judgment, will *all* take place at one and the same time—in reply to B. Clark.

In respect to his arguments, one thing more may be regarded by some as having some weight—that "one day is with the Lord as a thousand years, and a thousand years as one day." This is made, by many, a very convenient hobby, when they wish to do away with some plain statement of Scripture. The passage simply teaches that a thousand years are just as present to the Divine mind as a single day—that *all* time is present to his all-comprehensive view, and is short to him; and that he can say, "*Behold I come quickly,*" though thousands of years intervene between the statement and the event. And it was stated by Peter for the express purpose of showing, that what would seem to us a long delay, ought not to shake our faith in his coming at last. And then he assures us that "the day of the Lord *will come.*" It is a well-established fact, and is acknowledged, I believe, by all judicious commentators, that expressions of time, such as *days, weeks, months,* &c., are always to be taken either in the most literal sense, or a day for a year. No other rule of interpretation can possibly be sustained, or admitted. And when our Saviour says, "the *hour* is coming when *all* that are in the graves shall hear his voice," &c., he either means an hour of sixty minutes, or the twenty-fourth part of a year, which would be half a month.

The principal point in the argument is the general resurrection. If this is sustained, the other points will be easily supported. The resurrection of the righteous is often spoken of, in the Bible, just as if the wicked would never be raised at all. And such a resurrection as the righteous will enjoy, the wicked never will be the subjects of. Jesus says, "No man can come to me, except the Father which hath sent me draw him; and I will rise *him* up at the last day." (John 6: 44.) Here the resurrection of the righteous is to be *at the last day,* and *not* a thousand years before; and it is spoken of just as if the wicked would have *no* resurrection at all. "But they which shall be accounted worthy to obtain that world, *and the resurrection from the dead,* neither marry, nor are given in marriage. Neither can they die any more; for they are equal unto the angels, and are the children of God, *being the children of the resurrection.*" (Luke 20: 35, 36.) If we had information nowhere else on the subject, we should certainly think, from this passage, that the wicked *never would* be raised at all. This is sufficient to show, that the separate statements concerning the resurrection of the just, which are often met with in Scripture, where nothing is said of the resurrection of the wicked, afford no ground of argument against the position, that the wicked will be raised, and called to judgment at the same time. And let it be observed, that our appeals are not to prophetic visions, and parables, to be interpreted before we can use them; but to the plain and naked statements of truth, which are to be taken to mean just what they say, according to the common laws of language, with due regard, however, to the sense of the connection. We still claim the full force of John 5: 28, 29, as an *unequivocal proof,* that the resurrection of both the righteous and the wicked will take place in *one* and the *same* hour. And whether it be common or prophetic time amounts to nothing in the present controversy. Again, Matt. 25th chapter, from the 31st verse to the end of the chapter, contains statements which cover the whole ground of my positions, except the burning of the earth. "*When* the Son of man shall come in his glory, and all the holy angels with him, *then* shall he sit upon the throne of his glory; and before him shall be gathered all nations, and he shall separate them one from another, as a shepherd divideth his sheep from the goats." So far, there is no figure, but simple statements of naked truth. And it distinctly teaches, that the Son of man will come in his glory, attended by all the holy angels; and that *then,* at that very time *when* he comes, all nations will be gathered before him; and that the two classes will be in one general congregation—that HE will separate them one from another, with the same unmistakable discrimination with which a shepherd can separate his *sheep* from *goats.* Then he adopts the figurative expressions of *sheep* and *goats.* And those called *sheep* are, without figure, called *the righteous,* in the 37th verse; which puts it beyond all dispute, that all that are left when the righteous are all thus removed, are the wicked, called *goats.* Then the righteous will be placed at his right hand, and the wicked at his left, both at the same time. And then the judgment will proceed with both classes, and their eternal state will be settled, and the judgment executed. See the text. Paul says, "And to you who are troubled, rest with us, when the Lord Jesus shall be revealed from heaven, with his mighty angels, in flaming fire, taking vengeance on them that know not God, and that obey not the gospel of our Lord Jesus Christ, who shall be punished with everlasting destruction, from the presence of the Lord, and from the glory of his power; WHEN HE SHALL BE GLORIFIED IN HIS SAINTS, *and be admired in all them that believe* (because our testimony among you was believed) IN THAT DAY." (2 Thess. 1: 7–10.) Here we see, that the Lord is to take vengeance on the wicked, to punish them with everlasting destruction, &c., IN THAT VERY DAY *when* HE COMES to be glorified in his saints, &c. Paul says to Timothy, "I charge thee, therefore, before God, and the Lord Jesus Christ, who shall judge the quick and the dead AT HIS APPEARING," &c. (2 Tim. 4: 1.) Here the living and the dead, without distinction or limitation, are to be judged *at the coming of Christ.* What we have now presented is sufficient to prove that the second advent, the general resurrection and judgment of both righteous and wicked, will all come at the same time; and that the burning of this present earth will also be at that very time, the following Scriptures will show: "But the heavens and the earth, which are now, by the same word are kept in store, *reserved unto fire against the day of judgment, and perdition of ungodly men.*" Again, in the same connection, "The earth also, and all the works that are therein, shall be burned up." (2 Pet. 3: 7–10.) This earth is *reserved* by the word of Divine power, and *kept in store* for the fuel of that burning day, which is the day of judgment and perdition of ungodly men, and also the day of general resurrection and judgment.

And now, if the plain words of the Bible can prove *any thing,* my positions are proved. But I do not expect every one will admit it; for there is scarcely a truth revealed in the Bible, which all who profess to believe the Bible will own to be truth. And this very thing makes more infidels than all the infidel writings in the world. On the other hand, if the position of my opponent were true, it would follow that the *truth* of a considerable part of the Scriptures brought to view in this article, *could not be sustained.* And the same may be said of other Scriptures—enough of them to make quite a volume; especially, many of the prophecies could never be fulfilled; many of which are given in plain language, without being clothed in the hieroglyphics of prophetic visions, to be interpreted before they can be understood. And we say again, that we may know that our interpretations of prophetic visions are not right, unless they harmonize with the plain and positive statements with which the Bible abounds. A word to the wise is sufficient. And I now leave the subject, contented to let readers judge for themselves, and on their own responsibility. ELIAS BURDICK.

TRUXTON, Jan. 8th, 1855.

A SERVANT OF THE CHURCH.

Humility and labor are implied in the appellation. We are servants hired, nay, bought. "Ye are bought with a price." Humbly, then, should we fulfill the duties of our position. Nothing is more unbecoming in a servant than pride. Nothing more essentially unfits him for a proper discharge of the duties of his calling. But labor, too, is expected from a servant. Member of the church of Christ! are you living to serve the interests of that church; is its prosperity and efficiency the object of your earnest solicitude, of your ardent prayers, of your persevering endeavors? Are you found among its servants when plans are to be devised, and labor performed for its enlargement and spirituality? Is your voice heard in its counsels and petitions? Is your purse always open to its pecuniary claims? Are you striving to fit the opening minds of the young to receive and obey the truth by your service in the Sabbath school? Is the knowledge of the beauty and the blessedness of the church increased by your circulation of tracts and publications, and by your own personal instructions and appeals to your kindred and friends? What department of labor is entrusted to you as a servant of the church? There is service for every one. To what position are you appointed? Have you not yet found it? O! on your knees, before the Master, implore him, "Lord, what wilt thou have me to do?" and obey the indications of his will, furnished by his Word, his providence, and his Spirit, that there may be truly inscribed upon your tomb-stone this epitaph: "A servant of the church!" [Watch. & Observer.

POEM BY JOHN QUINCY ADAMS.

Among the published poems of Mr. Adams we do not remember (says the N. Y. *Tribune*) any more pleasing, or reflecting in a more agreeable light his character, than the following, which was addressed to his wife, on her birth-day, from Washington, in the winter of 1807, and has never before appeared in print. We copy it from his autograph, preserved among the most curious and valued treasures in the possession of one of his surviving intimate friends.

A Winter's Day; to Louisa.

Friend of my bosom! wouldst thou know
  How, far from thee, the days I spend,
And how the passing moments flow,
  To this short, simple tale attend:
When first emerging from the East,
  The sunbeam flashes on my curtain,
I start from slumber's ties, released,
  And make the weather's temper certain.

Next on the closet's shelf I seek
  My pocket Homer, and compel
The man of many wiles, in Greek,
  Again his many woes to tell,
How true he paints the scenes of life!
  How sweet the poet's honest prattle!
Far sweeter than fierce Illium's strife,
  And never-ending fields of battle.

At nine, comes Moses to my door,
  And down stairs summons *me* with ease,
But on my neighbor calls before,
  And knocks, "Miss Kitty! breakfast please!"
Again, he louder knocks, and stronger,
  Till Kitty answers, "Coming, Moses!"
And then, in half-an-hour or longer,
  Comes Kitty, just as breakfast closes.

Then forth I sally for the day,
  And, musing politics and rhyme,
Take to the Capitol my way,
  To join in colloquy sublime.
There, with the fathers of the land,
  I mix in sage deliberation,
And lend my feeble voice and hand
  With equal laws to bless the nation.

The labors of the Senate o'er,
  Again, with solitary pace,
Down to Potomac's glossy floor
  My morning's footsteps I retrace;
And oft, dejected or elate,
  With painful or with pleased reflection,
In thought renew the day's debate,
  And canvass votes for retrospection.

At home I find the table spread,
  And dinner's fragrant steams invite;
But first the two-fold stairs I tread,
  My atmospheric tale to write;
Then, seated round the social board,
  We feast till absent friends are toasted,—
Though sometimes *my* delays afford
  The beef or mutton over-roasted.

In bounces Johnson from his school,
  A dog-eared Webster in his hand;
Repeats his daily studied rule,
  And next his mother takes his stand.
With looks of pure, maternal bliss,
  Mamma says, "John, wilt have an apple?"
And on his cheek imprints a kiss—
  His cheek, which rose and lilly dapple.

Soon little Mary, too, they bring;
  And now, we practice every wile,
And clap our hands, and laugh and sing,
  To catch that heaven, *an infant's smile.*
Meantime, an apple pearing, whirled
  Thrice round the head, with mystic ditty,
And forthwith on the carpet hurled,
  Foretells her future lord to Kitty!

As eve approaches I ascend,
  And hours of solitude ensue;
To public papers I attend,
  Or write, my bosom friend, to you.
Gaze at the fire with vacant stare,
  Suspended pen, and brow contracted;
Or, starting sudden from my chair,
  The chamber pace, like one distracted.

I see the partner of my soul,
  I hear my darling children play;
Before me airy visions roll,
  And steal me from myself away.
Not long the dear delusions last,
  Not long the lovely forms surround me;
Recovered, eyes too soon I cast—
  And all is solitude—around me!

My heart a short depression feels,
  And, throwing straight aside my pen,
I take the volume that reveals
  Their duties and their hopes to men.
Yes! wherefore should I not confess,
  This book, of sacred inspiration,
Yields to my bosom, in distress,
  Both fortitude and consolation!

Anon, the supper's bread and cheese
  Begins, with grave and solemn face,
Till silence, yielding by degrees,
  The festive spirit takes its place;
Good humor comes, with waggish mein,
  And shakes his sides with laughter hearty,
And satire's face is not unseen,
  Reflected from the last night's party.

At last, dispersing, we retire;
  Again, the glass's state I learn,
Then, for the night, compose my fire,
  And to my lonely couch return.
Then, for my wife, my boys, my friends,
  Imploring blessings without number,
Even while the vow to heaven ascends,
  My sense dissolves in peaceful slumber.

Thus, in succession, pass my days,
  While Time, with flagging pinion flies.
And still the promised hour delays
  When thou shalt once more charm my eyes.
Louisa, thus, remote from thee,
  Still something to each joy is wanting,
While thy affection can, to me,
  Make the most dreary scene enchanting.

J. Q. A.

Louisa's Birthday, February 12, 1807.

THE CLOAK LEFT AT TROAS.

Phillip Grey was a hard-working man, who loved his Bible. In the evening, when his labors were over, and he sat down to rest himself for an hour or so, his usual companion was a large printed and well-used copy of God's Word. And Phillip was not satisfied, as some persons are, with simply *reading* the Bible; he always tried to understand what he read, and to receive the truths which it taught him.

One evening he had been pondering over St. Paul's Second Epistle to Timothy, and he lingered a long time over one verse. It was this: "The cloak that I left at Troas with Carpus, when thou comest bring with thee," (ch. iv. 13.) Nothing very difficult, you think, in that simple and straight-forward message. No; and yet it seemed to puzzle Phillip. I will tell you why. Joe Wilkins, his fellow-workman, who did not like the Bible, and therefore endeavored to disbelieve it, had brought forward this passage as one proof, that the Scriptures were not inspired. "For if they were," he argued, "such a trifling matter, such a domestic detail as this, would have been omitted."

"Well," said Phillip to himself, as he gazed upon the words, "it does seem a rather insignificant and unedifying subject for the Apostle to mention. I don't think there is any thing instructive to be gathered from it."

Just then there was a gentle tap at the half-opened door, and the next minute Mr. Howard, the clergyman, came in. When he came to see Phillip, he always called in the evening, because he knew that Phillip was quite at leisure then; and they often had very nice conversations together; and Mr. Howard was always ready and glad to explain anything which Phillip wanted to know. So, as you will imagine, this verse about St. Paul's cloak was soon alluded to, and Phillip's difficulty frankly stated.

"Well," said Mr. Howard, "this verse, Phillip, appears to me a most touching and instructive one. St. Paul had lost everything. In his youth he was great among men; favored by princes, admired of all; but he left all for Christ. During thirty years and upwards he had been poor; in labors more abundant than others, in stripes above their measure, and in prisons more frequent; of the Jews he had five times received forty stripes save one; thrice he had been beaten with rods; once he had been stoned; three times he had suffered shipwreck; in journeyings often; in perils of waters, in perils in the towns, in perils in deserts, in perils by sea, often in watchings, in hunger, in thrist, in nakedness. These are his own words. (2 Cor. xi. 23—27.) He is now Paul the aged, in his last prison, at Rome, expecting sentence of death; he has fought the good fight; he has finished his course; he has kept the faith; but he is suffering from cold as the winter sets in, and lacks clothing. Thrust into a dungeon of the prison, he bore a name so vile that even the Christians of Rome were ashamed to acknowledge him, so that on his first arraignment no man stood with him. Ten years before this period, when a prisoner at Rome, and loaded with chains, he had at least received some relief from the Philippians, who, knowing his miserable condition, had, notwithstanding their own need, laid themselves under restraint in order to minister to his wants. But now he is almost friendless; Luke only is with him; he is forsaken of all others; and the winter is about to set in. He would need some additional clothing; he had left his cloak with Carpus at Troas, two hundred leagues away; there was no one in the chilly dungeons of Rome to lend him one. How affecting the picture! I was myself in Rome last year, and at the commencement of November, on a cold and rainy day, I recollect with what vivid reality I imagined the apostle Paul down in the deep dungeons of the Capitol, dictating the last of his letters, regretting the absence of his cloak, and begging Timothy to bring it before the winter!"

Phillip's honest, sunburnt face, expressed the emotion which he felt on listening to this account. "I never thought all this, sir!" he exclaimed, "I had no idea that the Apostle, when he wrote to Timothy, was in such want and distress. Oh, how different the verse looks to me now! It brings St. Paul in his prison, cold and friendless, right before me. What a noble character he was!"

"Yes, Phillip; and these few words of his, thrown as it were negligently among the closing commissions of a familiar letter, shed a glancing light upon his ministry; and a passing remark enables us to see the character of his whole apostolic life."

"They do indeed, sir; and it comforts and encourages me to think how patient and cheerful the apostle was in the midst of his poverty and privation."

"And who can tell, Phillip, the power and consolation which this portion of his history has imparted to many of the Lord's tried and even martyred servants. I remember hearing, twenty years ago, of a Christian pastor in Switzerland, who was refused a blanket in the prisons of the Canton of Vaud. There is also the instance of Jerome of Prague, who was immured during three hundred and forty days in the dungeons of Constance, at the bottom of a dark and fetid tower, which he only left to be transferred to the hands of the murderers. And you have read yourself, Phillip, of Bishop Hooper, led from his damp unwholesome cell, covered with tattered clothes and borrowed cloak, passing to the stake resting upon a staff. Ah, such men would doubtless call to mind their brother Paul, shut up in the dungeons of Rome, suffering from cold and lack of raiment, and asking for his cloak! *They* would not consider this verse too trifling or too undignified for the page of Scripture."

"Nor do I now," said Phillip. "And I am much obliged to you," he added earnestly, "for helping me to see such meaning in it. I shall never forget, I think, in future, that '*all* Scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness.'" (2 Tim. iii. 16.)

"I hope you will not, Phillip. Settle it down in your mind, that there is not a chapter or verse in the Word of God, from first to last, which is not in some way profitable. If you and I do not see its use, it is because we have not eyes to see it. But all, we may rest assured, is precious. All is 'very good.' Well said Bishop Jewel, 'There is no sentence, no clause, no word, no syllable, but it is written for thy instruction.'" [Sch. Mag.

FRENCH MISSIONARIES IN THIBET.

According to the latest accounts, three separate attempts are being made by French (Roman Catholic) missionaries to enter Thibet—from the Chinese provinces Se-tchuen and Yun-nan on the south-east, and from Assam on the south. Mr. Krick, who was operating from the south, had succeeded in reaching the Abor, a mountain range in the north of Assam, and in producing a favorable impression on its inhabitants by the care with which he attended their sick. But unfortunately for his prospects of entering the country of the Grand Lama, a fire broke out one day, consuming two houses, and two days after, his nearest neighbor lost two sheep—one was eaten by tigers, and the other fell from a rock. Superstition was aroused, and M. Krick was ordered to leave. When they saw him prepared to depart, they relented, and begged him to stay a few days longer. He decided, however, to go—thinking that if a death should happen, all the influence that he had acquired would be lost, and there would be no hope of future success. On his return from the Abor, M. Krick was seized with a violent fever, and it was necessary for him to leave the country. Under the date Jan. 16, he writes that he had recovered, and was about to make a third attempt in company with M. Bournf. A chief had visited them that morning and offered to conduct them to Thibet. They would, however, first attempt a passage through Sommen.

The plan of M. Renou, who was entering through Yun-nan, was to establish Christian communities in the intermediate principalities, which might serve as a line of approach to Thibet proper. His last letter is dated Dec. 3, 1852. He had crossed the line which separates China from the principalities, and found it marked by a wall. The change from China to Thibet was complete. The first village that he entered was inhabited exclusively by Thibetans. It was the residence of the Chief of the Canton La-pon, which contains eighteen districts. From La-pon to A-ten-se is nine days' journey. At the end of six he came upon a community of about 500 Lamas. He paid them a visit. A man of handsome proportions and expressive countenance was introduced to him as the living Buddha of the community, now in his seventh incarnation. His Buddhaship greeted M. Renou very courteously in Chinese, and invited him to his house. They were friends at first sight. M. Renou exhibited several objects of European manufacture to the Thibetan divinity, with which he was graciously pleased. Most acceptable in his eyes was a telescope; he signified as much in the language of the Celestials. M. Renou answered that he could give it to him only on condition of his becoming his teacher in the Thibetan tongue. The divinity consulted with the chief men of his community, agreed to become the teacher of the man with the miraculous reed, and, in a few hours, M. Renou was established with one of the relations of the Buddha, retaining one of the Chinese converts who had come with him, while the other two continued their journey to Set-len-se, to sell their goods and explore the country. M. Renou found in this duplex personage what he had not been able to find before—a man who understood Thibetan grammar. The Buddha understood it perfectly, and was, besides, quite conversant with all the Thibetan classics. Out of the 500 Lamas in this community, Teun-tchu-lin-in, very few understood their prayer-books, and only four could write the language correctly. The best of these four was the Buddha. The divine functions of the Buddha were quite simple; they consisted merely in eating, drinking, and occasional prophecy; they were, however, very profitable. For six weeks M. Renou had spent all his time with him, and he was making rapid progress. He hoped soon to be able to translate some of the more important prayers and the elements of the Christian religion. The Buddha was under the necessity of going a short journey, but that time would not be lost to the missionary, as he would make annotations on what he had already learned, and copy a very good dictionary, which they were to translate together on the Buddha's return. His two Chinese had come back from A-ten-se; they had been taken for merchants. Some mandarians, who happened to be in the country, supposed him to be a mandarin sent on a secret mission by the Governor of Yun-nan; his real character was unknown. He was living in the most perfect harmony with the chiefs of the community, and he hoped soon to obtain a permanent foothold in A-ten-se—the first step in the prosecution of his design. But one thing was wanting to its accomplishment; he had expended nearly all the money which he had brought from Canton, and unless he received a further supply would be obliged to return.

As to the attempts which were being made on the side of Se-tchuen, M. Papin writes under the date of Aug. 30, 1853, that the two envoys which he sent to the Queen of So-Mo, nearly a year before, had met with a gracious reception. All wished to see the European lama, about whom they had heard so many wonderful stories, and promised to ride to the borders to meet him when they should hear of his approach. The Queen had accepted his presents, and sent him presents in return. His letter to her, written in French, had occasioned her considerable anxiety; she feared that he might be some spy from Pekin, and on this account she excused herself from writing an answer, saying that she did not know the etiquette due to a man from the evening-land, but if he were an honest man he could come without fear, and she would see him with pleasure; and she indicated a large lama-community near her palace as a residence for him, where he might learn the language. The Queen was so much pleased with a miraculous medal which M. Papin sent her, that she immediately adopted it as a neck ornament.

Mr. Latny describes a visit which was paid him by two persons from a caravan, sent by the Queen of So-Mo, into the country of Konan-Hien. He was at that time living in a fine large house, and the hall, which served as a chapel, was ornamented as on the greatest holidays. Arrayed in his best surplice, stole and miter, he seated himself before the altar in an arm-chair, covered with red cloth. Some twenty newly converted Chinese stood around him in a half circle, elegantly dressed. The guests were ushered in. As soon as they saw him, they began to prostrate themselves, uttering exclamations of wonder, which they continued until they reached his feet, when he gave them a sign to rise. He spoke to them in Chinese, of which they understood very little, and then dismissed them. They retired, saying to each other, "Yes, it is true; all that has been told us is perfectly true." Mr. Latny was hoping that their description of the interview on their return would produce a favorable impression.

The *Annales de la Propagation de la Foi* expresses the opinion, that the "time has fully come to acquaint these poor unbelievers with the true religion of Jesus Christ."

Bulwer, the novelist, in a letter to a gentleman in Boston, said, "I have closed my career as a writer of fiction. I am gloomy and unhappy. I have exhausted the powers of life, chasing pleasure where it is not to be found."

PHYSICAL AND MORAL COURAGE.

Nothing has more called forth the admiration of the world, than the display of what is called courage. The men in whom this attribute has been developed in the greatest degree, have reached the highest niche of fame, while all have united in branding the coward with contempt. The Romans called this attribute virtue, (*virtus*,) because it was, according to their heathen philosophy, the highest excellence attainable by man. To be a virtuous man was, with them, the same as to be a brave or courageous man. The word *virtus* being derived from the word which, in the Latan tongue, signifies man, (*vir*,) and being always employed to denote courage, shows that, in the opinion of the Romans, a brave person was the only one who behaved worthy of his character as a man, while a cowardly, shrinking man, was no man at all. We believe that all other nations have taken much the same view.

But the courage which the world has so much glorified is not a moral quality. The heroism which braves public opinion in defense of what is right; which endures ridicule, taunt, and even infamy, for the sake of accomplishing substantial good; which moves steadily forward to bless mankind at the risk of even life itself; which visits prisons, and hospitals and the abodes of pestilence, to carry relief to the suffering; which, in short, makes a willing sacrifice of fame, pleasure, and all the forms of worldly comfort, that humanity may be comforted—this kind of courage elicits but little attention. Brute courage, such as the lion or the mastiff displays, is what makes man a hero, in the estimation of mankind.

Lord Forth is sent home from the Crimea in disgrace, branded as a coward. Society spurns him, his own father refuses to see him. He failed to show himself a *man* at Alma and Inkermann. What was actually the feeling which prompted his cowardly behavior, we do not pretend to know. What it *may* have been, it were easier to say. It may have been something not at all disgraceful to him as a man, a rational and accountable creature, but infinitely more to his honor than the foolhardiness of those who regard neither their own lives, nor the lives of their fellow creatures.

That he regarded himself as in a situation of danger, is evident. He was liable to be killed, at any moment—ushered into the presence of his Maker, while in the very act of trying to murder his fellow creatures. He *may* have suddenly waked up to the guilt of being in such a situation, and reflected that it was a serious matter to rush into the presence of his Judge unbidden, uncalled for. Is it unworthy of man—is it bemeaning the dignity of his nature—to be afraid of venturing before his Maker while in the act of sinning against Him? Is he a coward, because he hesitates to fight against God?

He *may* not have seriously reflected upon the horrible, murderous nature of war, till in the midst of its carnage, and surrounded by scenes which have no parallel this side of hell. He may have, hitherto, looked only at the brighter features of a soldier's life, and not thought very solemnly of mangled corpses, the groans of the dying, the demoniacal yells of the battle field, and the cruelties which the war spirit engenders. But these dreadful atrocities being brought before him, as the realities of military life, may have aroused him to see that rational men cannot engage in such work, without first steeling their hearts against those tender emotions which the law of our being requires us to cultivate. What wonder, then, that he shrank—that he acted in the character of a coward?

This may be regarded as a strained apology for Lord Forth. Be it so, then; we have no wish to uphold him, nor any other coward. Perhaps he merits all the contempt he receives. But these considerations show what principles *ought* to govern rational minds in reference to that most horrid of professions, the profession of war. Much as the world has glorified mere physical courage, we do not see that the possessor of it comes any nearer to the standard of a man than many-a-one who possesses it not. The only really perfect specimen of humanity that ever appeared on the earth was Jesus Christ. But whether he possessed what we call physical courage, we have no means of determining. We know that he exercised an unshaken confidence in the God whom he came to serve. We know that that confidence sustained him in all the circumstances of danger in which he was placed. Any one inattentive to the facts in the case might say, that there was a great display of physical courage, when, being awakened from sleep to witness the storm that agitated the sea, he showed no fear. (Matt. 8: 23–27.) But it was his confidence in God, not his physical daring, that banished all fear from his breast; and he rebuked his disciples, not for their cowardice, but for their want of faith. When he was inveigled by his enemies, when he was arraigned before Pontius Pilate, when he was called to undergo the torture of the cross, he demeaned himself with a calm fortitude; but the secret of it all was his trust in God. Physical daring made no part of the awful programme. It was, throughout, an exercise of moral obedience. No analysis of his character discloses any other kind of courage for us to admire, or imitate, except that moral courage which bids defiance to sufferings for the sake of accomplishing a great good. Yet such is the perverted spirit of the world, that Napoleon's character is held in greater admiration than that of Jesus Christ, and the cut-throats that have drenched the earth in blood are exalted above his Apostles.

Certainly, we would not undervalue physical courage. It has its uses, and sometimes plays no inconsiderable part in accomplishing real good. But it does not, necessarily, imply greatness of soul. It is, in so great a degree, the result of corporeal or animal organization, that even those who behave valiantly on the field of battle, when they come to have their nervous system prostrated by disease, and in this state of prostration to grapple with death, do, in numberless instances, show themselves as cowardly as the weakest. And in fact, the courage displayed by them on the field of battle is, as often as any other way, called forth by the unnatural excitement of the occasion. In the absence of such excitement, they are no braver than others. Just before the commencement of an action, soldiers have been known to tremble so that their limbs would scarcely support them, and would gladly have fled away, could they have done so without disgrace. The action once commenced, they were wrought into a perfect fury of courage. But what of the nature of cool, deliberate valor, was there in this? In what respect did it argue greatness of soul?

T. B. B.

RECEIVING CHRIST.

The Bible informs us of the Paradisiacal state of man, and of his fall, and the consequent misery. We learn from it of the choosing of Israel, also concerning the career of Moses and the prophets, with their dim, typical foreshadowings and prophetic visions of the future power and glory and benignity of Christ's spiritual kingdom.

Christ came and labored and died and rose. "He came to his own, and his own received him not. But as many as received him, to them gave he power to become the sons of God."

They would not receive Him because of his humble origin and life. They were expecting him to appear in worldly pomp and splendor—heralded by the great and noble of earth. They were not looking for him from among the lowly—were not looking for a carpenter, or the son of a carpenter, or that his heralds, delegated with especial power from on high, should be fishermen or tax-gatherers. Yet so it was, and they were offended at him. They would not receive him from their attachment to Mosaic institutions. Theirs was an old and well-established form of religion—his was new and untried. The purity of his life, and the spiritual nature of his doctrines, prevented their ready reception of him.

Mankind, at the present day, do not, any more willingly than of old, receive or come to Christ. Its lowly origin, its unpopularity, its newness, or their attachment to more ancient institutions, may not now be the reason why men reject religion and its author; yet we now reject him for other reasons.

Our sinful natures and tendencies keep us from accepting him. His mission is a spiritual, a heavenly one. He stands in the gateway of holiness and love, beckoning us to God. There is no other way by which we can come to our Heavenly Father, save through His son, Jesus Christ; yet our groveling dispositions are continually drawing us earthward. Our affections are ever centered upon objects of sense and sin. The appetites, propensities, and passions, are continually dragging us down deeper and deeper in guilt. Christ is inviting us to a higher and diviner life—we seek a lower and more sinful one.

Business and pleasure absorb our time and engross our affections. Alledged inability, either in time or power, and prejudice, oppose themselves to our acceptance of this diviner life. Its mysteries are urged as reasons against it. All such excuses reject Christ, despise, condemn God, abuse His mercy, and cast contempt upon the great plan of salvation. All the difficulties have been removed by Christ. All of the burden and guilt imposed by a broken law have been voluntarily assumed by him, and all necessary provision made for us, if we will, to accept of salvation.

We receive him by faith in his name, by willingly and cheerfully appropriating to ourselves all the ways by which he meets our various wants, relations, and necessities. He comes as the great mediator and advocate between us and the Father. He comes as the great redeemer and sacrifice, as our justifier and sanctifier. Do we want some one to enter into the holy of holies, and there offer propitiation for our sins? Christ stands as the great high priest. Are we ignorant, and need instruction? He has come as teacher. Are we groping in darkness? He is the true light. Are we hungering and thirsting? He is the bread and the water of eternal life. Are we like lost sheep scattered upon the mountains? He appears as shepherd to lead us to a fold of safety. Are we weak? He is strong. Are we friendless and brotherless? He offers himself as friend and elder brother. Are we exposed to danger? He is a shield, and a rock of salvation. Yes, he is the true vine—the wonderful counsellor—the captain of our salvation—the *head of the church.* He is to be received in these varied, important, and intimate relations, by faith, by repentance, by filial and cheerful obedience, by full and hearty love and affection, by a grateful, cheerful, acknowledgment of Christ, of his religion, before the world.

Thus receiving Christ, we are justified, sanctified. We have peace. Joy fills our souls. Hope, zeal, burn brightly upon the altar of our hearts. Eternal happiness beams sweetly upon our future pathway. May we thus receive Christ.

THINGS IN CHINA.

Extracts from a letter of Eld. Nathan Wardner to the Executive Board of the Seventh-day Baptist Missionary Society.

SHANGHAE, Nov. 1, 1854.

Soon after we moved here [into the new house] I dismissed the cook we had had in employ for two or three months. About a month or six weeks previously he communicated a wish, through my teacher, to be received into the church, professing to be deeply interested in the doctrines of the Bible. I had before noticed that he treasured up such knowledge more rapidly than is common for Chinese to do; still, I thought it not safe to encourage him too fast, and replied, that before administering to him the ordinance of baptism, I wished for more opportunity to judge of his fitness by observations in regard to his manner of life. Soon after this we began to miss provisions and various little articles about the house, and in an increasing ratio, till we thought fit to inform him, that we should make him responsible for what was committed to his trust; at which he became very angry and impudent, and refused to stay on such terms. Our suspicions in regard to him have since been fully confirmed. The frequency with which such professions occur here which prove to be made through mere policy, is quite disheartening, and tends to make us *fear* "all things" instead of *hoping* "all things."

In reading the life of Dr. Judson, I was struck with the difference between the characters of the Burmans and Chinese. The former were inclined to investigate, dispute, and openly to commit themselves without reserve; while the Chinese must have the truth drilled into them, without much effort on their part; and discussion with them on religious topics is almost entirely out of the question. And it is no easy matter to know what their honest sentiments and feelings are, except as we may see them practice under such circumstances that no worldly interest can influence them. Converts in India were bold and aggressive in publishing the Gospel, while in China there is but little evidence that converts do anything to speak of towards disseminating the doctrine, except as they are led on by and under the inspection of the foreign teacher; and few, if any, show a disposition to make sacrifices for the truth's sake. In these remarks I only have reference to those who are connected with foreignors.

On the 23d of October—Sabbath—while passing a neighbor's garden, I stopped and got into conversation with a man who was at work near the path, and in a few moments had a congregation of nearly a dozen, to whom I held forth for about twenty minutes, and received very good attention. Passing on, I distributed a few Sabbath publications among the British guards. On my return, I met with three criminals, in chains, and two of them had iron bands fastened round their bent knees, so that they were obliged to hitch along on all fours, half reclining. On inquiry, I learned that they had been condemned, through the English Consul, to this punishment for smoking opium on the English reservation, in violation of a law recently enacted by the municipal authorities. The Chinese seem to think it rather hard that they should be compelled to admit that drug as an article of traffic, and then be subject to such penalties for using it.

25th. Had a long talk with a pro-slavery missionary on the sin of American slavery and the manner in which Sundayism is propagated in China.

The imperialists have recently built a new encampment between here and my house, whence a constant firing is kept up with the rebels, which prevents me from going there at all, as I cannot do so without endangering life. The last news I had was, that they, or somebody else, were tearing up my floors, tearing down my fences, smashing in my doors and windows, &c. I sent in a complaint to our Consul, a few days ago, requesting his interference. But it is doubtful whether any thing effectual will be done. It is possible that indemnification for such damages may eventually be obtained from the Chinese government, but it is not probable that it can be brought about soon enough to afford us any relief during these troublous times. If peace should now be restored, it would require quite an outlay of money to put it in a habitable condition again.

Oct. 2d. In my walk this evening, I called on a family near the city wall, and to open a way for introducing my subject, inquired if they were much exposed in time of battle; to which the woman of the house replied, that in consequence of her possessing a pure and righteous heart, neither she, her house, nor any of her family, had received any injury, though cannon balls had struck on all sides of them, and had entered the houses of several of their neighbors. I could not get her to admit that she was ever guilty of an evil thought, word, or deed. But she finally admitted, that she worshiped idols and ancestors, on the righteousness of which I joined issue with her, and endeavored, as well as I could, to present the torch of truth, in hopes to enable her thereby to discover some of her own filthiness. Self-righteousness is very characteristic of this people, and if they chance to escape any prevailing calamity, the tendency is to strengthen the deception. It is only occasionally, in such desultory modes of labor, any thing occurs that is sufficiently striking to be worth recording.

There are a couple of families in the city which we have been in the habit of visiting Sabbath-days of late, who profess to be interested in the subject. But where there are so many temptations to make false professions as at present, there is no knowing how much dependence to put upon them.

A week ago last Sabbath, when we went in, we found widow Chung a corpse. The Sabbath previous, we visited her, talked and prayed with her, and she seemed to relish what we said, but we did not think then that she was near her end.

Last Sabbath I tried a new method for getting a congregation. Taking some tracts and a copy of Matthew's gospel, I went into the by-ways which were much frequented, and selecting an eligible position, went to reading. But the passers-by would merely stop long enough to see what I was about, and then pass on. Failing in my first effort, I passed on to another street, and met with similar success, till I began to think I would be obliged to change my mode of attack, when an acquaintance happened along, with whom I entered into conversation. After exchanging a few words, others halted, when I proposed to read them a few sentences for their entertainment; to which, out of politeness, they consented; and I very soon had a good congregation. After reading part of the fifth chapter of Matthew, I commenced explaining and applying it, and continued my remarks for near half an hour, and then distributed what tracts I had. As I have a tract now going through the press, I have commenced a system of daily distribution, beginning with a few that I have been keeping for emergencies.

There seems to be quite a prevailing opinion, that matters at Shanghae will be brought to a crisis before long. It is reported that the French have offered to protect the imperialists while they build a blank wall between the French reservation and the city, so as to enable them effectually to cut off supplies, and starve the rebels out. If this is done, in all probability we shall soon have exciting times.

The representatives of the three treaty powers are expected back from Pekin next week. It is to be feared that China is yet to have more to go through with than merely to terminate her present struggles. The spirit of aggression among western nations is becoming strong, and there seems to be a disposition to seize upon the most favorable opportunities to secure their ends without stopping to think much about right or wrong. But though in these things God is not thought of, all are tending towards that one great crisis which he has predetermined.

REVIVAL AT SOUTH KINGSTON—AGAIN.

NEW MARKET, N. J., Jan. 21, 1855.

To the Editors of the Sabbath Recorder:—

In a letter just received from Bro. C. M. Lewis, bearing date South Kingston, January 15, he says:—

"Last Sabbath Eld. Clarke baptized nine, and yesterday seven more. Fifteen have joined this little church, and twelve of the number are converts to the Sabbath of the Lord our God.

"You may conclude our dear brethren and sisters can give God thanks, and take courage to serve him, and advocate his holy truth.

"In one discourse, I endeavored to show the people here where I understand the 'lines of the lot lie,' as relates to the Sabbath. I have the pleasure of knowing that I have *once* preached so as to create some *sensation* in community.

"Eld. Berbank (the first-day Baptist minister) has given notice that next first-day he will preach at his church on the subject of the Sabbath. We feel it our duty to attend, and see whether the last survey agrees with the original lines of the lot. A re-survey of the 'lot' may be found necessary.

"Give us the aid of your prayers, that the cause of truth and of God may be carried forward to a glorious consummation here."

May the Lord prosper this little church, once the field of labor of our dear Bro. Carpenter, and of late years under the care of Bro. Henry Clarke, until she shall "shine forth clear as the sun," and for the truth become "terrible as an army with banners," is the ardent prayer of H. H. BAKER.

RELIGION OF THE CHINESE INSURGENTS.—Sir John Bowring, in a private letter dated June 23, 1854, says:—

"I have sent my son with my public secretary to Nanking, in order to learn something more positive than we have hitherto gathered, as to the 'religious movement,' as it has been called. The nearer we approach, the more we see of the fraud, imposture and fanaticism. An extraordinary change is taking place in the minds of the missionaries, even the most sanguine."

In another part of the same letter he says of the insurgents:—

"Instead of seeking after Christian truths, they proclaim their 'celestial king' as a portion of the Godhead, profess to have 'The Holy Ghost' for one of their kings, and enjoy personal intercourse with Jesus Christ, who, they say, comes to their camp, and holds conversation with their chief. Since the time of Mahomet no event so extraordinary has occurred, and I am by no means sure that this new impostor will not found a new religion, as Mahomet did; but it will be one of bitter persecution against all who deny his 'divine' authority. These are the impressions I have received up to the present moment."

RETURN OF MR. ROBERTS.—The ship Messenger, from Shanghae, China, which arrived at New York on the 24th January, brought Rev. Issacher J. Roberts, wife and child. It would seem from this, that Mr. R. abandons the idea of becoming soon the spiritual teacher of the leader of the Chinese Insurrection.

A TRIBUTE OF RESPECT

To the Memory of Wm. M. Fahnestock, M. D.

Oh death! how varied are thy schemes,
To crush our hopes, and blight our dreams;
To snatch the jewled joys of life,
The parent—child—the husband—wife.

Again thy stern, relentless hand,
Hath seized the life-destroying brand;
Again thine arrow swift hath flown,
And robbed life's bright and cherished throne.

Another star hath paled and died,
Whose light filled every heart with pride;
Science hath lost a pilot true,
One of her noble, treasured few.

Alas! no more the scholar, sage,
Will fill with glowing thoughts the page—
No more apply the healing art,
Or with kind words enchant the heart.

Farewell! thou husband, father, friend;
We mourn thy sad, untimely end;
We wait until our change shall come,
To greet thee in thy blood-bought home.

Farewell! physician! kind and free;
We cherish heartfelt thoughts of thee;
Thou art beyond dark pain's control;
The great Physician makes thee whole.

Farewell! thou scholar, writer, sage,
There is a bright and golden page,
Where mercy pure hath wrote thy name,
Beyond the reach of empty fame.

Farewell! farewell! thy work is done;
Again, farewell! thy race is run;
'Tis run—ah, no! the soul, the heart,
Begins anew its glorious part. W. H. V. N.

Bordentown Register.]

CHARITABLE BEQUESTS.—The will of the late Jas. McBride, merchant, testifies his interest in the benevolent and religious institutions of this metropolis, by appropriating the sum of $6,500, in sums of $500 each, to the American Bible Society; the American Tract Society; the Board of Foreign Missions of the Presbyterian Church of the United States of America; the Board of Missions of the General Assembly of the Presbyterian Church in the United States; the Board of Education of the Presbyterian Church of the United States of America; the Association for the Relief of Respectable Aged and Indigent Females in the city of New York; the Society for the Relief of Widows with Small Children; the Managers of the New York Asylum for Lying-in Women; the New York Magdalen Female Benevolent Society; the American Female Guardian Society and Home for the Friendless, incorporated by the Legislature of New York in 1849; the New York Institution for the Instruction of the Deaf and Dumb; the Managers of the New York Institution for the Blind; the Orphan Asylum in the city of New York; the Society for the Relief of Half-Orphan and Destitute Children, established in New York, Dec. 16, 1835; the Roman Catholic Orphan Asylum in the city of New York.

NEW LIQUOR LAW IN MAINE.—A telegraphic dispatch from Boston, dated Jan. 23d, says:—A new Liquor Law has been laid before the Special Temperance Committee of the Maine Legislature, by Neal Dow, which is more stringent in its action, if possible, than the existing Maine Law. The bill provides that for selling liquor in violation of the provisions of the act, a fine of $50 and imprisonment in the County Jail for four months shall be inflicted for the first offense; for the second, a fine of $50 and six months' imprisonment; and for the third, a fine of $100 and one year in the State Prison. Persons intoxicated are obliged to disclose where they obtained their liquor, under penalty of going to the House of Correction. No action is to lie against any officer for seizing and destroying liquor, where the warrant is issued by a competent Court. Expressmen and Railroad and Steamboat Companies who convey liquor, except according to the law, are to be fined for the two first offenses and imprisoned one month for the third. It is thought the bill will be adopted by the Committee, but there is some doubt as to the action of the House.

AN EXAMPLE IN HARD TIMES.—We were accidentally in the counting-room of one of our city firms, a day or two ago, when an agent for Foreign Missions called to obtain their annual subscription. Not a word was said about hard times, or a tight money-market, or about calling again, or thinking more of it. One of the firm handed the collector two thousand, and the other three thousand, making five thousand dollars to a single object of Christian benevolence, in the midst of commercial embarrassments. We happen to know that this firm never had a note lying over, and never asked a creditor to call a second time for his money. God has blessed them, and they give as they are prospered. But there are hundreds of members of our churches in New York, Boston, Philadelphia, Baltimore, Pittsburgh, New Orleans, and other cities, worth more money than these men, who have not the heart to give as they have received. [N. Y. Obs.

PRICE OF RELIGIOUS NEWSPAPERS.—Several of our religious exchanges have within the last half-dozen years tried the experiment of competing *in price* with the papers devoted mainly to advertising and politics. In almost every instance, a few months have sufficed to show the folly of such proceeding. These papers have been compelled either to increase their price or suspend publication. The New York Weekly Chronicle the organ or advocate of the American Bible Union, started at one dollar a year; but we see that it has recently changed proprietors, and that its terms are now two dollars per annum in advance, or two dollars and fifty cents if payment is delayed six months.

DAY OF FASTING.—A business letter from a member of the 3d Seventh-day Baptist Church in Brookfield, says: "We observed the day set by the Central Association for the meeting of the Council in Adams, according to the recommendation, as a day of fasting and prayer, by preaching and public prayer after the discourse. There was evidently a great deal of feeling in the minds of many of our brethren and sisters on the subject of a proper adjustment of all those difficulties."

THE CRIMEA.—An extract of a letter from an officer in the Crimea, conveys the gratifying information that conversions are taking place in the camp and on the field. Two instances are mentioned, by name, of officers who had gone to the East careless about religion, and who had there found a Saviour, lived in the daily practice of reading the Scriptures and prayer, and one of whom had died in faith. The letter also stated that there were about 300 pious officers in the land service, and as many in the sea service in the East, besides many religious men in the ranks—men who daily braced themselves up for death by prayer and faith.

ENGLISH WESLEYANS.—At its last session, the British Conference resolved, that "on the second Sunday in January, 1855, sermons specially directed to the awakening of sinners and the revival of a spirit of tender concern for the unconverted, shall be preached in all our chapels;" such sermons to be followed up "during the succeeding week by SPECIAL RELIGIOUS SERVICES daily throughout the kingdom, that the whole Society may together humble itself before God for past unfaithfulness, and seek for new and more ample measures of the quickening Spirit."

RELIGIOUS INTELLIGENCE.

During the year ending in 1854, the amount received by the Episcopal General Domestic Committee from the churches in the several States was $38,404 15, and for foreign missions, $59,582 23, making a total of $97,068 38, which is an increase of some $25,000 over the previous year. Of the receipts in 1854, Massachusetts contributes one twenty-fourth, and, in 1853, one-ninth.

A speaker at the London anniversaries stated as his belief, after careful examination, that the number of missionaries laboring throughout the world is about 3,612. These, if equally distributed, would allow but one missionary for about 167,000 souls.

In the House of Representatives, South Corolina, the Messenger and Door-Keeper are both students, one of the South Carolina College, and the other of the Furman University, and both educating themselves on their little salaries.

Strang, the Mormon Prophet of Beaver Island, has made a move in the Legislature of Michigan to admit colored citizens to the right of suffrage. Strang says: "On looking for a man, he looks not in the face, but *to the soul.*"

The London *Jewish Chronicle* states that the movement to carry out the scheme for an Anglo-Jewish College is progressing. Salvador House has been taken, and negotiations are reported to be on foot for the engagement of Dr. L. Lowe, of Brighton, (Eng.,) as Head Master.

The ringers of Christ Church, Philadelphia, on New Year's Eve, celebrated the 100th anniversary of a peal of bells in that church. These bells were the second full chime put up in the United States; that on the old North Church in Boston, being the first.

It is stated that during the last six years and a half, 32,000 persons have left the Romish Church in this country, and become members of Protestant churches, while more than 80,000 have become unsettled in their old opinions.

The donations of the churches in Boston to the American Board during the last year amounted to $27,483 51, of which the Mount Vernon church gave the largest single portion—$5,399 63.

The library of the late Daniel Sharp has been purchased by some of the members of his church, and presented, together with a bust of himself, to the Newton Theological Institution.

A pastor of one of the Boston religious societies recently made an appeal to his people for $1,500 for some benevolent object; they responded by a contribution of $2,000.

Elihu Burritt, the well-known philanthropist, has issued the first number of a magazine, called the *Citizen of the World*, of which he has assumed the editorial charge.

Rev. Professor W. S. Tyler, of Amherst College, has received the premium of $150 for the best essay on Prayer for Colleges.

Twenty persons have recently been baptized and added to the West Union Baptist Church, Marion county, Ind.

Seventeen persons have been baptized, as the fruits of a work of grace, still in progress, in Cheviot, O.

Thirty-five persons have been baptized within a few weeks, at Gilbertsville, N. Y.

Luther Severance died at Augusta, Maine, on the 25th ult., aged about 55 years. Mr. Severance was for many years editor of the Kennebec *Journal*, the Whig State paper of Maine, and one of the best inland gazettes in the Union. While acting in that capacity, he was chosen twice to Congress, and served from '43 to '47 with eminent fidelity and usefulness. Upon Gen. Taylor's accession to the Presidency, he was appointed U. S. Commissioner to the Sandwich Islands, whither he immediately proceeded, and discharged the duties of his office until Gen. Pierce's elevation. Here a cancer on his face was gradually developed, which had considerably disfigured him before he returned, and which ultimately ended his life.

On Thursday evening, Jan. 25, Alvah Redfield, Esq., of Tunkhannock, Wyoming Co., Pa., was found dead near Painted Post, on the road from Corning. It was at first supposed that he had been robbed, but after long search his money was found. He left the New York and Erie train at Corning, and undertook to walk to Painted Post, some two miles, complaining at the time of not feeling well. He probably died of disease of the heart. He was 54 years old, and was Superintendent of the North Branch Extension Canal.

In the course of his lecture on Water, Prof. Silliman gave his testimony, as a chemist, against the use of alcoholic beverages. The only fluid proper to be taken into the stomach, and that may be safely used, is pure water. There is no deadlier poison than alcohol, and the nearer the quantity imbibed is reduced to an infinitesimal amount, the further off is the drinker from its dangerous effects. It supplies no nutriment, and the human system must be impaired by the introduction of such an element.

General Intelligence.

Abstract of Proceedings in Congress.

SECOND-DAY, JAN. 22.

In the SENATE, a proposition was submitted, to place at the call of the President a sufficient volunteer force to keep the Indians quiet. The conduct of the Postmaster-General, in refusing to establish, as directed by law, a daily mail between Louisville and New Orleans, was freely commented upon, and finally referred to the Post Office Committee. Com. Perry's report of operations in Japan, with maps, &c, was directed to be printed.

In the HOUSE OF REPRESENTATIVES, the only subject of interest under consideration was the Pacific Railroad Bill, which was, after considerable maneuvering, referred to a select Committee.

THIRD-DAY, JAN. 23.

In the SENATE, a resolution was offered, that the President be requested to cause the Secretaries of State and Treasury to communicate to the Senate from their Departments, all information relative to the transportation of convicts and paupers into the United States from foreign countries, and what agency their Governments have had in sending them here; also, how many volunteer immigrants have arrived within two years past; also, that the appropriate Committee be instructed to inquire what, if any, legislation is required to prevent foreign Governments from transporting convicts and paupers into the United States; and also, whether any and what legislation is necessary to prevent voluntary immigration hereafter of either of the above classes The Bounty Land bill was then taken up, and some amendments were adopted, extending the benefits of the bill to soldiers of the War of 1812, and widows of Revolutionary soldiers.

In the HOUSE, Mr. Seward (of Ga.) made a pointed exposure of the quiet and easy manner in which the Standing Committees stifle a great deal of the business referred to them, by never reporting at all upon the matter. The Pacific Railroad bill was then put to sleep for the session by a vote to reconsider the vote of yesterday, and to lay that reconsideration on the table, which was done by a majority of one. The French Indemnity bill was taken up and discussed at some length.

FOURTH-DAY, JAN. 24.

In the SENATE, the Army Appropriation bill was taken up, after considerable objection. A number of amendments were adopted; among them, one to expend $30,000 in trying dromedaries for military transport. The bill was not disposed of, when the Senate adjourned.

In the HOUSE, the French Spoliation bill was taken up, and Mr. Benton and others discussed it. Without reporting the bill, the Committee rose and the House adjourned.

FIFTH-DAY, JAN. 25.

In the HOUSE, a Mr. Cooper made a long speech on his resolutions to prevent the introduction of foreign paupers and criminals. After some sharp talk on nativism, the resolutions were laid aside, and the Army Appropriation bill came up, on which there was some talk of the present and anticipated Indian troubles.

The Speaker laid before the HOUSE a message from the President of the United States, in response to the resolution of August last, relative to the selection of the sites for the accommodation of Courts and Post Offices in Philadelphia and New York. The communication was referred to a select Committee. The debate upon the French Spoliation bill was closed, but the House adjourned before coming to the question.

European News.

One week later news from Europe was received in New York on the 25th January, by the steamer Pacific.

By this arrival, the prospect of peace receives additional confirmation. The Czar unequivocally accepts the basis of negotiations proposed by the Allies, and a Congress to settle the definitive terms of peace, or at least to attempt it, is about to meet at Vienna. The starting point from which the new negotiations are to begin, and upon which the parties are all agreed, is: 1. The revision of the treaties between Turkey and Russia; 2. A joint protectorate of all the great Powers over the Christians of Turkey; 3. The free navigation of the Danube; 4. France and England to have respectively the right to maintain on the Black Sea the same naval force as Russia. These terms the Russian Envoy at Vienna refused to accept without special orders from St. Petersburg; but, much to the surprise of everybody, such orders were promptly received.

Meanwhile, however, hostilities continue, which seems strange if peace is really to be restored. Around Sevastopol the allies are erecting additional works, but up to Jan. 3d, no attack had been made on the fortress.

Sardinia has joined the Western alliance. The conduct of Prussia and of the Germanic States is still equivocal.

There has been another tempest in the Black Sea, causing some disasters. Two ships of the British fleet suffered damage.

A terrible storm had raged along the African coast. About forty vessels, mostly laden with wine, were ashore.

A courier from Bucharest confirms the accounts of the war on the Danube having been recommenced. The Russians, in force, crossed Tultcha, defeated the Turks, took the town, and are now marching on the Katchia. The Austrians do not interfere. This report has caused some consternation.

According to private accounts of a completely reliable character from St. Petersburg, great distress is experienced in that city, and much dissatisfaction prevails at the hardships imposed by the war. It is mentioned that in all the churches prayers are offered for peace.

Provisions are becoming very scarce at Constantinople, from the immense requirements of the armies. An organized force of police, French and English, is placed on duty in Constantinople, in consequence of repeated quarrels and assassinations that have recently occurred.

A general order has been issued, through Lord Raglan, signifying the Queen's approbation of the conduct of the troops at the battle of Inkermann, and announcing that a medal will be issued to all officers and soldiers who have served in the Crimea.

A terrible inundation of the Elbe occurred on the 2d Jan. The damage done at Hamburg is estimated at from three to four millions of marks. In Hanover many of the dykes gave way, and the land was flooded for miles, causing much loss of property, and probably of life. At Cuxhaven there was but little shipping when the hurricane, which preceded the inundation, came on, and not much damage was done beyond the loss of spars and anchors. A steamer from Leith is reported to be lost at sea, and other sea-going steamers reached port with paddles and deck-works damaged. The loss of the George Canning, New York liner, (supposed in the same gale,) is referred to.

A pastoral letter from Cardinal Wiseman, relative to the "Immaculate Conception," has been read in all the Roman Catholic chapels of Britain.

Queen Pomare, of Otaheite, announces that she intends to visit the great Exhibition in Paris, in May next.

California News.

The steamer George Law, with nine days later news from California, and $1,269,997 in gold dust, arrived at New York on the 25th January.

The accounts from the mines show a good deal of suffering from the want of rain, which brings all kinds of business to a stand-still, and has produced considerable pecuniary embarrassment.

The particulars of an outbreak of the convicts in the State Prison are brought by this arrival. Some twenty-five or thirty of the most desperate among the convicts made the attempt to escape. Some were killed, some wounded, some recaptured, and many got off. The keepers of the prison, assisted by the police of several counties, were in pursuit of the fugitives, and they will, most probably, all be recaptured or slain. They are bold, desperate fellows, and seem disposed to fight to the death rather than be taken.

A letter dated Rocky Canon, Dec. 20, says:—

Yesterday we had quite an exciting scene happen within a mile of our tent. While two of my partners and myself were taking a hunt over the hills, we heard the report of guns below us, and saw two small parties shooting at each other. Convinced that they were all strangers, we hesitated for a moment before we ventured down to them. A feeling of duty, however, soon prompted us to hasten down. On approaching we saw two of a little party of three whom he had noticed following the trail unobserved, some half hour previous, fall in the fight, and the remaining one, a man somewhat above the medium height, whom we could readily distinguish from all the rest by his white hat, fighting bravely for his life. Approaching still nearer, we were surprised at the sight of eleven men lying stretched upon the ground, seven of them dead, belonging, as they afterward proved, to a party of robbers, and one only of the party of three so suddenly fired upon from the bushes by robbers. Three of the wounded robbers having died last night, we had ten of them to bury. One survives, who will probably recover. He is marked, however, for life, having lost his nose in toto and the fore-finger of his right hand. Seven of them were shot through the head. The surviving one, who seems to be but little hurt, says that their band was composed of two Americans, Frenchmen, five Sydney men, and four Mexicans, and they had just commenced operations, having killed six Chinamen three days ago and four Americans the day before yesterday.

Night-Running upon Railroads.

We have sometimes heard it remarked by timid persons, that they would not travel by night on the railroad—their impression being that there is more danger of accidents in the dark than during daylight. Upon first thought, this would seem to be the fact; but a writer in the *Railroad Advocate* takes a different view of the matter, and certainly makes out a good case. He says there are many circumstances which make night-running comparatively safe. All work upon the track is stopped. Comparatively few other trains are on the road. No drawbridge would ever be likely to remain open in the night. Switches are more likely to be right than at other times, as they are not in use for other trains, and are locked. The signals for night trains being made by *light*, would scarcely fail to be observed and obeyed; and what is important, would be seen at a greater distance than any other signal in daylight. The Engineer has less to attract his attention than in the day time. While, after all, a rock or tree falling across a bend in the track in broad daylight, or an intended obstruction, is nearly as much a "hidden danger," as if encountered in the night. There are many places in nearly all roads where the range of view is less than the reflection of the "headlight" at night. So, after all, it would appear that one can take a night's rest in a railroad car with comparative safety.

PETRIFIED BODIES.—The Germantown *Locomotive* tells the following story, which, though not unparalleled, is somewhat remarkable: On Monday last, Mr. George Loy, of this township, caused the bodies in his family burying ground on his farm to be disinterred, in order to re-inter them in the grave-yard at Sunbury. The burial place was in very wet ground, and the coffins were, for the most part, in water. Upon digging down, all the coffins were found to be solid and sound, although most of them had been buried for many years. Upon opening the coffin of Mrs. Loy, who had been buried about twenty-four years, it was discovered that the greater part of the body was petrified and very solid. The head and neck and one of the legs had dropped off and decayed. We are informed that a child was also found to be in a state of petrification.

THE SHIP GREAT REPUBLIC.—A fatality seems to attend the clipper-ship Great Republic. After being exhibited for some time in Boston and New York as a great curiosity, she was partly destroyed by fire when nearly ready for sea. Since that, she has been made over, had her upper deck taken off, and been fitted for sea. On Sabbath-day, Jan. 20th, she was hauled out of the pier next to Peck-slip, where she has been lying for some months, and towed across to Ford's Wharf, on the Brooklyn side of the river, adjacent to the Wall-st. Ferry-House, where she is loading for Liverpool. Tuesday afternoon, the boiler of the steam-engine on board, for hoisting and lowering cargo, exploded with a loud report, blowing the engine-house, engine and boiler to atoms, and severely injuring the engineer and three lightermen that were near it. The engine house was situated on the upper deck, just aft the mainmast. The explosion scattered the fragments of the house and machinery in every direction.

COCK-FIGHTING IN NEW YORK.—The following paragraph from the N. Y. *Tribune* of Jan. 24th, shows that New York is getting along in the customs of the old world:—

On Monday evening, about five hundred of "the fancy" were crowded together in the sub-cellar of No. 283 Bowery, kept by one Quackenbos, for the purpose of witnessing a "Royal Main" or cock-fight, for $500 a side. Nearly all the principal fighting men in the City were present. It is said that there were also several police officers in the crowd. The tickets of admission were $1 each. Twenty-nine cocks were put up by the Troy party, backed up by Morrissey, who won from $3,000 to $5,000. An equal number of birds was put up by their opponents from Brooklyn, backed by McNulty. These professional gentlemen were engaged from 9 P. M. Monday, to 7 A. M. Tuesday morning, in their favorite pastime, betting and swearing, drinking and commenting upon the chances of their favorite birds. The cocks had long steel spurs attached to their heels, and nineteen of them were killed outright by "gaffing" alone. An English fighting man presided over the game, and there were two judges and four referees. Large sums of money were lost and won on the results of the fighting.

ANOTHER INFERNAL MACHINE AT CINCINNATI.—A diabolical attempt was made on Monday evening, Jan. 22, to destroy the family of Mr. Cyrus Swishelm, at Cincinnati, the particulars of which *The Enquirer* gives: On the evening in question Mr. Swishelm and family, consisting of five persons, were seated around the fire, when a huge ball descended the chimney, and, bouncing into the fire, rolled in a bright blaze into the middle of the floor. It was made of cotton, saturated with turpentine, and, during its brief contact with the fire, had become ignited. Luckily, a pail of water was standing near, and Mr. Swishelm, catching the burning ball in his hand, instantly immersed it in the water and extinguished it. Upon opening the ball it was found to be filled with gunpowder and slugs.

HOOSICK TUNNEL.—The Hoosick Tunnel project seems to be in a fair way for successful competition, at least so says its friends. A company, consisting of Messrs. Aspinwall, (of the House of Howland & Aspinwall, of New York) and Erastus Corning, of Albany, and others, agree to finish the tunnel road for $3,500,000. They take stock to the amount of $1,000,000, and furnish $400,000, leaving the Troy and Greenfield Railroad Company to raise $220,000. Aspinwall, Corning & Co. are to have the benefit of the State Loan of $2,000,000, granted last year. The work is to be completed within seven years, the time allowed by the loan.

SUMMARY.

The clipper-ship Witchcraft, Capt. Freeman, from the Chincha Islands via St. Thomas arrived at New York, Jan 23d, having made the passage in 60 days, said to be the shortest on record. She sailed from New York, May 9, 1854, and arrived at San Francisco August 15—97 days 8 hours from anchor to anchor; sailed thence August 28, arrived at Callao October 8, proceded to the Chincha Islands, where she loaded, and, as already stated, made the passage thence, via St. Thomas, in 69 days, having accomplished the whole voyage in 8 months and 14 days, which is nearly a month shorter than the same voyage was ever performed before.

A Miss Sarah Pellett, who has been officiating in San Francisco and neighborhood, has in contemplation the project of the importation of five thousand respectable marriageable girls from New England into California. They are to be recommended by the Sons of Temperance there, and to be consigned to the various divisions of the Sons of Temperance in that State, who are to receive them and provide for their wants—husbands included—we suppose.

A new application of the photographic process has been made, which is to supersede the labor of drawing previous to engraving. The Photographic portrait, or picture, is transferred directly to the wood, making a well-defined, and, of course, correctly proportioned and shaded likeness, ready for the engraver. By this process the enlarging and reducing of figures is done with perfect accuracy, beside saving a vast deal of the most irksome labor of wood-engraving.

The new steamship River Bird, built by Samuel Sneeden, for the Chinese coasting trade, went down the New York Bay on Friday, on a trial trip. Notwithstanding the heavy sea, she ran back from the bar bouy to the Fulton Ferry, about 26 miles, in 1 hour 40 minutes, under easy steam. It is expected that she will start from this port for China on the 1st February, under command of Capt. J. W. Paul.

The Census taken in 1851 discloses the following facts in regard to the number and size of farm-holdings in Great Britain. It appears that there are 190,573 farms under 100 acres each; 52,912 farms over 100 acres each; 20,603 farms over 200 acres each; 9,031 farms over 300 acres each; 4,063 farms over 400 acres each; 2,248 farms over 500 acres each; 2,816 farms over 600 acres each; 1,132 farms over 1,000 acres each.

Chief Justice Thurman has pronounced the unanimous decision of the Judges of the Supreme Court of Ohio, touching the constitutionality and validity of the Liquor Law enacted by the Legislature of that State at its last session. The opinion fully sustains the law on all the points raised against it. The decision is important, and will quiet all further discussion on the subject.

We learn that a paper-maker of Lee, Mass., has made several samples of paper from the weed known as "everlasting," and which the farmers have a great dread of. It is said to be easily converted into pulp. The paper made from it has a yellowish tinge, but a smooth, firm surface.

It is stated as an indisputable fact, that taking the whole United States together, much more money is expended for the single article of cigars than for all the common schools in the Union.

We learn from the Taunton *Gazette*, that a man named Michael McCarty, of Squawbetty, while on his way to the jail in Taunton, to which, as a common seller of liquors, he had been committed, in default of bail, escaped from the officer's grasp, and crying that he would drown himself before he would be arrested, sprang into the river and was drowned.

A dispatch dated Milwaukee, Tuesday, Jan. 23, 1855, says: In the District Court of the United States yesterday, S. M. Booth, convicted of aiding in the escape of a fugitive slave, was sentenced to pay a fine of one thousand dollars, and be imprisoned one month. John Reynolds, for the same offense, a fine of $200 and 10 days' imprisonment.

Printed and blank sheets of paper made from basswood have been forwarded from Albany to the London *Times* and *Bell's Life in London* and to some of the Paris journals. The London *Times* has for some time had a standing reward of £1,000 for the production of paper from other material than rags, at a reduced cost.

Mr. Sherman, a member of the Michigan Legislature from the Lake Superior region, has given the House notice that he will introduce a joint resolution instructing their senators and representatives in Congress to "set off" the upper peninsular of that State into a Territory, to be known as the Territory of Superior.

The London Athenæum has Mr. Bentley's authority for saying that the following sums have been paid by his firm for American copyrights to three American writers—that is, to Mr. Washington Irving, £2,450; to Mr. Prescott, £2,495; and to Mr. Fennimore Cooper, £12,590—in all, £17,535.

The way in which the new States of the West are filling up with emigrants is truly surprising. It has been stated that during the past season 100,000 emigrants have settled in Iowa, 25,000 in Minnesota, and about 40,000 in Wisconsin, while the roads leading to Texas are still swarming with them.

A dispatch dated Trenton, N. J., Tuesday, Jan. 23, 1855, says: The Prohibitory Law has passed to a third reading, and the final vote will be taken on Thursday. The bill has been so amended as to allow it to go to the people, at a special election, on the first Monday of October next.

A dispatch dated Mauch Chunk, Thursday, Jan. 25, 1855, says: A New Brunswick coal-boat caught fire at the wharf last night, and the captain of her, with his son, being drunk, it is supposed, in the cabin at the time, their bodies were burned to a crisp before they could be rescued.

A premium of twenty dollars for the best specimen number of an American newspaper, printed in the year 1854, having due regard to its typographical and artistical appearance, is to be awarded at the County Fair in Sumner Co., Tenn., which is to be held at the town of Gallatin.

Dr. G. A. Smith, formerly of Rochester, N. Y., who has been making experiments in Rockaway, Morris Co., N. Y., is said to have succeeded in manufacturing cast steel directly from the ore, which can be furnished at a price considerably reduced from that found in market.

A slave, secreted on board the bark Franklin, from Jacksonville for Bath, Me., on arriving at the latter place, took to the swamps, where he lay concealed for several days. The women went after him, dressed him in female clothing, and sent him off to New Bedford, whence he speedily departed for Canada.

There is at Astoria (near New York) a family of which there are now living, seven males and seven females, the eldest seventy years of age, the youngest forty-five years, making an aggregate of eight hundred and twenty-two years.

The Toronto papers inform us that there are two post-offices in Canada now called Alma and Inkermann, in honor of the two battles which the allied armies have gained against the Russians.

The citizens of Hartford, Conn., have raised, by voluntary contribution, the sum of $3,730, in aid of the suffering poor of that city. The amount was made up by a little over one hundred individuals.

The Farmers' and Mechanics' Bank of Indianapolis, Ind., owned by Allen May and W. F. May, was robbed on Friday evening, 19th ult., of about $10,000.

New York Markets—January 29, 1855.

Ashes—Pots $6 68; Pearls 7 00.

Flour and Meal—Flour, 8 00 a 8 25 for common to good State, 8 62 a 9 00 for Michigan and Indiana, 10 50 a 12 00 for extra Genesee. Rye Flour, 6 25 a 7 25. Corn Meal, 4 62 for Jersey. Buckwheat Flour 3 75 a 4 00 per 100 lbs.

Grain—Wheat, 2 05 a 2 12 for mixed Western, 2 28 for white Ohio, 2 48 a 2 52 for white Genesee. Rye, 1 32 a 1 35. Oats, 51 a 53c. for Jersey, 60 a 63c for State and Western. Corn, 98 a 99c for Western mixed in store.

Provisions—Pork, 13 25 for new prime, 14 25 a 16 25. Beef, 5 50 a 7 00 for country prime, 8 50 a 11 00 for mess. Lard, 10c. Butter, 11 a 17c for Ohio, 17 a 24c. for State, 24 a 27c. for Orange Co.

Hay—94c a 1 00 per 100 lbs.

Lumber—15 00 a 15 50 for Eastern Spruce and Pine.

Potatoes—2 50 a 2 75 for Pinkeyes and Western Reds, 3 00 a 3 50 for Mercers and Carters.

Seeds—Clover, 11 a 12c. Timothy, 3 00 per bushel for reaped. Rough Flaxseed, 1 85.

Wool—28 a 30c for native, 42 a 45c for American Saxony Fleece.

☞ There is but little change in the general aspect of affairs since our last. Stagnation in business, bankruptcies, failures, loss of confidence, inflict an injury upon the community which it takes time to cure. The improvement will probably be but slow and tedious, until the coming to market of the next crop. If this should be abundant, it will probably afford substantial relief. These business derangements and consequent disorganization and confusion, are very demoralizing in their effects upon the community. Embarrassment, destitution, and want, have a powerful tendency to break the spirit of individuals, and to gradually undermine and destroy laudable pride, ambition, and self-respect. This is an evil of great magnitude to the community, and well worthy the serious attention of the Christian philanthropist. How can these evils be prevented, or even essentially diminished or mitigated? JOHN RANDOLPH of Roanoke said, near forty years ago, in his place in Congress, "I have discovered the philosopher's stone; it is to *pay as you go*." We should scarcely ever buy too many goods in Europe, if we should establish and adhere rigidly to the rule of paying for them at the time of making the purchase. Our country merchants would seldom buy too much, if they could only obtain what they paid for at the time. So of individuals; if they would only allow themselves to consume an article of necessity or luxury after it was honestly paid for, the number of extravagant and foolish purchases would be greatly diminished; and although they might not be entirely prevented, the individual would usually remain in a solvent condition, and would escape that vortex of embarrassment, bankruptcy, destitution, and the too often consequent humiliation, degradation, and demoralization. The character, position, and prospects of individuals and families, are often totally and irrevocably changed by a change in their pecuniary condition. Families are broken up and scattered abroad, children separated from their natural guardians and protectors, and even disease and death are all caused by errors and follies in pecuniary matters, and the destitution, degradation, and misery incident thereto. Let those who are convinced of the truth of these views, and of the great moral utility of a reformation, commence forthwith to act upon the motto, *Pay as you go*. We are not hostile to a moderate and legitimate use of credit; but it should constantly be borne in mind, that the tendency is to excess, which is very dangerous, particularly to those of moderate means. "Out of debt, out of danger," is a sound maxim. The great evil, however, is the artificial debt system established by the States, in the form of incorporated companies, authorized to deal in the debt system, and scatter it broadcast over the land, in the form of a debt currency of promises to pay, without sufficient regulation and restriction.

MARRIED,

On the 1st day of January, 1855, by Eld. Elias Burdick, DAVID JOHNSON to LYDIA C. MAXSON, both of Truxton.

DIED,

In Shiloh, N. J., Jan. 16, 1855, of typhoid fever, accompanied with inflammation of the lungs, Mrs. SARAH ANN, wife of Eld. Walter B. Gillette, in the 47th year of her age. Mrs. Gillette made a profession of religion when in her twentieth year, and united with the Seventh-day Baptist Church in Friendship, Allegany Co., N. Y. Subsequently, when her husband was called to the pastoral charge of the Church in New Market, N. J., she removed her membership to that place; and in 1853, from the same occasion, she united with the Church at Shiloh, her native place. During her last illness, she suffered much. In the early part of her sickness, in view of past delinquency, she expressed some doubts of her preparedness for death. But on being reminded of her past experience, her faith in the Redeemer, her former joys, her sacrifices for the cause of Christ, and above all of God's mercy and faithfulness toward those who put their trust in Him, the evidences of her adoption were brightened, and her hopes of heaven confirmed, saying emphatically, "*Yes, I have a hope.*" Frequently she expressed a wish to depart and to be with Christ. Such was her anxiety to depart, that she often expressed fears that she should be impatient; and on one occasion, when a wish was expressed by her friends that she might yet live to be a blessing to her family and to the community. She replied, "If I live, I am afraid that I shall lose that sweet hope I now enjoy." She was much devoted to the welfare of her family, to whom she calmly gave directions about their future course, and kindly admonished them to discharge with fidelity the duties devolving upon them. In her intercourse with society, it seemed to be her greatest happiness to make others happy. We trust that our loss is her inestimable gain. Her funeral took place in the afternoon of the 18th, when a discourse was delivered by Eld. D. Clawson, other ministering brethren present participating in the exercises. G. T.

In Hopkinton, R. I., Jan. 11, 1855, Mrs. ELIZABETH STILLMAN, widow of Eld. Matthew Stillman, deceased, aged 80 years. Sister Stillman professed religion some 57 years since, and united with the 1st Seventh-day Baptist Church of Hopkinton, and there remained a devoted and faithful member until she was summoned to her glorious reward. For some months previous to her death she had been gradually declining in health, till, on the morning of her departure, a sudden change convinced her that death was at hand. The announcement did not alarm her; but with unshaken confidence in the divine promises, she fell asleep in Christ. Thus another of the long-standing members of this church has passed away. Her loss will be deeply felt among her brethren and sisters in Christ, to whom she was greatly endeared by a long and interesting acquaintance, as well as the kindness and constancy by which she evinced her desire for the prosperity of the church, in aiding her husband in his labors of love while he was its pastor. Especially will her death be felt by her numerous relatives and Christian friends, who have for many years been accustomed to find in her society the pleasures of friendship, and the cheerful, yet dignified enjoyments of Christian association. In this affliction, many will feel anew that

> "There is no union here of hearts,
> That finds not here an end,"

and be led the more to appreciate the sentiment—

> "There is a world above,
> Where parting is unknown;
> A long eternity of love,
> Formed for the good alone;
> And faith beholds the dying here,
> Translated to that glorious sphere." C. M. L.

MAYOR'S OFFICE, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the jurisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.

Leave Elizabethport at 8 and 9.45 A. M., 15 and 3.30 P. M. JOHN O. STERNS, Superintendent.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

☞ "The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 50 cents for a single copy; 35 cents per copy by the dozen. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of FRANCIS C. WOODWORTH, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year*.

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83½ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year*.

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

☞ The publishers of such newspapers as receive this notice, are requested to give the foregoing ballad (not including this notice) two or three insertions—the first insertion in their literary department. To those who comply with this request, the undersigned will send one copy of *Woodworth's Youth's Cabinet* for two years, or two copies for one year, at the option of the publisher respectively. D. A. WOODWORTH.

Miscellaneous.

A Visit to Japan.

Letter from a British Medical Officer.

NAGASAKI, JAPAN, Sept. 25, 1854.

Our small squadron of three steamers and a frigate arrived off this port on the 7th of September, and were running in with all ease and comfort, viewing with some surprise the number of batteries and guns on all available points of defense for the outer harbor, when we found some boats anxious to communicate a letter in several languages forbidding our entrance, and even verbally hinting such things as blowing us out of the water. This was at 4 P. M., but subsequently a deputation came and gave permission and promise of pilots for our going into the middle harbor on the following morning. We found our way in and anchored. A host of boats, with flags and canopies, accompanied us, or waited for the grand event of a British squadron visiting the port. A chain of small junks was moored across the mouth of the inner port. There was a Dutch steamer of war and the annual trading ship close in, near the Dutch factory, on the little island of Desima.

A party of Japanese officials visited us. Their appearance is peculiar; their features resemble those of North American Indians, who are considered to derive their origin from stray Japanese; and this notion is not out of the way, for our interpreter was one of a junk's crew cast away in 1833 on the north west coast of America, after tossing about 14 months or so. The mode of dressing the hair is quite different from that of Chinese or Tartars. The top of the head is shorn clean, the hair of the remainder is brought up to it and tied, and a short tail, made solid by gum, is laid on the head. The clothing is of loose silk gauze, of black or sober gray, a loose-fitting robe round the body and legs, with sometimes silk large-legged trowsers, and the feet covered with a cloth or cotton glove, with a separate accommodation for the big toe, as a part of the sandal fastening runs between the toes to the instep from the sole of rice straw, which appears to be worn by all classes.

Among the visitors there has been, I am told, an artist, and he took, slily, a likeness of the captain. They carry a pocket-book, and we have got a peep once or twice at a plan of the port or some of the guns, which are very large 64 pounders, and very numerous. All the visitors had in their sashes a long sword and a dagger. I got one to show me the latter, and it seemed as fine in temper and edge as one of my amputating knives. The hilts are curiously ornamented with gold and bronze, and the scabbards are of Japanware of a beautiful black and white shagreen. The curve is worn upward, and they will not show the large blade.

On the first day I found one or two who spoke Dutch, and I tried to get up a conversation.

Every thing seems interesting about this place and people, but they will not allow us many opportunities of judging, for we cannot land at all.

They have sent some supplies of various kinds, with fresh fish occasionally; in fact, any thing can be got but the shore. Our boats have had a little trip round the harbor, and some of our officers found two pits of coal, which appeared to be of good quality, and will add to the value of this place as a "*port de relache.*" The scenery of this place is charming. I have made some colored sketches. I hope to give you an opportunity of seeing them. We are going to Jeddo in a day or two; perhaps I may find something to communicate.

OCT. 2.—The fear of our departure has induced the Governor to give us some supplies, with permission to pay for them through the Dutch Government—a great step in policy. We have some good tea and rice; pigs are coming instead of beef; cattle are only draft, and the use of milk is unknown, as in China. Wax candles are used, and seem well made. The interior of the boats is clean and neat in all arrangements. By what I can learn, the population is about 40,000,000; that of Nagasaki 70,000.

OCT. 3.—The Admiral was invited to land, with some officers. I have the honor of an invitation. We land to-morrow in five boats, with the band.

OCT. 4.—Our procession started at 9 A. M. As we got near the line of junks moored across the harbor, a boat came with an official to request we would wait until some grandee should arrive to conduct us. Our premature or informal entry would lead to the offending dignitary ripping himself up, as is the custom here in difficulties; and the reason is that the loss of imperial favor is attended with serious consequences to the family and children. Therefore, suicide of the parent is the usual course adopted.

A brief delay set all right. We passed up the harbor, admiring the scenery, bays, villages and cultivated hills. Two military stations and some batteries were seen. We saw two large Chinese junks—crews and rudders on shore. The Dutch steamer-of-war paid the compliment to our flag. The little island of Desima, on which the Dutch factory is placed, attracted our notice. Our party was received by the official body waiting on the landing-place. Soldiers were placed at the side of the square, and some with staves escorted us up the street of stairs to the Governor's house. A framework was placed for cloths of blue, with white designs, or white with black stripes, and they seemed to be for concealment as well as ornament. Guards lined our road, and we soon got to the Governor's, and after a short delay were ushered into the presence of his Excellency and the Inspector of the Province, Nodge Ivan Najo, who is independent in his functions, and exercises a controlling power, as in the case of the Spiritual Emperor and Kubo Saima. Their appearance and manners were dignified, the Court dresses were very curious, and the silk portion of rich quality. The style and degree of politeness practiced among themselves is so extreme that it disgusted us considerably. The persons communicating between the Governor and our interpreter were on their knees, and frequently kissing the ground and speaking in a low tone of voice, while they rested their fingers on the ground. After the interview, we were taken to two rooms; ours had the number of arm chairs required for officers not of the Admiral's set, who were in another room. Tea was brought on small stands; no sugar, no milk used. In a short time trays with pipes, tobacco, lighted charcoal, and a pot for ashes; pipe of brass, small; stem, bamboo. After some time a box of cake and sweetmeats, with chop-sticks, was placed before each officer, and was afterward sent on board to us, as we wrote our names on the lid by order. Again our wants were attended to; octagonal deal boxes were placed before each of us, the contents a block of sponge-cakes, two cakes of jelly, two rolls of sweets, two birds of flour, and a sugar fish—chopsticks to eat with.

The name of the Governor is Melzono Chikfoona Kami; his dress a black gauze overcoat, white vest and sleeves, green silk petticoat, open at the sides, showing wrapper or trousers, and reaching to the feet, which were covered with white cotton socks; shoes and sandals not worn in the palace. In the afternoon a suet pudding and sirup were brought, with large silver fork and spoon (European form) and chopsticks.

I had an opportunity of seeing paper used instead of pocket-handkerchiefs, although the latter article is in use when the heat oppresses, ventilation not being attended to. Our gold watches pleased much. It appears that two hours of our time make one hour Japanese; the day begins at 6 in the morning, and ends at 6 in the evening.

The politeness of these people is very remarkable, even among small officials; if seated on their knees, as at Court, bowing to the ground or speaking in a low tone, while resting the fingers on the ground or matting, the interpreter to the Governor being most abject in his manner. A second visit took place, and I was permitted to be in the boat for a sketch. A heavy fall of rain obtained the permission with all the boat's crew to visit the Governor's house. I saw the landing scene, which was interesting, and would form a good scene for a pantomime or play.

On our return to the boats, white umbrellas were supplied to us, and we kept them, such being the custom, which is convenient, as traffic is not permitted.

I made use of my Flemish, to inquire of the Dutch interpreters about the doctors, but the faculty does not seem to enjoy high favor, the custom being a present of bronzes, &c., in case of success, and thanks, or less, for bad cases.

There are proofs of smallpox prevailing here; and, as the climate is severe in winter, other complaints must exist which would require something beyond the *vis medicatrix naturæ*. In cold weather the number of coats is increased, and they are also probably wadded with cotton wool as in China. Charcoal is burnt in brasiers in the house. In wet weather the feet are kept dry on high pattens of wood.

The supplies furnished to our messes are very good. The soy for which Japan is famous is cheap and very nice. We did not like the "raki," a fermented liquor from rice; the taste approaches that of acetate of ammonia water.

On a little island appropriated for the recreation of our men we have found some eight or nine ferns, some of which are curious, and I believe novel.

From time to time, fish have been sent to the squadron, but we could not be allowed to haul the seine, as our doing so might do a prejudice of the poor inhabitants to the villages near this bay. Neither sheep nor horned cattle are bred here, the food being fish and vegetables; buffalos have been seen, but they are for plowing. These ugly brutes have a great turn for running at Englishmen in China.

Since our visit to the shore, the guard-boats have been withdrawn, and much cordiality is displayed in the visits.

A third interview took place. Better refreshments and the sweets, on a crockery-saucer or dish, were sent to the officers; also, an intimation that the Emperor had ordered presents for each officer of the squadron, which came on board yesterday. The Admiral has several handsome boxes, specimens of silk, and good china; other officers, according to rank, have received small assorted boxes of china; surgeons have five cups and saucers of blue china, of tolerable quality; juniors get plates.

I may tell you that the treaty has been signed, giving us certain accommodation, and promising much. At any rate, it is something to renew friendly intercourse with the most extraordinary of our race.

To-day our screw-frigate went out with a party of the Japanese mechanics, who, by the way, are not in high esteem, as the military class is most honored.

We expect to move off to Hong-Kong in a few days, and then get our six mails, and thus rejoin the world, and hear of the progress of the war.

The Musquit Tree.

A Texas paper contains the following interesting account of the tree concerning which so much has been said as affording a gum which, it is thought will prove an excellent substitute for gum arabic, and the getting of which it is believed, will, ere long, prove a profitable employment for the Indians of the West:—

"This is a very abundant timber in many portions of Western Texas, possessing some remarkable and valuable properties. It deserves attention. Although a very compact and heavy wood, and generally free from rot, yet the centre portion is generally shivered in circles often as near as two or three inches to the surface. It splits with remarkable accuracy through the centre, and, although a scrubby low growth, its great durability renders it valuable for posts and fencing material. A considerable amount of timber may be procured from it, and for furniture there is scarcely any wood superior to it. It takes a beautiful smooth polish, never shrinks, although put together green. The color is at first a bright brown, and with age assumes a deeper bright brown. Perhaps no wood yields greater heat than this when seasoned. The sap portion is very thin, often not more than one-fourth of an inch thick. If the tree is hacked in the months of June or July, a gum issues in considerable quantities, and hardens from the action of the sun, having all the properties of gum arabic. The decayed wood by being burnt under cover yields a large amount of benzoic acid. The burning of this wood in stoves is very destructive to them; the grating and sides are rapidly corroded, both by the heat of the grate and acid vapor of the burning fuel. To the soap-maker it furnishes a material of importance. The ashes, instead of containing potash, as most hard woods do, are carbonic acid and soda combined; and by putting say a peck—and half a bushel would do no damage—of fresh-burnt quick lime to the barrel of ashes, it will yield caustic soda-lye that will make the very best soap. Cattle are very fond of the ashes, as they lick them up whenever a tree is burnt upon the prairies. Another use, it is probable, could be made of the ashes; which is to scatter say half a bushel through each load of corn as it is housed, to destroy the weavil. It would certainly do no mischief, and would improve the shucks. As a fertilizer, there is no doubt it would give valuable results upon worn-out soils; but it is not probable that the application will be made for many years, for the soil upon which the musquit grows is invariably fertile and of great depth. This tree belongs to the family of acacias."

Anatomy and Propagation of Mosquitoes.

At a recent meeting of the Society of Natural History, in Boston, Dr. Durkee, of that city, exhibited under the microscope the rostrum or sting of the common Mosquito, (*Culex pipiens.*) The Doctor remarked, that one of the most remarkable features in the anatomy of the mosquito is that the parts which constitute the mouth are elongated, so as to form a beak extending horizontally, like that of some birds. The beak or sting is about half the length of the body, and to the unassisted eye appears to be very simple in its structure. When examined with the microscope, however, it is found to be composed of seven different parts, which are comparatively stout on one edge. These parts vary in length, and can be separated from each other without much difficulty. They are broad at the upper part, where they are united to the head, and they gradually taper to a point. One of the parts is a tubular canal or grove, in which the others are lodged when the proboscis is not in use. Dr. D. stated that he had not been able to find any appearance of teeth, except on the two longest pieces; in these he had found them near the tip. The two longest pieces, also, are marked by transverse lines, extending from one edge to the other, throughout their whole length.

Cuvier and others state that the male mosquito does not suck blood. From repeated examinations, Dr. D. has satisfied himself that the male has no sting, and consequently can not draw blood. The female alone is endowed with this organ. The male lives upon the juices of flowers and plants.

Mosquitoes are propagated only where there is water. The eggs, deposited in water, go through the larva and pupa state, collections of shallow water being most favorable for their development. Most of them die in the fall of the year, but some hybernate in cellars and other warm retreats, supported by the oil which they have accumulated during the summer, and with which they are distended in the fall of the year.

What shall we Eat?

With one of the hardest winters for the poor that has stared them in the face for many years, it behooves them to look about for something to eat less costly than roast beef and plum pudding. Whatever will tend, not to cheapen food, for that we cannot hope for, but to show them what to eat, less expensive than their accustomed diet, should be at once adopted. For this purpose we offer a few suggestions:

Fresh meat of all kinds, at the prices at which butchers retail it, is not economical food. Meats will average over a shilling a pound. Salted meats are cheaper than fresh. In economizing food, meat should never be fried or boiled. If you would get the most substance out of fresh meat, make it into soup, or stew, or pot-pie. In making soup, soak your meat some hours in cold water, and boil it in the same. Thicken with beans, peas, rice, barley, hominy, or broken bread. The best meat is the most economical for soup. Do not buy bones. If you boil meat to eat, never put it in cold water. Let it be boiling when you put the meat in the pot.

Do not buy your bread ready baked. It is sixpence a pound. Dry flour is the same. Home-made bread is far more nutritious. Make use of corn meal, oat meal, Graham flour, hominy, and cracked wheat, for bread, in preference to fine wheat flour, both for health and economy. Here are the relative retail prices per pound of these articles: Wheat flour, 6c.; Graham flour, 6c.; cracked wheat, 6c.; corn meal, 2 1-2c.; hominy, 3c.; oat meal, 4 1-2c. The latter is the most nutritious breadstuff known. Look at the Scotch with their oat meal porridge—as robust a set of men as ever lived.

Hominy is an article that no family, desirous of practicing economy, can do without. It is a very cheap, healthy, nutritious food. It costs only half the price per pound of flour, and contains no moisture, while the best of flour holds from twelve to sixteen pounds of water in a barrel. Cracked wheat is excellent for sedentary persons. That and Graham flour should be used in preference, at the same price per pound, to white flour, because more healthy and more nutritious. One hundred pounds of Graham flour is worth as much in a family as one hundred and thirty-three pounds of superfine white flour. Corn meal costs less than half the price of flour. It is worth twice as much. It is not so economical in summer, because it takes so much fire to cook it. The first great error in corn-meal is in grinding it too much, and next in not cooking it enough. Corn-meal mush should boil two hours; it is better if boiled four, and not fit to eat if boiled less than one hour. Buckwheat flour should never be purchased by a family who are obliged to economize food. It is dear at any price. It must be floated in dear butter to be eaten, and then it is not healthy. Oat meal is as good in cakes as buckwheat, and far more nutritious. But it is most nutritious, and is particularly healthy for children, in the form of porridge.

The cheapest of food is white beans. They are worth from $1 50 to $2 a bushel, and retail for 8 cents a quart. Prof. Liebig has stated that pork and beans form a compound of substances peculiarly adapted to furnish all that is necessary to support life and give bone, muscle and fat, in proper proportions, to a man. This food will enable one to perform more labor, at less cost, than any other substance. A quart of beans, 8 cents, half a pound of pork, 6 cents, will feed a large family for a day, with good strengthening food. And who that can raise a reminiscence of good old times in New England, but will remember that glorious old-fashioned dish called "bean porridge?" We should call it bean soup now. Four quarts of beans and two pounds of corned beef would give a good meal to fifty men—one cent a meal.

Potatoes should be utterly abandoned by the poor this winter. They cannot afford to eat them. Potatoes are selling at wholesale for four dollars a barrel. That is $1 78 a bushel. At retail, the poor pay $2 50 a bushel, or about five cents a pound; twice the price of corn meal; five-sixths as much as fine flour; one-fifth more a bushel than beans, while one bushel of the latter are worth for food as much as a cart-load of potatoes. All other vegetables are still more uneconomical than potatoes. Carrots are the cheapest of all roots. But they are but little used as human food, though very nutritious. They are partially used in soups. They are good simply boiled and eaten with a little butter, or meat gravy. They should always form an ingredient of soup. They are sold by the quantity at 50c a bushel. Turnips are dear at any price. There is more nutriment in a quart of carrots than in a bushel of turnips. They are 92 per cent. water. Cabbage is nutritious, but very expensive. Buy very little of it if your money is short. Dried sweet corn is an article that all persons are fond of. It sells for $4 to $5 a bushel, which weighs 42 lbs., and would retail at about 10c a pound. We don't know about the economy of eating it, as compared with other breadstuffs, but as compared with coarse vegetables, it is immeasurably cheaper. A pound of sweet corn cooked to be eaten with meat, is worth more than three pounds of extra meat. It is also very excellent and nutritious mixed in the bean soup.

Another very excellent, nutritious, economical article of food is dried peas. They are generally a little more costly than beans, but some think they will go further. At any rate, they are good for a change. It would be good for a change to those who are put to their wits end to know how to get food enough to feed their families, if anything that we have said shall put them in a way of changing some of their old habits, so as to buy such articles as will satisfy hunger, while giving them health and strength, for less than half the money they are now expending, though living only half comfortably. [N. Y. Tribune.

Irving's Residence.

The house at "Sunnyside," in which Washington Irving resides, is one he built some three years ago. It is about two and a half miles below Tarrytown, directly on the banks of the Hudson. It is built on the site of the "Van Tassel House." In fact, the new structure includes a portion of the old walls. At an earlier day it was called Wolfert's Roast—Wolfert Acker being one of the Privy Councilors of the renowned Peter Stuyvesant. Afterward it came into the possession of the Van Tassels. It was here that the quilting party and dance took place, so graphically described in the Legends of Sleepy Hollow. It was here that the unfortunate Ichabod Crane and Brow Bows unequivocally met, both being suitors for the hand and heart of Kate Van Tassel. Your readers will recall the amusing incidents of that story, and especially the last appearance of Ichabod Crane. A weather-cock, of miserable appearance, is perched on the gable-end of the main building. It was once the ornament of the old Stadt House of New York, in the time of the old Dutch rule. The house is surrounded by trees—some wild and some planted by Irving. The buildings are nearly covered with vines and creepers. The Trumpet flower and the Ivy-vine are the most conspicuous of them. The ivy, that grows unusually rank, has a peculiar interest. It was brought from Melrose Abbey, near Abbottsford, Scotland, some twenty years ago. It was brought by a Mrs. Trenwick, an intimate friend of Mr. Irving, and planted at "Sunnyside" by her own fair hands. This lady was a Miss Jean Jeffrey. Her father was a minister, and it was of this lovely girl, then about 17, that Burns wrote two beautiful stanzas, among the gems of his poetry. [Detroit Tribune.

Rearing and Breaking of Colts.

The profit, in rearing horses, depends very materially upon the manner of their training. Indeed, many a noble animal has been spoiled, or nearly so, by bad management in breaking. Often the constitution is so broken that the naturally mettlesome creature is despoiled of all spirit or ambition.

In the first place, there is a great fault among farmers generally, with regard to keeping colts. They should not be suffered to get poor, at least not till four years old. The shape and form, as well as size, of many colts, are materially impaired by poor keeping the first two winters. If a colt is suffered to get down thin in the winter, it will not only require the greater part of summer to get him back where he was the fall before, but his head and limbs will grow large and ill-shaped.

The colt, at weaning, should be put into a field where there is water, with a trough to feed grain; and from that time till one year old, should have grain every day. Many colts are spoiled during the first three months after weaning. Taken from the mare, fat, round and handsome, they are turned where they have but little feed, less water, and no grain, and left to run until almost starved to death—then kept the rest of the winter on straw, without shelter. In the spring they are lousy, and but just alive, and ever so good care afterward cannot make such colts what they would otherwise have been.

Colts should have grain every winter until four years old. I would commence breaking the winter before three years old. See that the colt is in a good, healthy, thriving condition. Never break a poor, weak colt, unless you want to break his constitution. Get a new rope, seven-eighth inch in diameter, of which make a slip-halter; a large rope would be burdensome—one much smaller would be apt to indent the grisly part at the nose, and thus injure the shape of the face. When haltered, the colt should not be tied fast, as he will be liable to pull and strain the cords of the neck; but hold the rope with sufficient strength to keep him checking up occasionally, to relieve the muscles of the head and neck.

When sufficiently subdued to be managed with one hand, which will generally take but a few moments, the person holding the rope should walk to and fro before him, giving at each side a slight jerk upon the rope, which, in a little time, will learn the animal to follow the string before it is pulled. This should be done daily, until he can be led, or handled, anywhere. Next apply the bit. Never use a curb, but take a bridle with a common snapple, with gag reins to hold up the head, and martingale to hold in the nose—the reins attached to a crupper and fastened firmly on the back with a circingle. The reins should not be drawn too tight at first, but may be buckled up occasionally, until drawn close, and kept in this condition the greater part of the day, for at least one week, taking off the bit at night. While bitting, handle, curry, and drive around.

Next put on the harness. Secure, if possible, a harness with gag reins, crupper, martingale, &c., and buckle all up close. After a little, attach to some light vehicle, and drive on a walk—learn a colt to walk first, a quicker pace can be acquired afterward. A colt should never be put to a load requiring his utmost strength to move, until four years old. Colts may be driven in a harness, with a light load, without injury, much younger than they can be used under a saddle. They should be trained in the stable to understand and obey all that is said to them. Learn a colt to go, and back, and hold back, by the word of mouth. Never whip, except in the stable. If a young horse is inclined to stop, or balk, as it is called, (when they manifest this disposition,) stop them, and never let them know that they stop of their own accord.

Never hurry a fickle horse, young or old. Slack up or lay down your reins, and wait patiently fifteen minutes; then start quietly, and so manage until entirely cured, which will seldom fail.

Colts, after driving, should be cleaned and rubbed thoroughly before entirely cooled; this will prevent soreness, wind-gall, &c.

When thoroughly trained to the harness, then break to ride. This should be done by one hand—good bridle, martingale, girth drawn tight—get on, and stick. If well trained to the bit and harness, there will be no difficulty in breaking to ride. [Mich. Far.

A Monster Hotel.

The *Courrier des Etats-Unis* contains an account of the new hotel, on the American plan, now building in Paris. It out-tops any in this country in capacity. It is situated on Rivoli and St. Honoré-sts and Coq-st. and the Palais Royal—that is, about the center of Paris, a little north of the Seine River, and also of the Tuileries and Luxembourg Palaces, which border that river. The new hotel is 456 feet in length, 156 in depth, covering 23,700 square feet. The largest hotel now open is the St. Nicholas, of this City, which covers about 16,200 square feet. The galleries of the Paris hotel are composed of 52 arcades, and are faced with shops, occupying about 1,200 feet of the ground plan, with a second story to the same extent, and an entresol or little story between the shop and second story. The upper stories are occupied by the hotel, and have 436 windows. Three iron balconies extend 1,200 feet round the edifice. The principal entrance of the hotel, on Rivoli-st.—the grandest straight street in Paris—occupies four arcades, two of them for coaches; these lead to the central court, 90 feet long and 80 broad. The principal interior gallery is 332 long by about 20 broad. The eating-hall is 132 feet long and 52 broad, and will hold 350 persons. There are large private suites of apartments with private entrances. Six hundred persons can be accommodated. The fifth story contains 160 chambers for the servants. The hour of the day will be sounded electrically by all the clocks; and telegraphic communicatiosu are adopted for economy's sake. [Tribune.

MORE SLAVES LIBERATED.—An interesting slave case was recently tried before Judge Delong, in Gurnsey County, Ohio. The facts in the case were these: Two boys, one aged 10 years, the property of N. M. Lee, of Richmond, Va., and the other 9 years old, belonging to T. Nowdigate of Kentucky, were on the 15th ult. placed in charge of N. W. Graham, at Richmond, Va., for the purpose of being conveyed to Kentucky, Mr. Graham being instructed to proceed by the way of the Ohio River. Mr. Graham accordingly went as far as the Ohio river, but finding it not navigable, passed into the State of Ohio, intending to cross it upon the Central Ohio Railroad. When near Cambridge, Gurnsey County, an accident occurred to the train, by which Graham and the boys were detained, and during that detention, a writ was issued and the boys were taken from his keeping. After a full hearing of the matter, Judge Delong decided that the boys were free, and accordingly they were set at liberty.

CURE FOR RINGBONE.—I noticed in the Cultivator an inquiry for the cure of a ringbone in a colt, and answer, take high wines of cider brandy, add saltpeter as much as will dissolve, and wash the ringbone two or three times a day. One of my neighbors cured one, of three or four years' standing, by the application a few times. [Boston Cultivator.

At the meeting of the New York Horticultural Society on the evening of the 8th inst., Mr. Bell exhibited some roots, resembling somewhat the sweet potato, named Dioscoria Japanico, which, it is thought, will eventually supply the place, to a great extent, of the Irish potato. These roots are extensively cultivated in Japan, and were first introduced into France two years since, where Mr. Bell recently procured the seed. They have been analyzed by French chemists, and found to contain as much nutritious matter as any root known, and are considered far superior to any potato grown. This root yields largely, is adapted to cold climates, and can remain in the ground till spring, unless required for use.

The mammoth lump of gold, recently found in Calvero Co., California, has been received at New Orleans. The *Picayune* says it weighs 160 1-2 pounds avoirdupois, 15 pounds only of which is quartz, and the rest virgin gold, and its value is estimated at $38,916. It was brought to New Orleans by a gentleman who, having given the five men who found it the round sum of $40,000 for it, intends taking it to Paris next year, to be exhibited at the great exhibition to be held there.

The Providence (R. I.) *Journal* publishes a list of seventy-six persons, all of them upwards of seventy years of age, who have died in that city during the past year. The list includes four persons between the ages of ninety and one hundred years, the oldest of them being ninety-seven years of age; twenty-nine persons between the ages of eighty and ninety; and forty-three who were at the time of death upwards of seventy and less than eighty.

Instruct your son well, or others will instruct him ill. No child goes altogether untaught. Send him to the school of wisdom, or he will go of himself to the rival academy, kept by the lady with the cap and bells. There is always teaching going on of some sort, just as in fields—vegetation is never idle.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently *cures* those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, *Mass.* Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

THE FOOTPRINTS OF JEHOVAH IN THE AGES OF REVELATION.—NO. 2.

The Beginning.

Who ever grew to manhood, with intelligence and reflection, without believing that all things around him had a beginning? Who is it? What is it? Why is it? Where from? What of it? These are inquiries inseparable from intelligence. To these inquiries the productions of nature, and their progress from the unseen or the impalpable to the embryo, and the embryo to the matured, and all to dissolution and decomposition, all answer, Nature has its beginning and its end. An endless series, without beginning and without end, involves in it an absurdity. A chain without a first or a last link! Nature deified, working by chance, is an abortion of pride and profligacy. The sceptical geologist, who constructs a revelation older than the Adamite world, and reads on the primary rock, Eternity, or first formation of uncreated affinities; on the secondary, ante-Adamite transitions, and debris with vegetable fossils; on the tertiary, ante-Adamite revolutions, with fossil animal organizations; errs, "not knowing the Scriptures, nor the power of God." That these formations exist, is indisputable; but not the theories that sages have fancied them to teach. Transitions of inanimate nature producing organizations, and chance amalgams producing life, have no demonstrations; it is theory, guess-work. Where are the vegetables produced by the debris of granite, gneiss, mica, and sienite? Ye workshops of sculptors, say where! Millions of shrewd women have for ages churned twice a week, but in no instance got a calf out of the buttermilk! Millions of frogs and turtles have wallowed for ages in the same mire-beds, but the sun never hatched an embryo man from their spawn!

Dagon, Milam, Diana, Jupiter, Venus, Neptune, Flora, Ceres, Bramha, Vishnu, and a long catalogue of heathen gods and goddesses, are each a fancied impersonation of some productive power of nature. But the myths of the pagan philosophers associated with their fabled exploits have all been exploded alike by revelation and science. It is not so with the testamentary facts of revelation. The Mosaic account of the beginning, is the only reliable account of the origin of this world. It is an intelligent, demonstrable, impregnable history of the first existence of the world and the things therein. It ascribes the beginning to an infinite, intelligent Being. Elohim is the creator of all. His works and his ways are every where seen, manifesting his glory in all parts of his vast domain, at all times. Incomprehensible in himself, his existence impresses involuntary conviction of its reality upon all observers of his works. Believers in the Mosaic revelation know more of the origin and history of the world in its first ages, than all the philosophers of the nations ever found out without it.

"Through faith we understand that the worlds were framed by the word of God; so that things which are seen, *were not made of things which do appear.*" "In the beginning God created the heavens and the earth." Prior to that work of Almighty God, the heavens, atmospherical or etherial, did not exist; the earth, with its land and water, affinities and aggregations, existed not. Jehovah, in his Word, says nothing of a world out of which the Adamite was formed. God's Bible says the world was *not* made of things which do appear! The Geological Bible says, the dumb rock teaches the existence of a pre-Adamite world for thousands of years before that of which Moses writes, and that this is framed of that which did before exist. The two Bibles are not reconcilable. Moses says, "The earth was without form and void." After the first act of creation, it had no form; it was a choatic, unfinished mass. Where, then, were its continents and its islands—its seas and its oceans—its mountains and its plains—its rivers and its vallies—its granites and its flats—its foliated and superincumbent rocks—its diluvials and alluvials—its simples and conglomerates? Where were its acids and alkalies—its silicious, argilaceous, and magnesian earths? Could the earth be without form, and all these forms exist in it at the same time? It was "void," i. e., empty. Where then were its molusca, with the zoophite, the univalve, bevalve, and multivalve genera? Where the areolites, madreposes. encrini, and pentacrini genera? Where were the saurians, ichthyosaurians, gegantea, and the mastodons? An empty world—a void —and yet all these fossil creatures in it. The water in which they laved, and the air they respired, and the fossil remains of countless genera of vegetables that grew and bloomed, and fed these ante-Adamite races, thousands of years before Adam lived! Who can fail to see that the Mosaic Bible does not agree with the Geological Bible; alias, ante-Adamite theories, as now constructed?

"And darkness was upon the face of the deep." Where shall we find vegetable, or animated life without light, phosphorescent, electric, or solar?

> "Ye powers,
> And spirits of the nethermost abyss,
> Chaos and ancient night, I come no spy,
> With purpose to explore or disturb
> The secrets of your realm.
>
> * * * * * * * *
>
> The secrets of the hoary deep; a dark
> Illimitable ocean, without bound,
> Without dimension, where length, breadth, and height,
> And time, and place, are lost; where eldest night
> And chaos, ancestors of Nature, hold
> Eternal anarchy."

Of all that was before Adam was formed and animated, God alone can teach. God has condescended to give us such a revelation as ascribes to His almighty power alone the origin of all our senses can see, or touch, or feel; and he who deserts the plain import of that revelation, and speculates upon theories wrapped up in stratified rocks and fossils, and plunges into the

> "Wild abyss,
> The womb of nature, and perhaps her grave,
> Of neither sea, nor shore, nor air, nor fire,
> But all these in their pregnant causes mixed
> Confusedly, ...
> Meets
> A vast vacuity;"

Such an one as Jehovah never revealed.

S. D.

"CONFLICT OF AGES"—NO. 6.

There is one feature of the "Conflict of Ages," in striking contrast with an almost universal opinion which prevailed among the fathers and early Christians. While Mr. Beecher hypothecates a pre-existent state of all mankind, in order to justify the ways of God with man, the primitive fathers of Christianity hypothecated the descent of Christ into hades, or the under world, for the same reason. In order, therefore, that it may be seen what were the views of those fathers, I will quote a few extracts from their writings.

Irenæus—"Therefore the Lord descended to the regions under the earth, preaching to them his advent—the sins of such as believed on him being remitted—that He might announce the glad tidings to Abraham, and those who were with him. The holy Lord remembered his dead, who were already fallen asleep in the earth, and descended to them that he might rise for the purpose of saving them."

Turtullian—"I think Christ descended to the souls of the patriarchs, and that He did not ascend the heights of heaven, before he had descended into the lower parts of the earth, that there he might make the patriarchs and prophets participators of himself."

Clement—"Wherefore the Lord preached to those in the underworld. For what reasonable man would brand Providence with injustice, by deeming the souls of just men from among the Gentiles, and sinners of all nations, under one condemnation? What! do not the scriptures manifest that the Lord preached the gospel to those who perished in the deluge? If then, the sole cause of the Lord's descent to the underworld was to preach the gospel (as descend he certainly did) it was that he might preach it to all, or to the Hebrews alone; for it is manifest that those outside of the law, who have lived according to their consciences, although they may have been in the underworld, and in custody, yet when they heard the voice of the Lord, were immediately converted."

Origen—"The patriarchs, therefore, and the prophets, and all, awaited below the coming of my Lord Jesus Christ. On this account Christ died and rose again, that he might be the Lord both of the dead and the living. And the apostle, by the dead over whom Christ should be Lord, understood those mentioned in 1 Cor. 15: 52—'The trumpet shall sound, and the dead shall awake.' Christ was in the regions under the earth, 'that every knee might bend at the name of Jesus Christ, of those in heaven, and on the earth, and of those under the earth.' Since all men prior to Christ's time descended into the underworld, therefore the souls of those who slept needed the prophetic favor. Before the coming of my Lord Jesus Christ, it was impossible for any one to pass by the tree of life. Samuel could not. Abraham could not. The patriarchs, therefore, and prophets, and *all*, awaited the coming of my Lord Jesus Christ, that He should open the way. For having bound the strong man (death) he went into his house, into the house of death, into the underworld, and thence plundered his goods, that is, carried off the souls which he held; and thence ascending on high, led captive the captives."

The above quotations are but a moiety of what might be produced, showing the prevalency, among the early Christian writers, of the opinion that Christ, after his death, performed a mission to the underworld or hades. Doubtless, upon this opinion, or tradition, is based that Catholic fiction—purgatory—as almost all error is a perversion of the truth.

If Mr. Beecher, in order to remove the cause of the "Conflict of Ages," had advanced forward instead of backward, he might have had the company of many of the ancient fathers of the church. Or had he let go some of the monstrosities of human creeds, he could have oiled the troubled waters of theology, and smoothed their angry crests by the voice of reason and common sense. But no; orthodoxy must stand, though the heavens do fall. Wisdom flies to brutish beasts, and men do lose their reason. For I ask, how can Mr. B. justify the ways of God to men, even by his pre-existent scheme, while he holds to moral inability, sovereign election, predestination, general atonement, with its particular application, or that repentance is subsequent to regeneration? If only that portion of those apostate spirits now inhering earthly bodies are saved whom God's sovereign will alone selects, is there not as great a conflict of our intuitive convictions of right with this view as with the commonly received opinion? For I believe any view of election, or divine sovereignty, as applicable to this subject, which elects but a part, will ever conflict with man's sense of justice and right. Universal salvation is the only consistent application of those doctrines, I apprehend, which will ever harmonize and justify the ways of God to man. And I think it would be not difficult to show, that Universalism is but the legitimate child of such a father. Had Mr. B. but admitted the doctrine of free-will into his theology, it would have rarified the fogs of his theological atmosphere, and revolved his spiritual planets in harmony around the great luminary of truth and justice.

S. S. GRISWOLD.

For the Sabbath Recorder.

A GENEROUS MIND.

A good nature is the very air in which a generous mind breathes; it is the sign of a large and generous soul, and the peculiar soil in which virtue prospers.

A generous mind can only be maintained by Christian principles. The *golden rule* instructs us to do unto others as we would they should do unto us. To relieve the needy and oppressed, is the most glorious act man is capable of performing in this world; nothing can be more magnificent, than to behold those who have freely received, freely dispensing to those who are in need; it is attended with a heavenly pleasure, unknown but to those who possess a generous mind, and are liberal.

Where avarice rules, there can exist no feelings of humanity, because interest supersedes all arguments of affection, and avarice becomes insatiable; but where a generous mind is found, there goodness becomes diffusive; it shows itself to be modest, sincere, and obliging, and exhibits an ardor to relieve the wants, to remove the oppressions, and better the condition of all mankind. Cæsar used to say, "that no music was so charming in his ear, as the requests of his friends, and the supplication of those in want of his assistance."

He that is generous minded is allowed the same concern for his own fortune that any wise man ought to have, and also the same kind regard for his poor neighbor that every good man really has. His generous manner of obliging is generally as effective as the obligation itself. The favors that he bestows are not extorted from him by often and continued importunity, but they flow from an open hand and a liberal heart.

Not only does a generous mind develop itself in dispensing gifts and relieving wants, but it shows its magnanimity and sweetness in forgiving injuries. Remembering that all are liable to become the victims of temptation, and to be led astray, with what a noble and generous mind does he make all due allowance for the failings of others, and with what cheerfulness does he forgive whenever the tears of penitence are seen to flow. He possesses no tantalizing spirit; has no selfish ends in view; no revenge to inflict; and instead of that moral distance so often known to exist, his noble and generous nature at once mingles in friendly acts and feelings, and the wonted harmony of former times is perfectly restored. Louis XII., King of France, showed a great and noble mind, when, on being advised to punish those who had wronged him when he was the Duke of Orleans, answered, "It is not becoming in a King of France to avenge injuries done to a Duke of Orleans."

Among the ingredients in the composition of those qualities that gain esteem among men, are found, a good nature, a generous mind, a strict regard for truth, accompanied with virtuous actions, which always render their society agreeable and engaging. When we meet such, we feel happy in their presence; we prize the social interview; and when we part, we feel that truly we have been made wiser and better.

True friendship can only be found where a generous mind is fully developed, and as true friendship is the bright and morning star that "sheds its radiant beams" across the pathway of human existence, so a noble and generous mind may be said to constitute the medicine that cures all misfortunes, and smooths the rough and uneven walks of life. A generous spirit is never envious, but always rejoices in the prosperity of others. It smiles to behold them reaping the fruit of honest toil, enjoying the reward of their labor, and sharing in those heavenly graces that illustrate the character of a Christian!

Let us strive to cultivate a generous mind, and seek to treasure up those principles that will enable us to view things in the light of heavenly wisdom. Let us cherish those lovely virtues that will give us a great, exalted, and generous soul, so that we can view riches and poverty with indifference, and adhere strictly to integrity, in whatever form it may be presented, always disregarding the alluring smiles and flattering prospects held forth by dishonesty; and can look upon life and death, and connect the results of one with the interests of the other. Then it is that a generous mind will appear with such brightness that the world will admire its beauties.

January 31.

THE BATTLE OF ALMA—AFTER SCENES.

We leave the reader to picture to himself the details of this fierce and terrible conflict. These few sketches are from eye-witnesses of what transpired after its close:—

The battle-field was dreadful to walk over in the evening and following day. The battle ended too late for us to remove even our own wounded that day, and the fearful spectacle of heads blown off, shattered limbs, broken arms, the groans and sighs of the wounded, altogether made a scene I never wish to see again.

The slaughter was terrific. The oldest generals declare that in no battle heretofore fought have so many dead been heaped up in one spot. It would be impossible to describe to you the frightful scene which I witnessed in the square mile comprising this earthwork, the slope beneath it, and the slope above it, upon which were formed the enormous squares of the Russian infantry. The greater part of the English killed and wounded were here, and there were at least five Russians to every Englishman. You could not walk for their bodies. The most frightful mutilations the human body can suffer, the groans of the wounded—all formed a scene that one can never forget.

I was dreadfully tired; for the band had to carry the wounded men to the rear, and assist the doctors to amputate, and bind the wounds. I saw some dreadful sights that day—poor fellows' legs and arms off—shells bursting near them setting their flesh on fire; the stench dreadful! We were up all night attending to the poor fellows—giving them water, changing their positions, lighting their pipes for them; and the night was awfully dark and cold, and, being on the battle field, the smell from the dead bodies, and the noise of the wounded horses, was dreadful. I hope I shall never pass such a night again. The next morning I went over the plain to look at the dead, and saw the place covered with wounded Russians—fine able-bodied men. I went up to one poor wounded Russian, and gave him a drink. *He was in great agony, and he made signs for me to cut his throat, he was so bad;* of course I left him as he was. We were occupied for the next two days in burying the dead.

Many of the Russians lived with wounds calculated to destroy two or three ordinary men. I saw one of the 23d Regiment on the field just after the fight. He was shot right through the head, and the brain protruded in large masses at the back of the head, and from the front of the skull. I saw with my own eyes the wounded man raise his hand, wipe the horrible mass from his brow, and proceed to struggle down the hill towards the water! Many of the Russians were shot in three or four places; few of them had only one wound. Many of them had small crosses and chains fastened around their necks. Many of the officers had portraits of wives or mistresses, of mothers or sisters, inside their coats. The privates wore the little money they possessed in purses fastened below their left knees; and the men, in their eager search after the money, often caused the wounded painful apprehensions that they were about to destroy them. Last night all these poor wretches lay in their agony; nothing could be done to help them. The groans, the yells, the cries of despair and suffering, were a mournful commentary on the exultation of the victors, and on the joy which reigned along the bivouac fires of our men. As many of our wounded as could be possibly picked up ere darkness set in, were conveyed on stretchers to the hospital tents. Many of the others were provided with blankets, and covered as they lay in their blood. The bandsmen of the regiments worked in the most cheerful and indefatigable manner, hour after hour, searching out and carrying off our wounded. Long after night had closed, faint lights might be seen moving over the frightful field, marking the spot where friendship directed the step of some officer in search of a wounded comrade, or where the pillager yet stalked about on his horrid errand.

The attitudes of some of the dead were awful. One man might be seen resting on one knee, with the arms extended in the form of taking aim, the brow compressed, the lips clinched—the very expression of firing at an enemy stamped on the face, and fixed there by death. A ball had struck this man on the neck; another was lying on his back with the same expression, and his arms raised in a similar attitude, the Minie musket still grasped in his hands undischarged. Another lay in a perfect arch, his head resting on one part of the ground and his feet on the other, but the back raised high above it. Many men without legs or arms were trying to crawl down to the waterside.

The fogs of the night crept slowly up the hill-sides, and hung in uncertain folds around their summits, revealing here and there the gathering columns of our regiments in dark patches on the declivities, or showing the deep black-looking squares of the French battalions, already in motion towards the south. But what is that gray mass on the plain, almost without life or motion? Now and then an arm may be seen waved aloft, or a man raises himself for a moment, looks around, and then lies down again. Alas! that plain is covered with the wounded Russians still. Nearly sixty long hours have they passed in agony on the ground, and now, with but little hope of help or succor more, we must leave them as they lie.

For the past two days, says a surgeon, under date of Sept. 25th, I have been literally in a sea of blood, as I have been employed attending on the wounded Russians on the battle-field of Alma. No description I could give would realize the horrors of war—the dead, the dying, horses, guns, carriages, *pele-mele*—headless trunks, bodies minus arms or legs, mutilation of every sort and kind—my blood almost freezes at the recollection. Every available hut was improvised into an operating theatre, and under every disadvantage we performed the most formidable surgical operations. You may judge how expeditiously we had to get through things, when I mention that I extracted twenty-three balls in less than three hours. Dressings were out of the question. Our surgical bivouacs were readily known by the number of legs and arms strewn around the scene of our labors. Indeed, I cannot liken the field of battle for two days after the fight, to anything better than an *abatoir*. My assistant for compressing arteries was the first passer-by, and when his nerves failed him, I had to wait until some one else came up. I will not say much for the result of my amputations, as directly one was concluded I laid him on a bed of hay or straw, and left him to the *vis medicatrix naturæ*. In the redoubts the Russian dead lay literally heaped on each other. No one, I believe, knows the Russian loss. I counted myself more than 400 Russians dead in less than three acres, and the wounded were beyond my calculation. Their supplications, as I passed through them, were heart-rending—when I had attended one, there were twenty unintelligible supplications from those around me to give them my surgical aid.

Nothing, says a writer from the camp near Sevastopol, could exceed the attention of the English soldiers to their wounded foes; and, on the other hand, it was delightful to witness the tearful gratitude of the latter for such attention. After forty-eight hours I found the Russians in the field, still groaning from their wounds. As our own men were to be attended to first, these were necessarily left, with legs, arms, and breasts shot away, during cold nights and burning days, without care or dressing. Many a flask of brandy and water did I expend in relieving their terrible thirst; and how my heart did bleed when around the necks of every one of these soldiers I found the cross and virgin and child. When I relieved them, they expressed their gratitude, first to God, by kissing the cross, and apparently saying a short prayer; then, by holding my hand to their lips, and pressing it to their hearts, until my feelings could bear it no longer, and I longed for some private spot where I could sit down and weep.

From the London Times.

BURYING THE DEAD.

After the battle of Inkermann, in every bush, on every yard of blood-stained ground, lay a dead or dying Russian. The well-known bearskins of our Guards, the red-coats of our infantry, and the bright blue of the French Chasseurs—revealing each a silent horror in the glades, and marking the spot where, stark and stiff, a corpse lay contorted on the grass—pointed out the scenes of the bloodiest contests. The dead were happy—the dull cold eye, the tranquil brow, the gently opening lips, which had given escape to the parting spirit as it fled from its bleeding shell, showed how peacefully a man may die in battle pierced by the rifle ball. The British and the French, many of whom had been murdered by the Russians as they lay wounded, wore terrible frowns on their faces, with which the agonies of death had clad them. Some in their last throes had torn up the earth in their hands, and held the grass between their fingers up toward heaven. All the men who exhibited such signs of pain had been bayoneted. The dead men who lay with an eternal smile on their lips had been shot. But the wounded; for two days they had lain where the hand and the ball had felled them. They were very few, it is true, but all our searching had not discovered the secrets of that blood-stained hill-side, and it was toward noon to-day ere the last of our soldiers had been found in his lair and carried to the hospital. But the Russians, groaning and palpitating as they lay around, were far more numerous. Some of these were placed together in heaps, that they might be more readily removed. Others glared on you from the bushes with the ferocity of wild beasts as they hugged their wounds. Some implored, in an unknown tongue, but in accents not to be mistaken, water, or succor; holding out their mutilated and shattered limbs, or pointing to the track of the lacerating ball. The sullen, angry scowl of some of these men was fearful. Fanaticism and immortal hate spake through their angry eyeballs, and he who gazed on them with pity and compassion could at last (unwillingly) understand how these men would in their savage passion kill the wounded, and fire on the conqueror, who, in his generous humanity, had aided them as he passed. It was a relief to see that their arms were broken—that their cartridges were lying opened in heaps on the ground. Litter-bearers, French and English, clothed the hill-side, now toiling painfully up with a heavy burden for the grave, or with some subject for the doctor's care; now hunting through the bushes for the dead or dying. Our men have acquired a shocking facility in their diagnosis. A body is before you; there is a shout, "Come here, boys; I see a Russian!" (or a "Frenchman," or "one of our fellows.") One of the party comes forward, raises the eyelid if it be closed, peers into the eye, shrugs his shoulders, says quietly, "He's dead—he'll wait," and moves back to the litter; others pull the feet, and arrive at equally correct conclusions by that process. The dead are generally stripped of all but their coats. The camp-followers and blackguards from Balaklava, and seamen from the ships anxious for trophies, carry off all they can take from the field. At particular spots you see a party of men busy at work. Groups of them are digging away all along the hill-side, at the distance of 40 or 50 yards apart. Go over, and you find them around a yawning trench 30 feet in length by 20 feet in breadth, and 6 feet in depth, at the bottom of which, in every conceivable attitude, lie packed together with exceeding art some thirty or forty corpses. The grave-diggers stand chatting on the mounds by the sides, waiting for the arrival of some bearers to complete the number of the dead. They speculate on the appearance of the body which is being borne toward them. "It's Corporal ——, of the —th, I think," says one. "No! it's my rear rank man, I can see his red hair plain enough," and so on. They discuss the merits or demerits of dead sergeants or comrades. "Well, he was a hard man; many's the time I was drilled through him, but it's all over now!" or, "Poor Mick! he had 15 years' service; a better fellow never stepped." This scene is going on all about the hill-side. Frenchmen, with litters, are also busy looking out for their dead and wounded, and in sharing the sad labors of the day. At last the number in the trench is completed. The bodies lie as closely as they can be packed. Some of them have upraised arms, in the attitude of taking aim; their legs stick up through the mold as it is thrown upon them; others are bent and twisted into shapes like fantoccini. Inch after inch the earth rises upon them, and they are left "alone in their glory." No, not alone, for the hopes, and fears, and affections of hundreds of human hearts lie buried with them.

For about one mile and a half in length by half a mile in depth, the hill-side offers such sights as these. Upward of 2,000 Russians have been buried by these men; few remain above ground now. As I was standing upon the Sandbag Battery a short time ago, talking to some officers of the Guards, who were describing their terrible losses, Col. Cunynghame and Lieutenant-Col. Wilbraham, of the Quartermaster-General's Staff, rode up toward the spot to superintend the operations. The instant their cocked hats were seen above the ridge, a burst of smoke arose out of the valley from the head of the harbor, and bizz! whish! bizz! came a shell right over us, and crashed into the hill-side, where our men were actually engaged in burying the Russian dead! Such atrocity needs no comment, and officers and men were alike indignant at it. Col. Cunynghame told me he understood that Lord Raglan had actually sent in a flag of truce that very morning to the Russian Generals to inform them that the parties on the hill-side were burying the dead. As he was speaking, a second shell was directed at us, and fell again to the right, but it was quite evident that the society of two officers in cocked hats and on horseback was not the safest in the world at that particular moment, and we all three retired, though I confess I would have willingly got away from them more rapidly, had my legs permitted me to do so. One thing is quite clear, that if such acts as these are approved of by the Russian authorities, it will be impossible to treat their men as civilized beings, and the contest will assume the worst characteristics of barbarian warfare. It is impossible to believe that Russia, which has hitherto lavished kindnesses on the few prisoners which had fallen into their hands, can permit her savage soldiery to murder the wounded, and can allow her gunners to fire on men employed in the sacred duty of burying the dead.

WICLIF—THE BIBLE.

Fuller, in his Church History of Britain, tells how the bones of Wiclif were burnt to ashes, and then cast "into the Swift, a neighboring brook, running hard by. Thus this brook," he continues, "conveyed his ashes into Avon, Avon into Severn, Severn into the narrow seas, and they into the main ocean: thus the ashes of Wiclif are an emblem of his doctrine, which is now dispersed all the world over." This striking remark Wordsworth has finely embalmed:—

> Once more the Church is seized with sudden fear,
> And at her call is Wiclif disinhumed;
> Yea, his dry bones to ashes are consumed,
> And flung into the brook that travels near.
> Forthwith the ancient voice which streams can hear,
> Thus speaks, (that voice which walks upon the wind,
> Though seldom heard by busy human kind,)
> "As thou these ashes, little brook, wilt bear
> Into the Avon, Avon to the tide
> Of Severn, Severn to the narrow seas.
> Into the main ocean they, that deed accurst
> An emblem yields to friends and enemies
> How the bold teacher's doctrine, sanctified
> By truth, shall spread throughout the world dispersed."

In allusion to the above extract from Fuller, one remarks: "I will not call it conceit: it is one of the grandest conceptions I ever met with. One sees the ashes of Wiclif gliding away out of the reach of Summers, commissaries, officials, proctors, doctors, and all the puddering rent of the executioners of the impotent rage of the baffled council, into the main ocean, where they became an emblem of the doctrine dispersed all the world over."

> Let thy Word prevail;
> O! let thy Word prevail to take away
> The sting of human nature. Spread the law,
> As it is written in thy holy Book,
> Throughout all lands: let every nation hear
> The high behest, and every heart obey.

THE QUEEN'S MOTHER.—The Duchess of Kent, Queen Victoria's mother, being left a widow when her daughter was eight months old, devoted herself to the great purpose of training her to be worthy of the crown. She nursed her infant at her own bosom—always attended to its bathing and dressing; and as soon as the little girl could sit alone, she was placed at a small table beside her mother's, at her meals, yet never indulged in any except the prescribed simple kinds of food; thus early being taught obedience, temperance, and self control. Her father having died in debt, the mother encouraged her to lay aside money which might have been expended in the purchase of toys, as a fund to pay the demands against him, thus cultivating the virtues of justice, fortitude, fidelity, prudence, and filial devotion. Thus through the whole period of her education, the counsels and example of her faithful mother, who was her sole guardian, were constantly directed towards fitting her daughter to become what she is, the best sovereign, morally speaking, that ever sat on the throne of England—perhaps the best in the world.

St. Paul had three wishes, and they were all about Christ—that he might *be found* in Christ; that he might *be with* Christ; and that he might *magnify* Christ.

Always treat the aged with respect and reverence if you would augment the happiness of this life.

THE KINGDOM OF GOD.

Some sections of our Demomination have been disturbed by a set of disorganizers, who go about preaching, that the kingdom of Christ has never yet been set up on the earth, and will not be, till He shall come the second time; also, that the dead shall lie dormant till the Resurrection. In some instances, these preachers are Sabbath-keepers, and by their zeal and ability in defending the integrity of the Fourth Commandment, have won their way to the hearts of our people. The cordiality with which they have been received has given them an advantage for propagating their peculiar views, which they have not been [illegible] to improve. Such is their zeal for what they call the doctrine of Christ's second coming, that they regard Christians in general as wofully benighted on this point—as having, in fact, hardly any faith in his second coming at all; and they call upon them to come out, and separate themselves from the churches to which they respectively belong, and to make the doctrine of the "Advent" the bond of fellowship in the formation of new societies. In some instances, we hear of their baptizing over again all who join them, thus conveying the idea that the former baptism of such was not a baptism into the faith of the gospel, and that they had not really embraced "the faith of God's elect," till they received this new doctrine. And true enough it is, that, if the doctrine of Christ's second coming implies, necessarily, that his kingdom has not yet been introduced; or, that the particular time of his coming is a matter of revelation; or, that the dead all lie in a dormant state, and will continue so, till he shall come; the great mass of those who claim to be his people are far astray. But in reality, the doctrine implies none of these things; and we can but regret, that any of our people have been so far beguiled from the simplicity of the gospel as to suppose that it does.

That Christ's kingdom on the earth is, one day, to assume a more glorious phase than it has ever yet assumed, we have no difficulty in believing. But that it has never been set up at all, and will not be till his second coming, we have never believed, nor do we now believe. True, if it is essential to a kingdom that there be some display of physical power, and of those imposing things with which the powers of this world are accustomed to keep up a show of grandeur, then it must be admitted, that what has been already introduced by the first coming of Christ fails to meet the idea. But a kingdom which has for its object, simply, the promotion of truth, (John 18: 37,) is a *moral* kingdom, and all that is essential to its existence is the exercise of moral power, and the display of those moral qualities, which constitute the grandest spectacle in reality, which men or angels can behold. In this respect, what has already been introduced by the coming of Christ is sufficient to entitle it to be called his kingdom. We mean by the kingdom of Christ, then, that state of things which is placed under the avowed administration of the Messiah. And now for the proof, that it has been already set up.

If we read the Scriptures aright, Christ, at his second coming, will deliver up the kingdom to God the Father. (1 Cor. 15: 23, 24.) Delivering up is, surely, not setting it up. The natural inference from such language is, that "then cometh the end" of his mediatorial reign.

Again, "He must reign till he hath put all enemies under his feet." (1 Cor. 15: 25.) But when does he begin to reign for this purpose? Why, in the day that God says to him, "Sit thou at my right hand, till I make thy foes thy footstool—Rule thou in the midst of thine enemies." (Ps. 110; 1, 2.) But the day in which God elevates him to this ruling, or reigning, power, is the day when he is taken up to heaven—the day of his ascension and glorification—the day in which God swears to him, "Thou art a Priest forever after the order of Melchizedec."

Christ and his Apostles both preached, when on earth, that the kingdom of heaven was at hand. (Matt. 4: 17 & 10: 7.) It is not by any *just* interpretation, that "at hand" can mean at the distance of some two thousand years. Besides, it is certain that, when God, having raised Christ from the dead, said to him, "Thou art my Son, this day have I begotten thee," then was the time that Christ as King was set on the holy hill of Sion. (Ps. 2: 6, 7.) If the King obtained his throne at that time, his kingdom then commenced; for the idea of a King on his throne, without any kingdom, is ridiculous.

Again, "From the days of John the Baptist until now, the kingdom of heaven suffereth violence, and the violent take it by force." (Matt. 11: 12.) But how could they take the kingdom, if the kingdom did not yet exist?

Christ said his kingdom was not of this world, (John 18: 36;) and in explaining the nature of his kingdom, he represents it as a kingdom which has for its object the promotion of truth. "Every one that is of the truth heareth my voice." (Verse 37.) Will any one pretend, that the work of diffusing truth, and gaining converts to it, has not been going on for more than 1800 years? Is such a kingdom yet in the future?

To Peter were committed the keys of the kingdom of heaven, (Matt. 16: 19,) that he might open, and admit to its communion both Jews and Gentiles. He used the keys, first, on the day of Pentecost, when, by preaching a discourse that set forth the way of life, he was instrumental of converting about three thousand souls. Thus he opened the kingdom to the Jews. Afterward, he opened it to the Gentiles, God making choice that, by his mouth, the Gentiles should hear the word of the gospel, and believe. (Acts 15: 7, with which compare Acts 10th chap.) If Peter died without making use of the keys, then they were entrusted to him in vain; and certainly, they were of no use, if the kingdom of heaven was not set up during his life-time. But it *was* set up during his life-time; for he was of that number, concerning whom Christ spoke, when he said, "Verily I say unto you, there be some standing here, who shall not taste of death, till they have seen the kingdom of God come with power." (Mark 9: 1.)

From these, and other passages which might be quoted, we conclude that the kingdom of Christ does actually now exist, and that its power is displayed in reducing men and women to obedience.

Upon the other point referred to—the dormant state of the dead—we may have a word to say next week. T. B. B.

CENTRAL ASSOCIATION MATTERS.

To the Editors of the Sabbath Recorder:—

Pending the anticipated visit of the Council appointed by the Association, it appeared improper, to the Seventh-day Baptist Church in Hounsfield, to take any published notice of the efforts made to influence the Council in the matter, and to prejudice the public mind against the churches here. Being urgently solicited, by the single member who came here by the appointment of the Association, to recede from our former published position, and place ourselves in the attitude of defense, with certain persons who have been excluded from this church for cause as prosecutors or witnesses against us, we feel called on to assign a few reasons for declining such proposition.

It is not true, that the leader in the attempt to override and nullify the discipline of this church, was expelled for "non concurrence" in certain acts inconsistent with the purity of the Gospel, and the "established discipline of our denomination," but he was expelled for acts which, in the judgment of this church, were inconsistent with the Gospel and the Christian character, and which, while we remember our responsibilities to the Judge of all, we can never fellowship or tolerate. And we regret, that the article containing charges of so grave a character against us, as those embraced in the communication of W. B. Maxson and E. S. Bailey, published in the *Recorder* of Nov. 9th, 1854, should have appeared at that time, and under such circumstances, since we must either tacitly admit the correctness of what is there published, or interpose our dissent and denial. It is a peculiar infelicity to us, to be compelled to notice in a public manner the inconsistencies of those venerable men, who have for many years filled so large a space in the affections and confidence of our denomination. Their taking sides with delinquents against this church, counseling them to protest against its discipline, and their interference with our internal affairs, we consider repugnant to the letter and spirit of our associational compact, unjust towards us, destructive of fraternal sympathy, subversive of church order, and tending to mutual alienation.

Their charges are not only against us for "corruption," but the committee who had the matter referred to them at DeRuyter, in 1851, and the Association who concurred in their report, receive the unqualified censure of these men. If the Association acted "precipitately" and "blindly" in the matter, as they alledge, it was in receiving the complaint in the manner it did, from persons not entitled to present it, and not because it found in favor of the church. We admit, however, that if an error was committed by the Association, the council for the complainants was in nowise to blame for it, for he used his utmost efforts to convict the church—talked against time—and ceased only when the Association would hear him no longer. The committee say in their report, they had examined the subject carefully; their accusers tell us it was not so; and who shall be believed? But let us inquire what means they (the accusers) possessed, to enable them to reach such a conclusion. Dr. E. S. Bailey was some thirty miles distant at that time, and knew nothing of what transpired there of his own *knowledge*; of course he relied on what was told by others, as the basis of his averment of the facts in the article alluded to. Neither Elder W. B. Maxson nor his colleague signer were in the committee room, to know whether the committee were faithful in their examination, and *they* also rely on the report of other and interested informants as authority for their statements so derogatory to the church, the committee, and the Association. This is unfortunately a specimen of the origin of the defamatory reports which have taken air respecting the parties in controversy from first to last. So the persons who assume the double responsibility of procuring the appointment of the Council, and then instructing them to consider their appointment a "*nullity*."

The wording of the associational action is, that the committee was to be one of reference and settlement. M. and B., in their instructions, say, instead of the committee being one to whom the records are to be referred for determination and settlement, it was the sense of the Association, that they should investigate the whole matter, and go behind all former actions and decisions; thus investing the committee with prerogatives which the Constitution does not recognize on the one hand, and asserting on the other hand what they (M. and B.) have always denied, viz., that complaints and investigations may go back of settlements and decisions.

They tell us, besides, that the corruption of the churches caused their clients to suspend travel with them, and that their organization into a church was a matter of necessity, owing to their "isolated condition," when the fact is, they labored for months to draw away from the churches adherents enough to establish a rival interest, and held their meetings in the immediate vicinity of those of the Adams Church, and at the same hour, being encouraged by their council to expect, if they protested against the discipline of the church, they might ultimately be recognized as the church proper; and to this ultimatum their whole efforts have looked, for they have uniformly sympathized with them, counseled them in opposition to the churches, dedicated their house, and procured the appointment of the present committee for their benefit. If, as they (M. and B.) say, that examination by the associational committee was *ex parte*, and that of the nature of a Grand Jury, we are unable to say who is to blame therefor, since one of the complainants was before the committee all the time, our clerk was with them, and testifying which of the papers the complainants had presented to the committee were copied from the church records, and there was no disagreement to the records between the parties; but they are quite welcome to what they gained by asserting that the committee was similar to that of a Grand Jury, since we have yet to learn that any Grand Jury ever inquires for the defendants in the case.

The Association asks us to co-operate with the council in the settlement of this matter. This would be cheerfully responded to by us, if the work should be attempted right end first; but we have done all that seemed to be duty for us, to reclaim those who have been excluded from our fellowship. If the council labor for that end, well; that will be a co-operation in the proper sense. If we understand M. & B., however, it is the conviction of the *church*, that the church is called on to co-operate in, not the restoration of those that the church has discarded. They indeed express a wish that these persons may be placed on better ground, or in a more friendly relation to the churches, but they would do well to remember, that their position is one of their own choosing, and that charges of corruption, and continued hostility, will not be likely to be accepted as their share of effort to be placed in a more friendly relation to us if they desire it. "Love only is the loan for love." It will be proper for us to say, once for all, that we possess a better knowledge of our discipline, and of the character of witnesses and parties, than strangers could be expected to acquire in an investigation, and we say firmly, yet kindly, that no decision of committee or council would reconcile us to those persons on whose account, and by whom, this controversy is protracted—that what would be indispensable to their restoration to fellowship, if they desire such restoration, could be performed without the decision of a council, as well as with it; but if such restoration is not desired by them, we have no desire for the labors of a council.

On one point, where M. & B. have expressed their feelings, we presume the most of the readers of the *Recorder* will dissent from them. They say the persons who have been excluded from this church are none the less our (their) brethren than before. This may be so in the sense in which they wish to be understood; they may drink into the same spirit, have the same general object to labor for, and be in perfect sympathy with each other, but they cannot wholly fellowship with these persons and with the churches of this Association at the same time. Those persons refuse to hear the church, and have been discarded; they are regarded by us as disorderly persons, and so are all those who encourage them in opposition to the right. Let us see how this sentiment will be relished by its authors. Several persons are excluded from 3d Brookfield church for being Sons of Temperance or Odd Fellows, which is not a disciplinable offense in our view, if the person performs Christian duties faithfully, according to his covenant obligations; and now, should we say to such persons, "You are none the less our brethren because thus dealt with by that church," what would Dr. Bailey and his church say? Would they be pleased with such a compliment from us. But because we have been under the necessity of dealing with a certain friend of his, he comes out and tells the world he is none the less his brother on that account. He doubtless feels so, but what is to become of church order, if his feelings are to be made a rule of action in the matter? The 1st church in Brookfield, some years since, excluded a large number of persons, because they thought the discipline of the church wrong, and refused to comply with it; they were mostly persons of high standing in the church and denomination, and active and influential Christians; would the pastor and the church be pleased to have us send ministers to organize a rival church there, because they are deprived of church privileges among them? And would they be pleased for us to encourage them to build a house of worship a few rods from the place where the church meets, dedicate it for them, and deal unsparingly in denunciations against the church, charge them with corruption, &c.? But if those we have excluded are none the less our (their) brethren, what of those of the number whom they have excluded from the first church of Brookfield? Are they "brethren" as much as before?

We repudiate the doctrine, that our churches are a rule to each other in the administration of discipline, as hinted by M. & B., when they talk of established discipline of our denomination. The gospel furnishes the only rule and model of Christian discipline. Two churches administering discipline according to Christ's direction, would indeed present a striking similarity, but the practice of one could not bind the other, any more than the tendencies of two bodies to the center would prove that the one was influenced by the other, and neither was governed by the law of gravity. If our discipline is to be interfered with, and made dependent on the caprice of others, the evil will be likely to spread till other churches find and feel the evil tendency of the policy. If, instead of taking sides against us, the men who have been active in this matter had labored to have shown the "Independents" their error, and restored peace in the proper way, there is scarcely a doubt that with their influence they would have been successful, and there would have been no need of calling a council. Besides, the cause of religion would have suffered infinitely less than it has done, and this church would not have been held up to the world in so ridiculous a light. We may judge of the future from the past; no decision short of a full justification of the "Independents" (in our opinion) will tend in the least to allay their asperity, or satisfy those in their interest. On the contrary, the number of persons who share this censure will be increased, and the evil spread still wider.

Though we have no very sanguine hope that anything can be accomplished by the council, since all similar efforts have left matters no better than before they have been tried; yet we would be glad to see the committee, and submit our records to them, and hear any advice they may be pleased to give us. And if we can do any thing to facilitate the object of their appointment, and advance the cause of truth, we will cheerfully do so. Our duty in the premises is made plain by the scriptures; we trust we shall not shrink from the performance of it. Though deeply humbled in seeing ourselves published as being corrupt, and untrue to the interest of Christ's kingdom, we nevertheless desire to see the welfare of all concerned promoted, and pray that "wars and fightings" may cease in our Zion, and that she may soon delight herself "*in the abundance of peace.*"

BENJAMIN MAXSON, Clerk.

HOUNSFIELD, January 25, 1855.

P. S. At our church meeting the 21st of January, inst., I was appointed to write an article to be published in the *Recorder*, giving the views of this church relating to what has been published of the origin of, and the reasons why we believe the existing difficulties have been thus far protracted, and not settled, asking you to publish the article. B. M.

THE PALESTINE MISSION.

PALESTINE, Plains of Sharon, Dec. 16th, 1854.

To the Seventh-day Baptist Missionary Board:—

MY DEAR BRETHREN—It has been some time since I wrote to you, and I gladly embrace this opportunity. I have just recovered from a severe sickness of four weeks. It is the second sickness of fever that I have had since I have been in this country. Mrs. S. has had several attacks of fever, from which she soon recovered. Our daughter has been quite sick with fever for a week past. She is now better. I think that where we now live is not as healthy as some locations near by. The longer I live here, the more I see the necessity of finding a healthy location for a permanent residence. There are a number for sale near by, which I think are more healthy than this, as the water is not good here.

The first rain that came sufficient to wet the ground for ploughing, was on the 29th and 30th of October. We have not had any since, until yesterday. Every body that has land and teams has been very busy in ploughing and getting in their wheat and barley. When the ground is very wet, we cannot plough; the most of the soil is clayey, and is so sticky, that it immediately clogs the plough. I have now about three quarters of an acre of wheat, and two and a quarter acres of barley, sowed. (Bro. Jones assisted in getting in the *wheat*, as I was sick at the time.) I have planted on my garden the second crop of beets, turnips, carrots, peas, beans, lettuce, horse-beans, and corn. I will give you an account of the expense during the time of watering, and also what we raised on it:—

Rent of garden for 5 months,	$8 00
Keeping the horse,	20 00
Paid a man for driving and taking care of the horse,	17 00
Repairs on the well,	10 17
Labor on the garden,	11 00
Our first crop of vegetables:	
Tomatoes worth	50
Eggplant,	50
12 doz. ears of green corn,	75
Pomegranates,	1 50
Squashes,	50
4½ bushels of shelled corn,	3 50
40 lbs. of sweet potatoes,	1 00
100 lbs. of winter squash,	1 25
Of my own labor I have not made an account.	

Ours is not a fair experiment. In the first place, we were here at least one month too late for the first crop; second, we had but very little manure; third, we did not have water for what we planted. We ought to keep a herd of cattle, that we may thoroughly manure the land; the crops will double by putting on a good coat of manure. A drove of cattle, sheep, and goats, will pay the expense, and as good profit as any thing we can do, if sufficiently large to employ a good shepherd. We must have at least two of the best mules that we can get for farming purposes, and especially for plowing, as the land plows very hard. Many of the Arabs use their cows for ploughing. Some have oxen. Neat cattle are very small in this country. The cows give very little milk. Horses and mules are also small; yet there are some fine horses, and a few good mules.

Emyloying the Jews is a work of charity. They never have been taught to labor, and their ignorance is astonishing. They always come in rags and dirt, and some of them, after getting comfortably clothed, will leave, having a dread of work. We furnish them with provision, and they do their own cooking, as they will not eat what is cooked by Christians. This takes much of their time. We have many perplexities in employing these people; yet we are happy in trying to raise them from their degradation, and hope to bring them to Christ.

The sick, and the friends of the sick, are constantly coming for medicine, food, and clothing. Our simple remedies have been remarkably blessed in the cure of many diseases. Some of the sick stay with us a half day; some a day; others longer. We have with us now a sick man who has been here two weeks to-day. He is from Bethlehem, and having heard of Mrs. Saunders, came here for treatment. He has been sick over a year with an affection of the heart. His journey was too hard for him. When he got here, he had for several days chills and fever. We have broken up his chills and fever, and his heart difficulty is better; but when he will be able to leave, we cannot tell. We keep his donkey, and expect no compensation, as he is a poor man. The medicines which we brought with us are nearly gone. We wish you to send by the first opportunity some botanical medicines, also a good quantity of senna; the extract would be preferable. Mrs. S. says it is impossible to get the Arabs or Jews to use water, except those who are immediately under her care, or where she can make the application herself. We have given to those in our employ, and to others who were the most needy, clothing contributed for that purpose by the friends of the mission amounting to $71 21 cents.

Brother Stillman thought it would be better, ~~when we purchase~~, to get, if possible, the title secured to the mission through the Government at Constantinople. I have talked with a number of men who are acquainted with the Government officers; they think it will be impossible, under the present state of things, to have any notice taken of such a request; still, I will see what can be done. I think, however, that we shall not be troubled about our title. CHARLES SAUNDERS.

A JEWISH TALE.

MIRIAM; or, the Power of Truth. A Jewish Tale. By the author of "Influence." With an Introduction by John Todd, D.D. Philadelphia: published by John E. Potter, 15 Sansom-st.

In this little volume, we have a good deal of information conveyed through the story of a Jew converted to Christianity by the death of his only child, a beautiful girl, whom he had reared with great care, and who embraced the Christian faith unknown to her father. The story upon which the work is founded was published in several of the religious papers many years ago, and will bear copying.

'Traveling lately through the State of Virginia, I was much interested in hearing an old and highly respectable clergyman give a short account of a Jew, with whom he had lately become acquainted.

He was preaching to a large and attentive audience, when his attention was arrested by seeing a man enter, having every mark of a Jew on the lineaments of his face. He was well dressed, and his countenance was noble, though it was evident that his heart had lately been the habitation of sorrow. He took his seat and was all attention, while an unconscious tear was often seen to wet his manly cheek. After service the clergyman fixed his eyes steadily upon him, and the stranger reciprocated the stare. The good minister goes up to him:—

"Sir, am I correct; am I not addressing one of the children of Abraham?"

"You are."

"But how is it that I meet a Jew in a Christian assembly?"

The following narrative was the substance of his reply:—

He was a very respectable man of a superior education, who had lately come from London, and with his books, his riches, and a lovely daughter of seventeen, had found a charming retreat on the fertile banks of the Ohio. He had buried the companion of his youth before he left Europe, and he now knew no pleasure but the company of his endeared child. She was indeed worthy of a parent's love. She was surrounded by beauty as a mantle; but her cultivated mind and her amiable disposition, threw around her a charm superior to any of the tinseled decorations of the body. No pains had been spared on her education. She could read and speak with fluency several different languages, and her manners charmed every beholder. No wonder then, that a doting father, whose head was now sprinkled with gray, should place his whole affection on this only child of his love, especially as he knew no source of happiness beyond this world. Being a strict Jew, he educated her in the strictest principles of his religion, and he thought that he had presented it with an ornament.

Not long ago this daughter was taken sick. The rose faded from her cheek, her eye lost its fire, her strength decayed, and it was soon apparent that the worm of disease was rioting in the core of her vitals. The father hung over the bed of his daughter with a heart ready to burst with anguish. He often attempted to converse with her, yet he seldom spoke except in the language of tears. He spared no trouble or expense in procuring medical assistance, but no human skill could avert the arrow of death now fixed in her heart.

The father was walking in a small grove near his house, wetting his steps with his tears, when he was sent for by the dying daughter. With a heavy heart he entered the door of the chamber, which he feared would soon be the entrance of death. He was now to take a last farewell of his child, and his religion gave but a feeble hope of meeting her hereafter.

She extended to her parent her wasted hand—"My father, do you love me?"

"My child, you know that I love you—that you are more dear to me than all the world besides."

"But father, do you love me?"

"Why, my child, will you give me pain so exquisite? have I never given you any proofs of my love?"

"But my dearest father, *do* you love me?"

The father could not answer: she added, "I know, my dear father, that you have ever loved me—that you have been the kindest of parents, and I tenderly love you. Will you grant me one request—O, my father, it is the dying request of your daughter—will you grant it?"

"My dearest child, ask what you will, though it take all my property, whatever it may be, it shall be freely granted. I *will* grant it."

"*My dear father, I beg you never again to speak against* JESUS OF NAZARETH!"

The father was dumb with astonishment. "I know," continued the dying child, "I know but little about this Jesus, for I was never taught. But I know that he is a Saviour, for he has manifested himself to me since I have been sick, even for the salvation of my soul. I believe he will save me, although I never before loved him; I feel that I am going to him, and that I shall ever be with him. And now, my dear father, do not deny me; I beg that you will never again speak against this Jesus of Nazareth! I entreat you to obtain a New Testament that tells of him; and I pray that you may know him; and when I am no more, you may bestow on him the love that was formerly mine."

The exertion overcame the weakness of her feeble body. She ceased; and the father's heart was too full even for tears. He left the room in great horror of mind, and ere he could again summon sufficient fortitude to return, the spirit of his accomplished daughter had taken its flight, as I trust, to that Saviour whom she loved and honored, without seeing or knowing. The first thing the parent did, after committing to the earth his last earthly joy, was to procure a New Testament. This he read, and taught by the Spirit from above, is now numbered among the meek and humble followers of the Lamb!'

A MISSIONARY FAMILY IN GERMANY.—The *Journal of Missions* says that there is a small kingdom in the Germanic Confederation, which sends out more missionaries in comparison to its numbers, than any other land in the world. It is the kingdom of Wirtemberg, (not Wittemberg, for that is a city in Saxony,) in the southwest of Germany. The pious people of that country, who generally belong to the middle and lower classes of society, possess eminently the spirit of missions. Here is an example. Says a friend in a letter to me, dated March 2, of this year: "There died lately in West Africa, one of the missionaries educated at Basle, brother Dauble, who labored in connection with the Missionary Society of Northern Germany. His elder brother died last year, in the east of Bengal, where he had labored as a missionary. A third brother is preparing for the missionary work in the Institution at Basle. Two sisters of that family are married to missionaries in Africa and America and a third sister is ready to leave her country, to go to West Africa. The father of this devoted family has five children more, and says the Saviour may have more of them for his work, if he will have them."

SAILING OF MISSIONARIES.—A reinforcement of the American Missionary Association's Mission at Kau-Mendi, West Africa, sailed from New York on Tuesday, Jan. 30th, in Brig Falmouth, Capt. Hatch, for Sierra Leone. The party consists of Rev. J. Cutler Tefft and wife, and Mrs. Barton, who are returning to the missionary field; and Miss Woolsey, Miss Winters, and Miss Susan Teall, who are going to join the mission. They are accompanied by Messrs. William J. Shuey, David K. Flickinger, and David C. Kumler, of the "United Brethren in Christ," from Dayton, Ohio. These brethren have been deputed to visit the Kau-Mendi mission, to be absent a year, with a view to ascertain, by personal inquiry and observation, whether the field is a desirable one for this denomination to commence its first foreign mission. If their report be favorable, it is expected that they will return to Africa with their families, and either be associated with the missionaries of the American Missionary Association, or form an independent mission, as may be mutually agreed upon.

QUEER POSITION FOR A JURY.—The Jury at Milwaukee, Wis., who found Sherman M. Booth guilty of aiding a fugitive slave to escape, wound up their labors by passing the following resolution:—

"*Resolved*, That while we feel ourselves bound by a solemn oath to perform a most painful duty, in declaring the defendant guilty of the above charge, and thus making him liable to the penalties of a most cruel and odious law, yet, at the same time, in so doing, we declare that he performed *a most noble, benevolent, and humane act*, and we thus record our condemnation of the Fugitive Slave Law, and earnestly commend him to the clemency of the Court."

The Independent calls upon all who sympathize with freedom and humanity to aid in making up the fine ($1,000) of Mr. Booth, by subscriptions of *one dollar*. It is a good and timely suggestion. Such a testimonial should be presented to this martyr in the cause of right.

REDEEMING A SON.—The *Banner of the Cross* tells of the following case, related to the editor by a clergyman of Philadelphia. One of his parishioners has a pious son, who had manifested an inclination for the ministry. The father, being satisfied, after mature reflection, that his son was not adapted to it, determined to *redeem* him; and accordingly deposited in his rector's hands the sum of $900, for the support and education for three years of any three young men whom he might choose, as likely to exercise the ministry to the glory of God, and the edifying of the church. The alarmingly deficient clerical ranks would soon be filled, if all who have been blessed with children and wealth felt something of this Christian father's obligations to Him who has "redeemed" *them*, "not with corruptible things, as silver and gold, but with the precious blood of Christ, as of a lamb without blemish and without spot."

A WORKING INSTITUTION.—The Reports made at the Annual Meeting of the New York State Temperance Society, show that the Society, since June last, has sent among the people various tracts and other Temperance documents, equal to *twenty-seven millions of large duodecimo pages*. The entire expenditure of funds during the same period, has been $12,000. Of course the salaries of the Corresponding Secretary and Editor, of the General Agent and the Publishing Agent, have been paid from this amount, as well as the expense of office-rent and attendants; and yet for each of the twelve thousand dollars, the Society has sent out *two thousand two hundred and fifty* duodecimo pages, filled with facts and arguments adapted to the times.

CORRECTION.—A week or two ago we copied from a Troy paper some account of the arrest of a man named Benajah Allen, on the charge of shooting a man named Smith, during the anti-rent excitement in Rensselaer Co., N. Y. We since learn that several Justices of the Peace refused to issue a warrant for his arrest, considering the evidence in the case altogether insufficient. One was found, however, who issued the warrant, and committed the accused to jail. But when the case came before the Grand Jury, they dismissed the complaint, and set Mr. Allen at liberty.

PRICE OF THE "CAROL."—It has been thought best to have only one price for the "Carol," irrespective of the number ordered. Accordingly, thirty-five cents per copy will hereafter be the charge in all cases. Where books are to be forwarded by mail, eight cents per copy should be sent for postage.

General Intelligence.

Abstract of Proceedings in Congress.

SECOND-DAY, JAN. 29.

In the SENATE, several petitions were presented, among which was one from mechanics and workingmen of New York City, asking for relief from present distress by the passage of a Homestead bill or other means whereby they can enter and cultivate the public lands. Mr. Seward made a lengthy speech in explanation of the memorial, after which it was laid on the table. A bill to extend the provisions of the judicial fee bill of 1853 to all territories of the United States, was adopted. The resolution to pay certain Washington papers for printing debates of the Senate last year, was talked over and tabled. The Army *Appropriation bill* was taken up, and Gen. Houston made a brief speech defending the Indians from the aspersions cast upon them, and charging that the aggressions complained of were the works of the whites and not the red men. Mr. Jones replied, supporting the Presidential recommendation for more soldiers to hunt down the Indians.

In the HOUSE OF REPRESENTATIVES, the resolution authorizing the Secretary of the Navy to send a steamer and tender to the relief of Dr. Kane, in the Arctic Sea, was adopted. A bill to establish a uniform rule of naturalization was introduced, and sent to the Judiciary Committee. The thanks of Congress were voted to Com. Perry, for opening Japan to American Commerce. The alledged swindles by Government officers in Minnesota, were specially disapproved, and the acts annulled, by resolutions from the Judiciary Committee; the acts alluded to, being the incorporation of the Minnesota and Northwestern Railroad Company, and the Transit Railroad Company. The House then passed the bill to enable the people of Oregon to form a State Government, and the establishing military posts in Minnesota.

THIRD-DAY, JAN. 30.

In the SENATE, after some resolutions asking for information, the Army Appropriation bill was taken up, and the proposition to increase the army occupied attention, without vote, until the hour of adjournment.

In the HOUSE, the correspondence with Spain, France and England, in regard to Cuba, was called for. The bill for a Telegraph to the Pacific was then taken up, and in course of debate there occurred a sharp personal rencounter between Mr. Lane, of Oregon, and Mr. Farley, of Me. Blows were expected for a moment, but the members were kept apart, and finally the storm passed over. The House adjourned before concluding the debate.

FOURTH-DAY, JAN. 31.

In the SENATE, the French Spoliation bill was taken up and read a second time. Some local bills were noticed, after which Mr. Bayard made a speech in defense of his father against certain charges in the original edition of Jefferson's Works. The Army Appropriation bill was then taken up, and the remainder of the session spent in debate concerning the Indians.

In the HOUSE, a resolution to declare null several Railroad Acts of the Minnesota Legislature was referred to the Judiciary Committee. The Pacific Telegraph bill was taken up, and an amendment accepted to relinquish the two million acres clause. Mr. Benton made an earnest appeal against the bill, and Mr. Richardson spoke in favor. There was no vote. A substitute for the pending Tariff bill was offered, and the House adjourned.

FIFTH-DAY, FEB. 1.

In the SENATE, Mr. Seward, from the Post Office Committee, reported a joint resolution that a weekly mail to and from San Francisco, from some point on the Mississippi, be established, the trip to be fourteen days, the postage on the letters to be fifty cents per half ounce, and pre-paid, the mail not to weigh over two hundred pounds, and the remuneration to be $6,000 a trip; the contract to be commenced within one year, and to be continued five years. It was ordered to be printed. The Senate refused to consider the French Spoliation bill, but spent the day on the Army Appropriation bill, discussing the proposed increase of the force. The sum of two and a half millions was voted to support the increase, and the bill was then laid aside.

In the HOUSE, the Pacific Telegraph bill was taken up. Mr. Richardson offered a substitute for the bill, striking out the grant of two millions acres of land, reserving the right of way, and extending the penal laws of the United States over the line for its protection. This substitute was agreed to, and the bill passed, by a vote of 110 against 70. The bill to establish a Surveyor-General in Utah came up, and a slight debate on polygamy followed; and after the talk the bill was killed, by a vote of 74 Yeas and 109 Nays. Motion to reconsider was made, and the House did so, finally passing the bill in such a form as to evade the polygamy question.

SIXTH-DAY, FEB. 2.

In the SENATE, the bill concerning the pay of naval officers was passed. After some discussion on the bill to remunerate the owners of the privateer "General Armstrong," the Senate adjourned to Second-day.

In the HOUSE, private bills occupied attention for a time, and then, for want of a quorum, they adjourned.

SABBATH-DAY, FEB. 3.

The HOUSE only was in session, and there the whole day was devoted to private bills.

THE KNUD IVERSON AFFAIR.—A committee, consisting of the Hon. Mark Skinner, the Hon. B. B. Morris, Judge Dickey, W. H. Brown, and Grant Goodrich, Esqs., Chicago, having been appointed to investigate the Knud Iverson affair, have made a report upon the matter. The committee go into a detailed history of the affair—the facts of the boy's drowning, &c. &c., and come to the conclusion, that they do not warrant the absolute conclusion that he was drowned because he would not steal. They therefore recommend that the money subscribed for the Knud Iverson monument be paid back to the donors, as the cause of truth and honesty cannot be subserved by erecting a monument that may be an embodied falsehood. The whole amount of the fund is stated to be $1,579 39, not including $200 subscribed by two gentlemen of New York, but not paid over.

European News.

European news to Jan. 20th was received in New York on the 30th, by steamer Africa, and telegraph from Halifax.

There is a remarkable scarcity of intelligence respecting either the progress of the seige or the progress of negotiations for peace. The chief interest now centers in the proceedings of the Congress at Vienna. Hopes are entertained that the negotiations may lead to peace; but equally well grounded apprehensions prevail, that the present negotiations will fail to reëstablish peace, in which event, all concur that this war will assume a vaster magnitude.

The London *Times*, in a leading editorial, draws a most deplorable picture of the state of the army in the Crimea. At the beginning of January it could muster only 14,000 bayonets; the artillery and engineers had been reduced in the same proportion, and cavalry no longer existed as a force. The deaths amounted to sixty a day, and the number disabled by fatigue and sickness to 1,000 a week. This ratio, the *Times* thinks, will rapidly increase. It is computed that out of 14,000 men nominally fit for service, only 2,000 are in good health. The army was an army of invalids at the beginning of the month, although the Crimean winter had not set in. The *Times* comes to the conclusion, that "unless some extraordinary stroke of fortune intervenes, we are about to lose our only army, the object of so much pride, of so much deep affection, of so much tender solicitude;" and asks if the nation is prepared for this disaster?

An approaching Congress of Nations is more and more confidently talked of. The London *Daily News* says: "We may be induced to repose some confidence in the result of that Congress's deliberations, if the United States are invited to take part in them, and accept the invitation."

We are without any thing respecting the invasion of Dobrodja, excepting the following from the *Wanderer*, of Vienna: The Russians crossed the Danube at Tultscha, and favored by the obscurity of the night, they reached the right bank in their boats, and surprised one of the weakest garrisons, and after making great carnage, recrossed the river laden with booty, and taking with them a number of prisoners. There was considerable loss on the part of the Russians, as the Turks fought with desperate courage. Among the slain is a Pacha, but his name is not mentioned. The inhabitants of Tultscha fled into the country with their wives and children, and did not return again until long after the departure of the Russians.

The fate of the British ship Bernice, missing since 1852, from Shanghae, is discovered, the Europeans on board having been murdered by the Lascar crew, and the ship burned. The assassins are captured and executed.

The new Spanish Constitution had been submitted. It tolerates religious opinion and a free press, abolishes confiscation and death for political offenses, establishes the National Guard and Elective Chambers.

The celebrated Dr. Newman's name is in the list of passengers by the Africa.

The latest dates from China say that Sir John Bowring, the British Plenipotentiary, had returned from the north of China, without reaching Pekin. He, and the other Plenipotentiaries, had been stopped by Commissioners from the Imperial Court, and proposed to meet at Shanghae in December, there to discuss the revision of the treaty. The Rebels had captured a large part of the Imperial squadron, and there was quite a panic at Canton.

California News.

By a remarkably short transit over the Nicaragua route, California dates to Jan. 9th were received in New York on the 30th.

From California, there is nothing of special importance. The Legislature had been organized, and the Governor's Message delivered. There had been heavy storms along the coast near San Francisco, and some welcome rain in the mining regions.

From the Sandwich Islands we hear of the death of the King, and the succession of Prince Liholiho. The old King died on the 15th of December, after an illness of five or six days. His age was 41 years. The young King will be twenty-one years old on the 9th of February. He is a man of good ability, having had a good English education, and has traveled through the United States, England and France. Hitherto, he has given himself up to pleasure to a great extent, for want, probably, of better occupation; but it is reported now that he is determined to give up his billiard and card associates, and turn over a new leaf. The *San Francisco Herald* thinks immediate annexation to the United States is done for. It says, the old King was a fast friend of the Americans, and warmly in favor of annexation. Had he lived a few months longer, that measure would have been consummated, and all uneasiness about the future position of the Islands forever put the rest. The new King is just the individual who, as heir apparent, interposed the only obstacle to the conclusion of the treaty. He has from the beginning resolutely opposed the project, and for a long time absented himself from the Capital, to avoid the importunities of his family and the friends of annexation. He is said to be a young man of more than ordinary abilities, well-educated, his mind improved by travel, and familiar by personal observation with the power and resources of the United States, France and Great Britain. He is, withal, ambitious, and particularly covetous of the kingly title, that he may be enabled to offer a share of his throne to a young English lady, to whom he is attached. Love and ambition, therefore, combine to make him hold on to his power with a tenacious grasp. It is, therefore, too much to expect that he will continue the negotiations with the United States Commissioner commenced by his predecessor, the more from the fact that he is reported to be under English influence, which has been unceasingly exerted to defeat the scheme of annexation.

From Tahiti we hear of the presence there of the great defaulter, Henry Meiggs. The *Message de Tahiti* also gives a lengthy account of a disturbance at Raiatea, an island adjacent to Tahiti. One of the Chiefs had revolted against the King of the Island, and a battle ensued, which lasted five hours. Four of the King's people were killed. Eight of the rebels were killed, and the survivors took to flight and escaped to the schooner Josephine. The Captain of the Josephine, acting under the advice of the British Consul, refused to give up the refugees to the King, unless his promise was given to spare their lives.

Wreck and Loss of Ten Lives.

Another melancholy shipwreck, attended with great suffering and loss of life, has just occurred on the coast of New Jersey. At midnight, on the night of Sunday, Jan. 28th, the bark Argyle, Capt. Burton, came ashore about five miles to the south of Squan Inlet. The bark struck several times, very heavily, on the outer bar, and then swung round, stern toward the shore. The captain and crew exerted themselves to the utmost to get her off, but all their efforts proved unsuccessful. The heavy sea broke constantly over her deck, and both captain and crew were soon compelled to take refuge in the rigging for their lives. All through the bleak night the bark beat with tremendous violence upon the bar, and every wave that rolled in shore threatened to engulph all on board. At length day dawned, and the fearful situation of the mariners was discovered by the coast people, who, with their accustomed humanity, promptly proceeded to the rescue. The life-boats were soon brought to the beach, but owing to the tremendous sea then running, it would have been madness to launch them. So the surf-men were obliged to stand on the beach, listening to the harrowing cries of the shipwrecked mariners for help, without being able to go to their aid, save at the cost of their own lives. Gradually the suffering men, worn out with fasting and the perishing cold, and exhausted by the fierce buffeting of the waves, one by one, loosed their hold, and dropped into the boiling surge, or were washed from their places of refuge by the great waves, and perished in the sea, while those who longed to assist them were forced to look impotently upon their sufferings, debarred from doing aught but sympathizing with their distress, or mourning their dreadful death.

OCCUPATIONS OF THE MEMBERS OF ASSEMBLY.—The Albany *Evening Journal* says, there are fewer Lawyers than usual in the New York Legislature. The Farmers greatly predominate. The Lawyers are second in the list, and Merchants next. It is a singular fact, that there are just as many Mechanics as Gentlemen, and only *four* of each:—

Farmers, 46; Merchants, 19; Farmers and Merchants, 4; Mechanics, 4; Forwarders, 4; Lawyers, 21; Physicians, 6; Teachers, 2; Gentlemen, 4; Clerks, 2.

And one each Lawyer and Farmer, Editor, Lumberman, Watch Repairer, Sailor, Naval Architect, Tailor, Hotel-Keeper, Omnibus Proprietor, Auctioneer, Farmer and Manufacturer, and Carpenter.

FATAL ACCIDENT.—On Monday, the 22d ult., Daniel S. Walker, of Andover, was instantly killed by the falling of a tree. It seems that he went to his work a little after eleven o'clock, and his wife, feeling anxious about his safety, as the wind was high, at about three o'clock in the afternoon, went to the woods to find him and induce him to return to his house; but on arriving at the place, she found, to her horror, that the first tree felled by her husband had, by some means, fallen upon him and killed him instantly! Mr. Walker was a worthy citizen of Andover, in the thirty-fifth year of his age. He leaves a wife and three small children to mourn his untimely fate. N. V. HULL.

Genesee Valley Free Press.]

SUMMARY.

Captain Simeon Hicks, the last of the Americans who were in the Battle of Bennington, died at the residence of his grandson, Maynard Knight, in Sunderland, Vermont, on Wednesday, the 24th Jan., aged ninety-nine years, five months, and two days. He was born in Hobarth, Mass., August 22, 1755, and was the eldest of twenty-two children by his father, who was twice married. Capt. H. served in the revolutionary army at two or three different stages of the struggle—first under Washington at Cambridge, and afterward under Stark in 1777. He participated in all the struggles of the 16th of August, at Bennington, (Hoosick,) to the final and complete discomfiture of the British. During the greater part of that day he was in the front ranks and in the hottest of the fight.

A Catholic priest recently called at the office of the National Insurance Company in New York, and stated to the President, that he had a sum of money which he was directed to pay over to the Company. He declined answering any questions as to the source whence he received the money, or giving any information whatever concerning it; but asked for a receipt from the Company, to the effect that they accepted the amount so paid, viz., $2,289, as in full for the sum which the parties would have wished to pay, including interest. Such a receipt was accordingly given, and the money paid over to the President.

Judge Hermann Knickerbacker, of Columbia County, (who is said to have been the original of Irving's "Deidreich Knickerbocker," in his amusing History of New York,) died on Tuesday, Jan. 30, in Williamsburg. Judge K. was a member of Congress in 1809 and 1810. He was widely known, and everywhere respected, as one of the finest specimens of the old Dutch chivalry that time had preserved to these latter days. The quaint stories and laughable anecdotes of which the Judge is the hero, are almost innumerable.

A dispatch dated Louisville, Tuesday, Jan. 30, 1855, says: The ferry-boat for Jeffersonville, with the passengers by the train from Cincinnati, some 200 in number, was lodged on the Falls this morning by the floating ice. The boat grounded, and the ice gorged around her, and it was thought that all on board would be lost. The passengers were rescued from their perilous position by the means of life-boats. The greatest excitement prevailed for a time.

A dispatch dated Cape Island, Thursday, Feb. 1, 1855, says: A man cutting down an old tree near the Cape May Court-House, discovered the remains of a man, supposed to be those of a Mr. Smith, who disappeared here very strangely some sixteen years ago. The overcoat and boots still remain around the skeleton.

The Hon. Hamilton Fish has been compelled by illness to leave Washington. Under the advice of his physician, he goes with his family, first to Charleston, and then to Havana.

The opening of the immense freight business anticipated by the Panama Railroad Co. we can now announce. The Company have made a contract to transport two cargoes of coal across the Isthmus at $7 per tun, in bags. The coal is now being loaded at Baltimore, for Aspinwall. The Company anticipate having as much freight as the capacity of the Road will admit of. Coal by this route can be delivered at Panama at $5 per tun less cost than via the Horn, and in two months less time.

The American Colonization Society was recently in session at Washington. The Annual Report was read on the 16th. From that document we learn that the receipts for the year have been about $65,000, and the expenditures have exceeded this sum. Nearly 600 emigrants have been sent our during the year, chiefly emancipated slaves. But the want of funds has constrained the Executive Committee to delay sending many suitable emigrants who are anxious to go. An earnest appeal is renewedly put forth for funds.

A dispatch dated Cincinnati, Tuesday, Jan. 30, 1855, says: At Mount Pleasant, in this county, about fifty women attacked a tavern and destroyed a large quantity of liquor belonging to the keeper. After demolishing the liquor casks, &c., they dragged the owner through the liquid, which stood six inches on the floor. Warrants were issued against about twenty of the parties, but the officers returned this afternoon and reported their inability to serve the processes.

A fugitive slave was at Bangor last week, who said he ran away from his master at Alexandria, Va., because he intended to sell him to a Florida planter. A son of his master, of about his own age, furnished him with money to pay his fare to New York, and he walked from Portland to Bangor. He estimated his value in Virginia at $900. The good people of Bangor put him through on the underground railroad for New Brunswick.

A dispatch dated Charlotte, N. C., Jan. 25, says: Rev. Cyrus Johnson, D. D., of this town, died very suddenly of apoplexy, this morning, in an omnibus, whilst going to the railroad depot. He was on his way to Fort Mills, for the purpose of marrying a gentleman and lady this evening. He was the second clergyman who had been engaged to perform the ceremony. Rev. A. S. Watts, who had been engaged for the same purpose, died on the day appointed and was buried yesterday. Dr. Johnson will be buried to-morrow.

The schooner Success to the Fisherman, Levi W. Rose, master, sailed from the Eastern Passage, Halifax, on Sunday, Jan 14, about 8 o'clock in the morning, for Sheet Harbor. Between 12 and 1 o'clock Mr. Boutilear, residing on Taylor's Head, saw the vessel capsize about three miles distant, near Jertych's Island, the sea being too rough to render any assistance, and, melancholy to relate, all on board perished.

The Rutland and Burlington Railroad was sold on Monday at Bellows Falls, Vt., for one mill per share. This was the first and only bid. Its capital stock, all honestly subscribed for, was $2,200,000. This stock, sold by the sheriff under attachment, brought $22. This road, which has been for years, and is still operative, furnishes a most striking example of that railroad fever which pervaded New England in 1842.

A lady writer in the *Home Journal*, in answer to the question, "What does it cost to dress a lady?" replies that $1,000 a year spent very carefully by a person who goes out much, would prove insufficient; $2,000 is nearer the average, without including furs and jewelry; and that $3,000 or $4,000 could be spent very easily when Russian sables and diamonds were brought into question.

Among the patents lately granted was one to Loomis E. Ransom, Havana, Ohio, for improvement in brick molding machines. The inventor reports that he has lately made a thorough trial of the bricks thus molded, and that they come from the kiln equal to the best. He further states that with one apparatus costing only five dollars, one man can mold from 10 to 12,000 bricks per hour.

The Evansville (Ia.) *Journal* says, that an old gentleman, aged sixty-five years, was married a few days ago, in Knox County, in that State, to his sixth wife, and he has only married five women. His first wife is his last wife, and she is now in her forty-fifth year. She has been married three times, and her first husband is her last husband.

A Committee of Christians exists in Rome, denominated by themselves the "Roman Committee for the Publication of the Bible." The Committee consists of seven persons, five residing in Rome, and two for the present in the kingdom of Piedmont. A great desire for the Scriptures is felt in some parts of Italy.

We are in receipt of Texas news to the 25th ult.: A desperate battle had been fought near Pecos River, between a party of Rangers and some Texas Indians, which resulted in the victory of the former, who killed seven of the Indians and took many prisoners.

An improvement in mills for grinding feed has been made by Amory Felton, of Troy, N. Y., which consists in the employment or use of a corrugated cylinder and a concave and cap, having spiral flanches and reciprocating teeth.

Both branches of the Legislature of Wisconsin have, by unanimous votes, instructed the Senators and Representatives in Congress from that State to oppose any change in the Naturalization laws.

The Memphis papers are advocating the establishment of a Female College, to be either located at that place or Holy Springs, Mississippi.

A metallic pen has been invented in Paris, composed of copper and silver, which is said to produce an electric current by the moisture of the hand.

An Englishman has invented an electric rifle, which throws 60 balls in a minute a distance of 600 to 700 yards.

New York Markets—February 5, 1855.

Ashes—Pots 6 68; Pearls 6 75.

Flour and Meal—Flour 8 25 a 8 62 for common to good State, 8 75 a 9 18 for mixed to good Indiana and Ohio, 10 50 a 12 00 for extra Genesee. Rye Flour 6 25 a 7 37. Corn Meal 4 50 for Jersey. Buckwheat Flour 3 75 a 4 00 per 100 lbs.

Grain—Wheat 2 05 a 2 15 for mixed Western, 2 48 a 2 52 for white Genesee. Rye 1 25 a 1 26. Oats 51 a 54c. for Jersey, 60 a 64c. for State and Western. Corn 98c. a 1 00 for Western mixed.

Provisions—Pork, 13 00 for new prime, 15 00 a 16 50 for mess. Beef 5 25 a 7 00 for country prime, 8 50 a 11 00 for country mess. Dressed Hogs 8c. Butter 12 a 17c. for Ohio, 18 a 25c. for State. Cheese 9½ a 10c.

Hay—87 a 93c. per 100 lbs.

Potatoes—2 50 a 2 75 per bbl. for Western reds, 3 00 a 3 50 for Mercers and Carters.

Seeds—Clover 11 a 11½c. Timothy 3 00 per bushel for reaped.

Tallow—12c. for Butchers' Association.

Wool—24 a 27c. for native, 35 a 37c. for full-blood Merino, 38 a 42c. for American Saxony Fleece.

☞ There are numerous indications of an improvement in business generally. Money is accumulating in the banks, indebtedness is being squared up and canceled, stocks and securities are rising in value, real estate is not, it is thought, at the present time, depreciating in price. From this, however, we should except a great deal that has been puffed up beyond its natural and reasonable value. This undoubtedly will have to come down. Affairs seem to be gradually adjusting themselves to their ordinary conditions. A cotemporary, a short time since, had the following in relation to the causes of hard times:—

"There is no less money in the world now than at any former period, but even more; yet there seems to be a pressure at present in the money market. What is the cause?

First. Five hundred thousand of our most active, enterprising, and vigorous citizens, mostly from the working and producing classes, have, within the past few years—since our war with Mexico—dropped the plow, the hoe, and the reaper, and emigrated to California, to dig *gold*. This required ships, clippers, and steamers, which cost a few millions of dollars, and the services of thousands of men to build, rig, and man them. Our gold crop has been sent to Europe by our importers, to pay for luxuries, such as silks, satins, and fine laces; tea, coffee, and tobacco; wines, liquors, and broadcloth—not necessaries, but mere luxuries.

Secondly. We have expended too much labor and money, within a short time, upon railways, instead of producing crops. Most of our laborers, native and foreign, have been building roads, instead of raising corn or cotton pay for imports.

Thirdly. We had a cold, wet, backward spring. Many farmers who planted early had their seed-corn rot in the ground, and those who planted late suffered on account of one of the greatest drouths ever known in this country. The summer was almost unendurably hot; much of the time laborers could not work. The consequence of this was light crops throughout every State in the Union. This, with the high price of labor, made farmers feel poor, though they realized high prices for what they had to sell.

Fourthly. The great Schuyler and other swindles; bank frauds, and the immense disasters and losses of life and property at sea; the wide-spread and destructive fires on land, the past and present years; besides destroying confidence in the judgment and integrity of men, cast a gloomy cloud over the whole business world.

Capitalists withdraw and lock up their funds. Manufacturers shut down their gates, discharge their hands, and stand still. Merchants and contractors ditto. Yet the world goes on."

A knowledge of the cause [illegible] difficulty generally gives an indication of the proper remedy. In this case, it would seem to be—industry in the production of those articles of necessity which are in demand; economy in consumption, avoiding extravagance and waste, and the consumption of articles that are not necessaries, such as silks, satins, laces, wines, liquors, tobacco, &c., &c.

It may be asked, How can these recommendations be carried into practice? There are three modes by which it may be done; either through the instrumentality of the three combined, or by that of one or two of them by themselves. The first of these is by the efforts of individuals and the community in voluntarily practicing them. The second is by the universal enforcement of the cash system. The third is by the establishment of a protective tariff. The firm establishment of the cash system would perhaps be the most permanent, lasting, and durable of all these means of reform, and the most beneficial to the industrial and producing classes.

⁂

DIED,

In Westerly, R. I., Jan. 24th, 1855, GEORGE GAVITT, aged 81 years, 9 months, and 8 days. Bro. Gavitt was born in Westerly on the 16th day of April, 1773. He made a profession of faith in Christ when about twenty years of age, and connected himself with a Baptist Church in his native town known by the name of the "Wilcox Church." Subsequently he united with the 1st Seventh-day Baptist Church of Hopkinton, with which he continued his membership until the organization of the Pawcatuck Seventh-day Baptist Church, on the 16th of April, 1840, when he placed his name as the third on the list of members. Although for many years attended with that most distressing disease of the respiratory organs, Asthma, yet his last sickness was of but five days continuance. He fell asleep trusting in God. Among the last expressions which fell from his lips was this: "Thank God for a heaven-born system of salvation." A. B. B.

LETTERS.

Isaac West, C D Langworthy, John Whitford, John Parmalee, E S Burdick, W B Maxson, Andrew Babcock, P L Berry, J M Todd, E R Clarke, Alaric Williams, S A Champlin, J B Wells, N V Hull, P C Kenyon, L Crandall, A B Burdick, Nelson Clarke, Abel Stillman.

RECEIPTS.

FOR THE SABBATH RECORDER:

Quarterly Meeting of Rhode Island Churches.

THE next quarterly meeting of the Seventh-day Baptist Churches in Rhode Island and Connecticut, will be held in Rockville, R. I., commencing on Sixth-day evening, Feb. 23, 1855, at 7 o'clock, and continuing through Sabbath day and Sunday. Opening discourse by S. S. Griswold. P. L. BERRY, Com.

NEW LONDON, Feb. 1, 1855.

MAYOR'S OFFICE, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the urisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg, (opposite Easton) at 15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.

Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M. JOHN O. STERNS, Superintendent.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 35 cents per copy. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions, such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of FRANCIS C. WOODWORTH, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year.*

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83⅓ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year.*

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,

118 Nassau-st., New York.

Miscellaneous.

From the National Era, Dec. 28.

Maud Muller.

BY JOHN G. WHITTIER.

Maud Muller, on a summer's day,
Raked the meadow sweet with hay.

Beneath her torn hat glowed the wealth
Of simple beauty and rustic health.

Singing she wrought, and her merry glee
The mock-bird echoed from every tree.

But, when she glanced to the far-off town,
White from its hill-slope looking down,

The sweet song died, and a vague unrest
And a nameless longing filled her breast—

A wish, she hardly dared to own,
For something better than she had known.

The Judge rode slowly down the lane,
Smoothing his horse's chestnut mane.

He drew his bridle in the shade
Of the apple trees, to greet the maid,

And ask a draught from the spring that flowed
Through the meadow, across the road.

She stooped where the cool spring bubbled up,
And filled for him her small tin cup,

And blushed as she gave it looking down
On her feet so bare and her tattered gown.

"Thanks!" said the Judge, "a sweeter draught
From a fairer hand was never quaffed."

He spoke of the grass and flowers and trees,
Of the singing birds and the humming bees,

Then talked of the haying, and wondered whether
The cloud in the west would bring foul weather.

And Maud forgot her brier-torn gown,
And her graceful ankles bare and brown;

And listened, while a pleased surprise
Looked from her long-lashed hazel eyes.

At last, like one who for delay
Seeks a vain excuse, he rode away.

Maud Muller looked and sighed: "Ah me!
That I the Judge's bride might be!

He would dress me up in silks so fine,
And praise and toast me at his wine.

My father should wear a broadcloth coat;
My brother should sail a painted boat.

I'd dress my mother so grand and gay,
And the baby should have a new toy each day,

And I'd feed the hungry and clothe the poor,
And all should bless me who left our door."

The Judge looked back as he climbed the hill,
And saw Maud Muller standing still.

"A form more fair, a face more sweet,
Ne'er hath it been my lot to meet,

And her modest answer and graceful air
Show her wise and good as she is fair.

Would she were mine, and I to-day,
Like her a harvester of hay:

No doubtful balance of rights and wrongs,
Nor weary lawyers with endless tongues;

But low of cattle and song of birds,
And health and quiet and loving words."

But he thought of his sister, proud and cold,
And his mother vain of her rank and gold.

So, closing his heart, the Judge rode on,
And Maud was left in the field alone.

But the lawyers smiled that afternoon,
When he hummed in court an old love-tune.

And the young girl mused beside the well,
Till the rain on the unraked clover fell.

He wedded a wife of richest dower,
Who lived for fashion as he for power.

Yet oft, in his marble hearth's glow,
He watched a picture come and go;

And sweet Maud Muller's hazel eyes
Looked out in their innocent surprise.

Oft when the wine in his glass was red,
He longed for the wayside well instead;

And closed his eyes on the garnished rooms,
To dream of meadows and clover blooms.

And the proud man sighed, with a secret pain:
"Ah, that I were free again!

Free as when I rode that day,
Where the barefoot maiden raked the hay."

She wedded a man unlearned and poor,
And many children played round her door.

But care and sorrow, and child-birth pain,
Left their traces on heart and brain.

And oft when the summer sun shone hot
On the new-mown hay in the meadow lot,

And she heard the little spring-brook fall
Over the roadside, through the wall,

In the shade of the apple tree again
She saw a rider draw his rein.

And gazing down with a timid grace,
She felt his pleased eyes read her face.

Sometimes her narrow kitchen walls
Stretched away into stately halls;

The weary wheel to a spinnet turned,
The tallow candle an astral burned,

And for him who sat by the chimney-lug,
Dozing and grumbling o'er pipe and mug,

A manly form at her side she saw,
And joy was duty and love was law.

Then she took up her burden of life again,
Saying only, "It might have been."

Alas for maiden, alas for Judge,
For rich repiner and household drudge!

God pity them both! and pity us all,
Who vainly the dreams of youth recall.

For of all sad words of tongue or pen,
The saddest are these: "It might have been!"

Ah, well for us all some sweet hope lies
Deeply buried from human eyes;

And, in the hereafter, angels may
Roll the stone from its grave away!

The Whale-Fishery.

From the New Bedford Shipping List, Jan. 9.

The importations of sperm and whale oil and whale-bone into the United States in 1854 were as follows: Barrels sperm, 76,696; barrels whale oil, 319,837; whalebone, 3,445,200 pounds. In 1853, the importations were: Sperm oil, 103,077 bbls.; whale oil, 260,114 bbls.; whalebone, 5,652,300 pounds.

There have been no exports of whale oil from the port of New Bedford during the years 1852, 1853 and 1854. The amount of oil and bone on hand Jan. 1, 1855, in the United States, as near as could be ascertained, was as follows: Sperm, 6,760; whale, 75,485; bone, 1,400,000. The stock of sperm oil has been well exhausted, and is held at very high prices. A large stock of whale oil remains on hand, about three-fourths of the importation having been used.

In 1854, about 235 ships cruised in the northern seas, two of which were lost, and 50 of which are reported to have cruised in the Arctic Sea, and have mostly been reported off the ground with an average catch of about 100 bbls. each, and 135 ships from the Ochotsk and other grounds, with an average catch of about 1,000 bbls.

There has been a diminution of 18 ships and barks, 8 brigs, and 4 schooners, in the whale fishery during the past year, with an aggregate tunnage of 8,557. The number of ships added to the fleet from New Bedford during the past year was 8. Number withdrawn and lost, 12. The number of ships and barks employed in the fishery from this district is 292; brigs, 9; schooners, 3; with an aggregate tunnage of 130,133. The number owned in this city is: Ships and barks, 312; brigs, 1; schooners, 1. Total tunnage, 105,459.

The average catch of vessels in the Ochotsk during the past year was one thousand barrels, which is a very fair business; but the fleet did little or nothing in the Arctic, and the general average is, therefore, reduced to a little less than 800 barrels.

In this connection we would mention that there was an aggregate of 11,421 tuns built in this district in the years 1853–54, of which 4,492 tuns were added to the merchant service, and 6,792 tuns to the whale fishery.

During the past year there have been five ships and one bark, amounting to 2,800 tuns, withdrawn from the whale fishery, and nearly all of them put into the merchant service. There have been lost at sea during the year six ships, one bark, and one brig, amounting to 2,806 tuns, making the aggregate of 5,606 tuns lost and withdrawn in this district. There have been added to the whale fishery six ships and six barks, amounting to 4,442 tuns, showing a diminution of 1,164 tuns for the year 1854.

The Great Barn.

Mr. David Leavitt, of New York, recently bought a farm of three hundred acres for his country residence on the Housatonic River, hardly two miles south of the village of Great Barrington, Berkshire Co., Mass. There may be fifty acres of it fair intervale; the residue being hilly upland, in good part covered with young wood. Here he has built him a handsome dwelling, and commenced the systematic improvement of the arable land, by draining, subsoiling, &c., under the direction of Mr. R. Wilkinson, whose efforts for Scientific Agriculture in Dutchess County and at Mount Airy, Germantown, Pa., deserve honorable mention. The expense of such improvement is largely enhanced by its novelty in this region, and the fact that his draining-tile have to be procured from a great distance, and cost him on the farm thrice what they should and what they ultimately will cost those who follow in his footsteps. Still, Mr. Leavitt goes ahead, with the energy he has eminently displayed in other undertakings, and will yet shame some of his now caviling neighbors into a far-off and feeble imitation of his liberality and thoroughness.

The 'great feature' of his estate, however, is a mammoth new barn, over one hundred feet from basement to observatory, and popularly estimated as having cost over Forty Thousand Dollars. The name, however, gives so inadequate an idea of its capacities and uses, that, having visited it while passing through Great Barrington a few day ago, we feel impelled to give a running account of it.

This barn is built across the bed of a small mill-stream, which is soon after lost in the Housatonic, and which, though largely fed by springs, is here in such immediate proximity to the steep Berkshire hills, whence it rapidly descends, that it must often be swelled to a raging, desolating mountain torrent. Across this stream a very substantial dam of cut stone, filled in with earth, is thrown just above the barn, forming a fine fishpond above, affording a good water-power, and supplying water in every part of the barn and for every conceivable purpose. The barn itself we should judge to be about one hundred and fifty feet long by seventy in width, and (as we have said) nearly one hundred feet high.

The basement (of cut stone) is of course devoted to manures, which, without waste, and by mechanical arrangements, are precipitated from the cattle-stalls on the next story. This basement has a tight stone floor, is always cool in summer and warm in winter, and twenty carts may be driven in at one end, loaded simultaneously, and driven out at another door. No frost ever enters, and the manure is usually removed every month and applied directly to the land. The advantage of being able to work here in comfort during the most inclement weather, and to sled out the compost in winter—taking a load to the upland and bringing back a load of cord-wood to the railroad—is esteemed considerable.

On the next floor are the Cattle and Horses, including more than fifty Milk Cows, mainly fine Devons, with three or four yoke of Working Oxen, and as many teams of Horses. Each is kept in its place by a long strap buckled around the neck, but giving each ample freedom to lick every part of its body, which is deemed important. Food and drink are given to each in a large iron trough or manger resembling a quarter of a large potash kettle, with one circular and two square sides. The water flows within easy reach everywhere. The stalks, roots, &c., are all cut or sliced before feeding, and are ultimately to be steamed in a gigantic boiler on the premises. At the end of each long row of cow-stalls hangs a large black board, bearing at the left side the number of each stall in a perpendicular column; on a horn of the occupant of said stall a corresponding number is impressed; and whenever she has been milked, her pail is immediately set in the weigh scales, the weight of milk ascertained and placed opposite her number on the black board; and, at the end of each week, the aggregate weight of milk and its ascertained value are carried to the cow's credit in an account-book, where her food is in like manner charged; and if any cow proves on a year's trial unprofitable, she is sold off and another put in her place. The animals of course are clean, fat, and comfortable. They are only turned out in mild weather for a short time at midday, and Mr. Wilkinson observed, that they might thus be kept ninety successive days in the stable without injury or suffering. The milk-room is directly north of the stable, under the carriage-way, with an arched stone roof and a capacious store of ice at the far end. The room is well tempered of course, may be warmed in winter if necessary, has water-pipes running through it, and ice within arm's length of the milk-pans.

On the next higher floor is a capacious kitchen and all conveniences for the family who board the workmen (fourteen to twenty in number) who sleep in a spacious chamber still higher. The family never have to move out of their special premises for water or any other accessary to their labor. Their slops fall into the basement, where they belong.

On this floor are a Woodruff Planing-Machine, a Saw Mill, a Buzz Saw for cutting wood about as fast as it can be handed on, a grind-stone always kept in rapid motion by water, &c., &c. Into one apartment a load of grain is driven and pitched off into a hopper, thence run by water through a Threshing-Machine, the screened grain delivered in its proper bin, the chaff sent to its appointed destination, and the straw carried some sixty to eighty feet and deposited in the apartment prepared for it—all beyond the pitching being done by the unaided force of water on machinery.

We might say more of this barn—probably the most complete ever yet built—yet not half exhaust its peculiarities. Ultimately, we believe, nearly all the food for cattle will be steamed; Indian corn being thrown into the boiler as it comes from the field, and stalks, ears and leaves all reduced to a pulp by the operation of heat and water. We understand Mr. Wilkinson, however, that the feeding of some long (uncut) hay from time to time is found advantageous to health and digestion.

—We do not suppose Mr. Leavitt will ever make this barn pay, in the narrow, pecuniary sense; it is very seldom that so bold and radical a novelty proves profitable. We should ask more than one per cent. to insure it against the stream which it bridles, and the neighbors say there is quicksand under its foundations—that the wheel of twenty-two feet breast which is to drive its machinery will tear it to pieces within a year, &c., &c. Fire, flood, or other casualty, may destroy or greatly damage it; but while it stands, that barn will be a perpetual suggestion of improvements on this side or on that to the farmers who may visit it; and we think its owner, even though to his own cost, will prove a signal benefactor to the public.

[N. Y. Tribune.

A Scene in Memphis.

Rev. Granville Moody relates the following story in the *Western Christian Advocate*:—

"At Memphis, Tennessee, we got fairly into the cotton region, and from the landing of the beautiful city we took on board over six hundred bales of cotton. Here slaves and mules—universally associated in the South—were found in abundance and variety. On the bank, above the landing, we saw a large three-story brick house, of ample dimensions, and strong and gloomy mien; but the reason thereof was obvious enough, when we read, in large and commanding characters, "Bolton & Co., Slave-Dealers." While the cotton was going abroad, I took the opportunity to visit this mart of humanity. Mr. Bolton, the very gentlemanly proprietor, received me very kindly, and gave me many items of information relative to his business. I told him that I did not want to purchase, but would look at his slaves, if he pleased. He showed me his stock on hand, exhibited their valuable points, and stated their prices. One young man, about nineteen years old, of fine, firm form, for whom the trader asked $950, spoke up and said, "Master, I'se de boy you ought to buy, if you wants de work done." I asked him where he had been raised. He replied, "In old Firginny, sir, and I can do all kinds of work on de farm, sir. I'se de stock you ought to buy, sir, if you want to get your money back." Poor fellow—he had learned his lesson well and acted well his part. After showing me several women, for whom he asked from $850 to $950, he told some of the slaves to go and call Martha. Immediately a young, tall, graceful, and really beautiful mulatto woman, and nearly white, appeared in tidy and becoming apparel. He stated, in business style, her many excellent qualities, age, etc., and remarked, "I ask $1,150 for her." And there she stood, in form almost as faultless as the Greek Slave of Powers, yet animated by a soul within worth more than a thousand worlds, and for the ransom of which "Heaven paid down the price, all price beyond, while angels, though curious to compute, still fail to cast the mighty sum" which brought that soul immortal into the redeeming hand of God's eternal Son. But there she stood, scanning me with an inquiring look, that seemed desirious to anticipate her fate—$1,150 paid down, and she is the property of any one that chooses such investment. Mr. Bolton said that most of his stock was hirded out, and that his assortment was incomplete—having only about twenty then on hand—but that he expected a gang every day to arrive from Virginia, where his partners was engaged in purchasing slaves for the southern market.

"I am credibly informed by slave-holders, that these traders are held in low estimation in the South; that no one, of any pretensions at all, gives them the least social countenance. I assure you that I went forth from this slave mart with a sad heart, and with my anti-slavery feelings immeasureably intensified."

Facts from the British Census.

Owing to the complicated nature of the facts elicited in the Census of Great Britain, taken in the Exhibition year of 1851, it has been found impossible to issue them in a printed form, until within the last few weeks. From a cursory glance at its mysterious pages, we have gleaned the following curious facts:—

—London extends over an area of 78,029 acres, on both sides of the Thames, into Kent, Surrey and Middlesex, and the number of its inhabitants, constantly increasing, was 2,362,236 on the day that the census was taken.

—The people of England were, on an average, 153 yards asunder in 1801, and 108 yards asunder in 1851. The mean distance apart of their houses was 362 yards in 1801, and only 252 yards in 1851.

—What is the oldest age that is now attained? The Census furnishes us some aid toward the prosecution of this inquiry, which is certainly of no inconsiderable interest or importance. In Great Britain, more than half a million of the inhabitants (596,030) have passed the barrier of "three score and ten;" more than a hundred and twenty-nine thousand the psalmist's limit of four-score years; and 100,000 the years which the last of Plato's climacteric square numbers expressed, (9 times 9 equals 81;) nearly ten thousand (9,847) have lived ninety years or more; a band of 2,638 aged pilgrims have been wandering ninety-five years and more on their unended journey, and 319 say that they have witnessed more than a hundred revolutions of the seasons. Many instances, we may observe, are cited of men living in the ancient world more than a hundred years; and Lord Bacon, in his History of Life and Death, quotes a fact unquestioned, that a few years before he wrote, a Morris-dance was performed in Herefordshire, at the May games, by eight men, whose ages, in the aggregate, amounted to 800 years. No populous village in England was then, it would seem, without a man or woman of four-score years old. In the Seventeenth Century, some time after Bacon wrote, two Englishmen are reported to have died at ages greater than almost any of those which have been attained in other European nations. According to documents printed in the Philosophical Transactions of the Royal Society, Thomas Parr lived 152 years and nine months; Henry Jenkins 169 years.

—In England, it seems that the twenty-sixth year is the mean age at which men marry, and the twenty-fifth that at which women marry.

—The average age of the wife is about 40½ years, of the husband 43 years; or the husband in Great Britain, on the average, is 2½ years older than the wife.

—The army and navy had, on March 31, 1851, exclusive of the East India Company's army and navy, and officers of the staff of the army not serving with the regiments, and militia, 178,773 effective men, namely, 142,870 in the army, 35,903 in the navy; besides 83,797 non-effectives on half-pay or pensions.

—The *effectives* of the army comprised 6,593 officers, 136,277 men; and the total of 142,870 were composed of cavalry, 12,911; infantry, 115,567; artillery, 12,000; engineers, 2,386.

—In the middle of 1851 there were 5,610,777 men at the age of 20 and upward, of whom 183,255 belonged to the army and navy. The active force is, consequently, about 2 per cent. of the men of Great Britain, or one in 47; or, if the total population be taken, one in 158 will be found to have been engaged in the army and navy previously to the breaking out of the present war in the East.

—The number of men between the ages of 15 and 45 is 4,801,900, one-tenth of whom would form an army of 480,190. One soldier to every *hundred* people in the entire population would supply 211,850 men. The levy of one in a *hundred* on the population of the United Kingdom, would give about 277,000 men.

—Of 4,694,583 children of the age 5 to 15, only 2,405,442 are returned as scholars at home and abroad; while 705,409 are employed in some extraneous employment, and 1,583,732 are simply occupied as children at home.

—By the English Life Table it is shown that the half of a generation of men of all ages passes away in thirty years, and that more than three in every four of their number die in half a century.

The average number of persons to a house in Great Britain, at the census of 1851, was five and a half, the same as in 1831.

—The population of Great Britain, including men, women, and children, exceeds 211 *hundred thousands*, and, at a rate of a hundred thousand a day, could have passed through the Crystal Palace in 211 days. In 1801, the population amounted, in round numbers, to 109 *hundred thousands*, and 102 of the 211 hundred thousands in 1851, or as many as could pass through such a place in 102 days, would represent the increase of the people of Great Britain in half a century. The most important production of a country is the population.

—Finally, we may observe, in order to place a schedule of the size of half a sheet of foolscap paper in the hands of every occupier in Great Britain, 42 tuns of paper were required, allowing none for waste; but that 42 tuns were actually used, and that the cost in England itself of taking the census, exclusive of postage and printing, was at the rate of £5 4s., or $25, for every thousand of the population.

[Tribune.

"A Living Compass."

A valued correspondent, who is a faithful and reliable minister of the gospel, writes to us from the interior of Florida, (says the *Southern Baptist*,) and at the close of his letter gives the following, which to many of our readers will, probably, be a new fact in natural history:

In many places in the southern parts of Georgia and Florida, during the months of October and November, there may be seen a species of deep yellow butterfly, with some slight touches of black on their wings, measuring some 2 1-2 inches from the point of one wing to the point of the other, going six or eight miles to the hour. Their precise course is some four or five degrees east of south; and when they meet with a forest too thick for them to penetrate, they rise above it, but immediately on passing it, they fall back to within six feet of the earth. Their course is frequently interrupted by flowers on which they alight, and they sometimes change their course in going from one to another; but as soon as their appetite is satisfied, they again resume their travels, so that by watching them a few rods, a person, however perplexed, may find the true course; for they are always reliable. This being the season for collecting stock in those trackless countries, we should often be greatly perplexed, especially on cloudy days, were it not that God, in his infinite wisdom and goodness, has provided us with a living compass. A few of them return in April, but not one in a hundred that go in the fall ever returns.

Rotation of Crops.

"Of course it is unimportant what system of rotation is adopted, provided the land is not exhausted by too frequent repetitions, or by working it too much without proper care in dressing and manuring." [Exchange.

The opinion that "it is unimportant what system of rotation is adopted," however popular it may be, arises, as it appears to us, from a misconception of the fundamental principles on which the practice of a rotation of crops is based. Timothy, wheat, barley, buckwheat, oats, corn, &c., following each other, would be a rotation of crops, but who can doubt that such a course would impoverish the soil as much as though any one of these crops were grown continuously on the same land. Looking simply at the exhaustion of the elements of fertility in a soil, rotation is of no use whatever, unless crops are introduced into the course which require a less quantity of certain substances as food than the crops which precede or are to follow them. To illustrate this, suppose wheat, barley, oats, and rye, require a much larger quantity of ammonia for their growth than the atmosphere and rain supply, while clover, peas, beans, and turnips do not; it is evident that a succession of the former crops would soon exhaust the soil of ammonia, and a diminished yield of these crops would be the result. If, however, instead of having a rotation of successive cereal crops, we introduce each alternate year a crop of clover, peas, beans, or roots into the rotation, the exhaustion of ammonia would be much less speedy, and, indeed, by judiciously feeding the clover, peas, roots, &c, to stock on the farm, it may be prevented altogether.

In regard to the mineral elements of plants, too, suppose turnips, clover, peas, &c., require more available phosphoric acid in the soil than wheat, it is evident that a succession of these crops would be a very injudicious rotation, and one calculated, provided they were sold off the farm, to render the soil incapable of producing a good yield of such crops. On the other hand, the same field, which after having produced a good crop of roots, had not sufficient available phosphoric acid for another crop of the same class, might, nevertheless, have enough for a large crop of wheat, &c.

It is not, therefore, "unimportant what system of rotation is adopted." It is, rather, of the greatest importance. No system of rotation is adapted to all soils and all climates, but the laws of vegetable growth on which the practice of rotation rests, are the same everywhere, and worthy of profound study. Experience has taught English farmers that, on their light soils, in their moist climate, wheat followed by turnips, barley, clover, and wheat again, and so on, is a judicious rotation. The heavy land farmers have long discovered that beans, peas, and clover, alternately with wheat, oats, &c., is a rotation well adapted to their soils and circumstances, and true science has demonstrated that it is so in both cases. In Western New York, clover and wheat, corn, &c., is found to be an excellent renovator of the soil. The Italian farmer advantageously introduces white lupines into his rotation. Now in all these cases the principles involved are the same, and cannot be violated with impunity.

[Rural New Yorker.

Ludicrous Mistakes.

The geologist, if he be fairly in earnest, is far too tired after his day's work to trouble himself about the aristocratic air of his quarters, and, besides, he generally manages to put his outer man into so uncleanly a condition, that a grand hotel would have some scruple in taking him in. Professor Sedgwick, after a hard morning's work, betook himself to a village inn, for a lunch of bread and cheese. When he asked what he had to pay, he was told fourpence. He could not avoid remarking on the smallness of the charge. "Ah, sir," said the landlady, "I should ask eightpence from any one else, but I only ask fourpence from you, for I see that you have known better days." At another time a lady stopped by the road side where he was working, made some inquiries, and gave him a shilling, because his answers were so intelligent for his station. He met the same lady at dinner the next day, to her great astonishment. A well-known geologist, long secretary of the Geological Society, was once taken up while at his vocation, and dragged off to the Bristol Asylum, for an escaped lunatic. On another occasion, tired, and with his pockets full of the day's treasures, he mounted a stage-coach, and fell fast asleep. Waking at his journey's end, he was horrified to find his pockets as empty as when he set out. An old woman who sat beside him, feeling the pockets full of stones, took him for a madman, who had loaded himself more effectually to insure drowning; so she slily picked out the fossils, one by one, from the drowsy philosopher's pockets, and tossed them on the road side.

[Chambers' Journal.

Illness—The Doctor.

How pathetic and how tenderly truthful is the subjoined pen-picture from the *Home Journal*.

Were you ever ill, seriously, dangerously ill? I mean you, dear reader. Was there ever a time when you thought at first that you had taken cold, and then, that the couch would be more comfortable than the arm-chair, and the little matters which, at morning, you said must be attended to to-day, you concluded to let pass until to-morrow? A strange and altogether new sensation had taken possession of you; cold, like ants, came creeping over you; perhaps the head grew dizzy, the eyes were weak, and warm drinks were grateful. By-and-by there was a change—a glowing warmth pervaded the system; you threw back the covering and say you are better now, and attempted to rise, when a sickening sense of despair came over you—things around you grew indistinct, and you fell back upon your couch to become unconscious for a time, and then awake as from an uneasy sleep and find yourself fairly in bed, and to be told that the doctor was expected soon.

What a change has come over you now! The doctor—the man of nauseating stuffs, you begin to regard in quite a different light; even his medicines you find are not near as bad as you had supposed them to be. But time goes on, and you grow more and more ill. How soon you have learned to distinguish the sound of the doctor's coming, as he drives up to your door, from the thousand others that go rolling by; even the ring of the door-bell, if you chance to be where you can hear it, you soon know, and his footsteps you easily recognize.

There is something cheering in the doctor's presence, and you wonder that you never discovered it before; you look more cheerful, and you tell him that you feel much better than you did a little while ago. He puts the tips of his fingers on your wrist, and looks at his watch, and counts the beating of your heart. He smooths the hair upon your forehead, and you think he does it pettingly, while he ascertains whether there is too much heat in your head. He does these and other things so gently, that you think the doctor must have changed—that he has become a milder and a better man in mind. But no—it is you that has sadly and sorrowfully changed, for the worse, in body; you are very ill.

Time goes on. What has become of that independence in spirit which braved everything? that self-reliance which gave you dignity, and carried you erect in the image of whom God after you were formed? Where are those ambitious plans over which you had deliberated long and carefully? those duties you had determined to attend to, the things you said must be done? Like you, bodily and mentally, they are all lying prostrate—fallen to the care of other hands!

It is a sad thing to see a strong man or proud woman stricken down, to be lifted about and nursed as a weak child, but 'the wind is tempered to the shorn lamb,' and we find it easier than we supposed to bear, what from our nature, must be endured. Such scenes are most common to the physician's eye; and, although he may bear a rough exterior, they soften his heart. But we seldom discover it until we see him at our own sick bed side.

THE DOCTOR.

Some idea of the rapid strides that "Young America" is making, may be gathered from the fact that just fourteen years ago but a single house, and that a log cabin, stood upon what is now the site of St. Paul, Minnesota, a city that supports four daily newspapers, and where upwards of forty-three thousand passengers have been landed within a year.

In Danville, N. J., is a sycamore tree estimated to be about two thousand years old; it measures twenty feet in diameter at the butt, in which there is a cavity capable of holding fifty persons.

The population of the United States in 1860 will be 30,986,861, at the ratio of increase that has prevailed from the organization of the government.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.
Dunkirk Express at 7 A. M. for Dunkirk.
Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Otisville and intermediate stations.
Night Express at 5 P. M. for Dunkirk and Buffalo.
Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7 00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.
9.00 A M—Mail Train   Through Way Train, 12 M.
4.45 P M—Express Train. Accommodation Train 6 P M.
For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.
For Peekskill at 3, 4 and 5.30 P M.
For Tarrytown at 1 and 8 P M.
The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.
SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder.

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

The Sabbath Recorder.

"SWEAR NOT."

To the Editors of the Sabbath Recorder :—

In a late number of the *Sabbath Recorder*, I find an article headed as above, which is evidently intended to ridicule the answer to the three questions propounded in a former number of the same paper. In answering those questions, I merely gave my views of the propriety and necessity of judicial oaths or affirmations. I did not wish or expect to engage in any debate. Nor would I attempt to answer "S. B." on any other consideration except by the advice of Solomon, in Prov. 26 : 5.

Mr. B. says that the first form of oath given by L. Jones is acknowledged as a sin ; "therefore so much is gained without argument." If any thing is gained, in this or any other part of his article, I think all that read it will readily admit that it is gained without argument. Now the man that does not know the difference between judicial proceedings and church meetings, proves his lack of common information in the next sentence, when he says, "For the laws of our land recognize no Sabbath but Sunday, and subject us to a fine for laboring on the first day of the week." I don't know what particular locality, or how much territory, he includes in the phrase *our land* ; but I know that the Seventh-day Baptists as a society have known for many years, that the laws of the State of New York guaranteed to them the privilege of laboring and traveling on the first day of the week ; and I would refer friend B. to the Revised Statutes of the State of New York, passed May, 1839, in which the seventh day of the week is recognized as a Sabbath of rest by divine commandment ; and all persons observing the same as a Sabbath are exempt from serving as jurors or appearing as witnesses, and from the service of all civil processes, or appearing to answer to or defend any suit, on that day ; and the same Statute declares, that all proceedings had against them on that day shall be utterly void. A copy of this Statute was published in the *Sabbath Recorder*, and was known and read of all men and some women throughout the Seventh day Baptist denomination. A still later Statute declares, that if any person knowingly and maliciously shall serve any civil process, or cause any to be issued and made returnable on the seventh day of the week, or procure any cause to be adjourned to be tried on that day, against any person observing the same as a Sabbath, he shall be deemed guilty of a misdemeanor, and punishable by fine not exceeding $100, or imprisonment not exceeding 30 days, or both.

Mr. B. refers me to Heb. 9 : 3, and 7 : 21, to prove that all judicial oaths and affirmations are forbidden by direct precept of Christ. I would ask, how the first passage quoted has any reference to the subject ? and if Heb. 7 : 21 does not prove the validity of an oath ? St. Paul says, "Those priests were made without an oath, but this with an oath ;" by so much (that is, by an oath) was Jesus made the surety of a better testament. When any law or precept suits Mr. B.'s notion of things, then it is right ; but when it contradicts his views, then a certain verb makes it to mean one thing, and again another verb something else

I conclude, by Mr. B.'s article, that he thinks the ten commandments are the whole and all the law that remains in force of the laws delivered to the Israelites through Moses, God's representative. But I trust that if ever the cloud of ignorance clears away, and lets in the sunshine of reason, he will be able to see, that the laws delivered to Moses were moral, judicial, and ceremonial. Nobody pretends that the ceremonial laws are now in force, or that we have any thing to do with them. But that the judicial laws are in force and binding, no man of sense would deny. In the first place, God gave the moral law, written on tables of stone. He then gave the judicial law, which, we are told, was written on parchment, and preserved in a similar manner as they are in books at present. In the 20th chapter of Exodus, immediately succeeding the moral law (or commandments) is the judicial law—the law of murder, manslaughter, man-stealing, theft, trespass, seduction, incest, blasphemy, false witness, wresting of judgment, raising and receiving of false reports, slander, depositing money or goods to keep (called in our law bailment,) also of hiring, borrowing, &c., which occupy the most of the three succeeding chapters ; all of which are at present, and always have been, recognized as law, where the Bible is acknowledged to be a divine revelation. They are the only code of laws sent down from heaven to man Our laws are a copy of them. The penalty in some cases differs a trifle, but they are after all substantially the same. The Lord, foreseeing the times, and knowing what was in man, very wisely provided laws and rules of conduct for him, and directed Moses to appoint judges to try matters of difference, and marked out the course to be pursued in the trial. Read Ex. 22 : 11. I deny there being any precept or example to be found, from that chapter to the end of the book of Revelations, that in the least diminishes the force of that law, or in any way intimates that any portion of the judicial law delivered to Moses was ever abolished. The judicial law was given to enforce the moral law and punish a breach of it. For example, the moral law says thou shalt not kill. Well, suppose you do kill, what then ? Why, the judicial law says, he that sheddeth man's blood, by man shall his blood be shed. This is repeated in the book of Numbers, and the reason given for executing the murderer : For blood it defileth the land, and the land cannot be cleansed of the blood shed in it but by the blood of him that shed it.

Mr. B. refers us to what the Apostles said, "We ought to obey God rather than men." Does he really think that any body is so ignorant as to believe that the judicial law of the Jews forbade the preaching of the Gospel ? Read the whole book of Acts, and you will not find it once intimated. But you will find, on every occasion where any of the Apostles were beaten or imprisoned, it was without law, or any authority. The book says that they could not find any thing by which they might accuse them. The fact was, the Apostles told too much truth for them, and exposed their wickedness, and all the law they had to punish or imprison them, was mob law. Forty of them combined, and took an unlawful oath to kill Paul ; they had agreed to mob him. The chief captain being apprised of that, ordered 470 armed men to take Paul at the third hour of the night, and escort him out of the country. The same mob law is still resorted to, by wicked combinations of men. It arrays itself against every good man that has the moral courage to stand up and expose secret wickedness, spiritual wickedness in high places ; or, in other words, wicked spirits in the church. Let any man say anything against any secret combination, or in the least expose any wicked practice, and see how soon his character will be assailed ; see what an amount of envy, malice, and deadly hatred, will be gathered together, not only by that society, or individual, but all the allied powers will appear in formidable array to punish the offender. So we see, that men have been very much alike in all ages of the world—some good, and others not so good. And it is but a short time since we heard of any too good to take an oath before a civil magistrate. It has always been considered that the better the man, the better his evidence. But if there are any that have become too good to testify under oath, they ought to be publicly known.

Mr. B. says, "I can see no possible necessity or reason for the Christian to take an oath." Suppose it was the law that Christians were not required to take an oath, how would courts of justice determine who should and who should not ? Let us suppose a case, and see how short it might be. Say Mr. B. is called as a witness. The court says, Mr. B., come forward and qualify. Says Mr. B., I am qualified. How ? says the court. Says Mr. B., I am a Christian. Says the defendant, I don't believe it, I object to his testifying until sworn. Says the court, Mr. B., how can you make it appear, that you are a Christian ? Here Mr. B. perhaps would propose to tell his experience, which might occupy one hour. The defendant still objects. The court next calls the neighbors and acquaintances of Mr. B., and asks if they have perfect confidence in Mr. B.'s integrity, stability, and love of truth, to believe him without first being sworn ; and a majority of them should decide against him. It would now be time for Mr. B. to rebut their statements—to enumerate his good deeds—tell how he had fasted and prayed—how much he had given to the poor, how much to charitable institutions, how liberal he had been to the preachers of the gospel, and thank the Lord that he was not as other men. And the court should then put him on his cross-examination, and ask him if he had not done these things to be seen of men, and to have his charity published in the newspaper, or if it had been done so privately that his left hand could not know what his right hand was doing ; and continue and ask him if he had not sometimes pinched a little in weight and measure, and tried to get a little of the best of a bargain, and sometimes put a little shade to the truth to make things appear in a more favorable light than was honest, or been a little mean about something else. And after wasting two hours in this way, the court would have to say, Stand aside, Mr. B., you are impeached by your own statements and those of your neighbors. The next witness comes on the stand, and claims to be a Christian, and the same manœuvre is to be gone through with. What an exhibition this would be in a court room ; and when would a case be tried. Was it not in great wisdom that the Lord instructed Moses to have in judicial proceedings an oath of the Lord between them, which should be an end of all strife ? And is not the present law and practice a continuation of the law of Moses, and a good one too ? Here the witness comes forward, and the officer says, You believe in a Supreme Being, and rewards and punishments. *Ans*, Yes. Well, in view of all this, you sincerely promise and say, in confidence, that what you shall here state as witness shall be the truth, the whole truth, and nothing more ; this you promise. I ask what shorter or better method could be devised to put an end to all strife. Once more—suppose that all that professed religion had refused to sign the temperance pledge, on the ground that they were Christians ; and, as Mr. B. says, "by virtue of their relation as children of God, were under the most solemn obligation to keep sober," &c., and so withheld their influence, what would the state of society have been at this day ? And if oath-taking in courts of justice were abolished, so that character had no protection, what would be the state of society twenty years hence ?

Did Christ ever condemn the law ? Did he refuse to pay tribute ? Although he was independently poor, and had not where to lay his head, yet he honored the law, and instructed Peter how to obtain the tribute money. When Christ was arraigned before Pilate, to be tried for his life, he did not dispute the law. No ; he did not claim that it was an unholy enactment of men. He said to Pilate, Thou couldst have no power at all against me, except it were given thee from above. He recognized the laws and powers that existed as coming down from heaven, and being ordained of God. And Pilate, as a judge of the law, could not find any law to condemn him. He was crucified by mob law, and without trial, or sentence.

Mr. B. says, in conclusion, that he fails to see the force of that assertion, that business transactions, national and individual, could not be done, and perjured persons brought to justice, without swearing by oaths. I wonder if he sees how any person could be tried and state-prisoned for the crime of perjury, before they were ever put under oath. In my answer to Eld. Griswold's questions, I gave what I understood to be a common sense view of the subject, and I trust it will be so considered by a majority of the readers of the *Sabbath Recorder*. Notwithstanding what may be said by the advocates of a higher law, the seventh-day people are acknowledged to be an enlightened and well-informed people ; and if I do not mistake their characters, the majority will never become anti-renters, mobites, or advocates of any higher law than the moral and judicial laws given to Moses.

Mr. B. says, yea and nay are sufficient for all Christian communication. That is not disputed. But how can he prove that yea and nay are sufficient for all legal communications ? Suppose Mr. B. was about getting married, and should say to his intended wife, Will you marry me ?—and she should answer, Yea ; and she in turn should ask him the same question, and he should say, Yea ; would this be such a marriage as would satisfy the church, or would they consider him living in adultery ? And again, suppose the ceremony was said over by an individual who was neither an ordained minister of the gospel nor a justice of the peace or judge of any court ; would a man that was too good to be sworn as a witness be satisfied with such a marriage ? Once more—suppose Mr. B. was taking a deed of a farm, would a yea satisfy him, or would he require an acknowledgment before an officer that was under oath, so that the same might be recorded.

L. JONES.

HOW TO STUDY.

Religion is the only gate to true learning and science. Those who go through their studies without it, have at least double work to do, and in the end not an equal product. While in the enjoyment of religion, a person's mind will become enlarged to take in every thing useful ; he will be separated from every thing which can hinder his studies, darken or debase his mind. Learning and science come from God, because he is the fountain of all knowledge. Properly speaking, these things belong to man ; God created them, not for himself—not for angels—but for man ; and he fulfills not the design of his Creator, who does not cultivate his mind in all useful knowledge to the utmost of his circumstances and power. God helps those who try to help themselves ; therefore, first be reconciled to Him, and then learn His sciences.

ALARIC WILLIAMS.

BROOKFIELD, N. Y., Jan. 1855.

PREACHING TO SLAVES.

The following is an extract from the report of the Rev. H. B. Whipple, of St. Augustine, Florida, communicated to the *Spirit of Missions* :—

"The slave has a deep interest in Missionary labor. He is naturally religious, and the plain, practical teaching of our church is well calculated for these poor sons of Africa. To them the missionary is always a welcome guest. It reminds you that "the common people heard *Him* gladly." "Is you well ?" "Me glad to see you." "Is you gwine to preach ?" "We is trying for de kingdom of Heben," are the welcomes of many swarthy friends. They need simple, home illustrations ; in a word, the old, heart breaking story of Christ crucified. When interested, they hang on the words of the speaker, as though he was the messenger of life. I have never held more delightful services than these ; there is earnestness in listening, devout responses in prayer, and sweetest singing of old hymns to African melodies. I have witnessed many touching instances of piety among slaves ; they always bring an offering to Holy Communion, and are ready to obey the truth."

On this the *Church Herald*, Vicksburg, Miss., remarks :—

"All blacks of course are not alike, any more than all whites. We do not doubt, therefore, that 'the old, heart-breaking story' of the crucifixion is effective in awakening religious feeling in many or most of them. But we remember that a friend of ours in Wilkinson County in this State, once related to us a circumstance that illustrates the degree of old Fetish and Obeah, in a word, genuine African feeling, that still remains among them. He had procured the services of a rather eminent Methodist preacher for their benefit, and after his sermon was ended, asked the 'religious leader' on the plantation—an old black woman—how she liked Parson D——. 'Don't like him,' was the answer ; 'he don't preach the Debbil.' 'Why,' said the master, 'but he preached the Lord.' 'Yes,' was the reply, 'dat berry well ; but it wont do for Niggers. If you want to do 'em good you must preach the Debbil.'"

THE POOR OF THIS WORLD.—God's ways are not as the ways of men. They often seem inexplicable to the human mind. None are more so than those which concern his choice as to the objects of his favor. He selects, as a general thing, not the rich of this world, but the poor ; not the noble and the mighty, but the humble and the weak. Moses was the son of a poor Levite—Gideon was a thrasher—David was a shepherd boy—Amos was a herdsman—the apostles were "ignorant and unlearned." The reformer, Zwingle, emerged from a shepherd's hut among the Alps. Melancthon, the great theologian of the Reformation, was a workman in an armorer's shop. Martin Luther was the child of a poor miner. Carey, who originated the plan of translating the Bible into the language of the millions of Hindostan, was a shoemaker in Northampton. Dr. Morrison, who translated the Bible into the Chinese language, was a last-maker in Newcastle. Dr. Minnie was a herd-boy in Aberdeenshire. Dr. Adam Clarke was the child of Irish cotters. John Foster was a weaver ; Andrew Fuller was a farm-servant. William Jay, of Bath, was a herdsman ; and the present Archbishop of York is the son of a draper.

For the Sabbath Recorder.

THE RAIN.

I've been sitting by the window,
 Holding converse with the rain,
Listening to its dreamy music,
 As it falls upon the pane ;
All of earthly care forgetting,
 As I listened to the rain—
Listened to its dreamy music,
 Calling from the window pane ;
Gently calling to my spirit ;
 Gently, yet with earnest tone ;
Speaking of the world above us,
 Whence the crystal drops had flown ;
Telling of the airy portals,
 Formed within the "upper deep,"
Where the Storm-king waves his sceptre,
 Causing all the clouds to weep ;
Telling of the time when earth-bound
 How it sought to soar on high—
Sought to soar, and, reaching heaven,
 Kiss the sunbeams in the sky ;
How it rose in graceful beauty,
 Gathered in a vapor wreath,—
Rose while smiling hills and valleys,
 Lay in calm repose beneath.
Then the drops came falling faster
 Down upon the window pane,
And all dreamingly I listened,
 Listened to the falling rain,
Till it told me that in heaven,
 It awoke all bright and fair,
Fair enough to be a jewel
 In the purest casket there ;
Then to earth again descended,
 In a cool, refreshing shower,
Laving all the withered verdure,
 Falling on each dying flower—
On the lilly in the valley,
 And the wild-rose on the hill—
On the daisy in the meadow,
 And the violet by the rill.
Then the rain-drops ceased their falling—
 Ceased the falling of the rain—
And the last drops taught this lesson,
 As they fell upon the pane :
Child of earth, unfurl thy pinions ;
 Bathe thy soul in founts above ;
Backward turn, and scatter round thee,
 Blessings thou hast sought above.

JUNE CLIFTON.

THE KING OF TONGA ISLAND.

Among the many interesting speeches made at the anniversary of the Wesleyan Missionary Society at Exeter Hall, London, was one by the Rev. Robert Young, who had recently returned from a visit to the Wesleyan missions in Australia, Van Dieman's Land, New Zealand, Tonga, Feejee, and Ceylon. The account he gave of his visit was thrilling. Everywhere, he said, he had beheld scenes of moral beauty, and everywhere he had heard songs of joy and holy triumph. Of his visit to Tonga he thus spoke :—

"Their King George is a most remarkable man, and I suppose I shall be expected to give some account of him. On my arrival at Tonga, I immediately paid my respects to him, and hearing that he had a desire to visit Australia, I at once offered him passage in the John Wesley. He accepted the offer, but said he must provision the ship. I refused, stating that I was quite sure, from the high estimate which the missionary committee had formed of his character, they would be delighted to know that I had the means of offering him that accommodation. He said that was all very well, and looking at me very archly, and smiling at the same time, he said, "You are in a strange land, and you must be kind enough to obey the will of its king." I of course submitted, and he provisioned the John Wesley. He sent on board five and a half tons of yams, fifteen cwt. of pork, upwards of two thousand cocoa nuts, and about six hundred fowls. It certainly was a kingly provision. On our arrival at Feejee, he evinced the same kind of disposition, for on the day following our landing he sent me my dinner to the mission house, and it was well cooked. And what do you think that dinner consisted of ? Six large puddings, four capacious baskets of tallow, and two large baked hogs. Whatever others may be disposed to do, it is evident that King George has no disposition to stop the supplies.

He is also a most decided and exemplary Christian. I had the privilege of being with him for nearly two months, and during that period I never heard a foolish word drop from his lips, nor did I see anything in his spirit or deportment inconsistent with the most entire devotedness as a disciple of the Lord Jesus Christ. He is a local preacher, and I heard him preach in Feejee a most interesting, powerful, and effective sermon.

On his arrival at Sydney he attended the missionary meeting. It appears that some years ago he gave to Mr. Rabone, a missionary in the Friendly Islands, an idol god which he and his family had been accustomed to worship—that the idol god had been preserved by Mr. Rabone, who being at the mission in Sydney, showed this to the king, and requested him to take it with him to the meeting. King George did so, and on the platform he held the idol up and said, 'This is the thing which I and my family were accustomed to worship.' Then holding up first one hand and then the other, each of which was minus two joints of the little finger, he said, 'My father cut off these fingers and offered them in sacrifice to this very thing.' The thrill that went through the congregation on his making this statement was indeed most wonderful. But the king had been amply revenged upon his idol gods. On his embracing Christianity he had them all collected, and to the indescribable alarm of his people he hanged the whole fraternity of them in his kitchen, and left them dangling in evidence of their inability to save themselves or those who had put their trust in them.

King George is a most enlightened and humane warrior. About two years ago the heathen part of the population, instigated by some of the emissaries of Rome, refused submission to his authority, and after the exercise of even a longer forbearance than that which England has shown to Russia, he was at last obliged to take up arms in defense of the laws and liberties of his country. But he went forth to war as a disciple of the Prince of peace, not to destroy men's lives, but if possible to save them, and by a course of conduct unknown to military tactics, he succeeded in destroying his enemies without slaying any one of them, and in transforming the most inveterate foes into the most admiring and ardent friends. One of the rebel ringleaders came to me, and with tears in his eyes, said, 'O, sir, the king has slain all our hearts.'

I visited the tree under which the king sat to receive his rebel subjects—they approached with fear and trembling, knowing that they had forfeited their lives to the law of their country—they expected to die. But as they came, King George magnanimously said, 'Live.' In a transport of joy and wonder, they began to thank the king for his clemency. But he said to them, 'Thank Jehovah, whose *lotu* (religion) has enforced me thus to act. If it had not been for Jehovah's *lotu*, every man among you would have perished.' They now desired to attend family worship with the king, and he had it performed in his camp, and for the first time did they bow the knee at the foot of the great Jehovah. King George returned from the conflict not with his garments rolled in blood, or with his head covered with the execrations of widows and orphans, but richly laden with the blessings of those that were ready to perish. His extraordinary conduct has made a powerful impression in that part of the world, and it seems to have utterly confouneed both Paganism and Popery."

CURIOUS ILLUSTRATION OF HABIT.

The omnipotence of habit receives illustration from what happened to a constant reader of the *London Times*. So addicted to it was he, and so dependent upon it for all the news, as to refuse intelligence from any other source ; and to this fountain he persisted in applying personally. Nobody was suffered to read its broad and stately columns in his stead on his account. No information was acceptable, even in that select source of light and knowledge, which did not shine through his own eyes.

This gentleman fell sick, and was confined to his bed. The stream of intelligence, therefore, from that journal, and he had no other, was quite shut out. He could not read himself, and would not permit any one else to do it for him. As his illness happened to be of a bad kind, and as obstinate as himself, he may easily be conceived to be in a tight place. For two whole years he was without any hint from the external world. His only mental sustenance was such as he had collected and laid up, squirrel like, in former days. He subsisted as bears do, on his old fat ; but it was getting pretty well used up, one may believe, when, though he was carefully attended by doctors—we forget of what 'opathy, for he was rich—he was given over—as cured, at the end of the time mentioned. No sooner was permission granted for the indulgence of his appetite for the *Times*, than he fell with incredible ardor to the perusal of that paper, beginning where he had left off two years befere.

We shall not stop to relate what alternations of joy and sorrow, of satisfaction and chagrin, played by turns over his still pallid countenance, as he rushed with eager curiosity, not through a fable, but the real and stirring history of his country and the world at large, during a space filled with the most agitating events that ever, perhaps, occurred in Europe, namely, the two years preceding the downfall of Napoleon. But when he came to the battle of Waterloo, his interest grew perfectly intense, and at the victory for England and the allies, which terminated forever that battle and the struggle in which his country had been engaged so long, he was thrown into a paroxysm of exultation. He rose up and vociferated a *hundred huzzas* with all his might ; nothing could appease him, and a sudden loss of voice was only able to stop his clamor, and allay somewhat the violence of his excitement. It was, it may be well supposed, a trial of no small magnitude to satisfy the longings of his pent-up curiosity for so long a period, and to come to the knowledge of the state of his country's affairs in the space of a few days, which no person had dared to whisper to him before.

What a strength of habit was displayed by this eccentric person ! But upon a nice inspection of himself, every person will ascertain, perhaps to his surprise, that some habit—it may be more than one—rules equally despotically in his own bosom. [Dr. Olin's Greece.

PROTESTANT PRESS IN PARIS.

I shall just tell you a little anecdote respecting the unfortunate gazettes or periodicals which represent in Paris the Protestant interest. Recently the editors of those papers—three in number—were summoned before the *Procureur Imperial*.

'Gentlemen,' said the magistrate, when the first civilities had been exchanged ; 'Gentlemen, I am instructed to forbid your publishing in the newspapers you edit any information leading people to suppose that Protestantism is gaining ground.'

'But if, in a certain locality, the number of conversions to evangelical truth warrants the building of a church, can we not ——?'

'No ; not a single allusion.'

'If the whole population of a village or district calls among them a regularly ordained minister of the gospel, surely *then* we may state the fact.'

'No ; not the hundredth part of a paragraph.'

'Well, sir,' replied one of the parties concerned, 'I am so far glad that your superior and yourself bear witness to the spread of Protestant Christianity. But as my *abonnes* are constantly sending me information, which, from what we have just been saying, I shall henceforth not be at liberty to print, it will be better if in the next number of my paper I tell them I must decline their communications for the future.'

'No !' exclaimed the Procureur, 'a line on that subject is enough to condemn you. Remember, WE DO NOT WISH TO SEEM TO INTERFERE.'

I DESIRE TO DIE.

The following reasons for desiring to die, were written by Mrs. Jane Ratcliffe, an eminent Christian lady, who died at Chester, two hundred and eighty years ago :

I desire to die, because I want, while I live here, the glorious presence of God, which I love and long for, and that sweet fellowship of the angels and saints, who would be glad of me, as I am of them, and would entertain me with unwearied delight.

I desire to die, because, while I live, I shall want the perfection of my nature, and be as an estranged and banished person, from my Father's house.

I desire to die, because I would not live to offend so good a God, nor to grieve his Holy Spirit ; for his loving kindness is better than life itself.

I desire to die, because this world is infected with the plague of sin, and some have this plague sore running upon them, and I myself am tainted with the same disease, so as while I live here, I can be in no place, nor in any company, but I am still in danger of being infected, or infecting others ; and if this world doth hate me because I endeavor to follow goodness, how will it rejoice if my foot do but slip ?

I desire to die, because of the devil's malignant and incessant assaults. I can stand nowhere before the Lord on earth, but one devil or other is at my right hand, and I must of necessity enter into conflict with them, and their temptations, and be buffeted and gored by them, which is a thousand-fold worse than death.

I desire to die, because by death I shall rest from the hard labors of this life.

I desire to die, because nothing in this world can give me solid and durable contentment.

I fear not death, because it is but the separation of the body from the soul.

I fear not death, because death is such an enemy as has often been vanquished, and because I am armed for it, and the weapons of my warfare are mighty through God, and I am assured of victory.

I do not fear death for the pain of it, for I am persuaded I have endured as great pains in life as I shall find in death, and death will cure me of all sorts of pains ; and because Christ died a terrible and accursed death, that any kind of death might be blessed to me ; and that God, who had greatly loved me in life, will not neglect me in death ; but his Spirit will succor and strengthen me all the time of the combat.

I do not fear death for any loss, for I shall but lose my body by it, and that is but a prison to my soul, an old rotten house or ragged garment ; nay, I shall not lose that neither, for I shall have it restored again at my Saviour's second coming, made much better than it now is ; for this vile body shall be like the body of Christ, and by death I shall obtain a far better life.

TALKING AND DOING.

When Dr. Chalmers was executing his plan of establishing parochial schools in connection with St. John's parish, in Glasgow, a site, which belonged to the college, was selected for the first school to be erected. Dr. Chalmers called on Dr. Taylor, the head of the College, in order to purchase this site. He expressed his hope of obtaining it on reasonable terms, in consequence of the novelty and importance of the undertaking.

"The undertaking," said Dr. Taylor, "is an important one ; but it is not a new one. We have been talking for twenty years of establishing parochial schools in Glasgow."

"Yes," said Dr. Chalmers ; "but how many more years do you intend to talk about it ? Now we are going to do the thing, and not to talk about it ; and so you must even let the price be as moderate as possible, seeing we are going to take the labor of talking and projecting entirely out of your hands."

There is a great difference between talking and doing, though all men do not seem to be aware of it. In this case above alluded to, more was accomplished by the latter in six months than the former in twenty years.

LIFE A VOYAGE.

A writer, whose name is unknown to us, says : I love to contemplate this life, this world, and all my passage through it ; and to compare it to the ocean, and to the mariner urging his way across its troubled and ever varying waters ; and then to consider heaven as being faintly shadowed by the port or haven where reside the dearest friends or kindred of the voyager, and where his heart and best affections are continually flying, and where he fain would himself be. O my blessed Jesus, now and then

By faith I see that land,
That port of endless rest ;

and every glimpse I am able to catch through the mists and clouds of frail mortality, only serves to endear that land to my soul, and to make me still more desirous to be gone. And can it be that I shall fall short of it ? Oh no, for it is God the Holy Ghost who hath given me a desire to depart from sin and from a sinful world, to be with Christ, which is far better. I will then endeavor to expand the wings of faith, and to urge on my course homeward, still trusting

That I shall reach the heavenly shore
Where sins and pain distress no more.

LIFE EXCURSION.—"A solemn thing this life-excursion—once made, forever ! It is something to move the soul's lowest depths, to look out on the boundless expanse beyond, and the vast swells, and catch the solemn sounds of eternity ; and happy he, who, sailing down the stream, has an eye to behold the sweet field beyond, who maintains calmness amid the swelling of Jordan ; yea, whose peace God maketh like a river ! What believing pilgrim can keep his thoughts away from a better land, that is, a heavenly ! 'There is a river, the streams whereof shall make glad the city of God, the holy place of the tabernacle of the Most High. God is in the midst of her ; she shall not be moved.'"

STATE OF THE DEAD.

It is held, by some, that the dead lie dormant till the resurrection of the body. If it is meant, by this, that they go out of existence, or suffer annihilation, at death, we reply that, if this be so, then the resurrection is not a *resurrection*, but a new *creation;* for a resurrection means a *rising again*—implying, evidently, that the being who comes up from the grave has existed before, and is not a new conscious being. But if a person's existence comes to a full end when he dies, then the person that comes up in the resurrection is not the same conscious being that once merited reward or punishment. Where, then, would be the justice of rewarding or punishing him? True, it is possible that Almighty Power might make a new conscious being, that should *suppose* itself to remember things done in a former state, before it had any existence; but as it would be a false apprehension, and not a real memory of what was done before, it would lay no just foundation for the recompenses of vice or virtue.

But if by a "dormant" state is meant, not a full end of existence, but merely a state of inactivity, or sleep, we would first ask the question, Has God created the soul without a capacity of being recompensed according to its works? Reason at once answers, that He has not. For if, by creation, man is invested with powers which enable him to love and obey his Maker, it is clear that, by these same powers, he is capable of dishonoring and blaspheming him. But to suppose that the Creator furnished him with such powers, and yet implanted, in connection with them, no capacity of being recompensed according to the use that he might make of them, is to suppose the Infinitely Wise God to have been guilty of a great oversight, not to say a most egregious blunder.

Now suppose a man of great piety to have toiled and labored, through great self-denial and sorrow, to accomplish some good for his fellow creatures. Suppose that, just as he brings about his end, and before he can possibly have received any recompense in this life, some wicked person suddenly puts an end to his earthly existence. Does such a wicked act prevent all God's rewarding goodness and justice with regard to that righteous man? Or, suppose a man of great wickedness to blaspheme and insult his Maker, and commit all possible outrages against his neighbors; and then suddenly to make away with himself by knife, or halter, or poison; does God therefore lose the power of punishing such wickedness *according to the course of nature?* Yet, if the soul goes to sleep, when the body dies, the designed rewards and punishments of divine justice are as effectually disappointed as if the soul went into a state of annihilation. For the dormant or sleeping state of the soul is a state without perception or consciousness. From this state it cannot awake by any power of its own. For it cannot reasonably be supposed, that this dormancy is analogous to the ordinary sleep which we take at night, from which we awake with perfect regularity, by reason of a law of our nature. For if it were in accordance with fixed or natural law, that the soul should awake from this state, there would be—not one general and simultaneous resurrection of the human family, but—a multitude of different resurrections. That is, Adam, and all those who died about the same time that he did, having fulfilled the law which laid them to sleep, would rise first. Then those who died some time later would rise. These would be followed by those who died still later; and so on, till time should end. But there would be this difficulty, that those who died just before the end of time, not having got their nap out, would not awake to be either rewarded or punished. They would lie till all was over. For by what law of nature would Adam not awake till after some thousands of years, others in half that time, others in a still shorter period, and so on, till at last some would have been in the dormant state but a few days, or hours?

We say, then, that the soul cannot awake from the dormant state by any power of its own. It can never awake, to be rewarded or punished, *except by a miracle.* But if it require a miracle to bring this about, then it is not a thing which takes place according to the course of nature. And so we come to the conclusion, that God cannot, in the cases above supposed, reward or punish *according to the course of nature.* The good man who is cut off before it is possible for him to receive any recompense in this life, cannot be recompensed without a miracle; and the wicked man who, after blaspheming his Maker and outraging his neighbors, kills himself, cannot be punished till a miracle has raised him from the sleeping state. And what is this but saying, that God has created man without a capacity of being rewarded, or punished, according to his works? For if He had given man such a capacity when He created him, then this capacity would be a *natural* capacity; and if man possessed a *natural* capacity of being rewarded or punished according to his works, then it would not require, in any case, a miracle to bring him into a state where he could be recompensed.

But we know, from experience, that man has a natural capacity of being rewarded for virtue, and punished for vice, in this respect, that the performance of virtuous actions is followed by happiness to himself, and the commission of wicked ones is followed by misery. This is the way in which the Creator recompenses his creatures *according to the course of nature.* And reason teaches that, if one is suddenly cut off, before it is possible for him to be recompensed in this life, in this natural way, death does not place him in a state which renders such a method of recompense utterly impossible.

But if God can distribute the recompenses of vice and virtue according to the course of nature, and without any miracle at all, why, it may be asked, does He resort to a miracle for the purpose of introducing the great day of accounts? For it is after the resurrection that the world is finally assembled for judgment, and not till then does the grand separation between the righteous and the wicked take place. If men can be recompensed previous to this miracle of the resurrection, and without its taking place at all, why is it resorted to? We might say much in answer to this question, but for the present we deem it sufficient to say, that the resurrection is ordered, not to render it possible for God to recompense his creatures, but in order that soul and body may be rewarded together.

T. B. B.

THE CHURCH AND THE SCHOOL.

1. The spirit of the church must be infused into the family institution, and control and guide it. It has been well said by some one, that the family and the home is the sister of heaven, though fallen and confined to earth. It is at least the great mission of the family to train candidates for a home in the skies, and preparatory to that, for the church militant. In order that the family may be an earthly sister of heaven, it is necessary that the spirit of heaven should reign in it. The spirit of Christ must be here. The altar and the mercy-seat must be here. The cherubim must hover here. The pure incense of religion undefiled, as a continual offering to the Most High, should ascend from the homes of all youth. This cannot be until the church has carried her conquests into these homes and subdued them to herself.

2. The spirit of the church must be infused into the *state*—not in the sense of an offensive, obnoxious union of church and state, but in that higher, spiritual, and at the same time more practical sense of the Christian carrying his religion into all the relations and activities of life, acknowledging at all times and in all places the presence and power of a higher, a religious law. The only true and sure foundation of perpetuity in the state is virtue, and this virtue must of necessity be the natural outgrowth of the religion of that nation. In this republic, the Christian is the national religion, and the church is its exponent, its representative, its heralder, and preserver; hence the church becomes the exponent and guardian of the nation's virtue—consequently of a nation's liberties. It is the nation's great moral instructor. As is the church, so may we expect to find our nation. As far as the principles taught by the church govern man, as far as man becomes subject to her moral sway, the state will not have to govern. The law of force will not have to be applied when the higher law of the church is sufficient. The governmental duties of the state are either prohibitory or regulatory—prohibiting the evil and regulating the good. In as far as the church accomplishes its mission and removes evil, by its moral and renovating power, the state will not have to restrain it by its arbitrary power.

3. The SCHOOL must be subject to its influence, must be guided by its principles. The relation existing between these is more intimate and important, if possible, than between the others.

Religion and knowledge must not be divorced. They are essential to each other for the full and perfect development of either. What God hath thus joined in mutual relations, let no man sever. Science is often said to be the hand-maid of religion, but we would rather say, that what the eye is to the body, what the ear is to the tongue, so is knowledge to the religious element of our natures. Without the eye, the body gropes in darkness—without knowledge our religious aspirations grope in worse than Egyptian darkness. If the ear never listens to sound, the tongue is voiceless and silent—so if the knowledge of the way of life never enters the soul, faith is never there to lisp forth its sublime strains; or if the ear has lost its hearing, the tongue soon forgets its accustomed accents—likewise the spirit, robbed of its former knowledge, soon forgets, in its idiocy, its accustomed devotions. Religion furnishes the great motive power to knowledge. Knowledge, on the other hand, gives light and guidance to this holy motive power. Religious sentiment unenlightened, is blind, superstitious, bigoted. Knowledge without the religious element is a servile slave, working as readily in the ranks of sin as of holiness.

Education without being deeply imbued with the religious element, is education unto death. There is no neutral ground. Death or life will ever be mixed in the fountain from which our spirits drink. Those systems of education that would shut out all religious education, shut out the Bible, and prayer, and all reference to the higher law, are to be shunned, are to be spurned by every Christian educator and philanthropist. Some institutions of learning have attempted it; but they have proved a failure, a curse. Some States, by an excessive, abnormal democracy, are taking incipient measures to exclude the Bible and prayer, and all religious instruction, all reference to the higher law, from their common schools. If the attempt succeeds, *mene, mene, tekel upharsin,* will be written by an unearthly hand all along the walls of their otherwise great and glorious common school system. It was the glory of the Reformation, it is to the praise of the Protestant, that his religion and knowledge go hand in hand, his faith is according to and sustained by knowledge. Luther resurrected the Bible from its long entombment, and from it educed a purer form of Christianity. The progress of this reformation has ever been identified with the progress of learning and of schools. The Protestant of the present day, and in our country, has bequeathed to him through the toil and sacrifice and blood of the Protestant of the past, three great legacies—the reformed church, the Christian school improved and adapted to the multitude, and a government guaranteeing freedom of thought, speech, and conscience. A simple reference to history will convince any one that these three great ideas of modern civilization have sprung from the Christian religion. Any attempt of learning to cast off its allegiance to religion, to deny its parentage, should be spurned with contempt by every Protestant.

If these statements are true, then it follows that next to piety and all of its collateral, attendant virtues, the church needs intellectual culture. It needs a clear intellect, a strong comprehensive mind, a mind well stored with knowledge. The church will have to meet and fight its way through many and varied foes, in all the departments of literature and science. It must expect to stand in the high places of the earth as well as the low places, and there fight the battles of the Lord. It will have to contend with strong minds and keen minds, with error subtile, and far reaching, and Proteus-shaped. It must contend with duplicity and cunning, and false philosophies grown gray in the affections of the people.

Instruction is an essential element in the mission of the church. It is to teach all nations and kindreds and tongues. It is to instruct not only the ignorant but also the learned. It must teach not only by "Greenland's icy mountains," and on "India's coral strands," but also on Mars hill, in academic groves, in college halls, and from the chair of the university. Christianity must regenerate our literature and baptize our philosophy into its pure spirit. Science must be christianized, art must be christianized, politics must be christianized, society must be christianized. In order to do this, the church must have not only the preacher, but also the teacher, the press, the school. Academic groves and college halls must be consecrated to her service. The pen of the writer must be devoted to her cause. The pleading of the lawyer and the eloquence of the statesman must be baptized from on high. The farmer, the mechanic, the day laborer, need the learning of schools, that they may reason understandingly, knowingly of temperance, righteousness, liberty, and a judgment to come.

In order to attain these objects, the church must be thoroughly educated, deeply, profoundly educated. Christian youth must be trained early and long. They must tarry long in the halls of science. They must drink deep from the fountains of knowledge. They must submit to stern and long-continued mental and moral discipline. *

NEW LIQUOR LAW IN OHIO.

The Supreme Court of Ohio has pronounced the new liquor law of that State constitutional. The result is a general conformity to its requirements by liquor sellers and liquor drinkers. It seems to have been thought best, by the friends of temperance in Ohio, not to insist on the seizure and confiscation of liquors, but to punish the sale and use of them so severely as to put an end to the traffic. Accordingly, they have accepted a law of which the following is a synopsis, and which is said to be working admirably:—

SECTION 1. Provides that it shall be unlawful for any person, by agent or otherwise, to sell in any quantity, to be drank in or about the premises where sold, any intoxicating liquors, ale, beer, native wine and cider excepted, under a penalty of $50 fine and 30 days' imprisonment and costs of suit.

SEC. 2. That it shall be unlawful to sell intoxicating liquors as aforesaid, to minors, unless upon the written order of their parents, family physician, or guardian, under the same penalty as in Sec. 1.

Sec. 3. That it shall be unlawful to sell liquor to persons intoxicated, or in the habit of getting drunk. Penalty as before.

SEC. 4. That all places where intoxicating liquors are sold in violation of the law shall be declared to be common nuisances, and shall be shut up and abated as public nuisances; and upon conviction the keeper may be fined $100, and jugged 50 days; and before re-opening it bonds shall be given that the law shall not again be violated.

SEC. 5. That it shall be unlawful for any person to get drunk, and upon conviction he shall be fined $5 and imprisoned three days, and pay costs of suit.

SEC. 6. That any person who shall by the sale of liquor cause the intoxication of any other, he shall be liable to any third person, and compelled to pay all expense of taking care of said drunken man, and one dollar per day for the loss of his time until he gets sober and well.

SEC. 7. That wife, parent, child, guardian, employer, or other person, who shall be injured in person or property in consequence of the intoxication of any person, shall have a right of action for damages against the person who furnished the liquor, and if the plaintiff be a married woman, she shall be entitled to *exemplary* damages.

SEC. 9. That the giving away of liquors, or other shift or device to evade the law, shall be deemed an unlawful selling and punished accordingly.

SEC. 10. Provides that the premises where the liquor is sold, shall be liable for all fines, costs, and damages assessed against the vender, whether he be a tenant or owning.

GLIMPSES OF DOMESTIC LIFE IN CHINA.

NUMBER TWELVE.

As affected by the Rebellion.

You are doubtless anxious to know how the present civil commotion affects the common people. Volumes would not exhaust the theme of their suffering. This would be inseparable from a state of civil war any where. It may have its varieties, incident to the peculiarities of this peculiar people. If so, you will as readily discover them, in illustrations from particular examples; so I shall introduce to your notice the same characters formerly taken to illustrate these "glimpses," as possessing particular interest for you, as well as ourselves.

The marriage of "my friend" Nemay occurred more than two years ago, as you were duly informed. Her husband, Low-Chung-Yuen, was, and had been from his youth, in the employ of the Tautai, as secretary or scribe, an office inherent in his family, and so considered as secured to them for generations to come; insuring them a competency, and giving a sort of aristocratic tinge to their friendship, which could not fail to be seen and felt by the "outside barbarian" friends of their new inmate, our beloved Nemay. Her husband, she had always told us, was friendly to foreigners, and designed to make our acquaintance, but the father was obstinate, and would be greatly enraged should we presume to visit her. Once only did we meet her husband, (and that was at the house of her mother, near the close of her first year of married life, and several months previous to those irruptions which have since caused such shaking among us,) until after the capture of the city in September last. Then was "his occupation gone," swept away with the same blast that demolished the grandeur and the power of "His Excellency, the Tautai;" and poor Low-Chung-Yuen had plenty of leisure for making acquaintance with the long-neglected friends of his wife. It is strange how circumstances alter cases; but so it was, that his first visit to us was to beg permission to come, accompanied by his wife, to consult about the future, in view of the troublous prospects just opening up. It is needless to say, how cordially we granted his petition, or how speedily the little feet of Nemay brought her to our house, unused as they were to such an exploit, to say nothing of that strange innovation of custom, a walk in the public streets, and that too accompanied by her husband! But she braved the double ordeal, fatigue and custom, and a pleasant interview we had. It ended in our promise to protect them, and their infant son, as far as in our power, and to allow them to share our retreat should we be compelled to leave the city, an alternative we confidently hoped to avoid, although our arrangements had already been made, in accordance with Consular advice, for leaving the city, should it finally become necessary. They also begged us to visit them at their own house, an invitation we were not slow to accept, as you will believe from the fact that before evening we had gone to our reserved quarters "down town," and in returning had actually made the long desired, but recently permitted visits. The hitherto unfriendly father was standing outside his gate when we came up, and stopping to make inquiries, (uncertain as to the precise house we were seeking,) for a family "surnamed Low," we were assured by a listening wag, that every body was "surnamed Low," when the old man stepping forward, pronounced our names, and entering his own door, welcomed us with all the cordiality of a patriarch and a friend. We well knew that self-interest was at the bottom; still, we rejoiced that Providence had overruled the obstinacy of man, and that this desire of our heart had been granted us.

We remained in the city during the month of September, although our neighbors were constantly leaving. Thousands on thousands had gone; for days and weeks, we could not look abroad, or move in the streets, but our eyes were arrested by fleeing multitudes, with their loads of valuables, until a strange look of desolation was spread over and within our once crowded streets. Fear was on every face, and we were constantly met by the inquiry, "Are we safe?" If I chanced to go out in my sedan, my return was looked for with the greatest anxiety; and if I chanced to remain longer than usual, the neighbors would become alarmed, and could only be quieted by seeing me come back. They said, "While you are at home we feel safe, but when we know you are gone, we fear there is danger, and we are troubled till you return." Understanding their feelings, we resolved to remain as long as possible, and we did so at length one day too late; for when the emergency came, we had not time to inform our friends of our departure, or even to take with us proper supplies of clothing for ourselves. The next day Mr. Carpenter returned to the city, but so far from liberating others, he was himself obliged to remain prisoner at large for two whole days, and one sad, gloomy night, a lively engagement having taken place in the interval, during which our house had received one cannon ball, giving him warning to seek a safer retreat. Another whole month elapsed before he could again get admission within the city walls, and it was still quite impossible to liberate our friends. Mr. C. continued to go in at intervals, and to visit the family, and none were more friendly to him than Mr. Low, Senior. Two or three months thus passed, when a note was brought to Mr. Carpenter from the Low family, having been passed over the city wall, and entrusted to some passer by, to hand to him. It contained merely a request that he would go in at once, as our friends were in trouble. They could not write more; as a strict surveillance was kept all around the city, and no notes might pass in or out, which could not be read by the guard. He immediately went, and found that the old man had been taken and imprisoned by the rebels, for the purpose of extorting money from him. This was their common mode of raising funds, and the family were no strangers to the dreadful tortures often inflicted in such cases, nor to the fact, that death often closed the frightful scene, where the required amount of money was not forthcoming. The wealthiest had suffered first, and doubtless many had suffered to death, rather than give up the treasure which might have purchased their lives. This may appear anomalous to those (if any such there be) who have not heard the frequent cases of Chinese who have sold themselves for a sum of money to die instead of some condemned criminal, an anomaly it is difficult to explain, except upon the principle of buying merit for another world or securing the means to perpetuate their honors in this, by leaving the price of their own blood a treasure in the hands of their friends. Mr. Carpenter found a rebel guard at the house, and the family on their knees, begging that the old man's life might be spared, which they were told might be, on condition of the payment of a certain sum. This the family declared themselves unable to raise. What could Mr. C. do? Foreigners might not interfere. He could only expostulate. He told the guards, he believed the family too poor to raise the ransom money, and they professed themselves willing to release the father, if the sons would come forward. No faith could be put in their promises; so the sons prudently kept themselves concealed, the younger at home, and the other, Low-Chung-Yuen, at our house, where he had taken refuge. Had the old man ever been in our employ, or any way connected with foreigners, there would have been somewhat on which to found a plea for his release, but the plea of acquaintance, or friendship even merely, would not be sufficient, and any interference on his behalf would have been considered a violation of neutrality, which could not be tolerated. It was, however, confidently predicted, that the fact of Mr. C.'s having met and conversed with the guards at the house, being a proof of their being somewhat under our patronage, would effectually prevent the use of violence in the old man's case. And it may have been so; for after a while, upon the payment of a much smaller sum than at first demanded, the old man was restored to his liberty, of which he speedily made the best use, by effecting his escape from the beleaguered city. This he accomplished by the help of a small bribe to the guards on the wall, who, in consideration thereof, allowed him gently to pass down their rope ladders, and thus into the free air of the outside world. This will seem strange to one who does not know, that *policy* is the proper term for Chinese *honesty,* and that *gain* is a sort of universal watchword. No wonder, then, if it is used by the watchmen on the walls of a besieged town. It is also a well known fact, that the second officer in command now in the city does many a good turn in this way of letting the oppressed go free.

L. M. C.

SHANGHAI, March, 1854.

CHAPLAINS IN CALIFORNIA.

The recent action of the Assembly of California in relation to Chaplains, shocks some portions of the community, while it amuses others—giving to all a glimpse of the state of religious feeling among politicians and legislators of the new State. It seems that the Assembly of 1854 had no Chaplain. They passed a resolution for the appointment of a Committee to invite all the clergymen in Sacramento City to appear, on alternate mornings, at the opening of the House, and offer gratuitous prayers. Immediately after the passage of that resolution, a letter was received from a Mormon priest and read. The following is the conclusion and pith of it:

"Believing it to be inconsistent with the principles of the Gospel, the practice of Jesus Christ and the economy of the government of God to sell prayers at the rate of $12 a piece, and NOT believing that a prayer which costs $12 will have any more influence with the Almighty than one which is offered freely, I propose, should it meet with the approbation of the honorable members of this House, that inasmuch as God bestows His blessings "without money and without price," to offer my services to ask those blessings freely as they are given, and thereby give a slight testimonial of my regard for the interests of the State and community."

A motion was made and carried—38 to 14—that this Mormon be considered one of the clergymen invited. The next day a couple of indignant letters were addressed to the House by evangelical clergymen, stationed in Sacramento, declining the invitations. The Rev. J. A. Benton declines because there is no pay. The Rev. J. Lewis Shuck says:

"I am now precluded from accepting the invitation you have extended, from the fact of the Assembly having, by a large vote of yesterday, acknowledged the Christianity of that daring imposture of systematic licentiousness called Mormonism. And with it, or its 'Elders,' I can have no religious affinity, sympathy, fraternity, or intercourse. I claim for myself, individually, no superiority in righteousness over other *men;* but as a Christian Minister, I do claim for Christianity a superiority over every other religious system on the face of this whole earth; and as to Mormonism itself, I regard it as a dishonor to the one living and true God, a libel upon Christianity, a disgrace to the philosophy of human progress, and a bold insult to the intelligence of the nineteenth century."

The large vote, 38 to 14, in favor of inviting the Mormon, was not owing to the fact that the majority were Mormons, (there is one only, Mr. Hunt, of San Bernardino,) nor that they were disposed for political or other reasons to pay respect to Mormonism, but they were merely desirous of casting ridicule on the chaplain project.

SUNDAY IN NEW YORK.—Mayor Wood's crusade against those who sell liquor on Sunday has proved quite successful. He is now trying to prevent the exposure and sale of goods on that day—a movement which may be consistent with the statutes, but which is by no means as generally approved as his anti-liquor-selling movement. The barbers also, acting it is said on the suggestion of Mayor Wood, are endeavoring to have their shops all closed on Sunday. The extent of their zeal, and the degree of piety which characterizes it, may be judged of from the following paragraph:

"Some weeks since a paper was circulated, by which every one signing pledged himself to close up on that day, *provided all who were engaged in the business would unite in the movement.* But here was the difficulty. There were found to be many who would not consent to such an arrangement. We have, at present, a law on our statute-books, making it an offense finable with one dollar to keep such places open on Sunday; but the profits of a majority of the shops on that day are sufficient to enable them to pay this paltry fine (even when it is enforced, which is rarely,) without feeling it materially. To obviate this difficulty, the barbers have drafted a petition to the Legislature, to which the signatures of three-fourths of both the employing and the employed barbers in the city have been obtained, asking for an amendment to the existing law, so as to make the fine $25, *which would probably bring the few opposing members of the profession into the traces.*

PROSPECTS IN CHINA.—An English paper says that the relations of that country have assumed a serious aspect. Grave apprehensions have been excited amongst the friends of Protestant missions, by the conduct of Sir John Bowring, in his relation with the Imperial Government at Pekin. There is ground for believing that an influence, hostile to the evangelization of China, is actively at work, and that an effort may even be made to lure England into an alliance with the Manchew dynasty, in order to prop up the tottering idolatries of China, and the domination of a foreign race over its native inhabitants. To be forewarned is to be forearmed, and we are glad to see that the Committee of the Chinese Evangelization Society have already presented a memorial to Lord Clarendon, praying that in any revision of existing treaties, ample security may be obtained for the free exercise of the Protestant faith and worship, and the propagation of Christianity in China.

HONOR TO WISCONSIN.—The United States District Court for Wisconsin recently convicted Messrs. Booth and Ryecraft, of Milwaukee, on a charge of assisting in the rescue of the fugitive slave Glover—a *crime* subjecting them to fine and imprisonment. The Supreme Court of the State, however, issued a writ of habeas corpus, on which the convicts were brought to Madison, the capital, to have the merits of their conviction and imprisonment inquired into. It seems that they were convicted for rescuing a "fugitive from labor;" whereas, in the indictment it was not averred that Glover, who was rescued, was a "fugitive from labor," nor was there a particle of evidence before the Court to establish that point. It was on this ground that the State Court set them free. In granting the writ, one member of the State Court declared his conviction that the fugitive law is entirely unconstitutional; the other two reserved their opinions on that point, and granted the writ on the ground that no offense had been proved.

IMPORTANT EXPEDITION.—An expedition has just been sent out by the United States Government, to ascertain whether on the Llarios de Estacedo—a region through which the Pacific Railroad would have to pass—water can be obtained by means of artesian wells. The expedition consists of Capt. J. Pope, of the U. S. Topographical Corps, with a detachment of 150 United States troops. Dr. G. G. Shumard accompanies the expedition as Surgeon and Geologist.

RE-ELECTION OF MR. SEWARD.—On Second-day, Feb. 6th, WILLIAM H. SEWARD was by the Legislature of New York elected Senator of the United States for six years from the fourth of March next, to fill the vacancy which will then occur by the expiration of his own term. In the Senate he had 18 votes, being a majority of 5 over all other candidates. In the Assembly, he had 69 votes, being a majority of 12 over all others. His election is considered a victory for freedom.

☞ Eld. THOMAS E. BABCOCK's post-office address is Albion, Dane Co., Wisconsin. In a business letter just received from him, he says: "My health has so far given way to the advance of a long-seated asthma, that I felt obliged to try to do something for relief. While revolving the question as to what it should be, I received a call from the Albion Church; and in view of the representations I receive of the favorable influence of that climate in such cases, I have determined to try it. I start on Second-day, Feb. 12th."

☞ Dr. EDWIN R. MAXSON has recently removed from Adams Center to Geneva, N. Y., where his correspondents are requested to address him.

A party of gentlemen left New York last week for the purpose of taking part in the proceedings at the opening of the Panama Railroad.

General Intelligence.

Abstract of Proceedings in Congress.

SECOND-DAY, FEB. 5.

In the SENATE, Mr. Stuart presented a joint resolution from the Legislature of Michigan, instructing their Senators and Representatives to use their best exertions to procure the passage of the act prohibiting the introduction or existence of Slavery in any of the Territories, especially in Kansas and Nebraska, and to introduce without delay a bill for the latter purpose; and also to procure the immediate repeal of the act of 1850. Gen. Cass promptly repudiated the doctrine of instruction, and flatly refused either to obey or resign. The resolution was laid on the table, and the Bounty Land bill was further discussed and finally passed. This bill, which was overburdened with amendments, gives to all who served fourteen days in any war since 1790, 160 acres, deducting the number of acres already received by them under former acts. Mr. Bell's amendment takes in wars prior to 1790. Mr. Weller's amendment increases pay of invalid pensioners.

In the HOUSE OF REPRESENTATIVES, the Senate bill refunding duties on certain railroad iron was adopted. A set of resolutions denunciatory of Know-Nothingism was proposed by Mr. Witte, who asked a suspension of the rules to bring them before the House. The House refused by Yeas 104, Nays 78, (not two-thirds Yeas,) to suspend the rule, and so the resolutions lie over. The Colt Extension case was debated nearly all day. A resolution to expel a reporter from the floor of the House was adopted, the reporter being interested in a claim before Congress, contrary to the rule.

THIRD-DAY, FEB. 6.

In the SENATE, the establishment of a United States Court in California was taken up, and some time spent in fixing the Judge's salary. The bill to improve the mouth of the Mississippi was next taken up, and finally adopted—30 to 17. Some improvement bills were referred, and the Senate adjourned.

In the HOUSE, the expulsion of W. B. Chase, a reporter, was clinched by a refusal to reconsider. After some talk on the Consular Reforms Bill, the Texas Creditors' bill came up, and was talked about until the hour of adjournment.

FOURTH-DAY, FEB. 7.

In the SENATE, several petitions for the repeal of the Fugitive Slave Law were presented; also, for the prohibition of Slavery in the Territories. Then the bill to establish a United States District Court in California was taken up and talked over, but not acted upon. River and Harbor bills occupied the remainder of the session.

In the HOUSE, the bill providing for the payment of the creditors of the late Republic of Texas was called up, and an amendment adopted reducing the gross amount to be appropriated from eight-and-a-half to six-and-a-half millions. The bill finally passed, as amended, by a vote of 154 to 43.

FIFTH-DAY, FEB. 8.

In the SENATE, the Indian Appropriation bill was made the special order for Sabbath-day. A bill was reported to carry the Reciprocity Treaty into effect. The bill to extend credit for duties on Railroad Iron was debated awhile, when the Senate went into Executive session.

In the HOUSE, bills were passed relating to the holding of the United States Courts in Tennessee and Florida; authorizing the opinions of the Attorney-General of the United States to be printed; regulating the salaries of the Judges of the Districts; dividing Illinois and Ohio each into two Judicial Districts; concerning the apprehension and delivery of deserters from foreign vessels in ports of the United States; providing for the accommodation of Courts in the District of Maryland, and Post Office in Baltimore; and amending the Act passed in August, 1852, making satisfaction for Military Land Warrants.

SIXTH-DAY, FEB. 9.

The SENATE spent most of the day on private bills, of which a large number were passed.

In the HOUSE, the Diplomatic and Consular Reform bill was taken up and passed, yeas 143, nays 33. A bill for the construction of seven sloops-of-war was reported. The Colt Patent Extension was then called, and after some personal conversation, it was killed by a vote of 111 against, to 68 for it.

SABBATH-DAY, FEB. 10.

In the SENATE, Gen. Wilson, the newly elected Sanator from Massachusetts, appeared, qualified and took his seat. Senator Seward gave notice of a River and Harbor Improvement bill. The Seneca Indians Bounty Land bill was amended so as to include all Indians who had served in the armies of the Union, and none others. The Anti-Know Nothing resolutions of the Wisconsin Legislature were presented. The Lake Improvement bill was taken up, but referred back to the Committee, with instructions to report specific appropriations.

The HOUSE voted $60,000 to build or purchase Revenue Cutters. The bill to extend the patent for Moore & Hascull's Harvesting Machine, was rejected. After considering several private bills, the House adjourned.

WHOLESALE MERCANTILE OPERATIONS BY A LUNATIC.—The N. Y. *Tribune* of Feb. 8 says that Mr. John P. Blauville, a French importing merchant, doing business at No. 160 Water-st., who, for the past three weeks, has been afflicted with partial derangement of mind, yesterday called at the store of Mr. Combes, in Grand-st., and stated that he wanted to purchase the goods then in the store for shipment to the West Indies. His manner and conversation were such as to excite suspicions of his being mentally deranged; and Officers Mead and Hays, of the Tenth Ward, were called in, and conveyed him before Justice Wood, who caused him to be examined by a physician, and he was soon pronounced to be insane. Inquiries were then instituted for the purpose of ascertaining whether he had pursued a similar course with other mercantile firms, when it was ascertained that he had purchased $39,440 worth of goods from Messrs. Ward & Knapp; $16,764 worth of P. L. Rogers, of Fulton-st.; $17,000 worth of J. Small & Co.; and various other bills—amounting to, in all, $112,471. Besides these, there are doubtless other firms that have sold large amounts to Mr. Blauville. At each place he represented that he wished the goods got ready for shipment on Saturday next; and in consequence of this, many of the merchants whose stocks he had bought out were up with their clerks all of Wednesday night getting the goods packed; and others, who were not aware of his lunacy, were probably similarly engaged last night. Among the articles purchased by Mr. B. are $1,200 worth of hobby-horses, all of which the fortunate seller supposed would shortly be on their way to the West Indies. The officers called upon Mrs. Blauville at her residence in Brooklyn, and she stated that her husband had been insane for three weeks, and she was making arrangements to have him sent to the Asylum.

European News.

Seven days later news from Europe was received in New York on the 9th inst., being to Jan. 27.

Almost the only intelligence of interest brought by this arrival is to be found in the proceedings of the British Parliament, in which the conduct of the war is discussed in a spirit very much the reverse of favorable to the Government. Lord John Russell has resigned, and other changes, amounting to a total break-up of the Ministry, are talked of.

From the seat of war we have nothing new. The Vienna Conference will not meet until the middle of February.

Most of the nations of Europe are placing their armies on a war footing. Opinion changes several times a day as to the prospect of an early peace. As hopes of a speedy settlement recede, fears of an extension of the area of hostilities increase; and in Paris it is a common remark that spring will see a French army marching on the Rhine.

Letters of Jan. 12th, from the Crimea, state that the Flagstaff Battery had been mined by the French, who only waited a favorable opportunity to blow it up. Sickness was on the increase in the camps.

Another dispatch, which arrived at Marseilles, Jan. 22, stated that the Allies had not undertaken anything new in the Crimea, as they were waiting until the Turkish army had all assembled at Eupatoria. No battle had been fought, as was reported. The beseiged had repaired and re-occupied the Quarantine fort. Gen. Brown was about to resume his command in the Crimea.

Gen. Menchikoff is reported to have said: "Our troops may rest; Generals January, February, and March will fight our battles far better than we can."

So extraordinary is the want of arrangement in the distribution of requisites for the British, that Lord Raglan has been compelled to borrow 10,000 great coats from Gen. Canrobert. And in great haste, the other day, two agents of the British Commissariat rode to Balaklava, and taking the first ship they could find—which chanced to be one that had lain there for a considerable time, with a cargo from England on board, there being no one authorized to receive it—they set out for Constantinople. On the way, they happened to mention to the captain of the ship that their urgent mission was to buy shoes for the troops, who were in a wretched condition for want. The captain, in reply, gave them the agreeable information that his ship had several thousand cases of shoes on board for those very troops, but that there was no "proper officer" to receive them—consequently they could not be landed!

California News.

California news to Jan. 16th was received in New York on the 8th inst, of which we give a summary.

From the mines accounts are more favorable—the long-continued drouth, from which the miners had suffered great interruption and damage, has given place to profuse rains; and the business of gold-washing has revived, with fresh activity in every part of the placers. The amount of gold on freight by this arrival reaches nearly a million and a quarter, besides the considerable sum in the hands of passengers.]

In Los Angeles there has been another instance of popular insubordination. Three men were convicted there, not long since, to be hung for murder. One, Alvitre, was a native Californian; the others, Brown and Lee, were American born. All were believed to be guilty, and the people at one time were about to hang Brown, but they were induced to desist by the assurance that he would be hung according to law. All were convicted. Brown and Lee had friends and money, and appealed to the Supreme Court. Alvitre had none. They had been sentenced to be hung on the same day, the 12th ult., and just before that day arrived an order reached Los Angeles, from the Supreme Court, that proceedings should be stayed in the cases of Brown and Lee. This act caused great exasperation among the native Californians, who have learned that an American criminal escapes punishment much more readily than a Californian. Many of the Americans were disposed to take part with them.

The great enterprise of connecting the Atlantic and Pacific shores is effected by the completion of the Panama Railroad. The first train passed from Aspinwall to Panama on the 28th of January, causing great excitement in that old Spanish city, and astonishing the natives by the sight of a fire-breathing locomotive. Hereafter, the delay, annoyance, and danger of crossing the Isthmus will in a great degree be avoided. Passengers will proceed directly from the cars to the steamer, and, with only four hours occupied by the transit, will escape the exposure to the weather and liability to disease, which have hitherto proved such formidable terrors to travelers bound for California.

From the South Pacific Coast we have news of the success of the revolutionary army in Peru under Gen. Castilla, and the total prostration of the Government party. The decisive battle was fought on the 5th of January. In the midst of the engagement two battalions of the Government forces went over to the hostile army, and soon after this desertion, Gen. Echenique, with his remaining troops, fled precipitately from the field. Several officers of high rank on both sides were killed. Echenique succeeded in reaching Lima, and at once threw himself on the protection of the British Minister, Mr. Sullivan. Gen. Castilla, with his victorious army, took possession of the city of Lima, where he was received with every demonstration of enthusiasm as the liberator of his country.

Our advices from the Sandwich Islands give several additional particulars with regard to the death of the late King, and the effect of that event on the native population. It is remarked, that the horrible orgies which were formerly celebrated on occasion of a royal demise, were entirely omitted, and no interruption was experienced of the prevailing peace and good order of the Island. The only approach to the antique rites was an assemblage of old women in the Palace yard, who gave vent to their grief by the hideous howls, which form the traditional lament for bereavement among the aborigines of the Pacific.

From Acapulco, it is reported that some 2,000 of Santa Anna's army had gone over to Alvarez.

Rights of Married Women.

The following bill has been submitted to the Assembly of New York, and referred to the appropriate Committee. It will probably become a law:—

SECTION 1. Any married woman whose husband, either from drunkenness, profligacy, or from any other cause, shall neglect or refuse to provide for her support, or for the support and education of her children; and any married woman who may be deserted by her husband, shall have the right, in her own name, to transact business and to receive and collect her own earnings, and the earnings of her own minor children, and apply the same for her own support and the support and education of such children, free from the control and interference of her husband, or of any person claiming the same, or claiming to be released from the same, by or through her husband.

SEC. 2. Any married woman whose husband shall neglect or refuse to provide for, or who shall abandon his wife and children, may bind out such minor children and execute indentures of apprenticeship, in the same manner, and to the same extent, as her husband could do.

SEC. 3. Hereafter it shall be necessary to the validity of every indenture of apprenticeship, executed by the father, that the mother of such child, if she be living with her husband, shall, in writing, consent to such identure. Nor shall any appointment of a general guardian of the person of a child by the father be valid unless the mother of such child, if she be living with her husband, shall, in writing, consent to such appointment.

"DECENTLY BURIED."—A person of inferior degree recently died in Rochester. He had a trifle over $100 in the Savings Bank. His wife decided that this should be withdrawn when he died, in order to secure to him a "decent burial." The money was taken out, and $81 92 were expended upon the "wake" and the funeral. The *Democrat* gives the following "bill of items" for the expenses of the "wake."

Mr.——

Jan. 15, 1855. To——	Dr.
To 5 gals. whisky	$1 88
4 gals. dark brandy, $3	12 00
1 gal. wine	2 00
½ lb. tea	38
5 lbs. crackers	40
10 lbs. cheese	1 25
3 lbs. tobacco	48
6 doz. pipes	24
2 lbs. sperm candles	1 50
Total	$20 63

The expenses at the cemetery, including the priest's charge of $1, were $20 25. Mass at the church, undertaker's fees, etc., reached $20 more.

An Irishman died in Albany, not long ago, who had deposited over $500 in the Savings Bank, although he lived in great apparent indigence. No sooner was he dead, than a grand "wake" and burial was decided upon, and it cost his family over $120 to get his body into the ground. The liquor drunk at the "wake" cost $42, and there was a charge for four "sympathizers," who were hired to make many lamentations for the departed—to wail and howl over his dead body. The coffin, the carriages and the masses amounted to a round sum. And so Pat was "decently buried."

A SLAVE CASE.—We learn from the *Chicago Tribune* that an interesting slave case was recently tried before Judge Delong, in Guernsey County, Ohio. Two boys, aged respectively nine and ten years, the elder belonging to a Mr. McLee, and the younger to a man named Nowdigate, of Kentucky, were, on the 15th of January, placed in charge of N. W. Graham, at Richmond, Virginia, for the purpose of being conveyed to Kentucky, by the Ohio River. Mr. Graham, however, finding the Ohio River not navigable, went with the "property" into the State of Ohio, whose laws forbid the holding or transporting of such "chattels." He took the Central Railroad cars, and would have reached his destination safely had not the train, luckily or unluckily, broke down near Cambridge, Guernsey County. During the detention the fact came to the knowledge of the County Court. A writ was issued; the boys brought into court, and after a full hearing of the matter, Judge Delong decided that the boys were free, and accordingly they were set at liberty.

DEAD HORSES.—The Turks in the Crimea have a curious way of accounting for dead horses. It is Oriental, but satisfactory. One of the men left in charge of horses at Varna came down to Scutari to render up his accounts to the Commissariat officer of the department. The first thing he did was to produce a large sack, which was borne into the apartment of the functionary by two men. "Two hundred of your horses have died," said the Turk. "Behold! what I have said is the truth;" and at the wave of his hand, the men tumbled out the contents of the sack on the floor, and lo! 400 horse ears, long and short, and of all sizes and shapes, were piled in a heap before the eyes of the astonished officer.

A dispatch dated Concord, N. H., Monday, Feb. 5, 1855, says: The Rev. John Moore, pastor of the Universalist Society of this city, and the late nominee of the Know Nothings for Governor, to which office he was ineligible, not having resided in the State a certain length of time, dropped dead in the street this morning, probably from an affection of the heart.

During the first twenty weeks of the late Canal season, the shipments of Flour from Buffalo were 185,266 bbls. by Canal, 157,336 by Central Railroad, and 46,083 by Buffalo and N. Y. City Railroad, so that one-half the aggregate was shipped by the Canal.

RELIGIOUS INTELLIGENCE.

There has been for the past week a most remarkable excitement upon the subject of religion among the female convicts of the Maryland penitenary. Under the preaching of a stranger, who visited the institution, a deep and serious feeling was aroused, and several of the females manifested very deep contrition for past offenses and an earnest desire for forgiveness. For several days and nights the struggle went on, some of them not eating any thing during that period—sounds of weeping and praying were heard throughout the day and night, and the Warden, with other friends, prayed with the sufferers and exhorted them to true repentance and faith. One by one they have come forward, expressing faith in the merits of the Saviour, until some twenty odd have made profession of the power of redeeming grace.

The Columbus (O.) *State Journal* says: A deep religious feeling exists in the Baptist Church in this city at the present time, under the preaching of Rev. Mr. Edwards, and Rev. Mr. Davis. Meetings are held every evening, which are attended by crowded audiences. Twelve persons were baptized in the Scioto river on Sunday morning last, and we hear that twelve more will be immersed next Sunday. The revival is still in progress at the Town-street Methodist Church; the altar is crowded every evening with mourners, many of whom have been hopefully converted.

At the late Conference of German Baptist Churches at Hamburg, it was stated that the church at Stolzenborg makes abstinence from smoking a condition of membership. The matter elicited a very warm discussion, but the Conference resolved as follows: That this assembly declares the use of tobacco to be one of the offenses specified by the Apostle (Rom. 13: 21) as belonging to Christian liberty. This declaration passed unanimously.

The editor of the newspaper in Athens, who so strongly opposed Dr. Jonas King, and whose articles often endangered the life of that excellent missionary, has been seized by the French, and with all his printing implements carried on board a French frigate. Dr. King is now under government protection, and his enemy is in prison.

The "Association of Scattered Protestants," a society which has long existed, having for its object the collection of funds for the aid of Protestant communities insulated among Romish populations, held a public meeting recently in Geneva—the first public meeting they have been able to hold in twelve years.

A revival is in progress at the Congregational Church in Slatersville, R. I. Additions have been made to the church by profession, at five out of the last six sacramental occasions. Indeed, there have been cases of special religious conversion occurring without scarcely an interruption for the last eight years.

SUMMARY.

The Cincinnati *Columbian* of Jan. 29, says that the Underground Railroad, for a few days, has been doing a heavy business. No fewer than seven lots of runaway slaves have arrived at this terminus within a week. The first of these lots was composed of three men; the next of three men; the third of two men; the fifth of one man. All these were from Kentucky. The sixth lot was composed of two middle-aged, stout men, who had come on foot from Louisiana to this place, sleeping by day, and walking toward the north star by night.

The N. Y. *Tribune* of Feb. 9th, says: W. W. Fream, once a man of some considerable property, and about six years ago Assistant-Alderman of the Thirteenth Ward, yesterday afternoon appeared before Justice Connelly at the Tombs, confessed himself to be a vagrant, and requested that he might be sent to the Penitentiary as such. The magistrate complied with his request, and sent him to that Institution for three months. A long course of imprudence has brought Mr. Fream to his present unfortunate situation.

The money order system comes into operation in the Canadian Post-Office Department on the 1st of February. Orders will be granted for sums not exceeding ten pounds, the charge for which will be 1s. 3d. The system is limited at present to certain Post-offices, of which a list has been published. The order will be paid only to the person whose name it bears. If he is unknown at the Post-office, he must give evidence of his being the person intended.

From a private correspondence dated Stockholm, Sweden, Dec. 15, we learn that Madame Jenny Lind Goldschmidt was in that city, attending to her property. She was unaccompanied by her husband, the laws of Sweden forbidding the presence of a Jew. The correspondent adds that Jenny had so changed in appearance, and grown so old in looks, that her oldest and most intimate friends did not recognize her.

A dispatch dated Philadelphia, Tuesday, Feb. 6, 1855, says: The freight train on the Columbia Railroad ran off the track three miles west of Schuylkill this afternoon. All the cars rolled over an embankment, broke up, and caught fire from the stoves. Their contents, consisting of flour, wheat, and domestics, were mostly consumed. Several persons employed on the train were injured.

The New York Industrial Association for the Protection of Home Industry advertise that they have opened an office at No. 463 Broadway, New York, where the workingmen of the city are earnestly invited to enter their names as signers of a Pledge to use clothing and other articles of American production only.

We learn from the Memphis *Eagle*, of Jan. 2, that the officers of the steamer John Simonda report that the steamer Eliza sunk up to her hurricane deck at Plum Point on Thursday evening. It is feared that between thirty and forty lives were lost.

Senators Douglas and Shields were recently comforted by the adoption of resolutions in the Illinois Legislature, censuring them for advocating the repeal of the Missouri Compromise Law.

The Rock River Valley Railroad is advertised for sale on the 24th of March next, at Janesville, by the trustee of the mortgage bonds—the company having failed to pay the interest thereon.

Miss Cummings, the authoress of "The Lamplighter," is spending the winter in New York city, and, we understand, is making arrangements for publishing a new book.

☞ The following general remarks were written for a different occasion, but seem appropriate to the present:—

HARD TIMES—CONSERVATIVE PROGRESS.—Our country is moving forward and increasing very rapidly in population, in the development and dissemination of science and general intelligence, in the invention and construction of labor-saving machinery, or the means of producing and accumulating wealth. The general mind of the country seems to be mainly directed to the production and accumulation of material things. This feeling is so stimulated in its action, as to become in a multitude of instances a morbid passion, or monomania. Industry economy, and thrift, are among the domestic and moral virtues. When under the guidance of intelligence, and the restraints of the moral law, they are truly useful, laudable, and honorable; but when they lose this guidance and restraint, they become the causes of great injury to the community. It is the union of these two elements—forward movement with proper guidance and restraint—that constitutes what we mean by "conservative progress."

Wealth is produced by the labor of man upon the original elements bestowed by the bounty of Providence. It has been increased and accumulated in this country more rapidly than in most others, in consequence of the great abundance of these first elements—the greater freedom of the people and their more ready access to those elements—by their greater intelligence, which brings their labor under a better guidance and direction—by the general freedom of industry and employments, and the lightness of taxation, enabling the enlightened workers to possess and enjoy the fruits of their labor. These are the great sources and main springs of progress and prosperity.

What then are the causes of derangement, stagnation, and adversity? They come from the morbid cravings for wealth becoming too strong for wholesome moral restraint, and judicious guidance. Under this influence, men invent and devise all sorts of schemes, from petit larceny to Schuylerizing, to get possession of property without rendering a proper equivalent. One of the most ready, available, and effectual of those schemes, is our erroneous, unregulated, and fluctuating debt system. We are not hostile to legitimate credit, that which frcilitates and assist rational industry, and legitimate enterprise. The prevailing system is not of this description. Those who will take the trouble to examine, will find that it is not under a rational guidance and direction; but, on the contrary, it has been the fruitful mother of erroneous, unsound, and visionary schemes—the great promoter of extravagance and excess—the diverter of industry from its natural and healthy channels. Our country suffers enormous loss by misdirected production and the extravagant and wasteful consumption; multitudes in the mean time suffering for the want of the common necessaries of life. If our industrial, commercial, and financial systems were brought rigidly under the restraints of the moral law, and under the guidance of the most enlightened arrangement, it would be nearly free from these painful vicissitudes—these demoralizing and ruinous fluctuations. It would be as regular as the tides, and as uniform as the seasons; with ebbs and floods, to be sure, but occurring from general and natural causes, which could be calculated upon with a considerable degree of certainty. The establishment of these principles and condition of business, would conduce greatly to the prosperity of the country, the welfare of the people, and the safety of our republican institutions. Material wealth would be produced more rapidly; it would be distributed, used, and consumed, in a much more rational, eqitable, and just manner. We should see much less of flaunting pride, extravagance, and excess, on the one hand—or of squalid poverty, destitution, wretchedness, and misery, on the other; but a sound, solid, wholesome, and durable prosperity. Who will not contribute his mite of influence to bring about so desirable a condition of things?

⁂

MARRIED,

At Shiloh, N. J., January 10th, by Rev. W. B. Gillett, Mr. DAVID E. GLASPEY to Miss JULIA C. WILLIAMS, both of Stoe Creek.

Near Shiloh, N. J., February 1, by Rev. W. B. Gillett, Deacon ENOCH J. DAVIS, of Shiloh, N. J., to Mrs. MARY T. DAVIS, late of Walworth, Wisconsin.

DIED,

In Shiloh, N. J., December 9th, 1854, Mrs. ANNA S. AYARS, wife of Isaac Ayars, in the 66th year of her age. Sister Ayars had been a great sufferer for many years. She had long maintained a very consistent and intelligent piety. Her love to her Saviour was unabated. In her last sickness, she seemed anxious to depart and be with Christ. Precious in the sight of the Lord is the death of his saints. Let me die the death of the righteous, and let my last end be like his. Previous to her last sickness, she selected for her funeral discourse the 23d chapter of Luke, and 28th verse—"Daughters of Jerusalem, weep not for me, but weep for yourselves and for your children."

Near Shiloh, N. J., January 22d, JOHN BOWEN, aged 65 years. He had long been a worthy member of the church at Shiloh. His sickness was protracted and painful, but he bore it with Christian meekness.

Near Shiloh, January 25th, Mrs. HARRIET AUSTIN, wife of David Austin, aged forty-eight years. She was a member from her youth of the church at Shiloh, and while lingering with the consumption, trusted with confidence in God.

Quartery Meeting of Rhode Island Churches.

THE next quarterly meeting of the Seventh-day Baptist Churches in Rhode Island and Connecticut, will be held in Rockville, R. I., commencing on Sixth-day evening, Feb. 23, 1855, at 7 o'clock, and continuing through Sabbath day and Sunday. Opening discourse by S. S. Griswold. P. L. BERRY, Com.

NEW LONDON, Feb. 1, 1855.

MAYOR'S OFFICE, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the urisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown wtth trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at tr15 and 9.20 A. M. and 3 P. M.; Somerville (way ain) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.
Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M. JOHN O. STERNS, Superintendent.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 35 cents per copy. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

Now is the Time to Subscribe

FOR the best Young People's Magazine in the Union. *Woodworth's Youth's Cabinet*, under the editorial care of FRANCIS C. WOODWORTH, alias "Uncle Frank," enters upon the tenth year of its publication with the issue of the January number. The editor and publisher have determined to celebrate this decade in the history of their magazine, by a larger expenditure upon it of money and talent, than it has yet received, so that its patrons and all others interested may count on its being even more attractive than ever.

It is the aim of *Woodworth's Youth's Cabinet* happily to blend instruction with amusement; to reform and purify the heart while it informs and elevates the mind. Hence, the moral and religious press have so generally accorded to it the merit of being "the best thing of its kind in the Union." It is emphatically the *Young People's Magazine*, and filled with just the kind of reading to please and profit those between the ages of eight and sixteen. Its illustrations are numerous and of the highest order.

Each number contains 48 duodecimo pages, and the yearly volume nearly 600 pages, with 100 engravings.

The January Number

is the most perfect specimen of the kind ever issued in this country, it being designed as a *holiday number*. It contains a great variety of amusing and instructive articles, illustrated by over 30 engravings, among which is a tinted portrait of one of the "Cabinet" makers, strikingly accurate and beautifully executed, forming the frontispiece of the volume. Who the original is, we leave for our friends to guess. It is a perfect gem of art, and is furnished at an expense of upwards of $200.

Single copies of the January (or holiday) number, 12½ cents, or four postage stamps. Do not fail to send for it, and examine it.

The subscription of *Woodworth's Youth's Cabinet*, notwithstanding the great and expensive improvements which have been made in it, remains the same—*one dollar a year.*

Great Inducements for Clubbing.

4 copies one year, 87½ cents each	$3 50
6 copies one year, 83⅓ cents each	5 00
8 copies one year, 75 cents each	6 00

For a Club of six or more, an extra copy will be sent to the person who forms the Club. All subscriptions must commence with the beginning of the volume.

Form your Clubs for the New Volume in season. A specimen of the January number will be sent to any person desiring it for this purpose.

To Postmasters.—Postmasters are authorized to obtain subscribers, and are allowed 25 per cent. on all new subscriptions, when the full price (one dollar) is paid, or a copy of the work when they forward subscriptions at the club prices.

The postage on *Woodworth's Youth's Cabinet*, when paid in advance at the subscriber's post-office, is only *six cents a year.*

☞ Send on your list of names for the new volume, with the money, addressed to

D. A. WOODWORTH, Publisher,
118 Nassau-st., New York.

Miscellaneous.

Japanese Houses.

From the very interesting letters of our former fellow-citizen, S. Wells Williams, (says the Utica *Morning Herald*,) we have to-day the pleasure of publishing a description of the dwelling-houses of Simoda:—

The houses in Simoda are built merely of pine boards, or of plaster thickly spread over a wattled wall of laths, the interstices of which are filled in with mud. In some cases these modes of construction are combined—the front and rear being of boards or sliding pannels, and the sides of mud. When thoroughly dried, the mud is whitewashed, and the plain surface worked into round ridges, three inches high, crossing each other diagonally from the roof to the ground; the ridges are then washed blue, and give the exterior a checker-board look, which, though singular, is more lively than a blue mud wall. The plaster is excellent, and these walls appear very solid and rather pretty when new—at a distance one would even think them to be stone; but after a few years, the ridges loosen, the rain insinuates itself beneath the outer coating, and the whole begins to scale and crack off, disclosing the mud and rushes, and then the tenement soon falls to pieces. Still, the progress of decay is not so rapid as one would think, if they judged only by the nature of the materials, and the walls are well protected by the projecting eaves. No bricks are used in building, nor are square tiles for floors seen; and the manner of making walls common in southern China by beating sanded clay into wooden molds is unknown.

Some of the best houses and temples have stone foundations, a few only of which are made of dressed stone. Half a dozen or more stone houses occur, faced entirely with slabs of stone, and standing detached from other buildings, and are doubtless fire-proof buildings. There are no cellars under the houses; the floors are raised on sleepers only two feet above the beaten ground, and uniformly covered with straw mats stuffed with chaff or grass an inch thick. The frames are of pine, the joists four or five inches square, and held together by the flooring of the attic, as well as the plates and ridge pole. The houses and shops join each other on the sides, with few exceptions, leaving the front and rear open. There is no uniformity in the width of the lots, the fronts of some shops extending twenty, thirty, or more feet along the streets, while intermediate ones are mere stalls, not over ten feet wide.

The shops succeed each other without any regular order as to their contents, those of the same sort not being arranged together, as is often the case in China. The finer wares are kept in drawers, so that unless one is acquainted with the place, he cannot easily find the goods he seeks. The eaves of the houses project about four feet from the front, and are not over eight feet from the ground; the porch thus made furnishes a covered place for arranging crockery, fruits, &c., for sale, trays of trinkets on a movable stall, baskets of grain, or other coarse articles, to attract buyers. The entrance is on one side, and the path leads directly through to the rear. The wooden shutters of shops are all removed in the day-time, and the paper windows closed, or thrust aside, according to the weather; on a pleasant day the doors are open, and in lieu of the windows, a screen is hung midway, so as to conceal the shopman and his customer from observation, while those goods placed on the stand are still under his eye. A case with latticed or wire doors, to contain the fine articles of earthenware, a framework with hooks, and shelves to suspend iron utensils or wooden ware, or a movable case of drawers, to hold silks, fine lacquered ware, for similar goods, constitute nearly all the furniture of the shops. Apothecaries' shops are hung with gilded signs and paper placards, setting forth the variety and virtues of their medicines, some of which are described as brought from Europe. The partition which separates the shop from the dwelling is sometimes closed, but more usually open; and a customer has, generally speaking, as much to do with the mistress as the master of the establishment. When he enters, his straw sandals are always left on the ground as he steps on the mats and squats down to look at the goods, which are then spread out on the floor. A foreigner has need of some thoughtfulness, in this particular, as it is an annoyance to a Japanese to have his mats soiled by dirty feet, or broken through by coarse shoes.

The rear of the building is appropriated to the family; here the domestic operations are all carried on; here the family take their meals in the day; here, on the same mats, do they sleep at night; receiving visitors, and dressing the children is also done here, and sometimes the cooking too. Usually this latter household task is performed is the porch in rear, or in an outhouse, so that the inmates are not so much annoyed with smoke as they are in Hakodadi. No arrangements for warming the dwelling are to be found, except that of hand-braziers placed in the middle of the room with lighted charcoal, around which the family gather. In most of the houses there is a garret, reached by a ladder—a dark and small apartment, where some goods can be stored or servants can be lodged. There is not a house in the town whose occupants have arranged this attic with windows and stairways to make it a pleasant room; a few such were, however, seen near the capital, at Kanagawa, and in its vicinity.

The roofs of all the best buildings are hipped, and covered with bluish tiling, each tile being about eight inches square, shaped somewhat like a wedge; the thick side is so made, that when laid on the rafters, it laps sideways over the thin edge of the adjoining tile in the next row, and thus forms gutters somewhat like the Chinese roofs. They are washed in alternate rows of white and blue, which, with the checkered walls, imparts a lively aspect, and contrasts pleasantly with the more numerous dingy, thatched roofs. The thatched roofs are made of a species of Arundo, grown and prepared for this purpose, and answering admirably as a cheap and light covering to the wooden tenements occupied by most of the people. It is matted into a compact mass eighteen inches thick, as it is laid on, and then the surface and the sides are neatly sheared. The ridge pole is protected by laying the thatch over a row of hoops that inclose it enough to overlap the edges on both slopes, and prevent the rain finding entrance. One cannot feel surprise at the ravages fires make in Japanese towns, where the least wind must blow the flame upon such straw coverings, which, like a tinder box, would ignite at the first spark. Wires are stretched along the ridge of some of the tiled roofs in Simoda, to prevent birds from resting on the houses.

In the rear yards attached to a large number of the dwellings, are outhouses, and sometimes, as in the lodging-houses, additional sleeping-rooms. Kitchen gardens are not unfrequently seen, and more rarely fancy fish ponds, dwarfed trees, and even stone carvings. A family shrine, made like a miniature house, containing images of penates and lares, is met with in most of the yards. Only a few of them are adorned with large trees, and still fewer of them exhibit marks of care or taste, presenting in this respect an observable contrast to the neatness of the houses. High hedges or stone walls seperate these yards when they are sontiguous, but the depth of the lots is usually insufficient to allow room for both the opposite dwellings the luxury of a garden.

There is not much variety in the structure of the various buildings in Simoda, and their general appearance denotes little enterprise or wealth. The paper windows and doors, not a few of them dirty and covered with writing, or torn by children to take a peep inside, impart a monotonous aspect to the streets. Dyers', carpenter's, blacksmiths' and stonecutters', and some other shops, have latticed fronts, to admit more light, which are elevated above the observation of persons passing by. In front of those dwellings occupied by officials, a white cotton curtain three feet wide is stretched along the whole length of the porch, having the coat of arms of the occupant painted on it in black; the names of the principal lodgers are also stuck on the door posts. Signs are mostly written on the doors, as the windows are drawn aside during the day, but only a portion of the shops have any; lodging-houses, barbers' shops, restaurants or tea-houses, apothecaries, and a few others, are almost always indicated by signs. One dealer in crockery and lacquered ware, has the sign of a celebreted medicine placed on a high pole, and the more to attract attention, has written the name in foreign letters. As in China, placards for medicine were the most conspicuous of all, but none are pasted upon blank walls; all are suspended in the shops. However, no dwelling or shop is left unprotected from the ill usage of malignant spirits, every one having a written or printed charm or picture (sometimes a score or more) over the door to defend the inmates from evil."

The Effects of Saleratus.

To the Editor of the N. Y. Tribune:

SIR: In a former number of this paper, I alluded to the use of saleratus in modern cookery. I have not hesitated to pronounce it an efficient agent in the production of that most alarming infantile mortality which prevails. Your readers know, perhaps, that we lose about 300,000 inhabitants of the United States every year, under ten years of age—and some of them know, if they have read all that has been written on the subject within a few years, that not a few of these children might have survived had it not been for the effects of saleratus.

Some individuals have doubted the truth of my suggestions. They have seriously questioned whether saleratus is really poisonous. Such individuals may be interested in the following statements and facts:

I had been lecturing in North Adams, Mass., on Diet and Regimen. At the close of the lecture the Rev. Robert Crawford came to me and inquired whether I was not fond of collecting facts, and when I replied in the affirmative, he gave me a particular account of an incident in Williamstown, which is only four miles from that place.

In the year 1835 an indigent female, who was desirous of trying to earn an honest livelihood for herself and her family by keeping boarders, rented a house in Williamstown, and took about fifteen boarders. They were chiefly, if not wholly, young men who were attending the college at that place.

The housekeeper was ignorant of the fashionable modes of cookery, though she knew that rich food was generally preferred. She had heard of saleratus, and that by many cooks it was freely used. Accordingly, she procured a quantity and freely used it. The warm biscuits were so full of it as not only to give them a yellow or burnt appearance, but also to render them bitter and nauseous to the taste. Many other articles were filled with it in like manner. In endeavoring to make light puddings, however, she used so much of the article, it is said, as to render them as heavy almost as lead. The students called these puddings by the name of '*specific gravity*'—so that whenever they wished for a slice, they would ask to be helped to some of the 'specific gravity.'

After the lapse of a few months a disease broke out among the students—so severe that many believed it to be contagious. Of the whole number, thirteen were confined for a long time, and the fourteenth was slightly affected for a few days. The house became known by the name of the pest-house. Two of the patients died—another barely escaped death—and eleven finally recovered.

The individual who escaped the disease wholly was Prof. Tatlock, now of the Williamstown College. The one who was only slightly affected was the Rev. Mr. Crawford, my informant. The latter had no doubt—never had any—that the disease was caused solely by the saleratus. I saw Prof. Tatlock subsequently, who confirmed the statement of Mr. Crawford. It appears that he, like Mr. Crawford, ate very little of the food which was so filled with saleratus, and the biscuits they seldom ever tasted.

I also saw and conversed freely with Dr. Sabin, one of the two principal physicians who attended at the 'pest-house' during the sickness aforesaid, and who is still a practicing physician in Williamstown. He told me that, to the present day, neither he nor his associate, Dr. Smith, had ever entertained a momentary doubt that the whole trouble was caused by saleratus.

The nature of the disease was somewhat peculiar—but in every particular gave indication that the citadel of life had been attacked by no mean or powerless enemy. The bowels lost their tone, and there was great muscular prostration. Blisters applied to any part of the system were sure to be followed by almost immediate mortification of the part. In short, the disease was one of the most severe ever known in that region.

But, if the more excessive use of this irritating substance is liable to produce such terrible effects, can the less excessive use of it, which almost everywhere prevails, be entirely innocuous?

Many tell us they do not use it to excess, though they are well aware that many others do so. But so it is with almost every abuse. I have seldom, if ever, met with a person who would confess to the error of tight-lacing—though I have met with thousands who knew that such an abuse prevailed all around them.

I was recently taken to task by a venerable house-keeper of this Commonwealth, for saying that the use of ten or twelve pounds of saleratus in a family was by no means uncommon. 'Why,' said she, 'I do not use so much as this in my great family.' 'How large is your family, Madam?' I inquired. 'It consists of ten persons.' 'And how much saleratus do you use yearly?' 'A pound will last me three weeks.' 'Well, Madam, that is between seventeen and eighteen pounds a year.' She was surprised, and said that she did not use so much; a pound, she said, would last her nearly four weeks. But this, to her surprise, was thirteen pounds a year.

There can be no doubt that the sub-inflammation of the alimentary canal, which the habitual use of this alkali induces, both on children and adults, is one cause of that dread mortality which prevails among the former—but which, in summer and autumn, when other causes co-operate, proves peculiarly alarming. For my own part, I can hardly resist the full conviction, that, of the 300,000 above mentioned, who die prematurely, at least 100,000 might survive, but for the effects of saleratus.

WM. A. ALCOTT, M. D.

AUBURN DALE, MASS., Dec. 29, 1854.

The Covenanter Church Case.

From the Pittsburgh Commercial Journal, Jan. 26.

The interesting case arising out of the division that took place nearly 20 years ago in the Reformed Presbyterian Church, generally known as Covenanters, which has been on trial in the District Court of Allegheny County, before Judge Williams and a Jury, resulted yesterday in a verdict and judgment in favor of the defendants. The suit was brought by the Trustees of the Pittsburgh and Allegheny Congregation of Covenanters against the Trustees of the Pittsburgh Congregation of Covenanters, to recover the lot and meeting-house, in Pittsburgh, known as Dr. Black's Church. The Pittsburgh congregation was founded about the year 1800, with the Rev. John Black as pastor, who continued in that station 49 years and until his death.

The Pittsburgh and Allegheny Congregation was founded in September, 1835, with the Rev. Mr. Sproul as its pastor, the members consisting chiefly of persons who, until the division that took place at the organization of the general Synod in August, 1833, had been members of the Pittsburgh Congregation. This suit was brought in 1852, against the Pittsburgh Congregation, on the ground that Doctor Black, and those who remained in his congregation, comprising two-thirds or more of the body, in connection with Dr. McLeod, of New York, Dr. Wylie, of Philadelphia, and other ministers and congregations of the Covenanter Church, had departed from the true faith and doctrines in respect to the relations of the Church with the Government of the United States and the several States, in the following respects, viz:

1. That church members were permitted to vote at elections.
2. That they were permitted to sit upon juries in Courts of law.
3. That they were allowed to take the oaths of allegiance and naturalization.
4. That they were allowed to hold civil offices under the Government, and take oaths to support the Constitution of the United States, and the several States.

The plaintiffs claimed that these acts were contrary to the faith and doctrines of the Covenant Church, and therefore, that the Pittsburgh congregation and its pastor had departed from the true faith, and forfeited their right to the Church property. Several distinguished divines of the Covenanter Church, among whom were Dr. John Neal McLeod, of New York, and Dr. Wilson, of Cincinnati, were in attendance, and examined as witnesses upon the trial.

The defendants claimed, 1st, That the principles of the Covenant Church were not hostile to the Constitution of the United States, nor to the Constitution of the State of Pennsylvania, and that membership in that Church was not inconsistent with allegiance to the Governments and performance of civil rights or duties of electors, jurors, public officers or naturalized citizens; 2d, That even if there had been a departure from the former doctrine of the Church, the plaintiffs thereby acquired no right to the property of the Pittsburgh Congregation. The case, which was conducted by Messrs. Jones, Black and Williams, for the plaintiffs, and by Mr. Marshall and Mr. Stanton, for the defendants, was decided upon the second point in favor of the defendants. The court instructed the Jury that the plaintiffs had shown no right in themselves to the property in dispute; that this being conclusive of the action, it was unnecessary to consider the question of faith and doctrine, and that their verdict should be in favor of the defendants. Upon this instruction, the verdict was immediately rendered by the Jury, without leaving the box.

Practical Application of the Electric Light.

The London *Times* says that Dr. Watson, of the Electric Power Light and Color Company, has entered into arrangements with the Government authorities for applying this novel agency in aid of the operations now in progress for the erection of the new bridge at Westminster. The advancement of the works being contingent on the state of the tide, they have consequently often to be prosecuted after dark; and hence the importance of pressing any improved lighting appliance afforded by scientific discovery into the service of such an enterprise. The experiment was tried, for the first time, last night at 6 1-2 o'clock, at the Surrey-side abutment of the bridge. The lighting apparatus used, which was computed to possess illuminating power equal to that of 72 Argand burners, or of nearly 1,000 wax candles, was stationed on the river's brink, so as to throw its rays upon a working stage, fixed some 200 feet or upward out into the stream, and upon which, it being low tide at the time, a body of workmen, 45 in number, were engaged in pile driving by means of eight ponderous "monkey" hammers. Chappuis's reflector was used on the occasion; and the electric battery for supplying the necessary power, and which was fitted with six dozen cells, was posted on the Middlesex shore, or at a distance of 2,000 feet. The experiment, we are glad to state, proved eminently successful in accomplishing its object. The light diffused over the working stage was of an intense and yet agreeable brilliancy, far exceeding the lustre of the brightest moonlight; but resembling the moon's mild and cheerful radiance. The workmen seemed to be greatly facilitated in their various occupations by its aid; and, we should think that after once tasting the advantage of so superior an illuminating agent, they would be very loth to have to revert to the "darkness visible" as well as the noxious fumes of the ordinary duck lamps, filled with naptha, to which they have heretofore been accustomed.

Fortune Telling.

Wm. C. Gower, a Sergeant of Police, in an affidavit sworn to before the Mayor of New York, gives a curious account of an interview which he had with a certain Madame Henry, No. 263 Broadway. He says that he told her that, understanding she told fortunes, he had come to consult her in relation to a valuable watch which had been stolen from him, and wished to learn if his suspicions in relation to its whereabouts were well-founded. She answered, that she could not tell who the person was that stole it, but that she could tell the color of that person's hair, and whether he would get his watch again. Her charges were from $1 to $5, but she would allow him three wishes for fifty cents. He agreed to take the wishes. She then went to a closet and took out a book with a massive iron key confined in it by a piece of red tape. She directed him to stand up and hold one side of the key with his right forefinger, and to wish aloud, and she said if the book turned around he would get his wish. The book was held between them according to directions; the sergeant wished for his watch, and Madame laid her hand on her breast, rolled up her eyes and exclaimed, "Almighty God, do tell whether that young man who stands before me will again get his watch." She then muttered over something to herself, and the book moved slightly, which Madame said was an indication of hope. Then she told him, when he went home, to take a piece of paper and put into it a pinch of salt, a small piece of bread, and a little lard, to fold it up, and in the evening, when alone, to throw it into the fire, saying: "This far thief who stole my watch, may he have pains in his heart, in his liver, and in his lungs, until he brings back my watch." The thief could then have no rest, she said, until he brought back the watch. The Sergeant received very flattering answers to the second and third wishes. He paid her the fifty cents, and she then gave him her card, saying that when his watch came back he must come and give her a present. The ungrateful Sergeant, however, complains of Madame as a disorderly person; alleges that she swindled him out of four shillings, and prays that she may be arrested, which is to be done. [Tribune.

Introduction of Plants into England.

Pine apples were first grown by Rose, gardener to Charles II. Sir Walter Raleigh introduced the potato. Sir Anthony Ashley, the ancestor of Lord Shaftesbury, first planted cabbages in this country, and a cabbage appears at his feet on his monument. Sir Richard Weston brought over clover grass from Flanders in 1645. Figs were planted in Henry VIII.'s reign, at Lambeth, by Cardinal Pole; and it is said the identical trees are yet remaining. Spelman, who erected the first paper-mill at Dartsford in 1590, brought over the first two lime-trees, which he planted at Dartford, and which are still growing there. Thomas Lord Cromwell enriched the gardens of England with three different kinds of plums. It was Evelyn, whose patriotism was not exceeded by his learning, who largely propagated the noble oak in this country; so much so, that the trees which he planted have supplied the navy of Great Britain with its chief proportion of that timber. Cherries were first planted in Kent by the Knights Templars, who brought them from the East; and the first mulberry trees were also planted in Kent by the Knights of St. John of Jerusalem. Aubrey says Sir Richard Weston brought the first clover grass, about 1645, out of Brabant or Flanders. The introduction of turnips, and also of sainfoin, is also attributed to him, and his memory is still revered by every inhabitant of Surrey acquainted with his deeds. He died in 1652.

Death from Old Age.

From the Nashville Medical Journal.

The following account of death from old age, by the distinguished divine, Dr. A. L. P. Green, of Nashville, will be read with great interest by every student of nature:—

I promised you that I would furnish you with some of the facts connected with the last days of Aunt Phillis, an old negro woman of mine, who died last fall. Aunt Phillis was at the time of her death, at the lowest estimate, 111 years old, and the probability is that she was several years older. For 50 years she has enjoyed uninterrupted health, and, as far as I have been able to learn, she was never sick in her life, except at the birth of her children. For thirty years of her life, and down to within three years of her death, she did not seem to undergo the slightest change in her appearance—time exercising but little power over her. The first sign of decay was that of sight, which took place about three years before her death; up to that time she was in the full enjoyment of all her senses; and at 104 years would have married an old negro man of 75, if I had not objected. Her sight failed not in the usual way, but she became near-sighted, not being able to see objects at a distance. Soon after this her hearing declined, but up to the time of her death she could hear better than old persons generally do. The first indication of mental failure was that of locality, she not being able to find her way to a neighbor's house; yet her memory seemed perfect in all other respects. She recollected her friends and old acquaintances, but could not find her way to their houses. I at first supposed that this was owing to defective sight, but on examination found it was in her mind. Still her locomotion was good; she had the full use of herself, and could walk strong and quick like a young person, and held herself up so straight that, when walking from me, I often took her for some of the younger servants about the premises. The next, and to me the most singular sign of decline was, that she lost the art of walking—not that she had not strength enough to walk, but forgot how to walk. The children would lead her forth and interest her for a while, and she would get the idea, which seemed to delight her very much, and she would walk about the yard and porches until some person would tell her she had walked enough—but she would no sooner take her seat, and sit for a few moments, before all idea of walking would be gone, and she would have to be taught over again. At length she became unwilling to try to walk unless she had hold something; take her by the arm and she would walk, and walk well, but just as soon as you would let her go, she would stop, and if no further aid was afforded her, she would get down and crawl like a child; and at length became so fearful that she refused to walk altogether, and continued to sit up during the day, but had to be put to bed and taken up like a child. After a while she became unwilling to get up altogether, and continued to lie until she died. All this time she seemed to be in good health, took her regular meals, and her stomach and bowels were uniformly in good condition. I often examined her the best I could, and she had no pains, no sickness, no aches of any kind, and from her own account, and from all that I was able to learn, she was in good health and all the while in fine spirits. The intellect and the mind seemed to be perfectly good, only that she did not seem to know where she was all the time.

At length one of the children said to me that Aunt Phillis was getting cold, and on examining her I found it even so; the extremities were cold—still she took her regular meals, and did not complain of anything; and the only change that I recollect of was that she slept a little more than usual. The coldness increased for two days, when she became as cold almost as a dead person. Her breathing began at length to shorten, and grew shorter and shorter till she ceased to breathe. Death closed in upon her like going into a soft, sweet sleep, and for two minutes it was difficult to tell whether she was breathing or not. There was no contortion, no struggle, no twisting of the muscles, but after death she might have still been taken, on a slight examination, to have been in a deep sleep. So passed away Phillis—the only natural death I ever witnessed.

A VERMONTER'S OPINION OF THE PRESENT CONGRESS.—The *Montpelier Green Mountain Freeman*, in its Washington correspondence, has the following:—

I have visited the House of Representatives several times while Congress was in session. I had expected to find a dignified body in the House of Representatives, but was disappointed. And I am bound to say, that I have seen more dignity and comparatively more real ability in the Legislature, at Montpelier, than can be found in the present House. While I was present, a member from some obscure district in Alabama was attempting to address the House, but with very indifferent success. Two or three members appeared to be listening to his remarks, but the greater portion were busy walking about, talking and laughing, some were lolling listlessly in their seats reading, and some were apparently sleeping. It is a notorious fact here, that there are not even a half dozen members who can secure the undivided attention of the House for the short period of sixty consecutive seconds. During my whole stay, I was unable to ascertain what the legitimate business before the House really was; it was to me, "confusion worse confounded."

The Senate came nearer to my notion of what a deliberate assembly should be. Unlike the House, business is transacted in the Senate without noise and uproar. To each member alike is respectful attention paid while speaking, and "order reigns supreme over all."

AN OLD SETTLER.—*The Cleveland Herald* contains a notice of a locomotive engine, now at the machine shop of the C. and P. Railroad for the purpose of undergoing some repairs, which is worth preserving. The engine is named the McNeill, and is said to be the pioneer locomotive in the United States. It was originally imported from Liverpool, England, by Messrs. Rogers, Ketchum & Grosvenor, celebrated as locomotive manufacturers at Paterson, N. J., at a cost of upward of $6,000, and was originally used by them *as a pattern*, and although vastly behind the splendid locomotives at the present day, was then regarded as the *ne plus ultra*, both in style and strength. After being used as a pattern for some time, the McNeill commenced running on the Paterson and Hudson River Railroad, between Jersey City and Paterson, in the year 1828. For years she was considered quite a wonder. She was recently purchased of the New York and Erie Railroad, by Messrs. Atkinson & Stidger, of Carrollton, O., for five hundred and fifty dollars, and is to be used on the "Carroll Branch R. R." a short road of ten and a half miles between Carrollton and Oneida. As she commenced running on the shores of the Atlantic, and is still in good preservation, it would not require a great stretch of the imagination to believe that the snort of her whistle might yet be heard on the shores of the Pacific.

UNQUENCHABLE FIRE.—Four years ago, (says a Pottsville paper) what is now called the old breaker, at Thomas & Beatty's mine, caught fire from an explosion. The fire was communicated to the "dirt heaps" around, where it has been secretly burning ever since. It made its appearance again, about five weeks ago, in the immediate vicinity of the new breaker, and men were and are still employed in removing the dirt heaps there—that being the only method practicable to insure safety. A stranger might pass it in the day-time, and not notice it, as there is but little smoke, and the daylight drowns every other appearance of the fire. It is only at night that the danger presents itself in its reality—showing itself to the beholder in an enormous mass of fire, partly hidden by a thin coating at the top, not yet consumed, and decorated with a number of pretty blue lights, proceeding from as many bright spots of burning anthracite coal.

A very excellent improvement has been made in looms for weaving seamless bags, by George Copeland, of Lewiston, Me., who has taken measures to secure the same by patent. This invention does not change the general character of the loom from those commonly employed for weaving plain or twilled fabrics, but consists chiefly in certain modes of constructing, arranging, and operating some of the parts which require to be duplicated.

The recent report of the United Brethren states that they have at present 69 missions in 13 different countries; in which are employed 397 missionaries, male and female, and 212 brother converts. Their last station was formed in 1853, among the Chinese in Mongolia. A large number of these stations defray their own expenses, and for the rest only $9,000 per annum are required.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7 00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not untrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

THE LAST WISH.

"Crown me with flowers--intoxicate me with perfumes--let me die to the sound of delicious music," said Mirabeau on his death bed. Not a word of God, or of his own soul.

Crown me with brilliant flowers;
Let their fair forms, their richly glowing bloom,
Shed a bright rainbow radiance through the room,
O'er life's last fleeting hours.

Bring from the shadowy dell,
Where summer winds are wandering cool and free,
The snow drop pure, and pale anemone,
And foxglove's purple bell.

Go to the meadows free,
Where, on the bosom of the gliding stream,
In the clear light the water-lilies gleam,
And bear them thence for me.

O! haste, and for me twine
Fresh crimson roses gemmed with pearly dew,
The pure fair lily, and the violet blue,
And clustering eglantine.

And bring ye rich perfume;
Pour fragrant odors on the balmy air—
Let my last hours be charmed by all things fair—
I'll rob e'en death of gloom.

Bring me the lute and lyre;
Let music, with its full voluptuous swell,
Throw o'er my senses a bewildering spell,
And let me thus expire.

Would'st thou thus pass away,
Without one heavenward look, one thought of God?
O! was it thus the holy Saviour trod
The dark and fearful way?

Was His head crowned with flowers?
Did the soft swelling tones of music sound?
Was the rich breath of incense poured around,
Through his last gloomy hours?

When on life's farthest shore
My weary feet shall stand, and vague and dim
Rolls death's dark stream, let me look up to Him
Who passed that flood before.

Let bright and fragrant flowers
Be showered around me, and let music's flow
Float on my ear all solemnly and low,
To charm the weary hours.

But let not this be all;
Let deep devotion fill the brooding air,
And faith, and hope, and holy love, be there,
Free from sin's blighting thrall.

So can I calmly die;
So can I tread with fearless step death's wave,
Leaning on Him who rose from the dark grave
To reign with God on high.

SARAH.

Shiloh, N. J., 1855.

A VILLAGE PARISH.

No subject, except perhaps the slave question, has been handled more frequently of late than that of parish life, especially in respect to its trials; and at least a half-dozen books have been sent out within two or three years, claiming as much sympathy for the clerical martyr and his consort, as is claimed for Uncle Tom and Aunt Chloe. These books probably do good, and will accomplish much towards correcting the faults and mistakes of that ruling ecclesiastical polity in this country, the individual church and its people. The little sketch that I shall try to pencil in these few lines, does not ask for a place in the public portfolio, but will answer its purposes if it meets the eyes of friends not indifferent, and is then forgotten.

I remember well, shortly after returning from the West, at the close of my wandering years, receiving a visit from a most excellent friend, Henry W——, who was unable, from illness, to fulfill an engagement in the town of N——, New Hampshire, and asking me to take his place for a Sunday. He, poor fellow, never, I believe, stood in the pulpit again, and the parish that would otherwise probably have been his, became mine for five years. It was on Saturday, in the middle of June, 1837, that I first visited N——, and taking the cars to Lowell, glided up the Merrimac in a wheezy little steamboat, that was soon to be displaced by a railway. It was easy to see, on Sunday morning, that the people who gathered together in that little Grecian temple, under the trees of the rural cemetery, were indeed a parish, and not merely a chance assembly of individuals. There sat the venerable Squire, and his portly sagacious lady, with interest evidently almost parental, in the welfare of the church. There was the young squire, not son but partner, and likely, it seemed, to be son-in-law to the former. There appeared the keen, sensible face of the Member of Congress, the leading politician of the neighborhood, and ere long to wear a Senator's laurels. There too was the worthy Superintendent of the Sunday-school, with kindness and reverence overflowing his face and eyes, to say nothing of his excellent wife, who, with himself, managed to do an amount of good in the course of the year quite sufficient to do honor to a parsonage. There was the bookseller, with his temper so sanguine, whether for a new publication, or a new political move; and there was the editor, with all the cares of the village paper upon his thoughtful and somewhat anxious face. There was the postmaster, with his military honors; and there the cashier of the bank, with his mild yet scrutinizing look. Other characters, equally marked, and afterwards to be very important personages in our pastoral round, were in their places, and not least among them appeared a goodly portion of youth and children, the future hope of the flock. There was an air of self-respect, mutual kindness, and Christian reverence about the congregation, that was quite impressive. The singing was hearty, and in good taste, under the direction of a tall chorister, who evidently magnified his office, and fulfilled its duties with a right good-will that extended itself to the other members of the choir.

Nothing human is perfect, and of course our parish had its faults, faults that were the theme of much perplexing thought and vehement exhortation, on the part of the pastor. Yet, as the world goes, they were a kindly and earnest congregation, not negligent of worship, not slow in good works. Surely, so far as their conduct to their pastor was concerned, all that he can say is, that their forbearance and good-will were wholly beyond his claims or deserts. With great individual independence, and exemption from merely ritual or dogmatic rigidity, we enjoyed a very genial and hearty church-life together, and social affections seemed to flourish quite in proportion to the growing love for the sanctuary and its services. The great point was to interest the young people, and they answered encouragingly to every appeal. Among them, one great truth was exemplified which is made of little account in our scholastic training, the truth that the power of religion in a church depends as much upon the receptive and devotional element in the people, as in the intellectual or active element. A company of docile children, or impressible young people, or a few really devout men and women in a parish, have an effect over the pastor and the whole sphere of church life, which cannot be estimated in language. The Divine Word, like the luminary to which it corresponds, has its virtue drawn out by the lowly plant, more than by the flinty rock, and the gifts of God in nature are constantly illustrating the Gospel doctrine, that divine grace is given in the measure of human need and yearning.

In looking to my first parish, I must own that I feel a profound gratitude, especially towards those waiting, lowly minds, who blessed the pastor more than any courtly patronage could do, simply by allowing him to serve them, and by expecting of him that direct usefulness, which is a minister's highest duty and richest blessing. In some cases, the sick and the dying evidently exercised, directly or indirectly, a commanding influence upon the whole congregation, even as some herb, almost too lowly to meet the eye, will gather from the sun, and earth, and air, a healing and diffusive grace that is not to be found in the rose's beauty or the oak's strength.

Many a baptism and communion in that embowered church, comforted the worshipers by the assurance of new zeal and sympathy among the people. A very genial, social life prevailed; and the quite frugal and republican manners of the community, combined with the good example of the chief citizens to keep up a style of visiting and entertaining, quite in contrast with the usual petty ostentation and exclusiveness of small places. It was a cheering time when the parish came in a body to visit the minister. He lived in priestly desolation, a bachelor; yet his lot was not desperate. A kind neighbor lent him for the occasion a large house adjacent to his lodgings, and the young people of the parish made it a bower of flowers from the produce of their gardens, whilst the notable house-keepers loaded the tables with all manner of good cheer for young and old. The evening was auspicious; the whole congregation came with their most cheerful look, and the occasion, in its social cordiality and Christian tone, was one that Fenelon himself would have thought worthy of his smile and benediction. Not a few guests came from neighboring parishes in town, and this was one of the least indications of the good feeling that prevailed between the various congregations and their pastors. I have never seen a more neighborly state of society than that which prevailed in our village, alike among pastors and people, during those years. We freely co-operated together in all matters of public spirit, especially education; and one of the most welcome reminiscences of parish life in the country, is connected with the teachers and scholars of the schools, all of whom I knew quite well, from those in the brick temple of learning in the center of the town, to those in the wooden ten-footer in the outskirts. ["Mile-Stones," by Dr. Osgood.

THE SPREAD OF THE LEAVEN.

A few years ago, a mere handful of men went out hence, under the commission of the Prince of Peace, to Turkey. Most strangely has their power been felt there. They have been the leading occasion, as it would seem, of arousing, at this crisis, the jealousy of the Czar, and making him conclude that he must seize upon his prey now or never. So much has at least been testified of them in the British Parliament, by one who well knows the nations of the East, having there dug out for himself an imperishable fame from the ruins of Nineveh and Babylon. Those missionaries commenced that motion of the elements which has hastened the present crisis. They have secured civil and religious liberty for Protestants in Turkey, and have filled the empire with the leaven of their doctrine. It is but some half dozen years since their congregations began visibly to multiply, and now they number a hundred. In the midst of a most fearful war, their success is even greater than ever. Mohammedanism has now formally surrendered its claim and power to persecute, and placed the Christian sects on an equality of rights with itself; and so has virtually abdicated its own existence.

But the most astonishing instance is that now in progress in China. Since Christianity was born, the like of this has not transpired. "Who hath seen such a thing? Who hath heard such a thing? Shall a nation be born in a day? Before Zion travailed, she brought forth her children." The Gospel was most completely fenced out of China. A few missionaries, after great difficulty and a world of discouragements, had made a small beginning; when, all at once, the fountains of the great deep are broken up. It was on this wise. A seeming chance brings a young man under instruction, and to the reading of a Christian book. The good seed strikes its roots in his heart. He spreads the doctrine among his friends. They are persecuted, and they resist. Their adherents multiply, and their resistance prevails. The insurrection becomes a sweeping revolution, and the imperial power melts before it like wax. Idolatry is put down, and the Ten Commandments of Jehovah are made the basis of legislation. The resources of the state are employed to publish the word of God; and now, no less than four hundred men are employed, by this new government, in printing Bibles for distribution.

These illustrations seem to show, what, under the hand of God, a small remnant of Christians may do, and of what value they are as the salt of the earth and the light of the world. We look around us, and see how disproportionate is the Church to the world in its visible materials of influence. Sometimes we hardly blame the despisers of religion for saying, "What do these feeble Jews? If but a fox should go up on their stone-wall, he would beak it down!" Nay, more; we are kept from attempting one half of what we ought to attempt, in the impression that the Church has so small a hold upon the people, that we have little to expect. We discover a little remnant of piety pervading a great mass of wickedness; and like the prophet's servant, when compassed with armies, we say, "Alas! master, what shall we do?" If we would take to ourselves strength to fulfill our mission, we should open our eyes and see the mountains full of horses and chariots of fire round about us. Christians have need to be convinced of the truth of the prophet's words: "Greater is he that is in you, than he that is in the world." They must know what value God attaches to that leaven which is to leaven the whole lump; remembering how his impending judgments were staid, out of respect to the few names, even in Sardis, that had not defiled their garments; and how that ten righteous men might have quenched the fires about to burst forth upon Sodom.

[Puritan Recorder.

THE SAMARITANS.

A good deal of interest in the condition of the Samaritans, has been felt in England for some months past. The following statement by Mr. E. T. Rogers, H. B. M. Vice-Consul at Caiffa, in Palestine, will doubtless gratify if it does not add to that interest:—

"The exact number of the Samaritan community in Nablous (that is, the Nablous district) is 195, including men, women, and children. They are thus far diminished and impoverished by many unfortunate circumstances—namely, first by oppression, by fines, imprisonment, and even, in some cases, by persecution unto death from the Mahomedans of Nablous. Secondly, by their unexpected inter-marriages; and thirdly, by the famine so severely felt in the year 1853. Having been obliged to sell or pledge many valuables belonging to their place of worship, they at last determined to send a messenger to England for the collection of alms; and intrusted Jacob esh Shelalz with two petitions, one addressed to Her Majesty and the other to the British public. In answer to the former, the Government has been pleased to instruct Mr. Consul Finn, of Jerusalem, to interfere to prevent any future persecution, and who (according to the further tenor of his instructions) has made a grant of £50 towards their relief. Upon the question being mooted by the Earl of Shaftesbury as to the amount required for the assistance of this community, their agent, Jacob esh Shelalz, said that he had not been commissioned to collect any definite sum, but thought that about £600 would be sufficient to meet their present emergencies, though £2,000 would not restore them to their former state. Were it not for the extreme reverence attached by the Samaritans to their books, especially to the unique Pentateuch, they need not to be in so much poverty; for travelers have offered enormous sums for very small MSS. in the Samaritan character. These books are, however, jealously kept by the community, and it is only by very great favor and influence that I have been able from time to time to purchase a few for Mr. Consul Finn, for the British Museum. The MS. roll of the law alluded to, is preserved with the most religious care—is only taken out of its case twice a year, on certain holy festivals; after which it is returned to its case with many coverings. The Samaritans believe that this MS. was written by Abishai, the grandson of Eleazer, the High Priest, who was one of the sons of Aaron. It is a remarkable fact that the priesthood, which is strictly hereditary, is likely to become extinct, seeing that the present priest, Amran, has no children. Should that contingency happen, the community must either—according to the confident hope expressed by Bishop Gobat—embrace the Christian faith, or they will, after an interrupted worship of nearly 4,000 years, be at last left without a sacrifice, as the Jews are at the present day. The fact to the continued sacrifices among the Samaritans has been denied; but I have been an eye-witness to their passover sacrifice on Mount Gerizin which was in strict accordance with the law of Moses. It was to me one of the most interesting scenes connected with biblical history."

RICH MEN.

We have *rich men* among our churches. According to the statement of the Apostle Paul, not many rich men were called. And our blessed Saviour has declared, that "it is easier for a camel to go through the eye of a needle than for a rich man to enter the kingdom of heaven." Without entering into the reasons for these solemn asservations, or attempting to illustrate their truthfulness, it is pleasing to know that some such men are brought into the kingdom. The grace of God does avail in the salvation of *some*, who abound in the good things of this world.

But how solemn is the responsibility of rich men. God has given to them much, and *much* will be required of them. They are but stewards of the manifold grace of God. The talents they have, consist in the money which God places at their disposal. If they hoard it up, if they aim the more to increase their possessions, if they use it to gratify their pride and lusts, or look to it as the means of elevating and glorifying their children, then they are unfaithful stewards, and are living after the course of this world. Great will be the woe of such.

On the other hand, the privilege of a truly benevolent rich man is beyond estimation. He has the power of doing good on a large scale. If he consecrates his wealth to God, and aims to do good as he has opportunity, if he be ready to distribute, willing to communicate, happy is that man. In diversified channels he may send forth currents of beneficence to gladden the earth. God will bless such a man. Such a man will be truly happy. He will know how to estimate by experience the truth of his Saviour's words, "*It is more blessed to give than to receive.*"

Reader, art thou rich? How much owest thou? Art thou a faithful steward?"

For the Sabbath Recorder.

THE THREE MRS. JUDSONS.

One in the far-off Burman land
Hath found an early grave;
O'er her the lovely Hopia tree
Its graceful branches waves.

Firmly she trod the path of life,
Meekly the cross she bore;
But pain, and tears, and suffering,
Shall visit her no more.

Another fair and gentle one
Sleeps where with solemn roar
The broad Atlantic's billows lave
Helena's rocky shore.

Humbly her patient spirit bowed
Beneath the chast'ning rod,
But she shall reap a rich reward
In the kingdom of our God.

And one, all weary, faint and worn,
Last of that noble band,
Came back, like Noah's wandering dove,
To die in this fair land.

And he o'er whose long toilsome life,
This faithful trio shed
The sunshine of their holy love,
He too lies with the dead.

He sleeps beneath the rolling waves
Of the resounding sea—
Fit resting place for one whose soul
Was fearless, bold and free.

They need no sculptured monument
To mark their place of rest;
Their memory will ever live
In every Christian's breast.

And brighter through each circling age
Shall glow their high renown;
And countless stars of glittering light
Shall gem each heavenly crown.

SARAH.

Shiloh, N. J., 1855.

LUTHER SEVERANCE.

The following incidents connected with the history of the late Mr. Severance, from the *Rural Intelligencer*, will be read with interest:—

Thirty years ago—to us it seems but as yesterday—we made the acquaintance of a flaxen-haired youth, who came to this place, just out of his apprenticeship to Gales & Seaton, publishers of the *National Intelligencer*, Washington. He came as an adventurer in the printing business, and issued proposals for a paper—there was none in Augusta—and called it the *Kennebec Journal*. He printed and edited his own paper—setting the types at his case from the thinking machine of his own head. He proved to be the ablest editor that Maine ever had. In less than five years the people *forced* him into a seat in our Legislature, then holding its temporary sessions in Portland. Afterward, he was chosen to the State Senate again and again; then he was *forced* into the Congress of the United States; and less than twenty years saw the poor apprentice boy that left Washington in 1825, seeking his fortune "down East," now a member of the National Legislature in the same city, one of the most talented, efficient, and honored members of that body. Meanwhile, he conducted his paper with as much readiness and fidelity as ever. He never sought office—supremely modest—it was always forced upon him, and the favor was done by him to the public, not by the public to him, whenever he accepted a public trust. It was he that made Millard Fillmore Vice President of the United States, and the death of Gen. Taylor made him President. Retiring from Congress to the editoral post of the *Kennebec Journal*, his health began to fail him, and President Taylor offered him an appointment as Commissioner of the United States to the Sandwich Islands. He was there four years, and returned last summer with a cancer upon his under lip, which has now eaten out the whole lower portion of his face and into his throat, and has destroyed the power of speaking and masticating food; and yet, true to his "ruling passion," he contrives to write articles every week for his old paper, the *Kennebec Journal*.

From the same paper, we copy the close of a feeling obituary of the deceased:—

He could communicate with his family only by writing; and the last words he ever wrote were on his dying bed, under circumstances which showed the preparedness of his soul for its ascent to the spirit-land. Beckoning his daughter to his side, with a faint hand tracing the request upon a slate, he signified his desire that she would sing. The request was affecting; and she asked what, if anything in particular, he most desired her to sing? He seized the pencil, and with a trembling, dying grasp, wrote:

"I would not live alway, I ask not to stay."

One can conceive how amid bleeding hearts and weeping eyes a dutiful child nerved herself to soothe the departing spirit of a fond father with the melody of that affecting song. At its close, he beckoned to a faithful religious brother who had stood by him during all his sufferings since his return to Augusta, to kneel at his bedside and pray. He did so; and God heard that prayer. Luther Severance is no more—rather, he is forever. No man could be taken from among us more universally beloved, or more sincerely lamented. All feel to be mourners. The City, the State, the Republic—each has lost one of its most valuable men. His age was 57.

THE UNLOVED SON'S SONG.—There are songs set apart from time immemorial for the sad occasion of a Greek's departure from Greece; and others are made on the spot, out of the excited feelings of the moment. There is a story told of a youth—the youngest of three brothers—but little beloved by his mother; the poor fellow endeavored in vain to win some scanty sprinkling of the affection that was showered on his elder brothers! and at last he determined to become an exile from that home which was no home to him. So he set forth, accompanied by his young companions, his brothers, his sisters, and, as a matter of form, by his mother herself. Four or five miles from his birthplace, there was a small gorge through which the narrow road wound. This was the determined point of separation; and here, among the rocky echoes, were sung the most doleful farewell songs. Suddenly the young man mounted upon a rock and improvised a poem on the sufferings he had experienced from the indifference of his mother. He cried to her to bless him once, before he went away forever. Nor was this strange poetical appeal in vain; the mother, with a sudden Eastern change of feeling, could hardly wait until the improvised song was finished, (I have sometimes felt as impatient over an improvised sermon,) before she in her turn sung her repentance; and promised, if he would remain at home, that she would be a better mother for the future. M. Fauriel says no more. I should not have been sorry to have had the old fairy-tale ending affixed to this true story, "And they lived together very happily ever after."

NECROLOGICAL LITERATURE.

The most difficult part of an editor's duties, according to our experience, is the proper disposition of obituary notices. Every sort of people write them. Those who never penned a line for publication on any other subject, when their friends die, take up their pens to record their virtues and perpetuate their memories. The excited state of their feelings frequently leads them to bury in oblivion all their faults and exalt their excellencies out of their due proportion, and to make exaggerated statements in reference to them, which disgust those whose feelings are not enlisted in the matter. The writer probably has censured others for doing the very thing which he himself now does, under similar circumstances. We remarked to a brother who was making a grievous complaint to us, a few years since, of the very numerous and long obituaries, which he said our paper often contained. "When *your wife* dies we shall expect to publish at least a half a column about her." "Yes," said he, "there would be some sense in that, for my wife is *a very remarkable woman*." "Very true," replied we, "and so is every other man's wife, he being the judge, especially just after he has lost her, a remarkable woman." The writers of these long notices often forget that out of the ten or twelve thousand readers of the paper, probably not over one or two hundred will feel any sort of interest in the details which they are drawing out at so great length.

The friends of the deceased know most of these details already, and others will care nothing about them, only so far as they illustrate the grace and mercy of God to his people in the last trying hour. Some of these notices are so deficient in literary merit that we have gone to the trouble of re-writing them, trying to express the ideas of the writers as far as we could gather them, but in most of such instances we learned afterwards that we had caused dissatisfaction; others of them contain statements which are theologically false, and when we have corrected them our efforts have been misapprehended. Others of them again are attempts at versification, which are any thing else but *poetry*. A short, pointed obituary we generally receive and publish with pleasure, and we know that such are read with interest by many of our subscribers, but those of an opposite character are generally passed over by the mass of our readers as decided bores.

[Presbyterian Herald.

PLAIN PREACHING.

A few years ago, it was announced in a village in the eastern part of Georgia, that Bishop Andrew would preach in the Methodist church on a certain evening; and as was to have been expected, there was quite a large congregation out. It being at night, the colored people were out almost unanimously, they having heard so much of the great man in the families to which they belonged. In fact, they had come almost to believe there was was something supernatural about him. The worthy Bishop, according to appointment, preached from the words: "Faith, hope, and charity, but the greatest of these is charity." The congregation was greatly edified and delighted with the lucid and simple manner in which the subject was handled. Returning from the church (as a matter of course) the sermon was the topic of conversation. Another young gentleman and myself were walking near an old negro man who was quite a favorite about the village, and resolved to take his opinion of the matter. "Well, Zip, [the nick-name which had been given him by the boys,] what do you think of the Bishop's sermon?" The old man stopped as in deep thought a moment, and then exclaimed, "Is that your *great Bishop Andrew?*" "Yes," said we. "Well! I spected to hear one of your high larnt men. I jist tell you he can't gin to preach with some our preachers here at home. Why, he talked so plain that even us black folks could understand him." In conclusion, I would respectfully suggest, that some who are in the habit of getting on the grandiloquent, would perhaps do well to ponder."

[Southern Christian Advocate.

THE TWO KEYS.

Once from the pulpit, at an ordination of elders, the late Rev. Mr. McCheyne made the following declaration: "When I first entered upon the work of the ministry among you, I was exceedingly ignorant of the vast importance of church discipline. I thought that my great and almost only work was to pray and preach. I saw your souls to be so precious, and the time so short, that I devoted all my time, and care, and strength, to labor in word and doctrine. When cases of discipline were brought before me and the elders, I regarded them with something like abhorrence. It was a duty I shrank from; and I may truly say it nearly drove me from the work of the ministry among you altogether. But it pleased God, who teaches his servants in another way than man teaches, to bless some of the cases of discipline to the manifest and undeniable conversion of the souls of those under our care; and from that hour a new light broke in upon my mind, and I saw that if preaching be an ordinance of Christ, so is church discipline. I now feel very deeply persuaded that both are of God, that two keys are committed to us, by Christ, the one the key of doctrine, by means of which we unlock the treasures of the Bible, the other the key of discipline, by which we open or shut the way to the sealing ordinances of the faith. Both are Christ's gift, and neither is to be resigned without sin.

PUNCTUALITY.

The importance of punctuality will not be denied, especially by those who have suffered through lack of it in themselves and others. Due regard is seldom paid to the formation of this habit in the training of the young. Those men who have accomplished great things, have usually been scrupulously methodical in their general habits, and strictly punctual in keeping all their engagements. No man was more methodical and punctual than Washington. No man was more so than John Quincy Adams.

The father of the eminent Dr. Chalmers was distinguished for method and punctuality. He not only practised those virtues himself, but was rigid in exacting them from others, occasionally somewhat to their annoyance. The following amusing incident was the result of this habit:—

The peculiarity which reigned over all the domestic regulations was sometimes not a little inconvenient to Mr. Chalmers' guests. His aunt, while living in the house, appearing one morning too late at breakfast, and well knowing what awaited her if she exposed herself defenseless to the storm, thus managed to divert it. "Oh! Mr. Chalmers," she exclaimed, as she entered the room, "I had such a strange dream last night; I dreamt that you were dead." "Indeed," said Mr. Chalmers, quite arrested by an announcement which bore so directly upon his own future history. "And I dreamt," she continued, "that the funeral day was named, and the funeral hour was fixed, and the funeral cards were written; and the day came, and the folks came, and the hour came, but what do you think happened? —why, the clock had scarce done chapping (striking) twelve, which had been the hour named in the cards, when a loud knocking was heard within the coffin, and a voice, very peremptory, and ill-pleased like, came out of it, saying, 'Twelve's chappit, and ye're no liftin'." Mr. Chalmers was himself too great a humorist not to relish a joke so quickly and cleverly contrived, and in the hearty laugh which followed, the ingenious culprit felt that she had accomplished more than an escape.

LAY MINISTRY.

It frequently happens, that a brother engaged in seculiar business is endowed with a talent for public speaking. On matters of general interest, he is heard by his fellow-citizens with pleasure and profit. This talent is more largely bestowed than we commonly suppose; and it would be more frequently observed, if we desired to cultivate and develop it. Now, a disciple who is able successfully to address men on secular subjects, is surely competent to address them on the subject in which he takes an immeasurably greater interest. This talent should especially be offered up in sacrifice to Christ. The voice of such brethren should be heard in the conference-room and prayer-meeting. They have no right to lay up this talent more than any other, in a napkin. And still more it is incumbent on the churches to foster and improve gifts of this kind. Thus we arrive at the order of lay preachers, formerly a most efficient aid in the work of spreading the Gospel. I believe that there are but few churches among us, in the ordinary enjoyment of religion, who have not much of this talent undiscovered and unemployed. Let them search out and improve it. Every church would thus be able to maintain out-stations, where small congregations might be gathered, which would shortly grow up into churches, able themselves to become lights to the surrounding neighborhood. I know of but few means by which the efficiency of our denomination could be so much increased as by a return to our former practice in this respect.

[Rev. Dr. Wayland.

THE PRICE OF SUCCESS.

Effort is the price of success in every department of human action. From the attainment of rudimental knowledge to the salvation of the soul, every step in our progress is made by undaunted toil. The boy who drones over his book, a slave to listless laziness, thereby secures a place for himself at the foot of society. The Christian who, like Bunyan's Timorous and Mistrust, flees at the voice of lions, is undone. The man who shrinks from difficulty in his business or profession, who refuses to climb because the rock is sharp, and the way steep, must make up his mind to slide back and to lie in the shadows below, while others use him as a stepping block for their own rising. For this, such is the constitution of society, there is no help. The poet wrote truly who said:

"Thou must either soar or stoop,
Fall or triumph, stand or droop;
Thou must either serve or govern;
Must be slave, or must be sovereign:
Must, in fine, be block or wedge,
Must be anvil or be sledge."

To shake off an indolent spirit, or stir one's self to exertion, to reach constantly upward, to struggle for a firm foothold on the most slippery places, to wrestle manfully even when principalities and powers are our foes, to refuse submission to any evils however frowning, are conditions we must either fulfill, or sink to littleness, to uselessness—perchance to ruin. Therefore, with a brave heart, and an unconquerable spirit, every man should address himself to the work of the day, striving with pure views, and religious trust for an increase of his talents, and for a victory, which will enable him to stand unabashed in the last day. He who thus strives need fear no failure. His triumph, though delayed for a time, shall come at last. [Zion's Herald.

WISDOM.—Honors, monuments, and all the works of vanity and ambition, are demolished and destroyed by time; but the reputation of wisdom is valuable to posterity.

STATE OF THE DEAD—AGAIN.

Last week, we gave a moral argument for the soul's immortality, showing that at death the soul was neither annihilated, nor laid in a dormant state. We did not present the scriptural argument, partly because the most of the texts which prove the soul's consciousness between death and the resurrection have reference to the righteous, our object being to show that all men, the wicked as well as the righteous, live in the intermediate state; and partly, because a false philosophy has so perverted the minds of some, that the plain teachings of the Bible are wrested from their proper meaning, and will continue to be, till a better philosopy prevails. But we are not afraid of the Scripture argument, being well satisfied that it gives no countenance to the idea of the soul's non-existence, or even its dormant condition, during the period referred to.

We had occasion to discuss this question, in the *Recorder*, some four or five years ago. We had written a series of articles on the "Destiny of the Wicked," and attempted to answer the question, "Will the punishment of the wicked consist in annihilation?" (See *Recorder* of Oct. 3d, 1850.) A correspondent undertook to review our argument, which elicited from us a reply. (See *Recorder* Nov. 14th, 1850.) After that, another correspondent attempted the controversy, and in our reply to him, we gave the scriptural proof that the soul does not sink into a state of unconsciousness at death. We think that what we wrote on that occasion, will bear examination, and we refer our readers to the *Recorder* of Dec. 12th, and the week following, for a full expression of our views. The most of the texts, which we then produced, described the intermediate state of the righteous, but the parable of the Rich Man and Lazarus, as we showed, was quite as conclusive with regard to the wicked. The rich man had, certainly, "*died and was buried.*" His state was, certainly, on this side of the Resurrection, for five of his brethren were still living. And wherever he was, he was "*in torment*"—"*tormented in this flame.*" Now, there can be no explaining away of this most explicit passage. To say that the passage is only a parable, neither destroys, nor impairs, the evidence which it furnishes that *Hades*—for this is the term in the original, "*In Hades he lifted up his eyes being in torments*"—is a place where the dead are conscious.

The 139th Psalm also furnishes evidence, on this point, of too strong a character to be passed without notice. Speaking of the omniscience and all pervading presence of God, the Psalmist says, "Whither shall I go from thy spirit, or whither shall I flee from thy presence?" He seems to think it impossible to find, any where, in all the universe, a spot where he would not be conscious of God's presence. But if he lived in these days of new-fangled notions, he would be told to go into *Hades*, and there he might escape all consciousness of God's presence, till the Resurrection at least. But he thought differently. "If I make my bed in hell—*hades*—behold, thou art there." *Sheol* is the term used in the Hebrew, but the Greek term *hades* is of the same import, both being used to set forth the place of departed spirits, or the condition of the dead previous to the Resurrection. Now this passage is most conclusive; for if God's all-seeing providence extends to *hades*, or *sheol*, or *the invisible world*—all which are terms of the same import—in such a sense as that those who go there do not escape it, but are still affected by it, it must be that, in that place, the soul still lives in a state of consciousness. The same passage implies that there is no such thing as final annihilation. For while one is asking, like the Psalmist, "Whither shall I go from thy spirit, or whither shall I flee from thy presence?" no such answer is given as would be given, if the doctrine of annihilation were true. He is not told to go into a state of non existence, and then he will be completely beyond the presence of God; but the answer is, that whether he ascend to heaven, or go down to hell—whether he fly beyond the sea, or take refuge in the darkness—God's presence is everywhere, and he must always expect to be conscious of it.

It is true, the foregoing passage is employed by a righteous man, and the questions he asks are propounded with reference to himself personally. But they are propounded in such a way as to imply, that whatever solution of them is given must originate in principles of general and universal concern. For he does not ask whether, as a *righteous* man, he can find a place of refuge from God's presence, but whether, as a *mere creature*, he can find any such place.

The idea of the soul's sleep, between death and the resurrection, seems to be founded in that of its *materiality*. Those who believe, that the soul is not a substance distinct from the body, must believe that the whole of the human machine is at rest after death, till it be restored to its functions at the last day. But those who are convinced of the immateriality of the soul, will not think the soul so entirely dependent, in all its operations, upon the body, but that it may exist in an unembodied state. But this notion of the soul's materiality lies at the root of Infidelity; and we cannot resist the conviction, that the legitimate tendency of the doctrine upon which we have animadverted is to Infidelity, of the worst kind, notwithstanding many of the believers in it would instinctively revolt from such a conclusion.

T. B. B.

MINISTERING SPIRITS.

How comforting the thought, that "ministering spirits"—beautiful inhabitants of the spirit world—are ever about us, hovering over our pathway, interested in all our pursuits, in our joys and sorrows, successes and misfortunes, and anxiously watching our footsteps, and seeking to guide them by their unseen and mysterious influence in the way of virtue and peace. Who, that is possessed of pure motives, and has any aspirations for a holier life, but would rejoice to be assured that this is a reality? And is it *not* a reality? Is it not highly probable, that the spirits of the blessed are deeply interested in the cause of their Master here on earth, Him whom they serve continually with delight, and that they would visit us on errands of benevolence and mercy if they have power to do so? It is certain, that angels were wont in former ages to visit the earth, as we learn from Scripture. We have accounts in the Old Testament of heavenly visitants, even in visible form, as in the instances related of Abraham, Lot, Jacob, and others. Hear also what the New Testament says: "But to which of the angels said he at any time, Sit on my right hand until I make thine enemies thy footstool? Are they not all ministering spirits, sent forth to minister for them who shall be heirs of salvation?" Heb. 1: 13, 14. "Take heed that ye despise not one of these little ones; for I say unto you, that in heaven their angels do always behold the face of my Father which is in heaven." Matt. 18: 10. Why did Christ say "their angels," if he did not mean those who were commissioned to watch over them, or in some way minister unto them?

But some may say, "The ministration of angels belonged to the age of miracles and prophecy, and not to this age." But how do we know that? Is it not likely, that the inhabitants of the spirit world are subject to the same laws now as then? Is it probable that the great Ruler has curtailed the powers or freedom of his servants, or abridged their sphere of usefulness? Above all, can we believe that our Heavenly Father has ceased to exercised that parental regard for, and care over His children, that He was wont to exercise in former days? "There shall no evil befall thee, neither shall any plague come near thy dwelling. For He shall give his angels charge over thee, to keep thee in all thy ways. They shall bear thee up in their hands, lest thou dash thy feet against a stone." Psalms 91: 10, 11, 12. Is not this promise to us of the present day, who have made the Most High our habitation, as well as to those of the Psalmist's day? If not, then we may claim none of those most comforting promises, with which the Psalm quoted from is so richly laden. And if we may not claim *them*, what promises contained in the Bible *may* we claim? Is there not still need of the heavenly influences of blessed spirits, to restrain man from wickedness, to encourage him to good works, to strengthen him amid trials and temptations, and to beckon him onward and upward to the realms of bliss? It may be answered, that we may have the Holy Spirit himself to perform these offices. That is very true. O that all would woo Him to come into their hearts, to guide and direct them. And it is also true, that He has ordained other influences to draw us heavenward, and so constituted us, that we may be affected by them. Perhaps, however, it would be more correct to say, that the means which He has ordained for our aid, are so many media through which the Holy Spirit operates upon us.

Why should not beings of light, from around the throne of the Most High, visit the shores of mortality, bearing with them, and imparting to us, the peaceful and holy influences of our future home—especially the spirits of departed kindred and friends? I see no good reason to doubt that such do sometimes visit their kindred of earth, and the scenes of their former earthly abode. Probably the most of us, or at least many of us, believe that the spirits of the just, when freed from their tenement of clay, and received into heaven, are permitted to soar through the realms of space, and witness and study the works of their Heavenly Father, even as the mortal child is permitted to roam over his earthly father's possessions. Is it unnatural or unreasonable to suppose, that they should have a lively interest in that portion of their Father's universe, which gave beginning to their existence, which was the scene of their probationary trials and struggles, by which they were fitted for their blessed abode on high, and above all, which contains their loved kindred, and a world of beings, immortal like themselves, who are yet struggling with the temptations of the flesh, especially if they can minister to them in any thing?

But let us turn our attention a moment to the influence on the inhabitants of earth which this doctrine of the relationship of departed and undeparted spirits would exercise, were it received and acknowledged to be true. Who, that is laboring under difficulties and discouragements, oppressed with the turmoil and cares of an uneven life, would not be animated with new courage and strength, which would enable him to struggle manfully on, by by the assurance that the spirit of some dear departed friend is hovering over him, watching his steps with the deepest solicitude for his welfare? Who, that is beset with some sore temptation, would not be greatly aided in resisting it? Or who, that has already deviated from the path of integrity, and commenced a course of sin, would not feel a restraint upon himself? Suppose that a young man, full of the wild impulses so natural to youth, subject to many dangers and snares, into which the tumultuous flow of his warm young blood may lead him, has a pure-minded sister, to whom he is attached by the strongest ties that link together kindred hearts, and that sister, in her youth and purity, is snatched from earth by death, and planted in the realms of living light. Suppose that he can be assured that his angel sister, who, he is conscious, was intensely solicitous for his safety while on earth, is now even more deeply concerned for his well being, and on angel wings comes directly from the shining courts above, to watch over him in his sleeping and waking hours, and to influence him to follow that path which will lead him upward to her happy abode. What would be the effect of such a belief on that young man? Would he be as likely to be carried away by the follies of youth, as he would were he not impressed with such thoughts? Should he engage in the giddy and reckless pleasures, so dangerous to youth, whenever the friendly voice of conscience causes him to reflect, how he will feel the mild spirit eye of his guardian angel, peering into his innermost soul, breaking the charm of the tempter, and impelling him to turn his back upon the glittering bubble that was luring him on into danger! So of one who has lost any other relative or friend, or, rather, whose relative or friend has departed this life, and gone to join the heavenly throng. Again, how it would assuage the grief that we feel at the death of a father, a mother, a sister, a brother, or a beloved companion, could we feel that they are not lost to us, even while we continue in the body, but that their spirits may still commune with our spirits, and take an interest in our affairs. In these remarks I have had no reference to spirits manifesting their presence by "raps" or other phenomena.

SPRINGBORO, O., Jan. 21st, 1855.

A SUCCESSFUL INVESTMENT;

A Good Example.

Mr. F. resides at the present time in one of the rural villages of the East. He was born and educated in New England, and is now about fifty five years of age. Having inherited a feeble physical constitution, he has been from his infancy an object of constant bodily suffering. His father was a poor man, yet he managed to give his invalid son a good common-school and academical education. At the age of about thirty years, having funds barely sufficient for the journey, he went to New York, and at once engaged as a clerk. The first year he received for his services his board, and a few articles of clothing. His industry, his faithfulness, and his economy, won the good opinion of his employer, who, the second year, gave him a respectable salary. By prudent management, he soon found himself in possession of sufficient funds to commence a small business upon his own responsibility. Wise in his plans, and successful in their execution, he gathered in a few years a handsome property. At length, suffering much from his inherited infirmities, he determined to close his business and retire to the country.

When he had settled all his affairs, he found himself in possession of several thousand dollars beyond the means of his own support. How he should invest his funds so as to yield the greatest amount of revenue, and at the same time produce the greatest good, became a matter of grave inquiry. He promptly resolved to retain in his own possession only so much of his property as should be sufficient for his own support, and to meet, to a limited extent, such charities as might appeal to his sympathies. The balance he invested as follows:

He first paid over to the trustees of the Rochester University a sum of money whose annual income would be sufficient for the economical support of two young men in that University. He conditioned his bequest, that the income only should be used, and that the young men who should be successively selected to enjoy its provisions, should study, one in view of becoming a Home Missionary, and the other a Foreign Missionary. He next paid over to Baptist Missionary Boards funds whose annual incomes would be sufficient to support a colporteur and two missionaries. He conditioned, that only the incomes of these funds should be used—that they should be devoted sacredly to the purposes for which they were given, and that one of the missionaries should labor in the Home Field, and the other in the Foreign Field. Thus he disposed of his surplus property.

This will doubtless strike every well-instructed Christian as an eminently wise investment. How infinitely better for a man thus to become the executor of his own estate, than to leave it for ungrateful heirs to wrangle over. No dividends of banks, or railroads, or State stocks, can yield such blessed satisfaction to an aged Christian, as funds thus invested in the great business of redeeming, renovating, elevating, and fitting men and women for earth and for heaven. Witness a single result. The first Home Missionary, appointed under these provisions, was sent to a small village on Long Island, distinguished for its vices, and for its destitution of the means of moral and religious instruction. A blessing attended the effort; a church numbering about one hundred members, able and willing to support a pastor, was organized; and a commodious house of worship was erected. How it gladdened the heart of the donor to see the desert and solitary places made to blossom. Look too at the sagacity of brother F. The school of the prophets is first provided for—just as it should be—that men may be trained for their work—trained for humanity—trained for the vineyard of the Lord. Next the colporteur is sent forth, sowing broadcast the "leaves of the tree of life"—Tracts, Testaments, and Bibles. These are followed by the missionary to explain and enforce the truths. What a power for good! Who can calculate its accumulating results down through successive ages? How many thousands, redeemed, by the grace of God, through the instrumentality of this man, shall be induced to make similar investments? This is one way to "lay up treasure in heaven." May the Lord inspire others to imitate this example. Do it, dear brother, that you may experience the pure and holy joys of doing good—do it, that you may bless the world and honor God.

GLIMPSES OF DOMESTIC LIFE IN CHINA,

NUMBER THIRTEEN.

As affected by the Rebellion.

At the time of the release of Mr. Low, Senior, as mentioned in my preceding sheet, Nemay was in constant attendance upon her own mother, who had been nearly crippled by a fall, a few weeks previous, so that her own life was one of multiplied cares and anxieties. Her husband kept himself concealed at our house, the younger brother was still a prisoner at home, and Nemay was a sort of presiding genius, a guardian spirit, for the whole. She could not leave the city, had its gates been opened to her; but she longed for her husband's release, and as he could be of no essential service to his family, from the necessity he felt of keeping himself concealed, Mr. Carpenter resolved to make an effort to bring him out. He adopted the plan which he had sometimes successfully prosecuted, and which has been much practiced by different persons, missionaries and merchants, on behalf of the inhabitants of the besieged town. It is this, to allow persons to act the cooley, and in bringing books or burdens through the gate, if they are not questioned, no one feels obliged to say they *belong* inside, and so they pass out undetected. They have felt only too happy, by this simple, unquestioned process, to help liberate the poor suffering people, who longed for a release. Often are the missionaries beset by some poor suppliant, who begs to accompany them out, and who will often boldly ask, "If they refuse to let me go, please tell them I am your servant." "No," he replies, "I cannot tell a lie for you; if questioned, I must freely tell them, you are *not* my servant." Still, the risk is often run, and the poor creature released without a question. Sometimes, also, a case like the following happens. Mr. C. took in a cooley with him, to get out some goods, and employed some others from the inside, without any idea of getting them out. At the gate it was probably noticed, that more came out than went in, but the objections were raised against the wrong one. They were about forbidding Mr. C.'s cooley to come out, but were told, "*This* is my servant; the others I don't know; *they* belong *inside*, but he *without*." However, for some reason, they would not yield *too much*, and although they let the disputed man come *out*, they would not be talked into keeping the others *in*; so all came along together. But poor Low-Chung-Yuen was not so fortunate; he was suspected, questioned, and sent back.

After a few days, Mr. Carpenter again went in, and I, for the first time in nearly six months, accompanied him. The gate-keepers were a little suspicious, but upon our promising to make no attempt to get any one out, they suffered us to pass. I was in my sedan; but my poor chair cooleys were so frightened at the formidable aspect of things, that they tumbled under the chair, and I was glad to escape from the perilous height of their shoulders, and seek security in walking. Sad were the scenes around us—the shops all shut, and the houses desolate—our once pleasant home, too, so marred and broken. Many cannon balls had entered it, and one an eighteen pounder. But it was sadder still to meet within its walls old neighbors, and little children, who came to welcome us, and talk of passing events. After a season of sorrowful sojourn, I prepared to go out, and visit Nemay. But she had already been apprised of our visit, and we met her at the foot of our stairs, just coming up. She was so careworn and haggard in her looks, that I scarcely recognized her. A sort of quiet despair seemed to possess her, and she seemed hardly to hope for release for herself. For her husband and infant son, her anxiety was intense. She hoped I might save the child, then fourteen months old—said he was nearly weaned, and would soon be able to subsist on rice—a precautionary measure which had been occupying her in her long attendance upon her poor mother, who still required her care. But our promise to the gate-keepers included even the little infant; so we could do nothing then.

We walked through the desolate streets to the residence of Nya-ee, with whom Ah-nah resided. Desolation seemed written on the door-posts of every house, yet many a familiar face greeted us, and it was difficult to say, whether joy at the recognition, or sadness at this deplorable state of things, was most apparent in their looks. One well remembered neighbor of the better class, who had often visited us at Ya-zu-loong, was standing at her door, well dressed as usual, and no appearance of want visible; yet the moment she recognized us, held out her hand, as if mechanically, and asked alms! Nothing for the whole day affected me so much. I did not attempt a reply to her. She seemed the living embodiment of that abject state, which is a sort of paralyzed despair, wanting even the energy to hope—a state with which the very air seemed burdened. On our return, we found her more herself. She met us with a smile, and many kind inquiries, and friendly remarks, but made no allusion to her necessities, nor seemed even to have any. I felt little wish to repeat my gloomy visit to the city, and have not done so since.

A few weeks more passed by, and Mr. Carpenter succeeded in liberating Low-Chung-Yuen, in the following manner. You are probably aware, that the rebels are called "long-haired men," because they do not shave the head, and the same prohibition has been strictly enjoined upon all within the city. How, then, could one under their scrutiny, whose head had not been shaven for six long months, pass their guards unnoticed? The following stratagem succeeded. A small rocking chair, with a slight cushion, was turned over his head, and as the Chinese are proverbial for turning all burdens upside down, no notice was taken of him, and he came out unquestioned.

Our next care was to free Nemay. But the laws are doubly strict with respect to females, and stratagem was out of the question. Petitions were also useless, except in cases where one's own servants were concerned, and the time of her release seemed far away. But the hour came. It was two days after the memorable battle of April 4th, between the Imperialists and foreigners. The former were for the time discomfited, and the Rebels were overjoyed at the assistance in this manner (though undesignedly) afforded them. In the flush of their grateful excitement, Mr. C. went to *Lew*, the head man in the city, presented his petition in person, and received even more than he had ventured to ask.

Lew said, "You wish to take out one woman; any more?" "Her infant child with her." "And her husband?" "No—no one else." "And her clothes?" "If we might do so, we should be very thankful to you." He immediately withdrew, and soon returned, with a "Peaw-tsz," permitting him to take from the city "one woman, one child, their clothing *and bed*." It was delightful to witness such an act of generous gratitude, and Nemay was soon with us, almost wild with delight at her escape. She remained several days—indeed, until a messenger could be dispatched into the country to inform her husband, when he came and removed her to the dwelling he had prepared. Her mother was much better, but does not wish to leave the city, and is probably as safe to remain, while the rebels keep possession; but should the imperialists succeed in retaking it, it is terrible to anticipate the carnage which would be sure to follow.

L. M. C.

LETTER FROM ELD. E. S. BAILEY.

To the Editors of the Sabbath Recorder:—

I presume no person has a greater aversion to being engaged in a personal controversy through the public press, (especially with Christian brethren,) than myself; yet it seems that I have unfortunately, though unintentionally, provoked such a controversy by the publication of the joint communication of Maxson, Bailey, and Clarke, of Nov. 9th. A number of brethren in Jefferson County, at different times, have published very severe strictures upon that communication, impugning my motives, censuring my conduct, and charging me with wrongs of which I am absolutely unconscious. These communications I did not note, deeming them unworthy of their authors, and that they were written under the influence of excited feelings. I was further induced to take this course, from the fact that the communication of M., B., & C., together with the strictures of W. & S. were all before the public, who would be able to judge of their merits or demerits, and the spirit which dictated them, without any interference of mine.

But recently the Seventh-day Baptist Church at Hounsfield have directed their clerk "to write an article to be published in the *Sabbath Recorder*," which appeared in the *Recorder* of the 8th instant, containing severe animadversions upon the conduct of M. & B., and preferring charges against us, which, if true, would (in my opinion) justly subject us to church censure. Under these circumstances, I am reduced to the painful necessity of asking the privilege of making a defense through the *Recorder*, and of stating the reasons which prompted the publication of the offensive document, assuring you that I intend this shall be the last time I will ask the privilege of a reply to any attacks from that quarter.

I will premise, that previous to the commencement of the difficulties referred to in the communication of M., B., & C., I became personally acquainted with most of the members of the Seventh-day Baptist Churches in Jefferson County, especially those of the Adams church—that I sustained the relation of pastor to that church in 1841—that a number of them I claimed as my spiritual children. With the Hounsfield church I was less intimately acquainted, having labored with them far less. I would further state, that I have ever esteemed them good though imperfect men, and have ever sought their good in all my intercourse with them, and that without reference to their belonging to the majority or minority. And to the present time I would not willingly do a wrong to either side. With a wish for their general good, I introduced the subject to the 3d Church of Brookfield, requesting them to solicit the aid of the Association in settling those difficulties. The Association appointed a committee to labor for the settlement of said difficulties, and respectfully invited the Jefferson County churches to accept the aid of said committee, and to notify the Corresponding Secretary of their acceptance, and he was to publish it in the *Recorder*. He published their response, which he deemed an acceptance, while I viewed it *equivocal*, and did believe that they never intended to submit their acts of discipline (not their records, but their acts) to the inspection of any council whatever; and their subsequent conduct has fully sustained the views I then entertained. With these views, we published the communication complained of by the Hounsfield church. If the views we entertained of their intentions were wrong, they had sufficient time to correct our error and place themselves right before the committee, by which the committee would have been enabled to decide on the propriety or impropriety of visiting Jefferson County.

As to the charge of our wishing to dictate to the committee, or to influence their decision, it is too ridiculously absurd to be believed by any body acquainted with the men, unless they were blinded by prejudice. I never entertained such a thought.

With reference to my knowledge of the action of the committee at DeRuyter, the Hounsfield church is correct. I was not present, and ought to have so stated in the communication. Though not present, I had my information from reliable sources, one of which was one of the committee, and one too who justified their report. I then believed, and now believe, that the Hounsfield church never did have a trial before said Committee or the Association.

She charges us with taking sides with the delinquents against the Hounsfield Church, "counselling them to protest against its discipline," with "interference with their internal affairs," &c. I extremely regret that she should have felt herself at liberty to bring such accusations against us. M. and C. can speak for themselves. For myself, I have no recollection of such conduct or advice in reference to either of the churches. I was counsel for Elder William Green at Hounsfield before a council from the Adams Church, in a trial between Joel Greene, complainant, and William Greene, respondent, in which I plead and proved a former settlement, as a bar to the pending complaint, which was sustained by the council, and approved by the church. At this time I did advise Elder William Greene to remove every stumbling block he might have laid in the way of any—to be prompt, and not wait to be called on, but to do it voluntarily; and, hearing *one* give very bad counsel to the church, I asked leave to show my opinion; which being granted, I stated to them that the object of *Gospel discipline* was not the excision of erring members, but their reformation. I exhorted them, if they believed he had done wrong, to treat him in the spirit and temper of the Gospel, and stated the happy or unhappy consequences which would result from their adopting the advice given by me or that of the other; the truth of which I think they have learned by an unhappy experience.

We are represented as wrong doers in saying that those persons who have been excluded from this church are none the less our brethren than before. These remarks were made of the aggrieved brethren in general, and in the sense we intended, are true. Will either of these churches contend that the mere act of exclusion from a local church, for no other crime than conscientiously refusing to comply with the act of the majority, when they honestly believed that act wrong, will exclude them from all Christian sympathy, from all efforts to reclaim them if they are in error, and finally from the kingdom of glory? If not, then are they our brethren still, and should share in our sympathies and in our efforts to do them good. If the question is answered in the affirmative, then is Rome robbed of her claim to exclusive infallibility. This, it may be urged, was not the case of all who were excluded from the church. This will not disprove the truth, that a large majority of the cases were such.

The insinuation that we encouraged them to organize a church, &c., so far as I am concerned, is utterly groundless. I never encouraged them to do any such thing, but, on the contrary, I did, at an early period, advise the leading influences of the aggrieved not to forsake the public worship of God with the church. At a later period, when they had separated from the worship of the church, and had set up meetings by themselves, I wrote to some of the leading men, advising them not to rend themselves from the church, without farther efforts for reconciliation. I advised them to solicit a mutual council to settle the difficulties, and not to think of organizing a separate church.

In conclusion, I wish to state, that in my opinion nothing but a full investigation of the premises will ever settle the difficulties, or remove suspicions of erroneous proceedings. To the church of Hounsfield I would kindly state, that if she believes me guilty of the charges she has set forth in her address, I ask her to bring those charges before the 3d church of Brookfield, the Presbytery of the Central Association, or the Presbytery of the General Conference. I will join issue on those charges before either of those bodies, reserving to myself the right of objecting to any member who may have prejudged the cause, and I will furnish them with all the facilities in my power to have a full investigation of my conduct in the premises. Should they comply with this invitation, I will release all my correspondents of the Independent Church from all obligations to secrecy, and give them full liberty to state all that I may have written or spoken to them on the subject.

ELI S. BAILEY.

BAPTIST HISTORICAL SOCIETY.—This Society was recently organized in the city of New York, for the purpose of collecting and pseserving historical facts relating to the Baptists in America. Each member is required to pay an initiation fee of one dollar, and one dollar per annum as dues. The first regular monthly meeting of the Society was held at the Tabernacle Baptist Church, in Second-avenue, on Monday evening of last week, when the President, Mr. T. D. Valentine, read a paper on the early history of the Baptists in New York, giving an account of their struggles against oppression, first from the Dutch Government, and subsequently from the Church of England, during the period from 1640 to the close of the Revolutionary War. The object of the Society is important and praiseworthy. The manner in which it has commenced operations gives promise of great usefulness.

COL. BENTON ON WATER-DRINKING.

Hon. Thomas H. Benton recently delivered a lecture before the Mercantile Library Association of the city of New York, on the subject of railroad communication with the Pacific ocean. In consideration of his services on that occasion, the Directors of the Association sent him a silver pitcher and salver. His letter acknowledging the receipt thereof, contains the following interesting episode:

"I take leave to say, that there was an appropriateness in the selection of the particular article for the testimonial, beyond what might have been understood when the pitcher was fixed upon, and which is this: When I was young I became what Dr. Franklin was—(my only point of resemblance to that illustrious man—when he worked at his early calling in London,) an *aquatic*—the term which his comrades applied to designate him as a water-drinker. I also drank water, and nothing stronger, in the early part of my life—the first half of it; and to that abstinence from all vinous, spirituous and fermented fluids, I attribute the good health and general vigor which I now enjoy.

"As this allusion touches a point at which a word might be useful to other young men desirous to advance themselves in life, and to have good health in old age, I will go on to say that, at that time, and in the South, it was the custom in every house to offer something to drink to all visitors—even boys; and that excuses were no defense for those who would refuse. Pressure, importunity, custom, broke down all excuses, and it became necessary to oppose *will* where reason was unavailing; so I made a law for myself, that I would drink nothing until I should be in the decline of life, and might need it—and resolutely pleading that law, I afterward escaped importunity. It was the first stand, 'solitary and alone,' that I ever made, but not the last. I was young enough, and silly enough, at that time, to suppose that this decline would come upon me at thirty; and so fixed that age as the limit for my law. When thirty came, I did not feel the decline, and extended the time, and eventually relaxed into temperance, and have remained at that point ever since. Thus the first half of my life was abstinent—the second half temperate; and to these conditions I attribute whatever of mental and bodily vigor I may now have, and whatever of business application I have ever shown."

Important Decision.—In the Circuit Court, New York, on the 12th inst., Judge Rosevelt decided that the publisher of a Sunday paper could not recover on a bill for advertising, because the contract to advertise on Sunday was a contract to do what the statute prohibited. It seems that John L. Smith, publisher of the *Sunday Courier*, sued John M. Wilcox, to recover $90 for advertising in 1850. The defendant plead that the contract to advertise was invalid, having been made in violation of the Sunday law. In this he was sustained by the Judge, who recited the law of the State prohibiting servile labor on Sunday, except for necessity or charity, and the exposure of goods for sale, except fish, milk and meat. It has been contended, (he said) that the Sunday papers are printed on Saturday night before 12 o'clock; and there is no evidence in regard to the paper in question to the contrary. There is no doubt, however, that the paper was prepared to be exposed for sale on Sunday, and the contract for advertising made with a view to Sunday publication. The Judge cited a case where a lawyer's clerk sued on a claim for copying papers on Sunday, and it was held to be a void contract, and the plaintiff could not recover. So of a case of contract made to sell property on Sunday, and other cases. The Judge considered, after stating his views as to the exposure and sale of papers on Sunday, and the disturbance to the public thereby, that the dissemination of business advertisements on that day, and the action of reading them, was not a work of charity or necessity. The opinion concluded as follows:—

"The conclusion is, that the contract made by plaintiff to publish the defendant's advertisements in a Sunday paper, was a contract to do an act prohibited by the statute; and that the price, therefore, stipulated to be paid for the service cannot be recovered in any Court in the State."

The publishers of the *Courier*, we learn, have appealed to the Supreme Court, and if defeated there, will carry the case to the Court of Appeals, for final adjudication.

The Massachusetts Sunday Law.—From a letter recently published in one of the Boston papers, it appears that the Sunday Law of Massachusetts defeated the project of manumitting the fugitive slave Burns. After the question of sending him back to slavery had been decided by the United States Commissioner, Col. Suttle offered to manumit him on the payment of $1,200, which was to be made up before 12 o'clock Saturday night. The money was raised; but when it was presented to the gallant Colonel, he declined to fulfill the contract, "because there was not time to draw the papers before the commencement of the Lord's Day, on which the transaction of business is prohibited by law." Thus it appears that the Sunday law not only prevented the completion of a work of mercy, but made void a contract. Nothing better could be expected, however, in view of a previous decision of the Supreme Court of Massachusetts, that contracts made on the Lord's Day are void—a decision which brings the Sunday law into direct conflict with that clause of the Constitution of the United States which forbids the State to make laws impairing the obligation of contracts.

The N. Y. *Tribune's* correspondent at Havana reports the existence of great excitement there, on account of the expected arrival of Gen. Quitman and his invading army. Preparations were making to receive them, and a strong body of troops had been dispatched to some part of the island, but to what part was not known.

Abstract of Proceedings in Congress.

SECOND-DAY, FEB. 12.

In the Senate, Mr. Sumner presented petitions for the prohibition of Slavery in the Territories, and to settle national disputes by negotiation instead of war. He also introduced a bill to secure seamen's wages in case of wreck. Mr. Seward introduced eight special river and harbor improvement bills. He also called up the bill to remit duties on goods destroyed by fires, principally in New York City. The bill, which was passed, provides that the Secretary of the Treasury may remit or refund the duties on the unbroken and original packages, destroyed by fire, which were imported between the 7th of July, 1838, and the 28th of March, 1854. The Judicial Salary bill, and the bill establishing a special Court in California, were passed, without amendment. The remainder of the session was spent in considering amendments to the Indian Appropriation bill.

In the House of Representatives, the Joint Resolution from the Senate, authorizing the President to confer brevet title of Lieutenant-General on General Scott, for his eminent military services, passed by a vote of 126 against 65. An unsuccessful attempt was made to offer a resolution thanking Lieut. Gen. Scott for his efforts to avert war and prevent bloodshed on the Northern frontiers. The House took up the Florida Claims bill, being a joint resolution to carry into effect the Treaty of 1819 with Spain, but adjourned before disposing of the question. These claims amount to over a million of dollars.

THIRD-DAY, FEB. 13.

In the Senate, several special Improvement bills were introduced, and referred to the Commerce Committee. Mr. Douglas reported the bill from the House establishing a line of subterranean telegraph to the Pacific, merely granting the right of way. The amendments were concurred in, and the bill passed. The Senate's bill for the better protection of passenger-ships was recommitted to the Committee on Commerce. The Indian Appropriation bill was then taken up. A debate then followed, during which Mr. Rusk reported a bill to carry out the last annual recommendation of the Postmaster-General, as to the greater security of valuable letters by the registry thereof. Bills were passed making appropriations for the construction of military roads in the Territories; for a Territorial road in Nebraska; to provide accommodation for a Post-Office at Baltimore.

In the House, Naval affairs were the special order, and Mr. Bocock reported a bill providing for more efficient discipline. After debate, the bill passed—116 to 46. The House, in Committee, then took up the bill providing for the construction of seven sloops-of-war, which was discussed until adjournment.

FOURTH-DAY, FEB. 14.

In the Senate, after some bills of minor importance had been considered, the Texan creditors' bill, with amendments, came in from the House, and the Senate, disagreeing in the amendments, appointed a Committee of Conference. The Indian Appropriation bill was taken up.

In the House, a bill to erect military defenses at the termination of the Mexican Gulf Railway, was passed. The printing of a large number of copies of the Patent Office Reports was ordered; also, of the Report of the Japan Expedition, and of the survey for a Pacific Railroad. The Florida (Spanish) Claims bill was then called up, and finally laid on the table, 164 to 90. A motion to close the debate on the bill for seven new sloops-of-war, was also tabled, 108 to 66.

FIFTH-DAY, FEB. 15.

In the Senate, Mr. Seward asked the consideration of the bill regulating the carriage of passengers in steamships and other vessels. This bill prescribes that no greater proportion of passengers than one person to every two tuns register of the ship shall be carried in any vessel coming to the United States; and that to such passenger shall be appropriated no less than sixteen superficial feet of space, clear of goods or baggage. The hight between the decks to be no less than six feet. No vessel to be allowed more than two tiers of berths, parallel with the sides of the vessel. The bill further provides for adequate ventilatory appliance to passenger vessels of every grade. It is specified further, that all vessels employed as aforesaid, shall have on board, for the use of such passengers, at the time of leaving the last port whence such vessel shall sail, well secured under deck for each passenger, at least fifteen pounds of good navy bread, ten pounds of rice, ten pounds of oatmeal, ten pounds of wheat floor, ten pounds of peas and beans, thirty-five pounds of potatoes, one pint of vinegar, sixty gallons of fresh water, ten pounds of salted pork, free of bone—all to be of good quality, and a sufficient supply of fuel for cooking. One-tenth of the above to be served out to each passenger weekly, and in default of the same, or of any part thereof, said passenger may recover, in due process of law, the sum of $3 per day from the Captain or owners of such vessel. After a short debate, the bill was laid over. The bill to increase the salaries of Supreme Court Judges passed by 30 to 15. The Foreign Relations Committee reported in favor of giving $25,000 to Com. Perry for his diplomatic services. The Pacific Railroad bill came up, and Mr. Douglas's substitute, proposing northern, central, and southern routes, was accepted as an amendment.

In the House, the Mail Steamer Appropriation bill was taken up, and Mr. Olds offered an amendment, appropriating $858,000 for the transportation of the mails from New York to Liverpool and back, and repealing that part of the deficiency bill of 1850, which directs the Secretary of the Navy to terminate the arrangement for the additional allowance to the Collins line, provided Collins and his associates shall proceed, with all due diligence, to build another steamship, in accordance with the terms of the contract, and have the same ready for mail service in two years from the passage of the act. If this steamship is not ready within the time mentioned, by reason of any neglect or want of diligence on their part, then they shall carry the mails between New York and Liverpool, from the expiration of said two years, every fortnight, free of charge to the Government, until the new steamship shall have commenced said service. A lively debate followed, in which Mr. Olds and Mr. Smith, of Virginia, indulged in some amusing personalities. No question was taken.

SIXTH-DAY, FEB. 15.

In the Senate, the bill for the relief of the owners of the brig General Armstrong, was reconsidered and laid on the table, 24 to 23. Private bills were then taken up, and one was passed to pay Overton Love $2,400, and John Guest, or his legal representatives, $1,300, the value, respectively, of certain slaves which were stolen from the Chickasaw Indians by certain white persons from the State of Texas. A bill was then passed unanimously appropriating $101,000 to White Marsh, B. Seabrook, Joseph Whaley and others, for themselves, and for the heirs of the officers and members of the Edisto Company, of South Carolina, for services during the last war with Great Britain.

The House spent the day in discussing the bill making appropriations for Mail Steamers.

SABBATH-DAY, FEB. 17.

In the Senate, Mr. Toucey, of Conn., introduced a bill prepared by the Judiciary Committee, with the title of "An Act to protect officers and others acting under the authority of the United States." There is no explanation of its purport, but it may be presumed that it is for the better protection of negro-hunters. After the reception of several memorials, the bill to extend credit for duties on Railroad iron was taken up, amended in some minor particulars, but before a final vote the Senate adjourned.

In the House, the Ocean Mail Steamer Appropriation bill was passed, after a brief debate, by a vote of 92 to 82. This secures the appropriations to the Collins Line. The President sent in a long document vetoing the French Spoliation bill.

European News.

European dates to Feb. 3d have been received.

England is in a foment on the Ministerial crisis. Mr. Roebuck's motion of want of confidence in the Ministry, and providing for an investigation into the condition of the army before Sevastopol, and the conduct of the war generally, passed the Commons by a vote of 305 to 148, whereupon the Ministry resigned. The resignation was accepted, and the Aberdeen Cabinet are only holding on until a new Ministry is formed.

The English Baltic fleet is to assemble in the Downs the first week in March, ready for sea. Admirals Seymour and Martin are named for the command.

There has been no more fighting in the East, but Diplomacy is hard at work.

It is understood at Sevastopol, that important changes are to be made from the original plans of attack, mainly with a view to cut off supplies by way of the new road which the Russians have made from Inkermann. The French force now numbers 68,000 men, and more are on the way. On the 13th, the Russians celebrated their New Year's in the town, when the French mistook the cheering for an insult, and opened fire. The fire was continued, and a fierce cannonading ensued. The Russians made bold sorties, both on the British and the French, capturing the British vidette and spiking three French mortars. The sanitary condition of the British Army is improving. On the 15th, there was a fall of snow to the depth of more than three feet. From movements in the town it was supposed that Gen. Liprandi had received strong re-enforcements; the Russians had also appeared in considerable force near Balaklava, which place, it was thought, they had abandoned. A dispatch from Menchikoff speaks of a successful sortie against the French center on the 19th, when a number of the besiegers were killed and several prisoners were taken. At latest advices, the firing was pretty much suspended, and all parties were seeking shelter from the snow.

California News.

The steamer Northern Light, with California dates to Jan. 24th, arrived in New York on the 14th inst. From the daily papers we glean the following summary of news:—

The State Controller's Annual Report for 1854, has been published. The total amount of taxable property in California is $114,000,000; the previous year it was $99,000,000. The receipts for the fiscal year ending June 30, 1855, are estimated at $1,839,800; the current expenditures at $804,190, exclusive of interest on the Funded Debt. The expenditures for the last year were $1,254,757, of which $307,712 was for legislative expenses, and $107,610 for printing. The expenditures for the last five years, have been $4,333,469, the receipts $2,178,410. The civil debt of the State is now $2,520,204; the war debt, $1,022,345.

The excitement in Los Angeles, in regard to the postponing of the execution of David Brown, mentioned in our news by the last arrival, resulted, after the execution of Avitre, in a riot, in which the Jail was broken open, Brown taken out, and hung by a rope thrown over the gateway, opposite the Court-House. Both the Los Angeles newspapers approve of the lynching. Mayor Foster resigned his office to lead the mob. He encouraged them; said he would die at their head if necessary, and now he offers himself as a candidate for Mayor again.

On the 19th, a similar scene was enacted in Sonora. On the evening of the 18th, Edward Crane Griffiths, a native of England, and lately from Australia, 30 years of age, murdered, with an axe, Joseph Heslep, Treasurer of Tuolumne County, in the Treasurer's Office, and stole $15,000 from the safe. Griffiths was arrested and brought before the Coroner's Jury, to whom he confessed at 2 o'clock the next morning. After the confession, alarm-bells were rung, a large number of persons collected, and it was determined to hang him at daylight. The Sheriff made a speech against Lynch law, but to no effect. Griffiths was hung upon a tree at 7 o'clock—ten hours after he committed the crime. A few of the newspapers disapprove of these lynchings; more approve of them; the majority say nothing.

The troubles between the miners and the Chinamen continue. A mass meeting of miners was held at Shasta, at which resolutions were passed forbidding the Chinese to mine in that County after the 25th of February.

On the Klamath, the Indians and whites are at open war. On the 13th instant, a party of Indians killed five Americans at Orleans Bar, because their rancheria, or huts, had been destroyed by a party of miners. Parties of United States troops and of miners had gone out to attack the Indians.

John Tabor, former editor of the Stockton *Journal*, and one of the best newspaper-writers in the State, has been sentenced to be hung in Stockton on the 16th March for the murder of Joseph Mansfield.

The Alta *California*, the oldest paper in the State, was sold recently by the Sheriff for $13,500. There were attachments for about $30,000 on the paper. The *Sun*, which has the largest daily circulation in the State, (as itself says,) is advertised for sale by the Sheriff under executions amounting to $16,000. An attachment was levied several days ago upon the *Herald*, which has the largest advertising patronage in the State, and it is rumored that the debts of the paper are $30,000. Such is newspaper business in San Francisco. Printers' wages alone, on a first-class paper here, amount to more than $1,000 a week.

The Northern Light brings dates from Oregon to the 6th of January, and from Washington Territory to the 16th December. The steamer Southerner had been totally wrecked about 60 miles south of Cape Flattery. All the passengers and crew were saved. Some citizens of Washington Territory had held an indignation meeting at Vancouver, denouncing the Hon. C. Lancaster, their delegate to Congress, and the Hudson Bay Company, for setting up pretended claims to their lands. They assert that at the time they settled on the public lands they were unclaimed by the Hudson Bay Company, and express a determination to defend their rights. The Supreme Court has made a decision establishing the right of Indian wives to hold lands under the Donation Act. A large force of miners had gone up from San Francisco, to work the coal fields at Bellingham Bay. A Mr. Burris, who lives near Hillsborough, killed his wife and four children on the morning of the 2d Jan. It is said he was insane. After committing the horrible deed, he burned his house, and attempted to kill himself by cutting his throat with a razor. Business is said to be improving throughout the country. Money is becoming plenty. The farmers are sending their surplus produce to the Southern mines, and receiving a fair price for it.

SUMMARY.

A few days since, Miss Isabella Newhall, a teacher in one of the public schools in Cincinnati, applied to the Board of Education, of that city, soliciting the dismission of one of her pupils, not for improper conduct, nor on account of his inability or unwillingness to receive instruction, but because his skin was darker than that of some of the other scholars. The matter was brought before the Board, and appears to have received considerable discussion in that body; but it was finally decided he must take his walking papers. The vote stood 16 to 10.

The citizens of Detroit are taking measures, under the General Railroad Law just enacted, to build a road from that city through Munroe to Toledo, so as to put themselves in railroad connection with the Lake Shore line of roads, and give them communication with the East during the close of lake navigation. This road will bring considerable traffic to the Cleveland and Toledo and the other shore roads, and also enable the Michigan Southern to divide with the Central the Detroit business from the West and North-west.

On the 15th inst., Mrs. Catharine Murphy, residing in Broome-st., New York, died of consumption, near New Brunswick, while in the Philadelphia train which arrived at Jersey City at 5 o'clock, A. M. She was returning home in company with her son, having been south for three months past, for the benefit of her health, but, failing rapidly for two or three weeks past, she was coming home to die. Her son spoke to her when near New Brunswick, and she not answering, he discovered that she was dead.

A clerk of the Bank of the Commonwealth, while on his way from the Clearing-House to the Bank, one day last week, had his pockets picked of a package of specie certificates, issued by the Bank of America to the Associated Banks of this city, amounting in all to eighteen thousand five hundred dollars. The Bank has offered a suitable reward for their money; and as they are not of the slightest value to any one except the owners, they will doubtless get them.

A stupendous project has been started in Australia, viz: a railroad with a double track of seven hundred miles, and a single track of three hundred, to connect with Sydney, Melbourne, and Adelaide. The cost is estimated at one hundred millions of dollars. The chief features of the scheme are that it seeks for the protection of the Home Government, on condition that the latter shall guarantee a loan for its construction.

A dispatch dated Chicago, Saturday, Feb. 10, 1855, says: The Prohibitory Liquor Law bill was returned by the Senate to the House of Assembly, with amendments. The amendments were concurred in, and the bill finally passed, by a vote of Yeas 51, Nays 17. Resolutions were passed instructing Senators in Congress from this State to oppose any Slave States being formed in the territories of Kansas and Nebraska.

A dispatch dated New Orleans, Friday, Feb. 9, 1855, says: A portion of an expedition against Cuba is understood to have left this and other Southern ports, during the last few days, and the remainder are to follow shortly. The total enlistment in this enterprise, it is said, reaches 3,500 men. The proceedings have been conducted with the greatest secrecy, and we are unable to gather any further particulars.

On the cold Tuesday, Feb. 6, Edward Ryan, of Woonsocket, R. I., clothed in a cotton shirt and thin pants, cut, split and packed over four cords of four feet chesnut wood, between sunrise and sunset, and won his wager of $60 thereby. And on the same day a party of young ladies and gentlemen took a sleigh ride for pleasure from Keeseville to Plattsburgh and back, returning (a 16 miles ride) at midnight in open sleighs with the thermometer at 32° below zero.

The Newburyport *Herald* reports the death of Orlando B. Merrill, Esq., of that city, at the advanced age of 92 years. The deceased was probably one of the oldest ship-builders in the country. He built the United States ship "Pickering" in 1789, and the United States sloop-of-war "Wasp" in 1813.

The Hon. Charles Durkee, has been chosen United States Senator from Wisconsin for six years from the 4th of March next. He is an old-fashioned Abolitionist, a thorough Land Reformer, and Christian philanthropist.

New York Markets—February 19, 1855.

Ashes—Pots $6 50; Pearls 6 75.

Flour and Meal—Flour, 8 00 a 8 37 for common to good State, 8 50 a 9 00 for Michigan, Indiana and Ohio, 10 75 a 12 00 for extra Genesee. Rye Flour 6 25 a 7 37. Corn Meal 4 37 for Jersey. Buckwheat Flour, 4 00 per 100 lbs.

Grain—Wheat 1 95 a 2 10 for Western red, 2 15 a 2 25 for white Ohio, 2 50 for white Genesee. Rye 1 25 for Northern. Barley 1 12 a 1 20. Oats 53 a 58c. for Jersey, 67 a 68c. for Western. Corn 1 00 a 1 02. White Beans 1 62 a 2 12.

Provisions—Pork 13 25 for new prime, 14 25 for new mess. Beef 5 25 a 7 00 for country prime, 8 50 a 11 00 for country mess. Dressed Hogs 7¾ a 8c. Butter 14 a 19c. for Ohio, 22 a 27c. for State. Cheese 9½ a 10½c.

Lumber—15 00 a 16 00 for Eastern Spruce and Pine.

Potatoes—2 50 a 2 75 per bbl. for Pink-eyes and Western reds, 3 00 a 3 50 for Carters and Mercers.

Seeds—Clover 10 a 11½c. Timothy 3 00 per bushel for reaped. Flaxseed 1 85 for 56 lbs.

Tallow—11¾ a 12c. for city rendered.

☞ Some of the readers of the *Recorder* have objected to our remarks in opposition to the debt system, and in favor of the pay-as-you-go doctrine, as being "Old Hunkerism to the back bone," saying also, that "Old Hunkerism advocates specie currency, free trade, the extension of slavery, free liquor," &c. It is objected, that this is foreign to the objects for which the paper is published, and that no mere political articles should be admitted into its columns. To this we would say, that we have sought to give useful information and instruction, irrespective of party. The questions discussed are now being examined elementarily, independent of party. Several of the denominational papers have articles on these subjects, such as the *Evangelist, Independent, Churchman*, &c. The writer has sought to direct attention to certain elementary principles, and to lead readers to consider and judge for themselves, without wishing to make the *Recorder* the vehicle of party politics. In one or two weeks from this time we propose to give one more article, which will be rather explanatory of the past; after which it may perhaps be best to discontinue them. In our next, we may give an article on the subject from the *Churchman*. **

MARRIED,

In Scott, N. Y., Feb. 4th, by Eld. A. W. Coon, Mr. ALBERT CLARKE to Miss ELVIRA A. GREEN, all of Scott.

In DeRuyter, February 15th, by Charles H. Maxson, Esq., Mr. RUFUS A. BUGBEE, of Tully, to Miss MARTHA A. JONES, of Apulia.

DIED,

In Waterford, Ct., on Sabbath evening, Feb. 11th, in the 24th year of her age, LUCILLA H. ROGERS, wife of Benjamin F. Rogers, and daughter of Dea. John Maxson of DeRuyter. She made a profession of religion some six years ago, and united with the Seventh-day Baptist Church in DeRuyter, of which she was a member at the time of her death. For several months she had been an invalid, without hope of restoration to health. During all that time she exhibited a spirit of Christian patience and resignation, the memory of which is comforting to her friends, and assures them that to her death was gain.

In Leonardsville, N. Y., on the 12th instant, GEORGE ALBERTI MAXSON, youngest son of Eld. W. B. Maxson, in the 22d year of his age. The subject of this notice became hopefully pious in early childhood, but did not make a public profession until he was about nine years of age. He then became a member of the 1st Seventh-day Baptist Church in Brookfield, of which he remained a member until his death. For a number of years he had suffered much from indigestion, and was unable to pursue his academic studies to the extent he would otherwise have done. In hope of regaining his health, he passed about seven months in the Water-Cure establishment in New Græfenberg; but he obtained no benefit from their treatment. He returned to his home in October last, much reduced in flesh and strength, still hoping that his health would be recovered. But God ordained otherwise. He became much emaciated, but suffered no pain. His mind was buoyant with a joyful hope in Christ, and in the full enjoyment of his intellectual and colloquial powers, he calmly fell asleep in Jesus.

"Blessed sleep!
From which none ever wakes to weep."

In New London, Ct., at the house of Bro. George C. Stillman, on the 2d inst., Miss PRUDENCE STILLMAN, daughter of the late Elisha Stillman, formerly of Hopkinton, R. I., aged 72 years. Sister Stillman embraced religion some 56 years since, and with more than usual faithfulness and steadfastness followed the Saviour through life. She united with the first Seventh-day Baptist Church of Hopkinton first, and subsequently with the Church in Scott, Cortland Co., N. Y., and finally with the DeRuyter Church, of which she was a member at the time of her death. She bore her afflictions with patience, and died trusting in Christ for final salvation. C. M. L.

At Potter Hill, R. I., Feb. 14, 1855, WILLIAM SHELDON, aged 83 years; and on the same day, about ten hours after, ESTHER SHELDON, wife of William Sheldon, aged 81 years. They had both been professors of religion for many years, and were both members of the 1st Seventh-day Baptist Church of Hopkinton, R. I. Aged, respected, and though poor in this world, they were esteemed "rich in faith and heirs of the kingdom."

In Brookfield, N. Y., Feb. 6th, Miss SYLVA SAUNDERS, in the 68th year of her age. Sister Saunders professed religion some thirty years ago, and united with the 2d Seventh-day Baptist Church in Brookfield, with which she remained an acceptable member till death released her to join the church triumphant. E. S. B.

In Waterford, Ct., Dec. 30, 1854, Mrs. LUCY ROGERS, wife of Jonathan Rogers, aged 70 years.

LETTERS.

H C Pierce, L P Babcock, R I S Rogers, B G Stillman, L F Cook, W B Maxson, E S Bailey, C M Lewis, Wm Kennedy, B Stelle, R E Nichols, N V Hull, P C Burdick, T F West, M S Kenyon, E I Maxson, S R Wheeler, C H Maxson, E R Clarke, Rowse Babcock, Charles Potter, D Saunders, J J Hare, H P Burdick, W V Hubbard (sent regularly,) H W Randolph, A A F Randolph, W H Monroe, B F Chester (will send,) A A Crandall, A W Coon, Wm F Randolph, E A Green, S Burdick.

RECEIPTS.

Quarterly Meeting of Rhode Island Churches.

THE next quarterly meeting of the Seventh-day Baptist Churches in Rhode Island and Connecticut, will be held in Rockville, R. I., commencing on Sixth-day evening, Feb. 23, 1855, at 7 o'clock, and continuing through Sabbath day and Sunday. Opening discourse by S. S. Griswold. P. L. BERRY, Com.

NEW LONDON, Feb. 1, 1855.

3d Brookfield Church.

NOTICE is hereby given, that at an adjourned meeting of the Seventh-day Baptist Beaver Creek Society, held on the 5th of February, 1855, it was resolved, by unanimous agreement, to sell the meeting-house and its appendages at auction, and give the avails to the American Seventh-day Baptist Missionary Society, except such portion as may be called for by the original contributors, who shall receive their shares, according to the sum they respectively paid, if called for in three months from this date. The amount of the sale was $88. Also resolved, that the above notice be published in the *Sabbath Recorder*.

BENJ. BURDICK, Society Clerk.

SOUTH BROOKFIELD, Feb. 13th, 1855. 37—6t.

Rare Chance—For Sale.

A DENTIST, (wishing to retire on account of ill health,) having a good practice in a large, thriving, and beautiful town, where there is a community of Sabbatarians, will sell advantageously for the cash. Any person wishing to buy, can receive the most thorough instructions in every department.

Letters addressed to "Dentist," care of Rev. Geo. B. Utter, this office, will be answered, giving further particulars. 37—3t.

MAYOR'S OFFICE, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the jurisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

Woodworth's Youth's Cabinet

IS the best illustrated dollar magazine in the Union. Send for a specimen of it, if you are not acquainted with it. The editor is giving a chance to his subscribers to get 12 splendid volumes of books for nothing, as premiums. You can have a chance too, if you will subscribe; and now is the time, as a new volume has just commenced. Yearly subscription, $1; single number, 12 cents, or four postage stamps. Address the Publisher,

D. A. WOODWORTH,
118 Nassau-st., New York.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 5.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.
Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M. JOHN O. STERNS, Superintendent.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 35 cents per copy. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

To Printers.

A NEW EDITION OF THE SPECIMEN BOOK OF BRUCE'S NEW YORK TYPE FOUNDRY, was published in September, 1853, and will be given to those proprietors of Printing Offices who will send for it, or it will be forwarded to them by mail on receipt, in advance, of fifty cents for the postage.

In it are exhibited many articles never before shown; there have been added to the Foundry new varieties of Roman Types from Nine-line Pica to Pearl various imitations of Writing, a great number of fancy founts borders, both plain and illuminated, labor-saving rules and a complete foundry of German.

The types now manufactured are cast from a new combination of great durability, and are usually kept on hand in large quantities. Every fancy fount is sold by weight, and at the printed prices, which are from ten to twenty-five per cent. less than those of some other foundries. All other printing materials are furnished at manufacturers' prices, either for cash or credit.

Printers wishing to open accounts with me, or whose dealings have been long suspended, are requested to accompany their orders with city references to prevent delay.

51—3

GEORGE BRUCE,
13 Chambers-st., New York.

Miscellaneous.

Agriculture.

A reporter of the N. Y. *Tribune* gives the following synopsis of a lecture delivered recently by Orange Judd, before the Farmer's Club, at Bedford, Westchester Co., N. Y. :—

How do plants grow? If I ask where the various plants come from, I shall at once be answered, from the soil. This is a mistake. They come chiefly from the air. Suppose a box of dry earth weighs 500 lbs.; plant an acorn in it, and add nothing but pure water until the oak tree grows to a weight of 100 lbs.; remove the tree and weigh the earth again, and it will still weigh nearly 500 lbs. Or sow clover-seed in a similar box of weighed earth, and you may cut off hundreds of pounds of clover without diminishing the weight of the earth. Indeed, the vegetable matter carried from the leaves into the roots will rather increase the weight of the soil. The same may be said of all growing plants; they do not come from the soil. The truth is, that the surface of the leaves is filled with little mouths, which continually draw in food that is floating in the air in an invisible state. All decaying animals and vegetables go off into the air in a so finely divided state that we cannot see them, and these fine particles are gathered up again by leaves. Then to grow or increase in size, the plant must have a good supply of leaves. But what are the roots for? To get moisture from the soil, and to support the plant in its upright position. The water goes up to the leaves, and carries or washes down the food collected by them, and deposits it in different parts to make up its structure. If the soil contain soluble food, some of it probably goes up with the sap, and thus the plant has two sources of food, though its principal supply comes from the air. A very important point is to supply the first wants of the plant, to develop its first leaves and roots by nourishment, and it will afterward take care of itself. An ounce of guano will produce several pounds of corn-stalk in a poor soil, simply because it develops the first organs or feeders of the plant. A little plaster on a poor soil attracts food from the air sufficient to start clover, and the great amount of leaves on the clover draws still further food, sufficient to supply the first wants of other plants. In this way clover acts so powerfully to improve poor soils and make them bear wheat and other crops. But much sap is required to carry down the food from the leaves and to supply the waste of evaporation. Hence the roots of the plant should be cared for. The soil must be free from poisonous substances—must be compact enough to hold moisture, loose enough to allow the roots to penetrate it, and fine enough to supply a medium for the growth of the minute fibres. Compact soils, or "hard pans," should be loosened, and coarse or sandy soils be rendered more tenacious by the addition of clay. The chief poisons of soils is a particular form of iron which abounds wherever air has not access to the soil. It is chiefly iron that gives color to our upland soils. Air will always change the poisonous form of iron (the sulphate) to a harmless form. Stirring the soil deeply with the plow, or subsoil plow, admits the air. Draining removes the water also, and allows air to take its place. The lecturer went into a detail of the advantages and methods of deep plowing, subsoiling, and draining. A great end to be aimed at, is to suitably prepare a very deep soil for the roots, and then they will go far enough down to be unharmed by the effects of drouth upon the surface. He had seen corn roots 3 1-2 feet below the surface, and the roots of a locust tree, the size of a middle finger 15 feet below the surface.

The soil being properly prepared, and the necessity of the first food having been considered, what is the most appropriate food to give the plant? All modern theories to the contrary, notwithstanding, reliable experience teaches us that animal or vegetable manures as plant-food are the most important. Animals are little more than concentrated vegetable. The body of an ox, or other animal, may be chiefly formed of corn-stalks or other vegetable. No dead animal should be drawn into the woods to decay and go into the air. Every portion of it should be carefully saved to supply the first wants of some plant. Guano is the remains of dead birds, and their droppings, and is a powerful stimulant. Ground bones, unburnt, contain much animal matter, in a finely divided state, and hence are very valuable as fertilizers, especially so, as this animal matter quickly decays and becomes available to plants. Burnt bones are of doubtful utility. But farmers should not go off from their farms for foreign manures until they have better husbanded those produced at home. The better preservation of these home manures is the most important topic now before American farmers. Let a mass of animal droppings and vegetable matter lie in the open air for a year, and more than half of their best material will have escaped into the air. The lecturer had heard "compost," "compost," repeated till he had become tired of the word. As a general thing, he would say, compost or rot no manure or fertilizers except muck. Let every thing from the yard be got under the soil, to rot there, where it could not be lost in the process of decay. Lime, potash or ashes hasten the decay, and loss of manure, and should never be used with animal or vegetable manures of any kind. Swamp muck becomes covered with a kind of pitchey matter, which needs lime or ashes to dissolve it, before it will decay enough to nourish plants. He repeated, never mix lime or ashes with vegetable manures or with the droppings of animals or fowls, for it will "cut them up" and greatly hasten their loss. Another great loss in the ordinary method of treating manures is in washing them. Five barrels of water leached or washed through a cart-load of rotted manure, contains more nourishment for plants than all that is left. Barn-yards should be so arranged as to allow nothing to run from them. Manure should always be under cover. He recommended a cheap kind of cover to be constructed as follows: Select some spot in the middle of the yard and drive down six crotched stakes. Let two of them be higher than the rest, and lay across them a ridge-pole. Upon the others two on each side of the first, place two eaves poles, and then put upon the roof-frame, thus made a covering of any old boards. Around this shed dig a trench to prevent the water from running under it. This cover can be erected at a cost of a very few dollars at most. Under it throw all the droppings of animals, the straw about the yard, and, indeed, every particle of animal and vegetable matter that can be gathered up. A little leakage in the roof will produce no material damage. The mass should be so spread out as not greatly to ferment, and let it be taken to the field at any season when it can immediately be covered in with the plow. Plaster or oil of vitriol greatly assists to prevent loss, if sprinkled quite frequently in the stables and upon the manure heap. Poultry droppings are an important item in farm-manure. It does not take a large number to produce a tun of home-made guano, equal to that brought from Peru, and costing $50. This taken into account, and the usual high price of poultry, it is probable that fowls are one of the most profitable products of the farm. Let the droppings be kept dry and mixed with plaster or dry earth, but never with lime or ashes. When applied near corn in the hill, for immediate effect, a little ashes or lime may profitably be added, just at the time of the application. In regard to mineral manures, much has been written, but their importance and relative value are by no means a settled point. The great difference in the analyses of plants, even by the best chemists, clearly show that we do not yet know what are the essential mineral elements of plants. The great amount of sap coming up from the earth holds potash, soda, &c., in solution, and the evaporation of this sap from the surface leaves behind some of these minerals. So also the sap in the plant at the time of gathering it holds some of the minerals, which is found in the ashes on burning, and which cannot be considered as a necessary part of the plant, any more than the salt in the ashes of a towel, which had been dipped in salt water, could be considered as an essential constituent of the towel. Future chemical researches will throw further light upon this subject; and, until this is done, no trustworthy adviser will undertake to specify the kinds or exact proportions of mineral elements necessary to the soil.

Chemical analyses of soils, if cheaply made, are worse than useless, because leading into error, and even the best analyses are of little practical value till we know more in regard to the constitution of plants. Plaster and sulphuric acid (oil of vitriol) attract ammonia from the air, and are frequently beneficial; lime and ashes in moderate quantities, assist in preparing for the plants' use the vegetable substances in the soil, and on this account alone these mineral substances are useful."

Royal Visitors in New York.

From the Evangelist.

Those of our readers who have been interested in the question, "Have we a Bourbon among us?" may be gratified to know that our city is favored with the presence of certain representatives of royalty, whose pretensions are much better authenticated, and whose adventures are not less romantic than those of the venerable Missionary to the Indians. The following facts are certified to us in a way that entitles them to credit.

About eighteen years ago, a young man named Robert Mills, came to this country from the north of Ireland, and settled in Gilboa, Schoharie Co., N. Y. Having a natural fondness for ocean life, he visited Nantucket, and sailed for the Pacific Ocean on board a whaling vessel, in the year 1839. He had spent about nine months in the Southern Pacific, when, in pursuing a whale with five of his shipmates, he lost sight of his vessel, night soon came on, and before the dawn of the following day they had drifted so far from the position where they had parted from the vessel, that they despaired of again finding her. Having a compass and a few biscuits in their boat, they determined to reach, if possible, the Marquesas Islands, which they supposed were not more than 200 miles distant. After much labor they succeeded in reaching Ohivahoa, the largest of the group, containing about 6,000 inhabitants, and were kindly received by the natives, and there they remained together about eight months. They kept a constant lookout, in the hope that they might signalize some passing vessel, by which they could escape from the island. Each in his turn repaired to an eminence, which commanded a view of the ocean, and spent the day in watching. At length Mr. Mills, being on duty, had the satisfaction of signalizing to his companions the joyful intelligence that a vessel was in sight. With all haste they made ready their boat, while he hastened down to the shore to embark with them. The natives, comprehending the movement, endeavored to prevent their departure. The companions of Mr. Mills, however, succeeded in launching their boat, and hastily pushed off from the shore. He was intercepted by the natives and compelled to remain. With a heavy heart he saw his shipmates receding slowly in the distance, till they disappeared beyond the horizon. He is now a solitary captive, in the hands of the savages, on an unfrequented island, in the vast Pacific. Perhaps years will elapse before a vessel will visit the island, and then he will not probably be permitted to depart. Hope dies within him. He is a prisoner for life.

Gradually, however, he became reconciled to his condition. The natives regarded him as a valuable prize, and treated him with much kindness. He soon formed an attachment to the daughter of the principal Chief, and was united to her in marriage. This alliance with royalty gave him great influence with the natives, and he determined to employ it for the introduction of the customs of civilized life. He acted as mediator between the tribes which were at war, and peace was soon restored. Finding that the island was occasionally visited by whale-ships, he explored the principal harbor, and by the proffer of his own services, as pilot, he encouraged commanders of whaling vessels to resort thither for supplies. Plantains, bananas, bread-fruit, yams, tara, cocoa-nuts, and other tropical fruits, which are abundant on the island, became important articles of commerce. A code of regulations was prepared, by which the introduction of intoxicating liquors, and immoral intercourse of foreigners with the natives, were prohibited; and these restrictions were vigorously enforced by Mr. Mills, with the concurrence and aid of the Chief and the people. In one instance, twenty-two sailors, who persisted, contrary to the statute, in spending the night on the shore, were bound hand and foot, and were released the next morning, on the payment, by the captain, of $2 a head for their lodging.

At length the chief was removed by death, and the son of Mr. Mills, though an infant, became chief by hereditary right. The influence of the father now became greater than before. Feeling the need of assistance in his efforts to elevate the people, he wrote to the American missionaries at the Sandwich Islands, entreating them to send one of their number, or at least a teacher, to share with him his responsibilities and labors. Whether his letters reached their destination, he does not know. No answer was ever received. He then determined to visit the English settlements of Australia, in the hope of persuading some of the missionaries, or other English families, residing there, to take up their abode on his island. Accordingly, in October, 1853, he took passage, with his wife, for Sydney, which is distant from the Marquesas about 5,000 miles. Failing to accomplish his object here, he proceeded to New Zealand, where he met with no better success. Unwilling to abandon his purpose, he finally resolved to visit the United States—confident that here he would find sympathy and encouragement. After some delay he obtained a passage to Salem, Mass., where he arrived on the 17th of November last.

He has made application to the Prudential Committee of the American Board to establish a mission on Ohivahoa; but it is understood that this is rendered impracticable by an understanding which exists with the English Missionary Board, that the American missions shall not extend south of the Equator. He is, therefore, advised to visit the Sandwich Islands, and lay his application before the Hawaiian Missionary Society, which has already established a mission on Fatabiwa, one of the Marquesas group.

Mr. Mills, with his wife, is now in this city, endeavoring to procure the means of prosecuting his praiseworthy undertaking. His resources, which would have been ample for the journey which he originally contemplated, are exhausted, while his embarrassments and expenditures have been increased by the recent accession to his family of another scion of royalty. Their immediate wants have been supplied by several benevolent individuals, and subscriptions to a small amount have been made to further the important object of his mission.

Mrs. Mills is liberally tattooed in the style royal of her nation, and is, altogether, an interesting specimen of Polynesian nobility. She is modest, well-behaved, and moderately intelligent, though she has but an imperfect command of the English language.

Mr. Mills, at the suggestion of friends, has visited New Bedford, Mass., where he found several masters of whaling vessels who have known him at the Marquesas, and who certify to the truth of the foregoing narrative.

Sandwich Islands Agriculture.

Correspondence of the N. Y. Tribune.

LAHAINA, S. I, Tuesday, June 27, 1854.

In the agriculture of these Islands a most important experiment is trying, the success of which, now nearly consummated, seems likely to change the destiny of this country.

Maui is a double island, composed of a large mountain island 10,000 feet high and 90 miles round, and a smaller one 7,000 feet high and 50 miles round. These lie respectively south-east and north-west, and are united by a low neck of land 7 miles wide from bay to bay, and 3 miles from slope to slope. On the map the outlines of the whole bear a wonderful likeness to a head and shoulders in profile—the face looking and leaning westward. Lahania is the jewel on the brow. A grand vision opens on the view as we begin to descend to the neck, between the mountains.

The giant dome of East Maui is before us, whose crater-summit is called Hale-a-ka-la, or House of the Sun. Long curves of beach and surf, fringing blue and foamy seas, answer to each other with murmurs on either side, below us. The trade-wind rushing in a gale between the mountains, drives in clouds the sand which has drifted in a long white river from bay to bay. On the western side of Hale-a-ka-la lies Honuaula; on its eastern slope the rich farms of Makawao, and between them, all along the mountain front, the fertile lands of Kula; at the present time all lying idle, save that it pastures many hundreds of cattle, grows a few potatoes, and furnishes three good sugar plantations. There is one yellow spot that is better than gold—it is *Wheat!*

At Father Green's, the missionary, 1,200 acres of wheat have been sown from seed raised last year; 200 of this was destroyed by cut-worm, being sown too late. The remainder is ripe, and yielding 20 bushels per acre, and the horse-reaper, cradles, and threshers are making many work with it. And yonder in Kahului bay lies a schooner taking in the first cargo for the new mill at Honolulu.

Two obstacles to success yet remain to be encountered; the weevil destroys grain left unprotected, and flour made here is apt to get sour. There are from 100,000 to 150,000 acres of land in this group, upon which wheat can be profitably cultivated. Flour is $12 to $18. The entire cost of raising wheat in Makawao this year is 60 cents a bushel, including labor and seed.

Case of Booth and Rycraft.

From the Milwaukee Free Democrat, Feb. 5.

On Saturday, the 3d inst., the Supreme Court in session at Madison on the petition of John Rycraft and Sherman M. Booth, unanimously discharged them from custody under sentence from Judge Miller, on a charge of violating the Fugitive Slave Act. The Judges delivered separate opinions. Justice Crawford, while adhering to his opinion of last summer, in favor of the constitutionality of the Fugitive Act of 1850, gave an able opinion, affirming the insufficiency of an indictment to warrant an imprisonment, because it charged us with no offense known to the laws of any State or of the United States; that as the allegation in the indictment did not aver that Joshua Glover was a fugitive slave, it was the same as if it was alledged that we had aided the rescue of Joshua Glover, a free citizen of Wisconsin, and that the sentence of Judge Miller, under that indictment, was as truly a nullity as if he had sentenced us arbitrarily, without conviction, without a trial, and without even notifying us that we were charged with any offense. And in this opinion of Justice Crawford, all the members of the Court concurred.

This decision of the Court was peculiarly soothing to the vanity of E. G. Ryan, Esq., who boasted, after the conviction of Rycraft, that he had drawn the indictments, and claimed that the conviction upon it was owing to his legal skill in framing it.

Chief Justice Whiton affirmed his former opinion, that the Act was unconstitutional, because it annulled the writ of habeas corpus and the right of trial by jury. He also took the ground that a law might be unconstitutional in some parts and constitutional in other parts, so that a conviction might legally take place under it, but whether this was such a case he would not inquire. It was sufficient to rest the discharge on the grounds affirmed by Justice Crawford.

Justice Smith gave a long and very able opinion, affirming all he had said in his first opinion, denying the power of Congress to legislate on the subject, reviewing the whole question of State Sovereignty and State Rights, affirming the power of the State Courts to enforce the writ of habeas corpus upon United States officers, and to inquire into the legality of the proceedings of the Federal Courts, as freely as into the proceedings of any other Court. The prisoners were ordered to be discharged from custody.

Growth of Boston.

Could old Gov. Withrop take a peep at the little trimountain peninsula he and his associates took such a fancy to about two hundred ago, and named Boston, they would hardly recognize the village. Considering the contracted quarters in which Boston has done her growing, we think there are few places in our country deserving of more credit. Her local advantages were nothing like those of New York, for expanding her limits. About three square miles bounded her chance for greatness, and on this narrow strip has she risen from the rank of a village to that of a first-class city, numbering nearly a hundred and fifty thousand inhabitants. The only annexation made to the original limits of the city, of which we are aware, was South Boston, formerly a part of Dorchester, and containing about 560 acres. The increase of population and buildings in this part of the city has been very great during the last twenty-five years. Perhaps, however, East Boston ought to be included among the acquired territory. Twenty-five years ago, this place, now quite a city of itself, was "Noddle's Island," and did not contain a building. The "East Boston Company" was formed in 1832, and bought up the whole island, comprising about 600 acres, for $80,000. East Boston is now thickly settled, and is the terminus of the Cunard steamers, and the seat of rapidly extending business.

But the chief increase of our city has been on land reclaimed from the ocean. Thirty-five years ago, nearly half of what is now Boston was under water, subject to flood and ebb. Large vessels floated near where the Public Garden is now located, and all that section of the city included between the mill-dam, Pleasant and Washington streets, was water. The site of Pond, Endicott and Merrimack Streets, was then a sheet of water, known as the Mill Pond, which extended from the rear of Leverett Street to Hanover and Salem-st. All east of Ann Street was under water, and North and South Market Streets, the location of our splendid markets, were flats. The greatest batch of made land, however, is found on what is called the South Cove. In 1831 the project of filling up the flats between Essex Street and South Boston Bridge, east of Front Street, (now Harrison Avenue) was started by Charles Ewer, Esq. A company was formed, with a capital of $600,000, and having, with admirable sagacity, effected an arrangement with the Boston and Worcester Railroad corporation, by which the terminus of their road was fixed upon the South Cove forever—for which purpose the South Cove Corporation paid a bonus $75,000—they went rapidly ahead with their immense enterprise, and reclaimed *seventy-seven* acres from the ocean. The property is now worth millions.

The point of most vigorous growth, in Boston, at the present time, is at the extreme South End, in the vicinity of the "Neck." The population is rapidly concentrating in this quarter, while in all other parts of the city, business is making scarcely less rapid inroads upon our residences, converting quiet streets into noisy marts of trade, and levelling the ancient and dignified mansions of the fathers, to make room for the warehouses and shops of the sons. At the South End, the progress of improvement has been very rapid. Blocks, streets, we might almost say wards, have sprung into existence, as if at the touch of the magician's wand. Many of these up-town residences are of the most costly and elegant description, indicating the tendency of our wealthy citizens to yield to the southward current. Churches, school-houses, markets, and public halls keep pace with the growth of the southern wards. The center of population, which a few years ago was in the vicinity of Court Street, is now near Boylston Market. The advancing wave of population has left the venerable Old South church "high and dry," to the north of the actual centre of the city. The city is still reaching out its arms, for further conquests, and will ere long encircle in its embrace its beautiful sister municipality, Roxbury. Then to balance the account, it must take to its bosom the twin cities of Charlestown and Cambridge, on the north and west. Having thus fulfilled its "manifest destiny," Boston may then rank in territory and population, as it long has in business, wealth and enterprise, among the first class cities of the United States. [N. E. Farmer.

Profusion of Life in the Ocean.

Not a shell or a stone is brought up, but is thronged with living beings. Every branch of weed gives shelter to multitudes of creatures—some temporary lodgers, some permanent residents. Life is a parasitic upon life. The surpula builds its stony case on the abode of the shell-fish, and the delicate lace-work of the moss coral overspreads the surpula. Over the stem of the sea-weed creeps the graceful plumes of the zoophyte spring. These, again, are thickly invested by the pretty cells of many smaller species; and they, in turn, minute as they are, often bear in profusion the curious forms of microscopic animalcules. Let us take a stone from the heap that is lying in our boat. It is a perfect museum in itself. It is richly colored in parts by the nullipore—one of the lowest forms of the vegetable life, which does for the scenery of the upper world.

Here is a circular cluster of cells, "looking like beautiful lacework carved in ivory;" here a little saucer of the purest whiteness, containing within it a number of stony tubes, the habitation of a whole company of tiny polyples. A sponge overgrows one portion of the stone, itself the home of a many a living thing; a sea anemone has possession of another. The little encrinite is present, and near it a small star fish. There are worms, too, in plenty, and more of life and beauty besides than we have space to describe. It is pleasant to think of the happy existence which a single stone may support. The forms to which we have chiefly referred are visible to the unassisted eye; but, as Humboldt remarks, "the application of the microscope increases in the most striking manner our impression of the rich luxuriance of animal life on the ocean, and reveals to the astonished senses the consciousness of the universality of being."

AN EXTRAORDINARY FAMILY.—Some particulars, which we think worthy of being embodied in an article, concerning an extraordinary family reared in this County, have lately come to our knowledge. Ephraim Brown, who lived in Sodus, where he died about three years ago, weighed 275 pounds, and was six feet two and a half inches in hight. His wife weighed 200 pounds, and was five feet ten inches in hight. These parents had fifteen children, consisting of nine boys and six girls. When grown, the shortest boy was six feet and one inch in hight, and the tallest six feet three and a half inches; and the average hight of the nine was six feet one inch and a half. The average weight of the boys was 205 pounds. Six of them are living. Three of them reside in this County, one in Onondaga County, and one in Michigan. The average hight of the girls was five feet and eight inches, and the average weight 160 pounds. One of the girls is dead, three reside in this Connty and one in Michigan. The average time between the births of the children was a trifle less than eighteen months. Six of the boys could turn somersets on the ground equal to the best circus performers. In several respects this is one of the most remarkable families of which we have ever heard. [Wayne Co. Whig.

MR. WEBSTER'S LIBRARY.—The library of Mr. Webster, says the Boston *Traveler*, is a manificent room. On three sides of the room extending from the floor to the ceiling, were six splendid library cases, filled with the choicest gems of literature and the ablest productions of law. This favorite apartment of Mr. Webster is adorned with the best portrait of himself that we have ever seen; a portrait of his son, Major Edward Webster, who died in the Mexican war, and also a fine portrait of Lord Ashburton. There is also in this room a bust of Mr. Webster. Every room in the house is furnished in the most magnificent style, and ornamented with busts and paintings of the most distinguished men of all ages, many of which were gifts from the persons themselves to Mr. Webster. Mingled with these were portraits of his children and grand-children. Among these was a small profile, in ancient style, of Mr. Webster's mother, under which, in Mr. Webster's handwriting were these words:—"My excellent mother. D. W."

FAILURE OF A BANKER.—The Geneva (N. Y.) *Gazette* announces the failure of N. B. Kidder, private banker, with liabilities to the amount of $200,000. He was sole or part owner of the Bainbridge Bank and Bank of Hornellsville. The drafts of the Bainbridge Bank upon its correspondent in New York are discredited, but the circulating notes are amply secured, and will, we understand, still be redeemed by the State Bank at Albany. The Hornellsville Bank will not suspend. The notes of this institution are amply secured. The Bainbridge Bank had on the 30th of September a circulation of $89,146, secured by $92,118 New York State stocks at par value. The Hornellsville Bank had $50,064 circulation, secured by $31,033 State and $20,000 United States stocks at par value. The Bank of Monroe at Cuba is also connected with the failures alluded to. Its circulating notes are partly secured by bonds and mortgages, which renders them less safe than those of the banks above named.

MANURE FOR ROSES.—Thomas Rivers, in his last rose-catalogue, says that for a neat surface-dressing for autumnal roses, to be applied late in spring, wood-ashes and guano have proved most excellent fertilizers, in the proportion of half a peck of guano to a bushel of ashes, appplying two quarts of the mixture to each tree, in a circle eighteen inches in diameter round the stem, and and suffering it to remain undisturbed upon the surface. The ashes retain the moisture from the dew and showers, and the effect, in giving a vigorous growth, with an abundant crop of flowers in the autumn, has been very apparent. In our dryer climate, an occasional copius watering, or a thin grass mulching, placed over this compound, would doubtless be of decided benefit, and during dry periods would in fact be indispensable.

FRYING PANS.—*Nichols' Journal* advises Congress to pass an act directing every frying pan in the country to be broken up and sold for old iron, and that no more be manufactured forever. It is alledged that frying is the most unwholesome mode of cooking, as it saturates the food with fat, or butter, renders it tough, covers it with emypreum oil, and makes it utterly unfit for the human stomach. No dyspeptic should ever eat any thing fried, nor any person desirous of avoiding becoming one. Let the food be boiled, roasted, broiled, or baked—any thing but fried—if it is desirable to avoid difficulty of digestion and extend human life.

An improvement in brick presses has been made by Henry Young, and assigned to Reuben Culp, of Degraff, Ohio. It consists in so combining a molding and pressing apparatus with the pug-mill, that the clay is forced by the arms of the latter out of an aperture in its bottom into a suitable charger, where it is pressed by a follower into the brick-molds. A suitable mold carriage is also provided to move in and out laterally beneath the charger, in correspondence to the movement of the follower.

A movement is in progress to secure the passage of an act authorizing the construction of a Ship Canal from the Wallabout Bay, east of the Navy Yard Hospital, though a portion of the Seventh Ward, Brooklyn, and the Third Ward in Williamsburg, to Newtown Creek, at a point near Troutman's Hotel. It is proposed that the canal be constructed fifty feet wide, and of sufficient depth to admit ordinary vessels loaded.

A bright-eyed, curly-haired boy, three years old, was, on his good behavior, promised a child's drum *to-morrow*. Early the next morning he turned to his mother and said: "Marm, is to-day to-morrow?"

Ex-Governor Fish has gone to Havana for the sake of his health by the advice of his physician. He was accompanied by his family.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, asfollows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & CO., and by all Druggists, everywhere.

TRACT OPERATIONS.

To the Editors of the Sabbath Recorder:—

In accordance with a vote taken at the last meeting of the Board of our Tract Society, namely, that I should furnish articles containing incidents of my travels as agent of the Society, I send you the following.

About the last of November, 1854, I left home, with a view of visiting some of the German Seventh-day Baptists in Pennsylvania, and to distribute tracts among them, and at the principal places on the route, particularly in Philadelphia. On my way to the above-named city, I stopped at Bordentown, and staid one night with *the now lamented* Dr. Wm. M. Fahnestock. It is hardly necessary to say, that I had a pleasant visit with Dr. F. and his interesting family. All who had the privilege of a personal acquaintance with them, would expect a visit there would be interesting. Those too who knew the Doctor by the productions of his pen only, would doubtless draw the same conclusion. Religion, of course, was the theme of conversation with us. Science, as connected with religion, was brought in. The subject of Geology was one among the topics had up. The Doctor seemed to think, that what he had written as a sarcasm on the unwarranted assumptions of some foreign geologists, had been in some degree *misapprehended by those who replied to him.* Dr. F. appeared to have the opinion, that his reviewers supposed he wrote in the style which he did, because the doctrines of geologists could not easily be exploded argumentatively; but *he* assigned as a reason of the course he took, that the positions of geologists, which he opposed, were so entirely groundless and untenable, that they neither required nor deserved a more formal or systematic exposition. Whether it is admitted the Doctor was correct or not in his judgment of the merits of the geological doctrines in question, it cannot be denied, that the position of affairs, every way considered, touching the subject of geology, especially in regard to the primary condition of the earth, is such as perfectly to account for Dr. F.'s manner of treating the case. Besides, those acquainted with the Doctor's predominant characteristics of mind, know, that he discovered a vein of humor, wit, and pleasantry, in speaking and writing on almost all subjects, and occasions. It was the natural bent and drift of his mind. It often occurs, that such persons are not understood, or are misunderstood, because, like poets, they employ language in such a manner that it requires a good share of like genius in the reader, to that possessed by the author, in order to a full comprehension of the former by the latter. And it not unfrequently happens, that persons of equal and rare faculties of perception, mistake each other's ironic and playful remarks, for grave and serious imputations, or disguised reflections. Such difficulties are inseparable from the style of Dr. F. He was well aware of that fact, and gave due weight to it in reference to the geological discussion in which he had been engaged. The Doctor (as usual) bestowed upon me every attention that could be expected by a visitor. In the morning, he went with me to the depot, *where our intercourse on earth ended.* But how unconscious was I that such would be the case! I presume it was much the same with him. *He* might have been more thoughtful than I, and probably was. *I* may be more thoughtful in future. I should have mentioned, that the Doctor, learning that I intended to visit the German Seventh-day Baptists in Pennsylvania, gave me letters of introduction to some prominent persons among them. Those letters were of no small use to me.

Exchanging a hearty "good morning" with Dr. F., I took passage for Philadelphia. When I arrived there, I called on Mr. John E. Potter, formerly of Hopkinton, R. I. Mr. P. very generously invited me to put up with him. As it was too late to reach Ephrata before the Sabbath, I accepted Mr. Potter's invitation, and put up with him at the American Hotel, where he was boarding. While in the city I learned that there was a church in Third-st., above Franklin, by the name of "Bible Christians," I had some curiosity to know more about that people, and in my walks for tract distribution, I called to make the acquaintance of their Pastor, the Rev. William Metcalf, M. D. I did not find Mr. M. at home. A distinguishing doctrine of this church is Vegetarianism, to which, I understand, they strictly adhere in practice. I saw a daughter of their pastor, who told me she was thirty years old, and had never tasted any meat. In conversation as to whether they did not find inconveniences in their manner of life, and whether they had any desire to eat meat, this lady replied, that meat was always disgusting to her, and that when she had occasion to go through the markets, it made her feel sick.

Mr. Elsegood, a shop keeper at the corner of Sixth and Walnut streets, told me that he knew a man in the city, by the name of Fowls, carpenter, who kept the seventh day, an old gentleman. I asked if he was not a Jew. Mr. E. said, "No, he is a Christian, a good man, and is often in my shop, and we have much conversation together." I tried to find this man, but did not succeed. Mr. E. said the man had changed his boarding place about that time, and he did not know where he had gone, so as to tell me where I could find him. This Mr. Elsegood told me, also, that *he* had been so troubled about the Sabbath, that he had sometimes thought he should be obliged to keep it, though he should have to beg his bread—that he had talked with his minister on the subject, but could get no satisfaction in regard to the matter. Mr. E. alluded to the necessity of providing for his family, as palliating his neglect of the Sabbath. How many there are who act thus! But how difficult it is to reconcile such a course with the teachings of Christ! Indeed, it seems impossible to reconcile these things.

Mr. Potter informed me, that he knew a man in the city, who, having picked up one of our tracts, some time since, when on one of the eastern thoroughfares, had become much impressed with the importance of the subject, and the force of the arguments brought for the observance of the seventh day. I regret that the brevity of my stay in the city, and the much that I had to do, did not afford an opportunity for us to call on the gentleman together, that I might have an introduction to him, as Mr. Potter proposed.

My visit to Ephrata was very agreeable, to myself at least. It is true, that the church and community there, whether contemplated in a numerical or financial point of view, is on the decline. Nor will the friends there, who treated me so hospitably and kindly, be disappointed as to *my* opinion of the principal *cause* of that state of things, when I say it is, in my judgment, the result of a lack of *Gospel discipline* in the church. They hold to the duty of admonition and reproof for delinquency, or wrong doing, on the part of their members, but seldom, if ever, proceed to the act of exclusion, or suspension from the communion. They are open communionists, in the general acceptation of that phrase, at least in respect to offering those of other denominations the opportunity to partake with them. Other causes have combined with the above to accelerate their decline, but they are only secondary or incidental thereto. That the Society at Ephrata is blessed with ~~members of exalted piety, no one, I presume,~~ will doubt, who witnesses their devotions. The aged pastor of the flock, Elder Andrew Fahnestock, is a man of good endowments by nature, and of a godly deportment. With his light drab suit, his white broad-brimmed hat, and his silver white and long flowing beard and hair, he is, I think, the most truly patriarchal looking man I have ever met with. His religious and Christian simplicity in conversation, add force to his personal appearance. Mr. William Konigmacher, who so hospitably entertained me while in the place, told me the following anecdote, which at the same time illustrates the scrupulous conscientiousness of Elder Fahnestock, and the cunning sometimes employed by artists to accomplish their purposes. Some of Elder F.'s relatives were desirous of having his portrait painted. But the Elder would not consent to it, seeming to regard such things as a breach of the law against making and worshiping images. But the artist, and those in his cause, were not to be thwarted in their plans by such scruples. So, when the Sabbath came, and the Elder stood up to preach, the artist came also, and taking a seat in a convenient place to see, rather than to be seen, with his drawing-paper and pencil in hand, he drew a very accurate likeness of the venerable minister of truth, as he was delivering his message to the people. I did not understand that the Elder was really offended with them for "stealing him" in that way, as he called it, yet they seemed to think he might almost be tempted to spoil the artist's work, if it should fall in his way. They informed me that the Elder had never seen that sketch, though it is carefully preserved by a relative of his, Mr. Joseph Konigmacher, the enterprising proprietor of the thriving watering place kept by him at Ephrata Mountain Springs, where I saw it. Mr. K. intends to have a painting from that sketch in due time. It would be a fine thing to lithograph, and I hope it will occur to Mr. K. to have it done by some competent hand ere long, as it would be just what we should want to insert in the *Seventh-day Baptist Memorial,* in connection with an article on the history of that people.

The music (and I think the hymns) in most common use at Ephrata, were written by Conrad Bisel, the founder of the Society. I had heard Dr. Fahnestock often speak of the excellencies, and peculiarities of that music, though he informed me that they had almost lost the art of performing it. Yet, on hearing them sing, I found that the music had qualities in it which fully justified the Doctor's description of it. It is singularly pleasing and highly promotive of devotional affections and emotions in the mind. One of their members made me a present of a small manuscript volume of that music. All their music books are in manuscript, and many of them are large, and not only beautifully written, but artistically illuminated. L. CRANDALL.

THE SECOND COMING OF CHRIST—NO. 6.

BY B. CLARK.

"Unto them that look for him, shall he appear the second time, without sin unto salvation."

Courteous religious discussion is profitable. I acknowledge already having received benefit in *one* respect from brother Elias Burdick's notice, in the *Recorder* of January 25, of my article in the *Recorder* of December 21st, (not December 1st, as he has it.) Not taking particular notice, I always read or understood the words, "The dead in Christ shall rise *first,*" or *before* the dead out of Christ. But brother B. understands the word "*first*" in the text to mean *before* the living saints are changed, which appears more correct. 1 Thes. 4: 16. Otherwise, the reader will please to take the two above-named articles, and compare them, and see if I have not clearly proved, that there will be a "*first resurrection*" of the saints only—a "*resurrection of the just,*" "at the coming of our Lord Jesus Christ with all his saints," (1 Thes. 3: 13,) before the last or *general* resurrection. Rev. 20: 12. John 5: 28, 29.

Brother Burdick (if I understand him,) thinks that Christ will not *personally* come with his saints and martyrs to reign on the earth, before the last, or (what he calls) the *general* resurrection. I am one of those who understand that Christ will *personally* come, and all his saints and martyrs with him, and reign on the earth one thousand years before the "rest of the dead" will live again, or before the general resurrection.

I have space to notice only a few of his remarks; and as he has introduced Dan. 12: 2, saying, "It can have no reference to the *general* resurrection," I would respectfully ask, To what resurrection does Daniel allude? Again, he asks, "How came the righteous back in their graves again to rise *in the same hour* with the wicked?" (that is, after the 1000 years.) I answer, in his own words, "*All* that are (that is, that shall be at that time) in the graves." Some will die at that time, for it is said, "The child shall die an hundred years old," &c. Isa. 65: 20.

Respecting the Revelation, brother B. says, "And we observe, *first,* that it would be well to wait till the meaning of John's prophetic visions is more generally understood and acknowledged, before we undertake to prove and establish doctrines from any part of them entirely incapable of proof from the plain teachings of the Bible." But Jesus Christ does not tell us to wait some eighteen hundred years to have this book more generally understood and acknowledged before we establish doctrines from it; but, "blessed is he that readeth, and they that hear the words of this prophecy, and keep those things which are written therein; for the time is at hand." If there is any one particular book in the Bible which our Lord Jesus Christ commanded to be written and given to the churches, "*to show unto his servants things which must shortly come to pass,*" surely this "*Revelation of Jesus Christ,* which God gave unto him," is one such book. We may prove doctrine from this book in *accordance* with the doctrine of the prophets and apostles. This book teaches plain, practical, as well as metaphorical doctrine.

Brother B. says his opponent "will hardly say that Jesus will again veil his glory to mingle with sinful men; and unless he does, a mortal man can no more live in his presence than we can live in devouring fire." But the three mortal apostles did not die when they saw his glory on the holy mount. We read that "without holiness no man shall see the Lord." He was seen of "more than five hundred *brethren* at once," after his resurrection. But did he mingle with sinful men after his resurrection?

Brother B. says, "We only observe, *first,* that only the martyrs are embraced in this description; and, *second,* that it is not their whole persons, for the soul of a man cannot be the whole man," &c. Rev. 20: 4. We observe, that if "only the martyrs are embraced," then only that little part of the martyrs which were beheaded—which had their heads taken off—can be embraced, and the millions of martyrs which have been burned, killed, and destroyed otherwise, can have no part nor lot in the matter! Impossible! Let us examine the text, and see who are embraced in it. Verses 4, 5, 6—"And I saw thrones, and *they* sat upon them, and judgment was given unto *them;* and I saw the souls of them that were beheaded for the witness of Jesus, and for the word of God, and which had not worshiped the beast, neither his image, neither had received his mark upon their forehead, or in their hands; and they lived and reigned with Christ a thousand years; but the rest of the dead lived not again until the thousand years were finished. This is the first resurrection. Blessed and holy is he that hath part in the first resurrection; on such the second death hath no power, but they shall be priests of God and of Christ, and shall reign with him a thousand years." Now, to understand this, we look for other Scriptures which will compare with it. We see *others* embraced in this description, before we come to the *martyrs.* There are *thrones,* and some that sat upon them, and judgment was given unto them. We find the words of Christ, and of the prophet Daniel, to agree with John here on the same subject. Christ says, (Luke 22: 28,) the apostles shall "set on thrones, judging the twelve tribes of Israel." Daniel says, (7: 2,) "Judgment was given to the saints of the Most High; and the time came that the saints possessed the kingdom." Here Daniel, Christ, and John, all agree, concerning the reign of Christ and his saints at the first resurrection. But John continues, "And I saw the souls of them that were beheaded for the witness of Jesus, and for the word of God," &c. This appears to be the same company of martyrs mentioned Rev. 6: 9, 11, that were to "rest for a little season," until their brethren should be killed, as they were. But now, in the twentieth chapter of events that should transpire, they are seen to live and reign with Christ in the first resurrection one thousand years.

Of 1 Cor. 15: 23, brother B. says, "The apostle's whole theme is the saints' resurrection, with no reference to the resurrection of the wicked." But the reader will see, that the apostle's theme was to answer some who said "that there is no resurrection of *the dead,*" (verse 12, &c.,) and to show that as by Adam all die, (for it is said, "Dust thou art, and unto dust shalt thou return,") so by Christ shall all be raised again to life—*all,* both the just and the unjust, (verse 21, &c.) "For since *by* man came death, *by* man came also the resurrection of the dead. For as in Adam all die, so in Christ shall all be made alive. But every man in his own order; Christ the first-fruits; afterward they that are Christ's *at his coming.* Then cometh the end, when he shall have delivered up the kingdom to God, even the Father; when he shall have put down all rule, and all authority, and power. For he must reign [this reign is after his coming as above] till he hath put all enemies under his feet. The last enemy that shall be destroyed is death." The apostle is here very plain and comprehensive in few words: 1st. As by, in, or through the act of one man, Adam, all die, return to dust, so by, in, or through the act of one man, Christ, the same shall all be made alive, raised from the dead. 2d. Here are three *orders* of the resurrection, or two after Christ's resurrection, and every man is to be raised in his "own order." Christ is called the first-fruits of the resurrection; "afterward," the next in order, is "the resurrection of the just"—the saints—"they that are Christ's at his coming"—"them that sleep in Jesus will God bring with him." The next in order is at the "end;" that is, the last order of the resurrection. (Rev. 20: 5, 6, 12–15.) 3d. *After* "they that are Christ's at his coming," and *before* the "end," Christ is to put down all rule, authority, and power, and is to *reign* till death is destroyed—"death and hell cast into the lake of fire," when "there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain; for the former things are passed away." Paul does not tell us, here, how long this *reign* of Christ will continue, after his coming with them that are his, before the "end." But John says, "a thousand years." Brother B. says, "And immediately upon the events of this day of the saints resurrection, his mediatorial kingdom is to be delivered up to the Father, with the express statement, 'then cometh the end.'" Now I ask, When cometh the end? Now I ask, When cometh the end? Brother B. says, "*immediately* upon the events of this day of the saints' resurrection," &c. But Paul says, "*when* he shall have delivered up the kingdom to God, even the Father." *When* is that to take place? "*When* he shall have put down all rule, and all authority, and power." *When* is that? "For he must *reign till* he hath put all enemies under his feet"—*till* death, the last enemy, shall be destroyed. All this great work may be done "immediately" after his coming with his saints; but I should think it would take something like "one thousand years."

GOOD REASON FOR LEAVING A PARISH.

When Dr. Chalmers was called from St. John's parish in Glasgow, to the chair of Moral Philosophy in the University of St. Andrews, a public dinner was given him by the magistrates and most distinguished men of the former city. Chalmers—who was as modest as he was great—was embarrassed by these enthusiastic expressions of regard from a people he was about to leave. His heart smote him for tearing himself away from such kind friends, and he thus frankly declares the cause which compelled him to this painful step:

"I am the prime, and in one sense the voluntary, mover in this separation; and, however strong the reasons for it in my own mind, it is impossible fully to present those reasons to others, and to divest it of an air and aspect of unkindness, seeing how I may be thought to have repaid the good will I have so long experienced. The separation may be said to have inflicted a shock on all those ties of friendship that exist between Christian connections; and I feel, under demonstrations of kindness so palpable, that you have heaped coals of fire on my head. If this were a place to enter upon the reasons that have led to my determination. I would state them; but however strong and satisfactory those reasons might be, I should still be left to struggle as I can under the unlooked-for difficulties and delicacies of this manifestation. One feeling, however, I must indulge, which alleviates the pain of this separation. I must say, that *it is not a change of local situatoin, but of life,* that I have deemed essential to my continued existence and usefulness in the world. I would not have given up the parish and congregation of St. John for any other parish and congregation in Scotland. It is not another parish, but another profession, that I have taken up; and short of a change so complete, I would not have been a party to any one whatever; a change which relieves me from all those drafts on my physical strength, that must ultimately have overpowered me. It is an office which combined all the great objects, and was singularly suited for all the duties of a Christian minister; and as I have before said, short of this, nothing on earth should have torn me away."

THE CZAR'S RELIGION.

As the present Eastern war is ostensibly, upon the part of Russia, a contest for the religion of the Greek Church, our readers may be not unwilling to become acquainted with the tenets of that ecclesiastical power which has for ages disputed the sway of a large portion of the eastern hemisphere with the Papal hierarchy. The Greek Church originated in a schism virtually occurring in the fifth century, though not fully consummated until much later, in what was then the Catholic Church, dividing it into the Oriental or Greek, and the Occidental or Latin, the former having its centre in the Patriarch of Constantinople, and the latter in the Bishop of Rome. Originally the Greek division occupied as its territory East Illyria, Greece Proper, with the Morea, and Archipelago, Asia Minor, and Syria, with Palestine, Arabia and Egypt; but the rise and progress of Mohammedanism afterwards deprived it of almost all its provinces in Asia and Africa; and even in Europe the number of its adherents has been diminished by the Turks. This loss, however, was somewhat repaired by the accession of several of the Sclavonic nations, and especially of Russia in the tenth century. Since that time, the latter has been the chief temporal power by which the Oriental Church has been upheld. The Greek Church has never displayed the vigor and aggressiveness which have been so characteristic of Rome—she has seemed rather to be a fossil handed down from one generation to another, than a living organization, aiming to extend her power, and keep pace with the advancing footsteps of nations and civilization. Though usually regarded as purer than the Papal hierarchy, she holds virtually the same tenets, practices many of the same ceremonies, and is equally guilty of betraying the truth by overlaying it with heretical dogmas and unmeaning forms. Both acknowledge the Bible and tradition as the sources of doctrine; both hold to the seven sacraments; both regard confession as indispensable, though in the Greek division the priest must be married; both practice the invocation of saints and the worship of the Virgin, and regard with adoration crosses, relics, &c., and both deny salvation to all who reject their tenets. In the observance of saints' days, festivals, &c., there is a similar agreement—the holy days in the Greek Church being so numerous as to leave but one hundred and eighty working days out of three hundred and sixty-five.

The Greek Church differs from that of Rome in allowing the marriage of the clergy, and to some extent the use of the Scriptures, and in the absence of instrumental music in its services, and ostensibly in denying transubstantiation and purgatory, and forbidding the use of images. As to the latter however, paintings are profusely substituted, and are regarded apparently with the same adoration as the Romanist pays to his statues. Although they have been regarded as denying transubstantiation, one of their councils has declared that "the bread is changed, transubstantiated, transmuted, transformed into the true body and blood of our Lord;" "and that the wine is converted and transubstantiated into the true blood of our Lord." They have no masses for the dead; but the same council, alluded to, declares a probation for certain classes of the dead, and on three separate days prayers are said at the grave of the deceased, in behalf of his soul. The priests, too, claim—going even beyond Rome—power of absolution for the dead as well as the living. The confessional also virtually exists, monasteries abound, and the priests are equally indolent, ignorant, and profligate with those of Rome; the Scriptures are practically unknown to the people—indeed, "*all* Scripture" is forbidden to be "read by the untrained;" infallibility is involved in their dogmas, and they have no less than sixty-seven liturgies. In Russia, as well as other countries, the prayers are uttered in eight tones, and two huge volumes are necessary to prescribe these variations. "It is hardly creditable," says a writer on this subject, "yet a positive fact, that the changes of the service for each day, and for almost every devotion of each day, occupy twenty folio volumes, and these volumes render necessary another, called "The Regulation," as a sort of index to them. The whole system of the Eastern Church is thus minced into endless particularities, or rather puerilities, and it is no easy task to discriminate exactly the measure of its orthodoxy amid such encumbering rubbish. As to marriage, all the priests, except the monks, and those promoted from their number to higher offices, are permitted to marry once, but not a widow; on the death of his wife the priest must relinquish his charge and go into a cloister.

Such is, briefly, the religion which holds in subjection sixty-five millions of people—the religion which Russia, with its gigantic power, endeavors to uphold and propagate—the religion in defense of which, professedly, the Czar has called out his embattled legions, and for whose altars tens of thousands are to be slain. Whatever may be the motives which have led the allies into this strife, it can hardly be doubted that their success would augur more favorably to the advancement the gospel than the triumph of Russia. Whatever may be the machinations of France for favoring the interests of Rome, England is too wary not to look out for her share of the spoils; and where she plants her standard, with all her faults, she will secure an open door for civilization and the Bible. The defeat of Russia, by any Protestant power, cannot result otherwise than in weakening the miserable structure of that Church, whose light to its enthralled millions has for so many generations been darkness.

A GERMAN COLPORTEUR.

A German colporteur, who for the past two seasons labored in the copper region on Lake Superior, returned to his field after attending the Colporteur Convention at Chicago. On landing late Saturday evening, he was glad to hear that there were there four persons from the neighborhood of his native place in Germany. One of them received him very kindly, and invited him to stay with him, but learning that he was a colporteur, he withdrew the offer. As his other countrymen were also infidels, he was left without a lodging for the Sunday. He however went several miles in the mountains to one of the mines, where he found a Roman Catholic family, who received him very kindly, though it was late at night.

The next day he preached twice to his countrymen, most of whom were Roman Catholics. They were much pleased, and raised two dollars, which they gave him for his personal use. He declined accepting of it, telling them that he did not preach for money, but to save their souls from eternal destruction. The next day he gave them books for their donation.

In visiting among the mines, he entered a house where a number of infidels were assembled, who expressed a desire to hang up and destroy all the priests in the country. He began to preach the gospel to them, and many felt its power. Instead of offering him violence, they invited him to dine with them, and purchased several books of him.

On the evening of the 4th of July, he was at a place where many were assembled to drink and dance. He had a full box of books, and though, as he says, "the evil one would tell me, here is not the place to sell books and to save souls, I commenced speaking with the miners about heavenly things, and in about an hour I had sold all my books, with the box, and went home with a joy and peace in my heart which the dancing people did not and could not feel."

On visiting a settlement where he had been the year before, many Roman Catholics and infidels received him kindly, and he had the evidence that his labors had been blessed. An American, whose wife was a Roman Catholic German, anxious to bring her out of her su~~perstitious prejudices, had bought several~~ good books, and now took the American Messenger. He was kindly and hospitably received by them on this visit, and was told by the wife, that she no longer believed in the Pope and his doctrine. Showing him one of the volumes her husband had bought, she said, "This precious book is now my favorite book." She bought several other books. Had it not been for the books, he thinks she would probably have fallen from her superstition and infidelity.

On visiting an intemperate Roman Catholic, who the year before would not buy any books, he offered him his books again, but he and his companions refused to buy. "Countryman," said the colporteur, "here is just the book you need to free you from your dreadful vice. It is worth a thousand dollars to you, and only costs you ten cents." He looked up, and probably feeling that the colporteur spoke the truth, and that there was no other escape, he stretched out his hand for the book, opened it, and began to read, for he was now sober. After reading a little, he paid for it; then reading a little more, he exclaimed, "Boys, these are nice books; buy some from this man." Several stopped their work and came after the books to read them, and bought many. After beseeching them to repent and believe in the Lord Jesus Christ, the colporteur left them.

In six weeks the colporteur sold nearly $200 worth of books, and procured 175 subscribers for the Messenger and Child's Paper. He was more kindly received, and met with better success, than in the previous year, when he found wickedness everywhere prevailing.

HARD CASES.

In every congregation there are some hearers for whom ministers and others have but little hope. The force of early training, perhaps, brings them to the house of worship, but the seed falls not in good ground. For a time ministers feel for them, and cherish hope that they may be reached. After a while they yield to despondency, and such characters are given up for lost. How can a minister permit himself to be thus faithless and recreant to his trust? His sermons should be studied, in view of the peculiar traits, habits, and tastes of such men. He should labor and pray to be able to present such instructions and warnings as may reach such cases. The most successful ministers, and the same is true of every laborer in the vineyard, adopt it as a rule, ever to be in pursuit of particular persons. This will give earnestness and point to preaching, and such persons will not long remain unaffected.

Dr. Griffin, speaking of his discourse, published in the Murray Street Lectures, says:

"I wrote that sermon with my eye on Dr. W., then an infidel, and sick with what proved to be his last sickness. I was most deeply affected through the whole of it, and wrote it with a strong desire for the conviction and salvation of Dr. W. He had just before resisted my arguments with vehemence, if not with passion. After I had finished my sermon, I read it to him, at two different sittings, half at a time. He never resisted afterwards; and gave such evidence of his conversion and faith, that his pious wife, and other pious friends, have no doubt that he went to heaven."

LIBERALITY TO ERRORISTS.

It is recorded of Doctor Gill, that he would allow no man to preach in his pulpit, whom he knew to be unsound in doctrine. There were certain great points, which he deemed vital to the Christian religion, and if a man was not right on these points, he looked upon him as unfit to stand before the people as their instructor, and as needing, rather, to be instructed himself. Accordingly, when a minister of this character presented himself at the Doctor's place of worship, he was allowed to take his seat with the hearers, and to sit there till the close of service.

Perhaps some may think that this was unnecessary rigidness, not to say bigotry. But to whatever extreme the good old Doctor may have verged, in this matter, we think it was far safer, and better for the interests of Zion, than that excess of liberality, which offers an open door for the discussion of every question that the caprice, or corrupt principles, of the enemies of truth may dictate. It is true, that a good cause need not fear discussion; and on this account, some would have our religious assemblies made the occasion of debating with infidels, of every sort and grade, whatever questions they may choose to introduce. Not only so, but the champions of the various sects claiming to be Christian must be invited, or at least welcomed, into our temples of worship, that they may have the privilege of setting forth their peculiarities, and that we may try our controversial skill with them; and all for the purpose of showing that truth is bold, and does not shun examination.

But, bold as the truth is, it should never be forgotten, that "men LOVE darkness rather than light." Hence, it is a very questionable kind of policy, to say the least, to lay before the people of a religious assembly all the arguments by which a bad cause is sustained, unless we feel the greatest moral certainty of our ability to confute those arguments, and to present the cause of truth in such a light as to leave the hearers without the least shadow of excuse. For "because their deeds are evil," they will receive the error, and reject the truth. They love the error best, and greedily avail themselves of whatever will comfort them in it. They will not receive the truth, because they do not wish to—a disposition which might be overcome, if plied with nothing but sound instruction, but which is likely always to govern them, if their minds are drawn alternately to truth and error.

To grapple with error, and overcome it, is a healthful exercise; but there is no little danger, that we may be overpowered in the contest. Whoever engages in such an undertaking, should be first qualified for it. It would be an ill-judged policy to set little children, who had never been trained in the knowledge of truth, to combating important errors, in the expectation that, if they were successful, they would be so much the stronger in the truth. Reason teaches, that they are not qualified for any such contests, till after their minds have become well stored with sound principles; and that, if they should undertake them, the almost certain result would be their moral ruin.

So, in the church, there are but few, comparatively, who are sufficiently well grounded in the truth to be competent for a discussion with an errorist, or even to listen to such a discussion, without danger. For one full grown man, there are ten babes in Christian knowledge, who require to be guarded with the utmost care, fed with the sincere milk of the word, and kept in comparative ignorance of the cunning sophistry by which error always supports its pretensions. They cannot hear the seductive voice of error, without imminent risk to their souls, any more than Eve could listen to the serpent in safety. The Apostle, indeed, holds a warning on this very point, "lest by any means, as the serpent beguiled Eve through his subtilty, so your minds should be corrupted from the simplicity that is in Christ." 2 Cor. 11 : 3.

The Christian Church, too, is designed as a school for the instruction of its members in the practice of those virtues which adorn our every-day life, and for the promotion of spiritual communion with God, the Father of all. The saints assemble, not merely to be instructed in doctrine, but to have their consciences probed, their devotion awakened, and their longings after Christ satisfied. And are these objects to be compassed by having the place of worship transformed into an arena for controversy, where errorists of all classes may have liberty to hold forth, and where ridicule and vile reproach of the gospel shall be as free as its defense? We do not believe in the wisdom of such a policy, and would much prefer the rigidness of Dr. Gill.

Truth and Error must, necessarily, often meet in battle. And it is well for the gospel minister to be well armed, and prepared for the contest, whenever it may be forced upon him. But to order our religious assemblies in such a way, that the errorist shall not only have liberty to come in, and advocate his pernicious principles, but even be invited to do so, is, in our opinion, taking the very course to destroy their usefulness, and must, soon or late, be followed by fearful consequences.

T. B. B.

THE CHURCH AND THE SCHOOL.

Historic.

Modern civilization is a development, an out-growth of Christianity. The Christian school, likewise, is at once the offspring of the church, and one of her most efficient agents in the civilization of man. Christianity touches upon every field of science, and every subject of learning. It lays every department of thought under contribution for its illucidation and advancement. The very idea of giving the Bible to man to read, is the key that unlocks all knowledge, and produces, as a legitimate and necessary consequence, schools and learning.

That the school of the present is but an out-growth of the church, is a historic fact. Schools for the popular instruction of proselytes and youth, and also others for giving to religious teachers a scientific knowledge of Christian doctrines, were early established. In the language of the Secretary of the Society for the Promotion of Collegiate and Theological Education, "Whether or not the opinion of Mosheim is entitled to credit, that the apostles of Christ undoubtedly both set up for themselves, and directed others to set up, seminaries, in which young men devoted to the sacred office were taught whatever was necessary to qualify them properly for it, there is clear evidence that, before the close of the second century, a regular theological school was in successful operation at Alexandria, and which, for more than two hundred years, exerted a prodigious influence throughout the Christian church. This shows how early the church felt the need of regular and established institutions for the training of her ministry." "Other schools, similar to that at Alexandria, are known to have existed in the early ages of the church. One was founded at Caesarea, about A. D. 290, and furnished with a library; another was founded at Antioch by learned presbyters; and another at Edessa about A. D. 360; and also at various places throughout the Eastern Church, and in the West, as at Rome and Carthage." To some or all of these schools flocked learned Pagans and young men desirous of being instructed in the doctrines of Christianity, and of becoming teachers in the church. Instruction was given in the Scriptures, in the duties of religion and Christian manners. They were long the "nurseries of piety and learning." "Although," says a writer in the *Bibliotheca Sacra*, "we find no traces of schools so celebrated in the West, yet every church was virtually a school, and in it, under the superintendence of the bishops, young men of promise were educated in Christian principles and letters. Though the schools were generally common to all the faithful, this could not prevent the bishops having ordinarily with them a certain number of young men, whom they instructed with particular care, as their children, and who, in process of time, became themselves masters. It was thus that the great luminaries of the occidental world were formed, even down to the fourth and fifth centuries." "The church was constrained, therefore, by her circumstances, as well as inspired by the liberalizing atmosphere of a free Christianity, which she had begun to breathe, to take measures for the education of her own sons. From almost the beginning, even in deep poverty and distraction, the early Christians are believed to have taught their children the principles of Christianity, and laid the foundations for their being intelligent and worthy members of the churches." "During the first three or four hundred years, then, of the Christian era, the church had evidently the means of furnishing herself with a competent ministry—its first teachers enjoying the instructions of the Saviour himself—the next generation educated by inspired apostles—then many pagan philosophers and other learned men of Greece and Rome converted to Christianity, were soon qualified to lead in its affairs, and finally enormous sums, with almost unlimited discretion, were placed in the hands of the Bishops, whose business it was, in looking after the general interests of the church, to provide for the supply of its sacred offices, and who, in schools connected with their churches, and in their own families, could educate charitably or otherwise as the circumstances might be, a competent number of excellent men for these high trusts."

"Opportunities were not wanting for suitable preparatory instruction. We have already seen, that in every diocese there was at least one general or cathedral school, designed not only to instruct catechumens, of whatever age, in the faith, but also to carry forward in the principles of Christian learning, those young men who aspired to the sacred profession. These schools were, at first, under the immediate personal superintendence of the bishops. But when these officers came afterwards to be involved more and more in the complicated affairs of the church, they appointed learned men, to act under their general supervision, as teachers of the young. With such masters, the cathedral schools were gradually formed into organizations, which were the germs or foreshadowings of those great seminaries of learning which adorn modern ages. It does not appear, that the profane sciences were taught in Christian schools previous to the fourth century. But from that time Christians availed themselves, to a considerable extent, of the famous pagan classical seminaries which flourished in all the great cities of civilized Europe, Christian masters, also, though professedly confining themselves to theology and morality, introduced human science as not without its utility in enabling one to understand and defend the dogmas of the church."

In these seminaries of the pagan world were taught philosophy, medicine, jurisprudence, literature, grammar, and astrology. They were under the especial patronage of kings and emperors. Ample salaries and rare privileges were conferred upon the teachers. It was ordained by several emperors, that the professors, with their families, be exempt from all public duties, and all taxes, and that they be not obliged to entertain guests, nor be harassed by law, and if any one annoyed them, the offenders were to be prosecuted by the magistrates, to the end that the teachers might be spared all trouble, and might have facility to instruct many people.[*]

But the schools thus endowed with costly libraries, competent and well-paid instructors, and all of the educational facilities afforded by the age, were under the control of pagans. The professors were pagans, and although Christians had in most instances, at least, the lawful right to attend, yet such were the prejudices and influences brought to bear against them, that very few availed themselves of their rights in the "great schools." Very few other sources for the study of science and literature were open to them. Christianity struggled on amid its disadvantages. Decay and death seized upon the pagan institutions of learning. The dark night of the middle ages drew on. The civilized world went down amid the overwhelming incursions of northern hordes. Pagan seminaries, being without any inherent life-giving power, and opposed by Christians, perished in the general shipwreck. Not so with the religious society. Inspired by a great and living principle, it incessantly labored and struggled to instruct, convert the world. In the church, there was as yet much life, thought, activity. Civil society, about this time, with its institutions, and teachers, was in a state of inertia and decay. Religious society possessed earnestness, zeal, perhaps progress. Pagan literature gradually degenerated into a tame and nerveless system, of effeminate forms, fancies, and routines. Christian literature, on the other hand, abounded more and more in the productions of great philosophers, statesmen, and divines. "It agitated the most important questions, the most pressing interests."

Monasteries began to be established in the West, where they at once assumed more of a liberalizing, educational, and elevating character, than in the East. "They were designed for religious men, who, in retirement from the world, might find enjoyment and discharge duty in Christian studies, devotional exercises, self-discipline, useful labor, and beneficent deeds. Religion fled to them as a covert from the times, and literature and science were saved from utter destruction, by finding an asylum in these retreats. Indeed, of many of them, schools were at first the leading characteristics." Here men meditated, discussed, taught. Each monastery had its school for the instruction of youth. Many of the finest minds of the times were thus educated. These institutions rapidly increased, until they spread like a net-work all over Europe. Episcopal or cathedral schools also existed, at least one in each diocese, in which young men preparing for the ministry, were instructed in those studies deemed of importance for the sacred office. These, in connection with the rural schools, gave a religious character to the learning and literature of the middle ages.

Guizot informs us, that at the end of the fourth century, two literatures, two philosophies, marched, as it were, side by side—profane literature and sacred literature, pagan philosophy and Christian theology. It is true that profane literature and pagan philosophy were dying, but still they breathed. Soon they disappear. Sacred literature and Christian theology alone remain. Intellectual development is in the religious sphere. Come down to the seventh century, Christian theology and sacred literature themselves have disappeared. Nothing but sermons, legends, monuments of an entirely practical activity, devoted to the wants of actual life, and foreign to research, investigation and progress. Here the dark ages had reached their darkest point, the nadir of descent. Henceforward the light began to break in, the scene began to brighten, an upward movement commenced.

---

[*] Guizot's History of Civilization, vol. 2, lect. 4.

WANTS OF MR. ONCKEN.

Mr. Wm. H. Wyckoff, Corresponding Secretary of the American Bible Union, sends us for publication the following letter from the German Missionary Oncken:—

HAMBURG, 20th January, 1855.

Wm. H. Wykoff, Esq., Cor. Sec. of the American Bible Union, New York:

MY BELOVED BROTHER,—Though only just returned from Berlin, where we had an interview with the King, and in a feeble state of health, I cannot refrain from sending a few words in reply to your favor of December 18th, 1854.

[In that letter occurs the following: "I think it right to inform you of the present state of financial matters with us. I fear that only the beginning of troubles has come upon us. Every department of benevolent effort is already affected. We have paid for German Bible operations over $5,000. I hoped we would be able to make it $10,000 by July next. This hope indeed has not entirely vanished. My belief is, that before the next Anniversary we will be able to do it. But it will come in later than I anticipated. To give you some idea of the pecuniary distress, I will copy from a letter received since I commenced writing. A brother says: My progress is onward. The Union is fast gaining favor among the people. The masses, wherever I go, are for it. Nearly every Baptist, after hearing the subject, is decidedly a Bible Union man. But I can't get money. It is not now to be had. Another writes: I would love to do something for our dear brother Oncken. The Lord bless that dear man of God. But it is hard to obtain money for any thing."]

The contents of the above have greatly depressed my spirits, and are calculated to paralyze my efforts in the cause of Bible circulation. I am now just on the point of raising steam and to set a powerful printing press into operation. Five brethren, you know, have already been engaged, and are in the field hard at work as colporteurs of the American Bible Union. *Twenty thousand Bibles* have been circulated already, and an edition of *five thousand more* is in the press. The paper for *another five thousand* has been, already purchased. But in the midst of it all comes your discouraging letter. Now picture to yourself my feelings. What shall I do? Any state is preferable to this uncertainty. And I do beg of you to state as early as possible what I may expect from your Board. As I am at present fully *one thousand dollars* in advance, and the paper for *ten thousand Bibles* has been purchased, of which one half is now in the printers' hands, I should feel greatly obliged for any remittance that could be made just now.

But my head and nerves are at present in such a condition that I must break off here. With love to yourself and all the brethren,

Your affectionate brother, J. G. ONCKEN.

CHRISTIANITY AND WAR.

Had Paul lived to see the union of Christianity and War, he would never have declared that there could be no union between Christ and Belial, or concord between a believer and an infidel. But to such an intimate union have Christianity and War arrived, that Mars even now dictates prayers to be said by Christian soldiers, and lays claim to the honor of fighting for Christ. Surely, if we are living in the *dawn* of the millennium, what will be its *meridian glory!* I can only say, From it, good Lord, deliver us. I used to think that a war camp was not the most favorable place for prayer-meetings and revivals; but from reports from the war department, I must have been mistaken. Hear the report:—

> "The battle of Inkermann was preceded by a remarkable intercessory meeting, at which ministers and other persons of various denominations assemble to commend the allied arms to the blessing of the God of battle—and while the hostile armies were actually contending on the field, the Christians at Constantinople were commending them to the care of Heaven. During the entire progress of that tremendous conflict, until victory crowned the cause of right, were its brave champions sustained by the intercessions of their fellow Christians."
>
> "Since the days of Cromwell there has not existed a body of troops so enlightened on religious topics, or *so well disposed towards the gospel*, as that comprising the army before Sevastopol. In prospect of the battle of Alma, they committed themselves in solemn prayer to the Divine protection; and since the Crimean army took the field, the most *gratifying proofs* have been given of the presence of Divine influence among them. On Sunday, June 18, and on a former occasion, the Bishop of London confirmed about 1300 of the Guard."

This is English Christianity. Hear the Russian report. The Russian Archbishop says:—

> "In heaven it has been decreed, that the sceptre to rule over the world shall remain alone in the right hand of the Lord's anointed, the Autocrat of all the Russias."

To the soldiers he said:

> "If you are the conquerors, great joy is in preparation for you. The English heretics have in their camp an enormous sum, which God will give into your hands. The Emperor makes you a present of a third part of this tremendous sum. As to those of you *chosen by God for a glorious death, your Emperor will permit you to dispose of your share in the booty by will.*"

What a noble fellow that old Czar must be. I suppose Her Most Christian Majesty will do the same, and perhaps the Emperor of France may too; and I think the Sublime Porte ought to do as much, especially as he enjoys the benefit of so many Christian prayer-meetings in his metropolis, and such a pious army. If he does not, he will be an infidel surely.

Before Nicholas left St. Petersburgh, in November last, a solemn religious service was held in the presence of 35,000 troops, when he and his two sons and the troops all knelt down on the field and invoked the blessing of Heaven upon their arms.

Here, then, are three Christian nations in hostile array—one against two and two against one—each praying to Omnipotence to aid their side. Now suppose that these prayers are effectual, what will be the result, but that Omnipotence will be arrayed against itself. Perhaps that may account for the continuance of the siege. But as the allies have this advantage, viz. two Christian nations praying against one, the allies may yet be successful, especially as the Turks can rely on their old Prophet.

I should not wonder, if these war-camp prayer-meetings and revivals should have an effect to lead many Christians to conclude, that the camp and battle field were favorable to the promotion of religion, and that wars were ordered by the God of battles for that very purpose. Why not? It has been argued by ministers, that God designed and decreed the slave-trade, so that some of the Africans might thereby become missionaries to their own countrymen. Some have thought that God had the introduction of religion into Mexico in view in the Mexican war. It is admitted, that the culprit many times is brought to a sense of his sins by seeing the gallows staring him in the face. Perhaps such scenes as transpired at Alma, Inkermann, Sevastopol, St. Juan, Buena Vista, Waterloo, and other places of human butchery, may have a similar effect. I know that Paul thought it wrong to do evil that good might come. But Paul had some strange notions. He thought it best to overcome evil with good, and Christ seems to have been of the same mind. But we live in the age of progress. Only 30,000,000 of dollars, annually, I believe, is now necessary for Congress to defend our country with, in connection with bomb-shells, cannons, mortars, guns, the army and navy, and the chaplains. Only $30,000,000 now, after all the revivals of the past half century. But no man can tell what we should have needed without their influence, or the vast quantity of religion which this nation has. It occurs to me, however, on reflection, that if we go on in this way, the "good time coming" is a great way off, and that it will require nearly all our iron and steel to make swords and spears. But we can use the old Dutch plough, and pewter jack-knife. So let them have the 30,000,000 dollars for war.

S. S. GRISWOLD.

To the Editors of the Sabbath Recorder:—

Being aware that there is a diversity of opinions, conflicting each with the other, entertained in the Christian Church in regard to the moral condition of unconscious infants, and considering the importance of the subject, I am induced to refer it to your readers through the columns of the *Sabbath Recorder*, hoping that some of them will give us light on the subject. The question proposed is, How, and to what extent, is the infant affected by the sin or transgression of Adam? How, and to what extent, restored by Christ? When dying in infancy, if they are saved through or by the atonement of Christ, how and when applied? If you deem the subject above referred to of sufficient interest, please publish the above.

M. W.

VERONA MILLS, 21st Feb., 1855.

THE CRISIS IN CHINA.—Since our publication, says the N. Y. *Observer*, of a long letter from China, giving an account of the revolution, and setting forth that the hope of China is in the success of the Tae-Ping-Wang rebellion, the Rev. I. J. Roberts, a Baptist missionary to the Chinese, has arrived in this city from the field of his labors. The object of his return home, where he designs to make only a temporary stay, is to seek men and means in aid of the missionary work in China. For this purpose, he makes an appeal to his denomination through the *Recorder and Register*, in which he gives some facts concerning the revolution, that confirm our correspondent's statements, and are hopeful of the freedom of China. He says:—

> 1. It is a fact that Tae-Ping-Wang is so firmly established at Nanking that no Tartar force will ever be able to expel him.
>
> 2. It is a fact that the revolutionary spirit is so universally diffused through China that no foreign power, if directed against the patriots, (and God forbid that such should be allowed,) could extinguish it; if driven out of Nanking it would come to consummation elsewhere.
>
> 3. It is a fact that Tae Ping-Wang destroys idols and publishes the Scriptures without note or comment; hence, that his revolution gives greater promise for China's renovation and advancement than any thing we had ever dreamed of before.
>
> 4. It is a fact that he and his party have solicited the aiding co-operation of wise counsellors, skillful physicians, surgeons, and *missionaries*, and offered a large money inducement.

DEFEAT OF THE NEW JERSEY PROHIBITORY BILL.—The following scene in the Senate of the New Jersey Legislature, upon the defeat of the Prohibitory Bill, on Thursday, Feb. 22d, is described by the Trenton correspondent of the *Newark Mercury*:

> "In the afternoon, long before 3 o'clock, the passages leading to the galleries were completely jammed with ladies, and the doors being opened, there ensued a great scramble for seats. It seemed as if the fair ones had turned out *en masse* for the purpose of awing the 'grave and reverend' Senators into the enactment of the desired law. The lobbies were also crowded long before the opening of the afternoon session, and hundreds were obliged to go away as they came, being unable to obtain admittance. A large proportion of those in the lobbies were ladies who could not get into the gallery.
>
> "Speeches were made on the question by Messrs. Howell, Martin, I. Bonnell, Franklin, Hoxsey and Smith. Messrs. Howell, Franklin and Hoxsey spoke in favor of the bill, and Messrs. I. Bonnell, Martin and Smith against it. The speech of Mr. Howell was a fervent and manly appeal in behalf of those whose lives are resting under the blight and shame of drunkenness, and presented the strongest reasons why the law should be passed. Mr. H. was frequently applauded during the delivery of his remarks. Mr. Franklin's remarks were also characterized by great fervency and force. Mr. Hoxsey was argumentative and energetic, and was listened to with great attention. The bill was finally lost by a vote of 10 to 9.

TRACTS IN TURKEY.—There were printed last year at the mission press in Constantinople 5,268,000 pages, in the Armenian, Armeno-Turkish, Greek and Hebrew-Spanish languages; of which 2,132,000 were of the Scriptures. This agency will probably be far more extensively employed during the present year. At a recent weekly business meeting of the station, letters were read from the British and Foreign Bible Society, offering funds for printing two editions of the Bible in different languages, and one of the New Testament; and from the London Religious Tract Society, expressing the desire of the committee to participate in the great work, and requesting to know in what way they may co-operate conformably to the principles of their institution.

SENATOR CHASE ON THE FUGITIVE SLAVE LAW.—Under date of Washington, Feb. 7th, Senator Chase wrote to Sherman M. Booth, enclosing ten dollars to help pay his fine for assisting a fugitive slave. We copy a paragraph of his letter:—

> The telegraph flashes to us the news that the Supreme Court of Wisconsin has delivered you out of prison. If this be so, as I most earnestly hope it may be, that Court has the honor which I trusted the Supreme Court of Ohio might have had, of first practically declaring the unconstitutionally of the Fugitive Slave act. The decision may bring on a conflict between the State and Federal Judiciary, in which the State Court will certainly have the right side, and, doubtless, the courage to maintain it. Wisconsin now presents a most interesting spectacle of constitutional right and eternal justice, opposed to unconstitutional usurpation and arbitrary power. The progress and results of the struggle most deeply interest all good men and true patriots."

TRACTS FOR MORMONS.—A Mormonite has been convinced of his error by the tracts of the London Religious Tract Society, and has been the means of causing more than 100 persons, through the tracts against Mormonism, to renounce the above belief; and this has so weakened them that they have been obliged to give up two of their places of meeting, one in Bermondsey street. "The Mormonites have been driven off my district," says a distributor, "more than once by these two tracts. There is not a Mormon in the district now, nor have the party attempted anything here for some months past."

BIBLES AT NICE.—When Lord Shaftesbury was at Nice, two or three years ago, he took a step of which some sticklers for formality complained. He listened to the complaints made with reference to the want of Bibles, and, acting with that boldness which generally characterizes true wisdom, he took it on his own responsibility, as President of the British and Foreign Bible Society, to order the immediate issue of 20,000 Italian Bibles. This order was carried out through the instrumentality of the Rev. W. Carus Wilson and others. The Bibles were circulated throughout Piedmont and the North of Italy.

AMERICAN MISSIONARIES AND RUSSIAN AGENTS.—A correspondent of the *London Daily Times* at Mosul reports, on the 4th of December, that through the exertions of the Russian envoy in Persia, M. Rhanikoff, the Shah has interfered with the proceedings of the American missionaries among the Nestorians in and around Oroomiah, prohibiting their books and teaching, and limiting the number of their schools. The missionaries, however, are well protected by the British Consul at Tabriz.

DR. FAHNESTOCK'S LIBRARY.—The Medical Library of the late Dr. Wm. M. Fahnestock, of Bordentown, N. J., is to be sold at public sale, by order of Administrator, on Thursday evening, March 15th, at the auction rooms of Thomas & Son, 67 and 69 South Fourth-street, Philadelphia. His Miscellaneous Library is to be sold at the same place on the following evening. Orders for purchases will be executed by the Auctioneers free of charge for gentlemen unable to attend the sale.

REVIVAL AT NEW MARKET, N. J.—We understand that the church at New Market, N. J., are enjoying a precious revival. On Sixth-day last twelve were baptized and have been added to the church; and on Fifth-day next they contemplate visiting again the water side, when more will follow their Saviour, and symbolize his burial and resurrection, and come forth to newness of life.

PROHIBITION IN NEW YORK.—The Prohibitory Liquor Bill passed the Assembly of New York, last week, by a vote of 80 yeas to 46 nays. It is now before the Senate, where strong hopes are entertained that it will triumph.

A WHOLESOME VERDICT.—The case of Elizabeth Jennings vs. the Third-av Railroad Company, was tried last week in the Brooklyn Circuit, before Judge Rockwell. The plaintiff is a colored lady, a teacher in one of the public schools, and an organist in one of the churches in New York. She got upon one of the Company's cars last summer, on Sunday, to ride to church. The conductor finally undertook to get her off, first alledging the car was full, and when this was shown to be false, he pretended the other passengers were displeased at her presence; but as she saw nothing of that, and insisted on her right, he took hold of her by force to expel her. She resisted; they got her down on the platform, jammed her bonnet, soiled her dress, and injured her person. Soon a crowd gathered around, but she effectually resisted, and they were not able to get her off. Finally, when the car had gone on further, they got the aid of a policeman, and succeeded in getting her from the car. She instructed her attorneys, Messrs. Culver, Patton, and Arthur, to prosecute the Company, together with the driver and conductor. The two latter interposed no defense; the Company took issue, and the case was brought to trial. Judge Rockwell gave a very clear and able charge, instructing the Jury, that the Company were liable for the acts of their agents, whether committed carelessly and negligently, or willfully and maliciously; that they were common-carriers, and as such bound to carry all respectable persons; *that colored persons, if sober, well-behaved, and free from disease*, had the same rights as others, and could neither be excluded by *any rules of the Company, nor by force or violence*; and in case of such expulsion or exclusion, the Company was liable. The plaintiff claimed $500 in her complaint, and a majority of the Jury were for giving her the full amount; but others maintained some peculiar notions as to colored people's rights, and they finally agreed on $225, on which the Court added ten per cent. besides the costs.

Two Philadelphia gentlemen recently had a dispute about the ownership of a certain sum of money. After considerable discussion, they compromised the matter by remitting the amount to the Home Missionary Society.

General Intelligence.

Abstract of Proceedings in Congress.

SECOND-DAY, FEB. 19.

In the **Senate**, after the reception of petitions, the Pacific Railroad bill was taken up—the bill providing for three Roads. Mr. Butler thought the scheme too expensive. Mr. Geyer stated the cost at $400,000,000. He wanted to know where iron was to be obtained to supply the demand for all our roads. Mr. Pearce opposed the bill. Mr. Seward supported it, saying that the country would never be in better condition to commence. Mr. Mason was also in its favor. The bill finally passed, 24 to 21.

In the **House of Representatives**, the Veto Message was first in order, and was settled by the application of the Previous Question; when the attempt to pass the Spoliation bill in spite of the veto failed by twenty votes, the Yeas being 113 and the Nays 86—133 being required in the affirmative by the two-thirds rule. The Civil and Diplomatic Appropriation bill came up immediately after the vote, and an attempt was made to attach the French Spoliation bill as an amendment. The motion was ruled out of order, and, after an exciting debate, the Chair's ruling was sustained, and the House adjournsd.

THIRD-DAY, FEB. 20.

In the **Senate**, Mr. Benjamin and Mr. Seward occupied a considerable portion of the session in a discussion upon the passenger bills. The whole subject was finally dropped, and will not probably be revived this session. After a long speech on foreign relations by Mr. Cass, a similar effort by Mr. Mason, a few words from Mr. Clayton, and an executive session, the Senate adjourned.

In the **House**, Mr. Bennett's bill, granting lands equally to the States for School and Railroad purposes, was laid on the table. Some unimportant amendments were made to the graduation law. The Civil and Diplomatic Appropriation bill then came up in Committee, and after the addition of a few appropriations for public buildings in Washington, the House adjourned.

FOURTH-DAY, FEB. 21.

The **Senate** resolved to meet hereafter at 11 o'clock. The Conference Committee on the Texas Appropriation bill reported $7,500,000 as the sum fixed upon. After debate the Senate agreed with the report. The State Department asked the insertion of an item in the Civil and Diplomatic Appropriation bill to provide for the expected return of the Minister at London. The Lobos Islands correspondence was called for. The bill to extend credit for duties on railroad iron was taken up. Mr. Wilson, the new Senator from Massachusetts, took occasion to say that he was in favor of Free trade, and, in reply to a fling from Mr. Brodhead, said the efforts of the Senators and representatives from Massachusetts hereafter in Congress will be on the side of human liberty. The debate had not concluded when the Senate adjourned.

In the **House**, the bill to explain certain revenue laws, and relieve vessels from seizure, was passed. The Texas Debt Conference Committee reported, (same as Senate,) and the report was adopted, 123 to 77. After some talk on the Civil Appropriation bill, the House adjourned.

FIFTH-DAY, FEB. 22.

In the **Senate**, Mr. Stuart offered a resolution to build a Slave Prison in Michigan. It was sent to the Judiciary Committee. Petitions for the repeal of the Fugitive Act were laid on the table. The Invalid Pension bill, as amended by the House, was passed. The bill to extend credit for duties on Railroad Iron was also adopted. Also the bill to provide for the settlement of certain Revolutionary Officers' claims. The House bill for four more Revenue Cutters went through, and then for want of a quorum the Senate adjourned.

In the **House**, the Swamp Lands bill was killed by adopting the Conference Committee's report disagreeing with the amendments of both Houses. The bill to give Alabama lands for railroad purposes was laid on the table. The Civil and Diplomatic Appropriation bill was further discussed, but nothing done beyond offering amendments, which were ruled out of order.

SIXTH-DAY, FEB. 23.

In the **Senate**, a resolution requesting the President of the Senate and the Speaker of the House to adjourn Congress at 12 o'clock on the night of Saturday, the 3d of March, was adopted. The bill to Protect Officers and others acting under the authority of the United States, was taken up, and a long and spicy debate ensued.

In the **House**, the bill to preserve life on steamers, the Pacific Telegraph bill, and the bill to impose stamp duty on small paper currency, were referred to the Committee of the Whole. The Colt Patent Bribery Committee was discharged. The bill to settle claims in regard to slaves on board the Enterprise and Creole was rushed through, and then the House went into Committee of the Whole on the civil and diplomatic appropriations. The bill to extend credit for duties on railroad iron was hitched on and to this was hitched Mr. Houston's tariff reduction scheme, proposing that articles now bearing duties of 100, 40, and 30 per cent., shall after the 1st of July pay 80, 32, and 24 per cent., or reducing the present rates 20 per cent.; the number of articles paying 25 per cent., to be reduced about 20. Both these additions went through.

SABBATH-DAY, FEB. 24.

In the **Senate**, the Diplomatic and Consul bill was taken up, and talked about for a short time. Mr. Mason stated briefly the nature of the bill; it reduces the grades; abolishes Chargés and Ministers Resident; takes away outfit and infit; gives Ministers a fixed salary, not to commence until their services begin, and to cease when the duties of their office terminate; prevents double pay for the same services at the same time; prohibits any foreign Minister from being absent from his post for more than ten days, without leave from the President of the United States, and if more than that time, either with or without leave, his salary ceases; although the salaries of Ministers will be raised on the face of the bill, the expenses of each Mission will be reduced, because no outfit, no infit, no overlapping of salaries, and no gratuities to subordinate officers of Missions will be allowed, as heretofore. Various bills relating to the District of Columbia, were disposed of. The Civil and Diplomatic Appropriation bill, with the Tariff bill attached, came in from the House, and was referred to the Finance Committee. A number of special Harbor Improvement bills were then passed. The bill to erect $125,000 worth of Forts in Louisiana, was also passed.

The **House** proceeded with the Diplomatic and Civil Appropriation bill, to which Mr. Letcher's Tariff bill was hitched and adopted, 126 to 82. This bill provides that articles now bearing duties of 100, 40 and 30 per cent., shall, after the 1st of July, pay 80, 32 and 24 per cent., or reducing the present rates 20 per cent., the number af articles paying 25 per cent. to be reduced to about 20. The Diplomatic bill was finally adopted, with this tariff rider, 126 to 30. The Naval Appropriation btll was taken up, pending a discussion of which the quorum ran out, and the House adjourned.

European News.

One week later news from Europe, being to Feb. 10th, was received in New York on the 21st.

The important event of the week is the reconstruction of the British Ministry under the Premiership of Lord Palmerston.

Nothing of importance had occurred in the Crimea. A rencontre had taken place on the Danube between the Russians and Turks, in which the Turks were successful.

The Vienna Peace Conference had not yet opened. Diplomacy had made a pause until the result of the British Ministerial crisis should be known.

In the mean time, both the Allied Powers and Russia continued their preparations for carrying on the war, but there were still hopes that negotiations might lead to peace.

Lord Palmerston is now Prime Minister of England, and the hopes of many people are raised by that alone, though nothing else has happened to lessen the general gloom that hangs like leaden clouds over the whole nation.

The proceedings in Parliament have been of an interesting cast. A long series of explanations on the part of various members of the old and new Ministries has been necessary to set matters straight between themselves and the public. The explanations made to the country by the parties to whom was confided the task of forming an Administration, are also numerous.

The other business in Parliament had mostly relation to the war. The Commons voted the sum of £1,615,000 for excess of Navy expenditure, and £1,200,000 on account of Ordnance estimates.

Letters from the Crimea give sad accounts of the condition of the British army around Sevastopol. A letter from Scutari, dated Feb. 1st, says:—

The accounts which are received here as to the health of the army become more dismal day after day; and they are only too drearily confirmed by the rate at which the arrivals of sick take place, and by the condition of the men when admitted into hospital. Only two days ago I met an officer holding a high position in the service, who had just returned from the Crimea. He spoke without the slightest reserve of the state of matters there—said that as an organized efficient force the army no longer existed, that all discipline and order had disappeared, that the men had ceased to salute their officers as they passed, and it was quite common to see them selling indispensable articles of clothing in order to buy rum. It would take, he said, many months to bring back to a proper state of efficiency those who were still fit for duty, so thoroughly demoralized had they become. As for the sick, not only the regimental hospitals, but the tents, were full of them, and many of those who still stuck to work were quite unfit for it. It was impossible, he said, to believe the state of the army as to disease, unless one went up and examined into it closely for himself.

Accounts respecting the movements of the Russians are contradictory. On the one hand, it is said that they continue to ravage the Dobrodja, under the very eyes of the Austrians; on the other hand, that Gen. Coronini has received orders to prevent the incursions of the Russians. The Paris *Moniteur* copies from a Constantinople paper a letter giving an account of an action fought on the Danube, but the account requires confirmation. It states that (no date) a Russian corps, having attempted to cross the river into the Dobrodja, was repulsed with great loss, after a conflict of several hours, by the rear guard of Yaya Pasha, and that the latter had already crossed the Danube at Tultscha and Ismael.

A letter from Constantinople, dated Jan. 25, says the British land force before Sevastopol is only 12,000 men.

Lord Cowley, the British Minister at Paris, has made known to the French Government the munificent Canadian contribution of £20,000, in aid of widows and orphans of the war; and states that he is prepared to hand over to the French Government the sum of 250,000 francs, which belong to France.

A sharp shock of earthquake was experienced at Constantinople on the 23d ult., but no damage was occasioned.

A law having been enacted in Sardinia for the sale of the estates of convents and churches, it being arranged that the latter shall be supported by the State, the Pope has published an allocation, delivered before the Cardinals, against the measure. He denounces the Sardinian Government, and declares the enactment to be of no effect. We shall now see which is the superior power, the Government or the Bishop of Rome.

The English Missionaries to the Jews in Poland are ordered to leave the Russian territory. Their printing materials and bookbindery, library and chapel, have been taken possession of by the Russian authorities, and are offered for sale.

The Panama Railroad.—The London *Morning Chronicle* of the 2d has an extended notice of this Road, speaking in the highest terms of the enterprise. It says:

"Its effect upon the commerce of the world, when its advantages are fully developed, it is difficult to estimate; but, as it is the only easy transit for passengers and the only practicable one for merchandize, it is evident that it will open an important channel of communication between the two great oceans, and become a source of very large revenue to its projectors. It extends from Navy Bay, on the Atlantic, to the bay of Panama, on the Pacific, its entire length being less than 49 miles. Its gauge is five feet, its grades easy, the highest, for a short distance near the summit, being 60 feet to the mile on the Pacific, and 53 feet to the mile on the Atlantic slope, the summit being only 250 feet above the level of the sea. It is well built, and in the opinion of engineers who have reported upon it, is in every respect as good a road as any on the continent of America.

California News.

California news to Feb. 1st was received in New York on the 26th.

The accounts of the business prospects of the State are less encouraging than at our previous advices. Every branch of trade is greatly depressed. The January rains did not furnish a sufficient amount of water to enable the miners to pursue their operations to advantage. A fortnight's steady rain, at least, was deemed necessary to afford sufficient relief.

A terrible steamboat explosion took place on the 27th Jan., by which it is supposed at least sixty lives were lost. The accident occurred in the steamer Pearl, a small vessel plying between Marysville and Sacramento, just as the Pearl was coming in from Marysville. The cause is supposed to have been in the pumping of water into a red-hot empty boiler. There had been a good deal of racing previously between the Pearl and Enterprise, an opposition boat.

There had been more than the reasonable and regular amount of crime during the week. We give a few illustrations.

On the 26th there was a duel in Centra Costa, between two Frenchmen. One of the parties, Mr. Albert, of San Antonio, received a troublesome, but not dangerous pistol-shot in the side.

On the 19th, a man named Moran, who had killed a Mr. Craig, was hung by Lynch law, at Bestville, in Siskiyon County.

On the 22d, a Californian, Salvador Valdez, and José Stede, and Juan Gonzales, two Chilenos, were hung by Lynch law, in Stanislaus County, on a charge of horse-stealing. Valdez confessed the stealing, and confessed, besides, that he had murdered seven men. On one of the Chilenos, some notes were found of a plan for the union of a large number of cattle-thieves, to sweep off all the cattle from a certain district, at once.

Mr. Steingrant was shot in the jaw, and in the arm, by Mr. McGrier, on the 25th, in Diablo Valley, Contra Costa County. The wounds are not mortal. The cause of the attack was alledged slander.

The Indians killed four miners in Salmon River, in the extreme northern portion of the State about the 16th.

On the 20th, a Mexican, named Domicio, was stabbed to the heart by Vessalio Padillo, a countryman, at Santa Cruz, in Mariposa County.

On the 27th, a reservoir of water used for mining broke at Iowa Hill, and the great body of water rushing down a small valley, carried away a house, in which were four persons. John Bostwick, of Detroit, Michigan, John T. Colby, of Ireland, and his child, were killed. Mrs. Colby was dangerously wounded.

The Panama Railroad is in full operation, and was to be publicly inaugurated with civic and military ceremonies on the 20th Feb. The party of directors and other persons from New York, who went out in the George Law, were expected to share in the celebration. The passengers from San Francisco by the John L. Stephens, who arrived at Panama on the morning of the 15th, were safe on board the steamer on the Atlantic side in the evening of the same day, and left the next morning.

A Runaway Locomotive.—Yesterday afternoon, (says the Albany *Argus* of Feb. 22d,) about two o'clock, as the locomotive No. 16, on the New York Central Railroad, was helping a freight train up the grade, when near Spencerville, some of the reversing gear becoming disarranged, placed it out of the control of the engineer. The engine began moving toward the city, and on account of the heavy grade, the speed was greatly accelerated as it advanced. It crossed Broadway with fearful velocity, the engineer and fireman jumped off at this point, slightly injuring themselves. The switchman, observing the engine approaching, changed the track and run it into a freight train, causing a collision, smashing the engine, and making a wreck of six freight cars. Fortunately, no personal injury was sustained, though there was great scratching to get out of the way of the runaway locomotive. Those who saw the accident aver that it was frightful in the extreme; the freight cars were dovetailed together in a huge wreck.

SUMMARY.

The yearly expenses of the city of New York are six millions of dollars, which sum is levied upon a total valuation of real and personal estate, of about four hundred and seventy millions of dollars, and at the rate of about ten dollars for each man, woman and child in the city. Of this six millions, about one million and a half is paid in salaries varying from $200 to $3000, to between four and five thousand officials. A large portion of the remainder is expended by contract.

The hurricane which caused such havoc amongst life and property in the north of Germany on New Year's day appears to have had a diameter of about 600 miles. It took its rise in the Polar Seas, swept over the Orkneys and Shetland Islands, covered the whole of the North Sea, caused immense damage in Holland, Hanover, and Denmark, and went down to Prussia and Austria, where its fury broke.

In passing the office of the U. S. Assistant Treasurer, Saturday night, says the St. Louis *Republican* of Feb. 19th, we noticed an unusual stir about the door, several persons being engaged in chucking bags of gold into a furniture-car. A whole load—amounting to $500,000—was transferred to Page & Bacon's banking-house, being the cash for a draft bought by Mr. Bacon in New York.

The completion of the Mississippi River Wire Bridge, connecting St. Anthony and Minneapolis, in Minnesota Territory, was celebrated at St. Anthony, in a highly creditable manner, on the 23d ult.

The Prohibitory Liquor Law passed the Indiana Assembly Feb. 9th, and is now the law of the State. A Prohibitory bill also passed the Illinois Senate on the same day.

In making up the account of the large amount of gold at present in this country, we forget the vast sum brought hither by foreigners. The New York Board of Emigration estimate that $20,000,000 has been brought to this city during the past year, by the Germans alone. If this is true, at least one-half as much more, we doubt not, has been received from other emigrants. Here is a total of $30,000,000, or more than one-half as much as we receive from California.

The clipper ship Great Republic cleared last week for London. Although she has been razeed from her original size, her appearance attracts general attention. She has four masts—the last called a spanker-mast, being made necessary by her extreme length. The clipper ship Witchcraft, lying alongside, although a ship of 1,500 or 1,600 tuns, is comparatively diminutive beside the Great Republic.

We learn by the Salisbury (N. C.) *Banner*, of the 16th ult., that Mr. Maxwell Chambers, of that place, lately deceased, has willed to Davidson College the munificent sum of $300,000. Mr. C. has always been a warm friend of the above Institution, and has heretofore done much for it, having endowed a professorship to be designated by his name. He also left $30,000 to the Presbyterian Church at Salisbury.

William L. Crandal, Esq., of Syracuse, honorably known as an ardent and steadfast champion of Free Common Schools, and whose recent work in favor of restricting school-hours to three per day is destined to make a deep and wide impression, died recently at Albany, of consumption. He was a writer of decided force, an original observer and thinker, and an earnest laborer for the good of mankind. His age was some 33 years.

Out of the three hundred and thirteen sail of vessels belonging to New Bedford, and engaged in the whale fishery, there are only eight now in port, viz: ships Brighton, Emma C. Jones, Wm. Hamilton; barks America, Columbia, Globe, Kathleen and San Francisco. Of the forty-five sail of vessels belonging at Fairhaven, employed in the whale fishery, only one is in port, viz: ship Columbus.

The Milwaukee and Mississippi Railroad Company have declared a stock dividend of 15 per cent. It is stated that 20 per cent could have been declared, but it was deemed best to reserve a certain portion for a reserve fund. The cash earnings have been used for extending the road, and considered as so much capital invested.

It is said that the Crystal Palace at Sydenham, near London, is likely to prove a failure in a financial point of view. Magnificent as are its attractions, the number of visitors is limited. Though not yet finished, it has cost some seven millions of dollars.

A telegraphic dispatch received at the office of the Kansas Settlement Company, of this City, dated Feb. 17, states that the first boat had just started for Westport, the usual disembarking point for emigrants to Kansas, so that the spring navigation may be considered open on the Missouri.

Mr. Phillips, the American who was arrested and imprisoned in Switzerland, having been mistaken for Mazzini, claims an indemnity from that Government of $5,000 for arbitrary and inhuman treatment, and his claim has been recognized by the American Legation.

There is at the present time one new vessel building at the yards in New York City, and that is a propeller, in Mr. Webb's yard. Others are on the stocks, but were commenced some time ago. Such dull times are almost beyond the recollection of any but old builders.

The British admiralty chart of the Arctic Sea, lately issued, gives to the land discovered by the Grinnell expedition the name of "Grinnell's Land." In a former chart it had been called Prince Albert's Land. The correction is a handsome acknowledgement of Mr. Grinnell's benevolent enterprise.

The American Widows' Relief Association have received a donation of 10 barrels of flour from L. F. Olmstead, Lakeville, New York. This shows the good effect of good example. The gentleman who made the donation of 25 barrels from Buffalo, said that "it might induce others to do likewise." It has.

The amount of wool grown in the United States in 1854, was 70,000,000 pounds. The importations for the same period, mostly in a manufactured state, were 140,000,000 pounds, making over 209,000,000 pounds consumed in the United States in one year.

An English collier, called the Prince of Wales, lately wrecked at the Nore, mouth of the River Thames, was built on that river in 1762, and was consequently ninety-three years old when lost. She was of 181 tuns burden, and had been all those years engaged as a collier between the Tyne and London.

The De Vaux legacy for the establishment of a College at Niagara Falls, is much larger than was at first thought. The domain of the institution is 344 acres of land, and the amount of real and personal property for its support $175,000.

On Saturday afternoon, while a party were skating on the Schuylkill river, above Fairmount, the ice gave way, and Mr. Earle S. Shinn, a druggist of Philadelphia, and his wife's sister, Miss Russell, fell through and were drowned.

In 1680, a Baptist meeting-house was nailed up in Boston, and worship therein forbidden until permitted by the "General Court." Now a Baptist clergyman is Speaker of one of the branches of that "Court."

Maryland has the heaviest debt in proportion to population, of any State in the Union. It exceeds fifteen millions in a population of five hundred and eighty-two thousand, bond and free.

The report of the Treasurer of Harvard College, just issued, shows that the receipts exceed the expenses, and that nearly a million of dollars is accumulated in the treasury of this venerable University.

The Virginia Colonization Society has sent from that State to Liberia the past year 272 emigrants, and has taken up several thousand dollars of the State appropriation for the assistance of emigrants.

A dispatch dated Chicago, Feb. 19, says: George W. Green, the banker, who was convicted some time since for the murder of his wife, hung himself in his cell yesterday morning.

New York Markets—February 26, 1855.

Ashes—Pots $6 44; Pearls 6 50.

Flour and Meal—Flour 8 31 a 8 62 for common to good State, 8 87 a 9 25 for Michigan, Indiana, and Ohio, 11 00 a 12 00 for extra Genesee. Rye Flour 7 25. Corn Meal 4 37 for Jersey, 4 75 for Brandywine. Buckwheat 3 50 a 4 00 per 100 lbs.

Grain—Wheat is firm at previous quotations, being 2 25 a 2 30 for fair white Southern. Barley 1 06 a 1 20. Rye 1 28 a 1 30. Oats 54 a 58c for Jersey, 60 a 69c for State and Western. Corn 95 a 98c.

Provisions—Pork 13 37 for new prime, 14 75 for new mess. Beef, 5 50 a 7 00 for country prime, 8 62 a 11 00 for country mess. Dressed Hogs 7½c. Butter, 15 a 20c for Ohio, 23 a 28c for State, 29 a 31c for Orange County. Cheese, 11 a 12½.

Hay—90 a 95c per 100 lbs.

Seeds—Clover 11 a 12c Timothy 3 00 a 3 50 per bushel. Flaxseed 1 80 a 1 85 per bushel

MARRIED,

In Stonington, Ct., Jan. 27th, by Eld. S. S. Griswold, Mr. Henry Throop, of Lebanon, to Miss Matilda A. Williams, of the former place.

In Ledyard, Feb. 18th, by the same, Mr. H. Lester, of Lyme, Ct., to Miss Eliza Geer, of Ledyard, Ct.

At the residence of Mr. A. N. Sheppard, in Aurora, Ill., on the 7th of February, by the Rev. Charles Button, Mr. Alexander Runyon, of Chicago, Ill., to Miss Lizzie T. Reeves, of Bridgeton, N. J.

In Milton, Wis., Feb. 6th, 1855, by Eld. V. Hull, of Milton, Mr. Allen McCoy, of Magnolia, to Miss Jane Vergin, of Johnstown, all of Rock Co., Wis.

In Lima, Wis., Feb. 6th, 1855, by Eld. V. Hull, of Milton, Mr. William Gould, of Cyrstal Lake, Ill., to Miss Jane Hall, of Lima, Rock Co., Wis.

DIED,

In Clarence, Erie Co., N. Y., Feb. 15th, 1855, Lucinda Babcock, wife of Eld. Rowse Babcock, of consumption, in the 51st year of her age. Sister Babcock found a hope in Christ at the early age of twelve years, and united with the First-day Baptist Church in Scott, Cortland Co., N. Y., of which she remained a devoted member for about fourteen years. She with her husband becoming convinced that the seventh day was the Sabbath of the Lord, embraced it, and united with the Seventh-day Baptist Church in Scott, Cortland Co., N. Y., of which denomination she continued a faithful member until death. During her whole life she maintained that firm reliance on the promises of her Saviour that bespeaks the heart purified by the spirit of grace. In her intercourse with society, she ever exhibited that spirit of Christian meekness so beautiful in the character of a follower of the lowly Jesus. She suffered many years from that painful and lingering disease, consumption, but bore it all with Christian fortitude, patiently awaiting her appointed time. Most of the time she had been able to discharge her family duties, until about nine weeks previous to her death, when she was suddenly taken worse, and felt that the hour of her departure was at hand. During her last illness her suffering was intense. But her faith never wavered, and she longed to go and be with Christ. Her friends hoped that she might be spared to them, but she told them that God had called, and she must go. She calmly told her wishes in regard to her family, gave her last counsel to her weeping children, and then gently fell asleep, and was borne to the arms of that Saviour she so much loved. Her last words were, "Let me die in peace." God heard that prayer—

And, gently as the zephyr sighing,
Through spicy grove on India's shore,
Her spirit passed; and quickly flying
To Jesus' arms, she weeps no more.

And rest thou, gentle spirit, there;
We would not call thee back again,
From realms where falls no gushing tear,
And fevered brow ne'er throbs with pain.

Sister Babcock has left a husband and seven children, with a large circle of friends, to mourn her loss. A bright example of Christian piety has been taken from them, but another star has been added to the crown of our ever-blessed Redeemer. G. W. M.

In Hounsfield, Jefferson Co., N. Y., on the 16th of February, John Witter, in the 74th year of his age. His disease at last terminated in the dropsy. A large congregation was in attendance at his funeral. Sermon by E. Barnes.

In Plainfield, N. J., on the morning of the 24th of February, Thomas S. Titsworth, son of Dea. A. D. Titsworth, in the 13th year of his age. He had been a great sufferer for about three months, and died a most peaceful and triumphant death.

In Milton, Rock Co., Wis., Feb. 12, 1855, of a combination of diseases, Salome S., wife of Ezekiel P. Frink, in the 32d year of her age. Sister Frink embraced religion in Scott, Cortland Co., N. Y., where she united with the Seventh-day Baptist Church of Christ, from whence she removed to this place, and united with the church of God here, of which she remained a faithful member until death, for which she seemed fully prepared, and joyfully to meet. Sister Frink left a devoted husband, four children, with a number of other relatives, to mourn her loss. Their consolation is, that she sleeps in Jesus. V. H.

In Milton, Rock Co., Wis., Feb. 17th, 1855, of pleurisy, Deacon Nathan Maxson, in the 36th year of his age. He was confined only about three days. He embraced the cause of Christ when young, in Alfred, Allegany Co., N. Y., where he was chosen to the office of deacon. From thence he moved to the place of his death. He connected himself with the Milton Church, where he won, by his devotion to the cause of Christ, the confidence and respect of all who knew him. He will be very much missed in the church and community where he lived; but more deeply than all others, will his widow and four children feel the loss of an affectionate and devoted husband and father, and they are only consoled in the thought that he triumphantly "died in the Lord."

Savery's Temperance Hotel

AND

TELEGRAPH DINING SALOON,

No. 14 Beekman Street, N. Y.

KEPT ON THE EUROPEAN PLAN.

MEALS AT ALL HOURS OF THE DAY.

LODGING-ROOMS,

From $2 to $3 per Week, or 50 Cts. per Night.

Bela Sawyer, Sup't. John S. Savery, Proprietor.

3d Brookfield Church.

NOTICE is hereby given, that at an adjourned meeting of the Seventh-day Baptist Beaver Creek Society, held on the 5th of February, 1855, it was resolved, by unanimous agreement, to sell the meeting-house and its appendages at auction, and give the avails to the American Seventh-day Baptist Missionary Society, except such portion as may be called for by the original contributors, who shall receive their shares, according to the sum they respectively paid, if called for in three months from this date. The amount of the sale was $88. Also resolved, that the above notice be published in the *Sabbath Recorder.*

BENJ. BURDICK, Society Clerk.

South Brookfield, Feb. 13th, 1855. 37—6t.

Rare Chance—For Sale.

A DENTIST, (wishing to retire on account of ill health,) having a good practice in a large, thriving, and beautiful town, where there is a community of Sabbatarians, will sell advantageously for the cash. Any person wishing to buy, can receive the most thorough instructions in every department.

Letters addressed to "Dentist," care of Rev. Geo. B. Utter, this office, will be answered, giving further particulars. 37—3t.

Mayor's Office, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the jurisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

Woodworth's Youth's Cabinet

IS the best illustrated dollar magazine in the Union. Send for a specimen of it, if you are not acquainted with it. The editor is giving a change to his subscribers to get 12 splendid volumes of books for nothing, as premiums. You can have a chance too, if you will subscribe; and now is the time, as a new volume has just commenced. Yearly subscription, $1; single number, 12 cents, or four postage stamps. Address the Publisher,

D. A. WOODWORTH,
118 Nassau-st., New York.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c.

Winter Arrangements, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 5.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.

Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M.

JOHN O. STERNS, Superintendent.

Alfred Academy,

At Alfred Center, Allegany Co., N. Y.

THE attention of the public is respectfully invited to the educational facilities of this Seminary.

1. The location is one of the *healthiest* in the world; in a community offering none of the usual inducements of youthful dissipation; easy of access by railroad; and in telegraphic communication with all parts of the country.

2. Young ladies and gentlemen occupy separate edifices, and enjoy, in the families of the Professors, the supervision of well-ordered *Christian Homes.* The health, morals, and manners of students are all looked after with parental solicitude.

3. The courses of instruction, embracing ten departments, with an experienced Professor or Teacher at the head of each, are thorough, extensive, and eminently practical. Young men wishing to study *Analytical* and *Agricultural Chemistry*, will find here every desirable aid for doing so to any extent. Classes in *Surveying* and *Civil Engineering* have daily field practice, under the directions of the Professor, with the most approved instruments. *Teachers'* Classes are carefully drilled in every branch of school-room duties. The *graduation course* for young ladies is adapted to fit them for the responsibilities of *American Women.* In the department of instrumental music, the pianos used are of the finest quality, and kept in perfect order. The Seminary employs no second grade teachers, but the *elementary* and higher classes receive alike the instructions of the *same* Professors.

4. The edifice containing the recitation, library, and society rooms, is one of the largest, most commodious, and best furnished school structures in Western New York.

The next term opens the 28th of March, and closes July 4th, 1855. The expenses are very moderate. For further particulars, address Rev. N. V. Hull, or W. C. Kenyon.

Feb. 24th, 1855.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 35 cents per copy. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

Miscellaneous.

Narrative of the Glover Rescue.

From the Milwaukee Sentinel, Feb. 6.

The decision of the Supreme Court of Wisconsin, pronounced on Saturday last, discharging S. M. Booth and John Rycraft, two citizens of this State, from the fine and imprisonment to which they had been sentenced by Judge Miller, after conviction in the U. S. District Court, of alledged violation of the Fugitive Slave Act, is a matter of too deep and serious import to be lightly passed over, or dismissed without further remark. Regarding that decision as fraught with important consequences to the great cause of Constitutional Rights and Human Liberty; as setting up a barrier against any further invasion of those rights by the grasping and domineering spirit of Slavery; and as conferring immortal honor upon the Court which pronounced and the State which sustains this righteous judgment, we have thought the present a proper occasion to lay before our readers a succinct narrative of the cause, the progress, and the issue of the Glover Rescue Trials in this city.

Early in March last, a negro, bruised, bleeding and manacled, was brought to this city, in custody of Deputy U. S. Marshal Cotton, and lodged in our County jail. In spite of the efforts of the United States officers to keep their secret, the fact speedily transpired. The circumstances, too, attending the capture, came out. As the story flew from mouth to mouth, the waves of popular excitement began to rise; and gathering groups on every corner attested the public interest in this novel case. It was soon known that brutal and unnecessary violence had been used to arrest the man, upon the charge of being a slave, and it began to be suspected that foul play would be employed to complete what force had begun. Counsel were procured for the imprisoned fugitive, and a writ of habeas corpus applied for and obtained from the Judge of the County Court. The Sheriff made return to the writ that the prisoner was not in his custody. A second writ was then sued out against the U. S. Marshal. Meantime the people assembled by thousands on the Court-House square; a meeting was organized, speeches made, resolutions adopted pledging all present to stand by the writ of habeas corpus and the right of trial by jury; and committees appointed to wait on the U. S. officers and learn whether they intended to obey the second writ and produce their prisoner. While the excitement was at its hight, a delegation, 100 strong, from Racine—whence the alledged slave had been forcibly abducted the previous night—arrived upon the ground, adding fuel to the fast-rising flame. At this critical juncture, too, came the report that the writ of habeas corpus would not be obeyed, and the suspicion was strengthened that the negro was to be carried back into Slavery, as he had been brought to the Milwaukee jail, by sheer force and without warrant of law. Then it was that, by an irresistible impulse, and without concert, or premeditation, a rush was made for the jail, the doors battered down, the prisoner released, placed in a wagon and hurried beyond the reach of pursuit, amid the applauding shouts of sympathizing thousands.

Such is the brief history of the rescue of the alledged fugitive slave Joshua Glover. The breaking of the jail, and the forcible release of Glover, were offenses in the eye of the law and in the estimation of the public. For these, as Mr. Tweedy well said, in his speech at Young's Hall, reparation was due to the State of Wisconsin, whose laws had been violated, and to the City of Milwaukee, whose peace had been broken; but it was not the province of the Federal Government to enforce that reparation. Our own Courts and authorities were competent to the task. The Officers of the Federal Government, however, assumed the initiative. Their first step was to procure the arrest of S. M. Booth, accused of being a ring-leader in the rescue, by a warrant from United States Commissioner Smith. An examination followed, and Mr. Booth was held to bail, to appear and answer the complaint at the next term of the United States Court. He gave bail, but shortly afterward was surrendered by his sureties, in order that a writ of habeas corpus might be sued out, in his behalf, before Judge Smith, of our State Supreme Court. The writ was granted, argument had upon it, and Mr. Booth discharged; the Judge holding that the commitment was insufficient, and the Fugitive Slave Act itself, under which the proceeding was had, unconstitutional. These points were enforced in an able and elaborate opinion, which was extensively circulated through the public press. From this decision the U. S. Officers took an appeal to the full bench of the Supreme Court. That Court affirmed the decision; all three Judges concurring in the order of discharge, though one of them, Judge Crawford, dissented as to that part of Judge Smith's opinion, which held the Fugitive Slave Act to be unconstitutional.

Meantime the U. S. District Court, Judge Miller presiding, commenced its summer term at Madison, and the Grand Jury found indictments against Messrs. Booth, Rycraft and others, for their participation in the rescue of Glover. Upon those indictments, and by order of the Judge, Mr. Booth was again arrested. He went to jail, and his counsel once more invoked the interposition of our State Supreme Court. It was denied, mainly upon the ground that the jurisdiction of the U. S. Court had attached, and that comity required that the State Court should not interfere until the Federal Court had heard the case and pronounced its judgment. Thereupon Mr. Booth gave bail to appear and stand his trial. The fall term of the U. S. District Court came on. Mr. Booth was confined to his bed by severe illness and his case went over. John Rycraft, however, was tried under the indictment found against him in July, convicted and sentence deferred. In January, the month just past, the U. S. Court again convened. The Grand Jury, carefully selected, found new bills of indictment against Mr. Booth, (the old one having been abandoned) and several others. An attempt was made to quash the indictment, on the ground that the Grand Jury was improperly and unfairly drawn. The motion for that purpose was overruled and the prisoner put upon his trial. The feeble hands of the U. S. District Attorney were strengthened for the occasion by the employment of able counsel, whose zeal was stimulated by a liberal fee, as well as by personal and political antipathy toward the accused. Unusual pains were taken to get a Jury whose opinions of the Fugitive Slave Act would not stand in the way of a conviction. The presiding Judge threw his official weight into the scales against the prisoner.

The evidence showed that Mr. Booth had been among the most active in getting up the meeting at the Court House Square, had been prominent in all the proceedings then and thereabout, and had been in close proximity to the wagon in which Glover was hurried out of the city. There was, however, not a particle of proof to connect him with the actual jail-breaking and jail delivery, or to show that he was one whit more guilty than any other of the two or three thousand citizens who "countenanced" and applauded the escape. But the Judge held that enough and more than enough had been proved to convict the defendant under the law, and of that law it was for him, and not the Jury to judge. The Jury, fettered by the positive directions of the court, and the majority of them, as we believe, in the conscientious discharge of their supposed duty, found a verdict against the prisoner. Motions were made in arrest of judgment, and for a new trial. The form of the indictment was challenged, the sufficiency of the proof disputed, and strong evidence offered that one, at least, of the jurors had prejudged the case. But all in vain. The Judge overruled the motions, and hastened to pronounce sentence. Mr. Booth was condemned to one month's imprisonment, $1,000 fine, and costs of prosecution—$451 01. Mr. Rycraft to $200 fine and ten days' imprisonment. Immediately after sentence, both prisoners were conducted to our County jail, and there confined.

The news created a great sensation in this city, and as it flew along the telegraph wires and sped through the mails, produced intense excitement throughout the State. A public meeting, hastily called, but most numerously and respectably attended, gave utterance to the outraged feeling of our city. The country responded promptly and universally. Meantime, the counsel of the prisoners once more appealed for help to the Supreme Court of the State, and this time not in vain. A writ of habeas corpus was granted, and in obedience to the summons, escorted by 2,000 of their fellow citizens, the prisoners, in charge of the Sheriff, proceeded on Monday week to the Railroad Depot, to take the cars for Madison. On Saturday last they returned FREE MEN!—the Supreme Court having discharged them from confinement. Two of the Judges, Whiton and Smith, reiterated the opinions expressed by them in July last, as to the unconstitutionality of the Fugitive Slave Act. The third, Crawford, adhering to his previous view of that question, concurred in the order of discharge, on the ground that no offense, under that act, was charged in the indictment. The decision of the Court, therefore, was UNANIMOUS.

So stands the case to-day—Messrs. Booth and Rycraft, by the fiat of our State Court, have been released from the fine and imprisonment to which the sentence of the Federal Court had subjected them. The Fugitive Slave Act has again been pronounced unconstitutional and void by the Supreme tribunal of the State. The great writ of Liberty has been sustained. The threatening surge of Slavery aggression has been stayed in its course. The birth right of Wisconsin—youngest and fairest offspring of the immortal Ordinance of 1787, has been nobly vindicated. Slavery, or involuntary servitude, except for crime, cannot and will not be tolerated within her borders. Kidnapping finds no favor with her Courts, no protection in her jails, no countenance among her people. Wisconsin is and will remain a free State, and while she claims no right and cherishes no desire to intermeddle in the domestic affairs of her sister sovereignties, she will at least assert and exercise at all times and at every hazard, the power to protect her own citizens, and to maintain and defend, in all their integrity, the writ of Habeas Corpus, and the right of trial by jury.

From the Churchman.

Hard Times.

The Commercial Center of the World.

One of the causes of hard times in our country is the war in Europe, which disturbs the industrial, commercial, and financial relations of that quarter of the globe. England is the great centre of the commercial and financial world. This comes from her great accumulations of wealth, from her having attained to a supremacy and superiority in manufacturing skill, and, as a consequence, a monopoly to a very great extent of the manufactures of the world. She has kept in advance of the rest of the world in science and labor-saving machinery, as applied to the production of wealth. Her improvements in agricultural science about the time of the commencement of the wars of the French revolution, and of those with Napoleon, doubled the products of her soil. This, together with the great productions of her factories, enabled her to pay not only her own vast expenses of those wars, but those enormous subsidies to nearly all the other nations of Europe beside, and carried her safely through them all. Other nations have since that time made great progress in manufactures and in labor-saving machinery, but England has still kept in advance of them all. The effective productive machinery of England is at this time equal to, if not superior to that of all the world beside. (?) The advantage which she holds from the great accumulations of wealth is that it makes her the great center of the commercial world, enabling her to govern in a great measure the movements of trade and commerce, to control the markets, and regulate them according to her wants and necessities. Hence, when in consequence of the present war, she wants more of our money, she can command it by sending more of her manufactured goods here and selling them, even at a sacrifice. This would bankrupt a poor country and close up its factories, but England is able to stand it, and is willing to make the present sacrifice, in the expectation of making up the loss at a future time when our factories are closed. An agricultural country cannot compete successfully with one that is both agricultural and manufacturing, and that has the advantage of labor-saving machinery and accumulated capital. The one will be impoverished, and the other enriched. The profits of manufacturing are so much greater to the man *pro rata* than those of agriculture, that the one will grow rich while the other will grow poor. Each country, in order to maintain a position of equality and national independence, should do a share of the manufacturing industry of the world, otherwise they will always remain in a condition of dependence and semi-vassalage to the country that has this advantage over them.

We would wish to inquire into this question in a candid and liberal spirit, and not as a partisan. It has too often been the hobby of the political adventurer, or the scheming speculator—party spirit has run high, and one section of the country has been arrayed against another in the struggle, until the true interests of the country have been lost sight of, or merged in party feeling. It is the true interest of this country morally and politically to be, as far as may be, independent of the painful vicissitudes of other countries. It should not be depressed by their depressions, or seriously injured by their calamities, but that we should have a foundation of our own, broad and solid, to stand upon. We do not mean this in a selfish and exclusive sense, but in that of self-sustaining, self-supporting, and self-reliance. Mankind are all of a family, and as members of one family we should remember and care for the general good of all, as well as for our special interests. The general good is promoted by securing that of each nationality and individual. If each secures its own welfare, all are secure.

If we would bring our own currency and credit systems under a safe and rational restriction and keep them there, it would be an effective means of securing the prosperity and safety of home industry and home manufactures. Our infant manufactures have been repeatedly paralyzed by the ruinous fluctuations of the currency. As soon as the country begins to prosper, the currency is expanded, and prices are raised to such a point that but few things can be exported at a profit, and almost every thing is brought here to sell; our specie is carried away, and then comes a stagnation and collapse, when the community must go through another period of suffering. What is called a protective tariff is rendered a nullity, by the currency expansion overriding it and overflowing the country and drowning out the infant manufacturing establishments. Besides, a high protective tariff is objected to by a great many in this country. It is regarded by some as savoring of an anti-social and exclusive and selfish policy—that it is an arbitrary interference with the natural and healthy channels of industry—of building up one section of the country to the detriment of another—thus disturbing the safety and harmony of our institutions. Establish a sound, rational, solid currency system, and manufactures will spring up and prosper as the country gets ripe for them. The woolen manufacturers of Massachusetts are at this time, we believe, applicants to Congress for a reduction of the tariff, believing that such reduction will conduce as well to their own interests as to the general good of the country. This could scarcely fail to be the case if our currency was properly governed.

Randolph as a Satirist.

Randolph was unequalled in one thing—in blending his sarcasm with his argument, so that he did not have to wander from the text to say bitter things. He rounded off the argument by some allusion or comparison, which was good as an illustration, and biting as a sarcasm. Randolph looked the embodiment of satire. Tall, emaciated, bloodless, the flashing eyes, blazing over the livid cheek, the skeleton finger, the proud and classic features, cold and unsympathizing, or flush with indignant scorn, the haughty air, the sneering lips, the sharp, bony face, and the keen, shrill, piping voice, slow, distinct, deliberate in its varied and most artistic enunciation, made up a manner which gave the fullest effect to intellectual qualities, so well answering to these organs of communication. There was nothing theatrical in all this, though Randolph was the most eccentric of men. His eccentricities, unlike most men's, so far from proceeding from vanity, came from a self-dependence and self-will, consulting his own taste and feelings, and almost wholly regardless of the taste and opinions of the world, if not actually scorning them. Probably no other man of his time could express scorn with such withering effect. He felt more scorn than he uttered, even when his utterance was most extravagant. His pride was morbid—Lucifer-like. His dislike transformed the object into a thing of utter meanness and boundless contempt. It is galling enough for a man to feel that another man looks upon him with contempt; but to be under the basalisk eye of one who, in a tone of measureless superiority, looking the lord and master, barely condescends to treat the gentleman with the contemptuous recognition of a trembling culprit, and to administer to him judicial chastisement for his crimes or impale him for his follies—to mark him out by his wit for the general derision, and coolly dismiss him to contempt, as an object worthy of no further notice—this is a burden which few men have the philosophy to bear with composure. [Baldwin's Party Leaders.

How to Raise and Feed Fowls.

To the Editor of the New York Tribune:

SIR: Being often importuned, by letters, for my opinion in regard to the manner of raising and feeding fowls, I am induced to give my views through the columns of your journal.

In the first place, I would recommend to all who intend breeding fowls, whether for pleasure, convenience, or profit, to procure some pure breed, of whatever variety they fancy, and then breed them pure, and improve upon them, year after year, by selecting their finest, best-modeled pullets for breeding purposes, and by changing the cock yearly, so as to avoid breeding "in and in." By pursuing this course, fowls may be increased in size and beauty to an extent perfectly astonishing. By the opposite course, the largest varieties may be reduced to the size of the smallest bantam. Follow the same rule in breeding to the feathers. Take a pair of black bantams, with only one white feather, and select from their offspring, for breeding purposes, those which have the most white feathers, and the stock will, in a few years, be changed from black to white.

In order to breed fowls successfully, it is of the first importance that they have a suitable building, for so long as the old plan of keeping them in damp underground hovels, or in close, unventilated buildings, with perhaps one whole side of glass, by which means they are heated as hot as an oven through the day, just so long shall we hear of their having all manner of distempers, and that breeding poultry is unprofitable.

I here give you a plan of a building sufficiently large to accommodate from 75 to 100 fowls, which building may be varied according to circumstances. It should in all cases be entirely above ground, facing the south, if convenient, leaving an aperture through which the fowls may pass in and out at their pleasure. Insert no more glass than is necessary for the admission of light. Dimensions as follows: 15 feet long, 10 feet wide; ports in front 10 feet, in back side 7 feet long; roof perfectly tight, floor also tight and smooth. The sides should be of common straight-edged boards, battened over the cracks, if necessary. Roost poles of 3 by 4 joist, running the whole length of the back side of the building, with a poop in the center of each.

For convenience in cleaning the building, I would recommend that the poles be placed on a level, three feet from the floor, and eighteen inches apart, with an inclined plane in the center for the fowls to walk to the poles upon. Saturate the poles occasionally with whale oil, and whitewash the whole interior at least twice a year; keep the floor covered with wood or coal ashes, and when the building is cleaned, (which should be often,) sprinkle a little air-slacked lime over the floor, by which means vermin of every kind will usually be kept out. Ventilate well, as fowls need pure air as well as man.

In order to make them grow rapidly, feed them regularly three times a day when young, never placing before them more than they will eat; change their food often, as whatever they like is good for them—wheat, oats, barley, corn. Indian meal scalded, or cooked and seasoned with a little salt, is good for chickens; also, sour or curdled milk. Raw potatoes and onions chopped fine are almost indispensable. Chandlers' scraps are also good.

To make hens lay in the winter, feed them three times in a day on Indian meal dough, mixed slightly with Cayenne pepper; scraps of meat three times a week; raw onions chopped once a week; the balance of the time give them corn, oats, barley, buckwheat, or anything of the kind. Always have oyster-shells pounded fine within their reach—also, gravel and pure water. H. S. BALLOU.

BLACKSTONE, Mass., Feb. 5, 1855.

Interesting Facts.

The organ of vision is considered the most delicate organization in the human frame; yet many who have been born blind have been enabled to see by surgical operations, and the following is an interesting fact concerning one of that class: A youth had become thirteen years of age when his eyes were couched by the surgeon. He thought scarlet the most beautiful color; black was painful. He fancied every object touched him; and he could not distinguish by sight what he perfectly well knew by feeling, for instance, the cat and dog. When his second eye was couched he remarked that the objects were not so large in appearance to this, as to the one opened at first. Pictures he considered only parti-colored surfaces, and a miniature absolutely astonished him, seeming to him like putting a bushel into a pint.

Stanley, the organist, and many blind musicians, have been the best performers of their time; and a schoolmistress in England could discover that two boys were playing in a distant corner of the room instead of studying, although a person using his eyes could not detect the slightest sound. Professor Sanderson, who was blind, could, in a few moments, tell how many persons were in a mixed company, and of each sex. A blind French lady could dance in figure dances, sew, and thread her own needle. A blind man in Derbyshire, England, has actually been a surveyor and planner of roads, his ear guiding him as to distance as accurately as the eye to others; and the late Justice Fielding, who was blind, on walking into a room for the first time, after speaking a few words, said, "This room is about twenty-two feet long, eighteen wide, and twelve high," all of which was revealed to him with accuracy through the medium of his ear. Verily, "we are fearfully and wonderfully made."

Hereditary Diseases of Cattle.

Mr. Findlay Dun, in a recent prize essay on this subject, in the Journal of the Royal Agricultural Society of England, mentions as the most important hereditary diseases of cattle, diarrhœa, rheumatism, scrofula, consumption, dysentery, malignant tumors, and the affections depending on a plethoric state of the body. The characters which cattle should possess, in order to perpetuate in their offspring a healthy and vigorous constitution, he, among others, gives the following:—

"The head small, muzzle fine and tapering, nostrils large and open, the eyes full and lustrous, ears small, and not too thick, the head well set on the neck, the distance between the ears and the angle of the jaw short, but the width behind the ears considerable (no dairy cow should have a short, thick neck,) the chest wide and deep; the girth taken immediately behind the shoulder, should correspond closely with the length from behind the ear to the rise of the tail; the carcase of a barrel shape, for a thin flat-ribbed animal eats largely, thrives badly, and is unusually liable to diarrhœa; there should be little space between the prominence of the hip and the last rib, the quarter large, the measurement from the prominence of the haunch backwards to the rise of the tail, and downwards to the hock, as great as possible; the lower part of the haunch thick and broad, the hide thick and pliant; smallness of bone is a sure indication of early maturity and aptitude for fattening. These, amongst other characters and qualities enumerated by Mr. Dun indicate the possession of a vigorous and healthy constitution, and freedom from all inherent disease."

THE "CURL" IN PEACH TREES.—The "curled leaf" is the most fatal obstacle to peach culture in Central New York. Quite commonly the cold of winter spares buds enough for a fair crop of fruit, and the month of April opens with fair prospects, which are perfectly blighted before its conclusion. Prematurely warm weather late in March, or during the month of April, swells the buds almost to bursting. Then succeeds cold weather, holding them in check sometimes, as in 1851, for thirty-six days. When vegetation finally recommences, the juices of the tree are in a morbid state; most of the buds that had been previously so excited never open at all; and those that do, exhibit a sickly, stinted foliage, which speedily falls, presenting the phenomenon of the "curled leaf." Some writers refer it to insects; but these are seen in the final catastrophe, and are the plunderers merely of the morbid vegetation. It is especially worthy of remark, that sudden and severe chills, occurring in midsummer, often cause a slight show of this disease. So well are the causes of "curled leaf" ascertained, that little is risked in predicting its speedy appearance, while, as yet, not a trace of it is seen. [C. E. Goodrich, Oneida Co.

TURNIPS IN FRANCE.—A correspondent of the Mark Lane Express, writing from Normandy, says: There are turnips growing in the district through which I had passed. They appear to rely chiefly on their pastures—on their rape, and on their mangel wurzel, for the winter food of their cattle. The sugar beet is also largely cultivated for the sugar manufactories, which are here extensively carried on; the chief supply of French sugar, indeed, is obtained from this source. The quality of the refined sugar made from beet is excellent in color and strength. The sugar manufactories which I have seen are handsome erections, with their machinery and other apparatus kept in the nicest order. The same remark applies to the courts and other little enclosures which surround them, these being remarkably well kept, and covered with beds of flowers and evergreens. A similar observation applies even to the extensive cotton manufactories which abound around Rouen—every thing looks neat and clean; flowers in profusion were in September surrounding these buildings—flowers which, however publicly displayed in France no one appears to injure.

A GOOD JOKE.—On Monday morning last (says the Reading, Pa. *Gazette*, of Feb. 10th,) an affair occurred in the railroad cars, while stopping at Pottstown, which is entirely too good to be lost. It appears that a short time since, a person who lodged there over night had carried away with him a valuable gold watch, the property of another. On the morning above named, as the passenger train was passing through the town, a person answering the description of the culprit was discovered sitting in one of the cars by that indefatigable officer, M. B. Missimer. He thereupon immediately arrested him. The gentleman remonstrated, but in vain. He was taken to one of the hotels, where a search was about being instituted, when some one happening to drop in, recognized in the supposed thief, our *new chosen State Treasurer*, Mr. Slifer! It is needless to say, that the officer was profuse in explanations and apologies, which Mr. S. took in good part, and consented to consider the arrest a "good joke," although too practical and personal to bear repetition.

SOLIDIFIED MILK.—The following is said to be Mr. Blatchford's process for solidifying milk. It appears so simple that any one could try it: The process of manufacture is simply that of concentration by boiling. The milk is placed in shallow pans, and after a mere trifle of carbonate of soda is added, (a drachm to ten gallons,) to neutralize any acid that may be formed by the first application of heat, it is then boiled down to half its quantity, then some pure white sugar is added, and the evaporation is continued till it is left in solid cakes like soap. In this state the chemical and microscopical characteristics are left unchanged, the butter globules remaining intact. One pound of this is worth twenty-five cents, and is equivalent to five pints of milk. To effect this change it is to be dissolved in water, when it is fresh country milk, scarcely distinguishable from the best fresh milk, save that it is somewhat sweeter, and capable of being used for all culinary purpose, the same as milk fresh from the cow.

PREPARING WOOD.—Some farmers have not yet learned, that in piling wood for seasoning, they should not expose the heart to the weather. Nature designed the bark of the trees as a protection, and it serves as well when a tree is cut and split, if properly piled, as when on the stump. The bark should always be uppermost. In this way, the water runs off readily, and the wood is not colored by exposure to rains.

When there is a large amount of it piled in one place, the different tiers should be somewhat removed from each other, that there may be a free circulation of the air among the wood. If this precaution is not taken, the interior courses will become mouldy, and will be seriously injured.

Now is the time to cut wood for the year, if it is not already completed. Wood cut now, will season better, and be of more value than when cut in the spring or summer.

[Granite Farmer.

New York is a queer State in respect to originating party names. Loco Foco, Barnburner, Silver Grey, Hunker, and a host of other party appellations, had their origin there, and now the New York politicians have found a nickname for the Know Nothings, whom they call "Hindoos." The name originated in the fact that their late candidate for Governor, once upon a time, when foreigners were more fashionable than now, claimed to be of Hindoo birth.

Lessing, the celebrated German poet, was remarkable for a frequent absence of mind. Having missed money at different times without being able to discover who took it, he determined to put the honesty of his servant to the test, and left a handful of gold on the table. "Of course you counted it," said one of his friends. "Counted it?" said Lessing, rather embarrassed, "no, I forgot that."

The celebrated author of Lacon, tells the following:—I once heard a gentleman make a very witty reply to one who asserted that he did not believe there was a truly honest man in the world. "Sir," said he, "it is quite impossible that any one man should know all the world; but it is very possible that some one man may know himself."

Lord Chesterfield says, Aim at perfection, in every thing, though in most things it is unattainable; however, they who aim at it and persevere, will come much nearer to it, than those whose laziness and despondency make them give it up as unattainable.

On Wednesday night, Feb. 14, the brig Rush, from Cardenas, while lying at anchor off the Battery, was cut through by the ice. She filled with water, and sunk almost immediately. The captain and three of the crew jumped into a boat and were saved, but two of the crew went down in the brig.

The resumption of Page, Bacon & Co., of St. Louis, took place Thursday, 15th inst. The protested drafts, &c., of that house were paid by the Bank of America, with interest and cost of protest. The Philadelphia Bank paid the drafts, &c., which had been protested in Philadelphia.

The Trustees of the United States Bank announce that no claims against that institution will be received after 16th April next, and that they will proceed to make a final dividend to the creditors.

A bill to incorporate Elizabethtown as a City has passed the Assembly of the New Jersey Legislature.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, *it is* the pleasantest and safest medicine that can be obtained. No family should be without it, and those who have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

MRS. SARAH ANN GILLETTE.

SARAH ANN FRAZEUR, wife of Rev. W. B. GILLETE, was the daughter of David O. and Sarah Frazeur, of Hopewell, Cumberland County, N. J. Her father was a native of Rahway, Middlesex County, and emigrated to Cumberland County when young. Her mother was the daughter of Elder Samuel Davis, and was born near the place where she lived and died. Sarah Ann was born July 20, 1808. When she was ten years old her father died, leaving his wife with five small children, two sons and three daughters. When Sarah was in her fifteenth year, her mother died, and the children were left orphans, but they were not without friends who cared for them like kind and loving parents. Their grandfather, Elder Davis, took charge of the children, and they were soon comfortably provided with homes among their relatives and friends. Sarah Ann took up her abode with her uncle, her mother's brother, where she remained about one year, spending a part of that time in school. She then went to live with her mother's sister, Eliza, the wife of Jeremy B. Davis. As her uncle was mostly from home, she and her aunt, with two small children, constituted the family. She was much attached to her aunt, and lived happily with her and her little family.

In her nineteenth year, March 27, 1827, she was married to Walter B. Gillette, then a resident of Friendship, Allegany County, New York, to which place they traveled in company with others in a wagon, the usual way of moving westward in those days, before the age of railroads. Her husband had been living in Salem County, N. J., some years, and thus formed an acquaintance, but had gone to Western New York, and had taken up his abode there. They were twelve days going through the country and over the mountains to that place. Having made a purchase of wild land upon which they intended to live and labor, they soon began to clear away the forest, and to build a house, into which they moved in January, 1828. In her new habitation, with her husband, she was very happy, feeling that her home was her own. "She was monarch of all she surveyed." The roads were new and rough, and carriages were few; hence the usual way of traveling was on horse-back, with which she was much pleased; and she enjoyed life much in riding through the wilderness from place to place, to see her acquaintances, and for other purposes, as circumstances might demand. Those were days of domestic enjoyment to herself and husband in their far off rural retreat.

When in her twenty-first year, she made a profession of religion, was baptized, and became a member of the Seventh-day Baptist Church in Friendship, under the pastoral care of Elder John Green, where her husband was a deacon. The meeting house was four miles from their residence, yet it was seldom that she was not at meeting, not only on the Sabbath, but she always filled her place faithfully in all the meetings of the church, and her memory is held dear by those who were in covenant relation with her at that time. In the fall of 1830, the little church was blessed with a remarkable revival; the whole community was awakened; and religion was the general theme. She and her husband were called from neighborhood to neighborhood, to visit the penitent, and assist in the social meetings, and were made the instruments of much good. The following spring her husband was called by the church to the work of the ministry. That was a great trial to her. She was much attached to her little farm, and lived in prospect, that it would be cleared of timber, and they be placed in independent circumstances. How vain are the hopes of man! Ministers in the country at that time suffered many privations and hardships, and received from the people a very limited support. She expected the same would be their lot, but counting the cost, she submitted to the will of God, and the judgment of her brethren, without a murmuring word, saying, "I hope, if my husband becomes a preacher, he will give himself wholly to the work, even if we must be poor and destitute."

In the fall of 1831, her husband parted with his little farm, settled his temporal affairs, and made arrangements to go on a preaching excursion through Western New York, Pennsylvania, and some parts of Virginia, intending to be absent the whole winter. Mrs. G. went to New Jersey, and spent the winter with her relatives, acquaintances, and friends. Her husband arriving the following spring, she went with him to Piscataway and Plainfield, where they spent a few weeks; then to Cambridge, New York, where his mother lived; and to Schenectady, his brother A. D. being then in that place; and thence to Friendship, their former home; having been absent six months. A few days after their return, her husband was ordained, and supplied the pulpit in Friendship until September, when he was appointed on a preaching circuit in Central New York, making De Ruyter their home. Mrs. G. took up her abode in the family of Deacon Pardon Coon. When the weather and roads were suitable she traveled the circuit with her husband, and there are those in the church, who still remember her with warm affection. In the month of May, they returned to Friendship, made arrangements to continue with that church, preach for them one half the time, and the rest of the time to be spent in other destitute churches in the vicinity.

Mr. G. built a house near the church in the village of Nile, and in October they moved into it, Mrs. G., feeling that she was again settled in a home that she could call her own. In 1833, her son, F. B., was born. Having the additional care of a child, increased her attachment to home and to her friends. During the winter the Lord visited his people in that place in great mercy; many were led to embrace the Saviour; some who were at the time members of her own family.

The following summer she went with her husband to Hayfield, Crawford County, Pennsylvania. On arriving there, she was taken sick, with a severe attack of billious fever. She was kindly cared for at the house of Maxson Greenley, and received the attendance of Dr. Boyd. The kindness she met with while sick among strangers, she often spoke of with gratefulness in after life. She soon recovered, and returned home again. When circumstances would admit, it was her delight to accompany her husband on his preaching excursions. It was almost her constant practice to attend the public meetings of the denomination, as in the business movements she took much interest. During their residence in Friendship, there was not a settlement within less than a day's ride, in which she had not formed some acquaintance. Cold and storm, wind and sunshine, did not deter her from going among both the rich and the poor, to rejoice or to sympathize with them. In the fall of 1836, her daughter Cornelia was born. Having two little ones to care for, confined her more at home, and she cheerfully submitted to her lot, evidently cultivating a growing interest in the happiness and prosperity of her family.

In the fall of 1837, they took a journey East, and while staying a short time in Schenectady, her husband's oldest brother, Rev. P. D. Gillette, living there, she was taken very ill. Dr. Dunlap kindly attended her until she was able to resume her journey; they went to Berlin, and attended the meeting of the General Conference; then to Mr. G.'s mother's in Washington County. Her husband having been invited to settle with the first church in Brookfield, they visited that place, and staid some time. On the way home from there she was taken with inflammation of the lungs. She was enabled to reach home, but remained dangerously sick for some time, not expecting to live. But God, who is rich in mercy, heard prayer, and restored her.

In the fall of 1839, her husband having accepted a call from the church at Piscataway, New Jersey, they moved to that place. This was a new trial to her. At Friendship were her acquaintances and friends, to whom she was strongly attached; there was the little church where she was wont to go, near by her own dwelling; and there was her pleasant home, with the shrubbery and vines that her own hands had planted, and whose growth she had watched for six long summers, which were to be left in the care of strangers, or by them destroyed and be trodden under foot. These thoughts affected her seriously. She counted the cost, and willingly made the sacrifice, believing that God required it at her hands. She formed acquaintance and gained friends with a great deal of care; hence people must prove themselves worthy of her attachment before they could gain it. But when she fixed her mind, and placed her affections, they were very strong indeed, as all know who have been intimately acquainted with her. Months passed away before they became settled in Piscataway, so as to feel as they had been accustomed to "at home." It was many months before she could form acquaintances to make amends for those she had left behind; often saying, "I fear I shall never love the people here as I did those at Friendship." As her husband began to labor among the people, their intercourse with the community increased and widened, and the fears she had been troubled with gradually wore away, and she became more and more attached to the people and to the place. She was wont to entertain a low opinion of herself, thinking she was in ability, and in attainments, inferior to others; and any disrespect, or designed neglect towards her on the part of others grieved her much. Being naturally very conscientious, doing every thing from a principle of right, she could not willingly submit to unnecessary reproof; and while some good sisters thought it necessary to reprove and instruct their minister's young wife, especially in the business of housewifery, they little knew the bitter pangs they gendered, while she thought it would be more becoming for them to attend to their own families and let her manage hers. With her acquaintance her attachment increased, to the people and the place, until she felt at times as though she could never leave them. We need not say, an acquaintance with her, on the part of the people, developed those very qualities they most feared she was deficient in. That is known by the people in that place, to their joy and satisfaction. Few occupy the position she did, who become more endeared to the people, or the people more attached to them. It was not confined to their own congregation, but general in the community around. Her life and labors there are of too recent date, and too well known, to need further comment. They are written in living characters on the memory and affections of the people, and they will not be soon forgotten. "She being dead yet speaketh."

In July, 1844, her daughter Mary Ann was born. About two weeks after, she was taken dangerously sick with the inflammatory fever. Her recovery for a long time was doubtful. She thought she should not recover, but through the kindness of Providence, she began gradually to amend, though it was nearly a year before she was able to take the charge of her family; and the effects of that sickness were visible in her constitution as long as she lived, being afflicted more or less with a lameness, from the disease having settled in her left limb. But she was spared to be a blessing to her family ten years longer.

Having lived in Piscataway thirteen years and six months, they came to the conclusion that it was their privilege and duty to accept of a call from Shiloh, Cumberland County, New Jersey, to which place they removed in April, 1853. During the winter she had not been as well as usual; her health had not been restored to that perfection and vigor that she enjoyed previous to her sickness in 1844. On one occasion, not many months before they moved, she had an attack that they feared would prove fatal. Doctor Runyon was with her the most of the night.

When moving to Shiloh, her husband staid in Philadelphia to ship the goods, while Mrs. Gillette with the family took the steamboat and pursued their journey. The day was boisterous; the wind blew almost a gale; so that most of the craft on the water were obliged to seek for harbors. The consequence was, that she became very seasick. She partially recovered from it, but still it affected her more or less through life. After being settled at Shiloh, her health became more and more delicate. She was not confined to her bed, but could walk around the house, and occasionally take a carriage ride. She had the faithful attendance of Dr. George Tomlinson, and the counsel of Dr. E. Fithian, who considered her case very critical, and of that she was perfectly aware. Some of her friends sympathized with her; others, as is always the case, were ready to deal in sarcastic reproofs, which things, in her delicate state, were more than she could bear. She finally declared herself home-sick, and thought she never could be contented at Shiloh; every-thing appeared wrong to her. Her physician recommended a journey, as soon as she could gain strength sufficient to warrant the undertaking. She started in company with her oldest daughter, her husband accompanying them to Bordentown, to the house of Doctor Fahnestock. He and his lady were absent, but they were kindly entertained by his amiable daughters. Mr. Gillette returned home, and she and her daughter went on to New Brunswick, Piscataway, Plainfield, and New Market, visiting their friends and acquaintances in those places. Her health was somewhat improved, and in a few weeks she wrote her husband to meet her in Bordentown, as she wished to return home again. When arriving there, they found the Doctor and his lady at home. Having much confidence in his medical skill, she consulted him in reference to herself. He told her the same that others had, especially Dr. Tomlinson—that proper exercise, dieting, care, and time, were the best if not the only remedies. Following their directions, she gradually improved, both in body and mind, so as to attend to some of her domestic duties, and occasionally to mingle with the surrounding community. When the following spring opened, she showed signs of returning health, and the activity, cheerfulness, and vigor that she had been accustomed to exercise. Still there were indications of remaining disease. She was not well, and when asked how she was, would say, "I am quite comfortable, but not well."

In September she accompanied her husband to Western New York, to attend the meeting of the denominational institutions. On their way they visited New York, New Market, Elmira, Alfred, Friendship, and other places, where old associations were again renewed. The journey was evidently an advantage to her; she felt and looked better than she had done in two years. In December her son came home from college in Philadelphia, bringing the intelligence of the death of Dr. Fahnestock, to whom she was much attached. Immediately her son was taken very sick with ulcerated throat. She was unremitting in her attentions to him, for that woman is not known who had more interest in and was more attached to her family than was Mrs. G. In about a week her eldest daughter was taken ill. These things had a tendency to increase her anxiety and her cares. She took cold, which resulted in an increased soreness of the stomach, and a troublesome cough. December 24th she attended the yearly meeting at Marlborough; the house was much crowded, and she said, when getting into the carriage, that she was in a perspiration, and was fearful she should add to her cold. What she then feared came upon her. Her uneasiness in her lungs increased, with an uncomfortable and alarming cough, until Fifth-day evening, when her breathing was intercepted with asthmatic symptoms. In the night she awoke her husband and son; they found her in a very critical state. Medicine was administered; relief was but partial; and soon it was pronounced a high state of inflammation of the lungs, accompanied with typhoid fever. She was pronounced dangerously ill, and the counsel of Dr. Fithian was called, who, in company with Dr. Tomlinson, the family physician, were unremitting in their attendence while she lived. She expressed a belief from the first that she should not recover; saying no one knew how she felt as well as she did herself; and why (she asked,) should we wish to live and suffer? She said little about her state of mind the first days of her sickness, but often expressed great thankfulness for the kindness of the people in taking care of her.

She being distressed in the night of the 3d of January, her husband was called and found her in extreme agony, and said to her, "How you do suffer; can we not do something for you?" "No, nothing, nothing; if I have to suffer so in this world, and then like that old man* die hard, and suffer in the world to come, won't it be dreadful." He replied, "You have no fears of that?" "Yes, I have," was her reply; "I always had fears; I have always been behind." She was told that the Lord Jesus had assured us that they who trust in Him were safe, they need fear no evil. "But I have not trusted in Him. I have been so wicked." Her husband says, "You never made the sacrifices you have for the cause of religion without having an interest in it." She then replied, "That is so; yes, that is so." He says to her, "You must put your trust in the Lord." She replied, "I will try; yes, I will try." After a pause, when she appeared to be quietly sleeping, she looked up and said, "Do you, dear husband, think I can be forgiven?" "Surely I do, for the Lord delighteth in mercy; the Christian's hope will not fail in the hour of need; you have a hope." "O, yes, I have; yes, I have; I will trust Him." He remarked, "You know that Job says, 'Though he slay me, yet will I trust in Him.'" She said, "Yes, I wish I felt as Job did; I do not think I do." Looking up she said, "What can you do without me? I know you can take care of yourself, but my poor girls; they are good girls; aunt, you must be kind to them; but they have a father, a good father, who will take care of them. I was left without father or mother." She then gave directions to her husband and daughter about her clothing, bedding, and other things about house, disposing and arranging them according to her own wishes. She left a message to be sent to Mrs. Jones, in Palestine; her respects and best affection to her mother-in-law, and brother-in-law, A. D. G. and wife; J. C. Ayers and wife; Martin Dunn and wife; those in particular, and others in general.

The next day she said to her husband, "I suppose I can live in heaven without you, but I never thought I could here. I always expected to go first, and now I am going before you. I have only a little inch of ground on which to stand, and I shall soon slip off from that. O, how will cousin M. feel when she hears that I am dead. I do not want to see her; I could not endure it; I am too weak; tell her that I love her. Do I suffer so because I am and have been so wicked?" Her husband replied to her, "We read of some who are to be made perfect through suffering; possibly you are one of that number." She said, "If that is it, I will try to bear it patiently." She said, "Why don't you come up here in my room to attend family worship? A minister does not know how much his family depends on him; their responsibility is great." She was told that she was too weak to have family worship in her room, but asked if she wanted us to pray with her. The 86th Psalm was read, to which she often responded, "Yes, yes," and likewise during prayer.

Near evening she said, "O that God would have mercy upon me." She was told by her husband, "that He would have mercy upon her; He is a God of mercy." She said, "O that he would blot out my transgressions, and take me to Himself; but that would be too much for me."

On the Sabbath, she often expressed anxiety to depart, saying, "How many more times must I breathe through these sore lungs." During the day she said, "If the choir want to sing at my funeral, let them, but I never was in favor of singing at funerals. It is a solemn thing to die, and I never thought it was a place for singing." Her son says to her, "Mother, there shall be no singing." She then looked at her husband and said, "Who will preach? Can you?" He shook his head. "Well, arrange it," she said, "just as you think best." He said to her, "You like brethren Clawson and West." "Yes," she said, "I like brother Clawson, I presume, as well as any one likes him; will you get him to preach, and have brother West make some remarks; have him talk some; that is all I have to say about it; you can arrange all to your own liking."

In the morning of the 7th, she appeared to be failing fast. She said, "O why am I so hard to die? Dr. Fahnestock died, and why cannot I die?" Her husband said to her, "Your sufferings will soon be over." She looked up with a smile and said, "Do you think so? Well, I am glad of it; that is what I want." At 3 o'clock she looked at her hands and said, "My flesh don't give way fast enough." Her husband said, "Though your strength and [illegible] tion." She replied, "O yes, I think he will."

On the 6th, she appeared depressed, and said little in the forenoon. In the afternoon, she was in extreme suffering, often saying, "O that I might go away, and be at rest." She looked at her husband and said, "I can patiently wait until evening; and then I can bid you all good night, and go; how glad I would be." When her family were with her alone, she gave to her three children each a small present, and directions about the future, with an assurance that they would comply with her wishes. She said to her sister, Mrs. Swinney, "Now I feel as though I was on the track; I am happy; it was a great trial to leave my family; there is nothing else; how much comfort I have taken with my family; I have been blest with a nice family." Her husband replied, "You will be taken from trouble, and we left to meet it without you." She said, "Yes, you will; but it will soon be over. O, that I could go; will not this be the last day of my suffering? Why can't I go to that bright city, that happy place? I am afraid I am impatient." Her husband said, "We want you to stay with us." She replied, "I have been willing to stay and suffer; I would like you to be gratified; but I am all diseased; I could do no good to live; I want to go; I want you to let me go."

At evening, she said to Dr. T., "I hope you will pray that I may be taken away this very night." He replied, "We cannot do that; we wan't you to live and enjoy life." She said, "O, that I cannot do, and if I live I fear I shall lose that bright hope I now have. I do not want to live; O, how impatient I am. What a night of suffering last night was; but it was a blessed night. What a happy time this little family had here last night all together. O how happy we have been together twenty-seven years. Last summer I was homesick; but I could not help it; it was a natural propensity—a strong attachment to a nice home, and good friends; how Mrs. Jones comforted me. When I went to East Jersey, all things were right again."

Sixth-day morning she said, "Aunt, what a happy time this little family had, night before last." After some moments she said to her husband, "You will be glad when you see me laid straight; you will then know that I am done suffering." Her husband replied, "The doctors say your symptoms are better." She replied, "O, I hope not; I hope not; I do not want them to be." He said to her, "Would you not be willing to stay with us if you could be well." She said, "Please, if you won't be hurt with me for not wanting to stay with you, let me go. I know that this body is so much diseased, it would only be to suffer; please let me go." When speaking of her children she said, "I have tried to do good to them; I think my work is done; I wish it was well done." Her son said, "Mother, as far as it relates to us children, it is well done." "Well, I hope my children will have no cause to rise up and call me cursed; I hope they won't call their father cursed." At 5 o'clock she was covered with a cold sweat, and said she was done talking; she wished to see her daughter Cornelia. She said to her, "I think I am going now." She then gave her some further directions about her domestic affairs, and to all present she showed evident signs of approaching death. She said, "This poor body will soon be left, and I am glad of it." While holding her up in the bed, her husband said, "I think you will soon go home." She said with emphasis, "Do you think so? I am glad of it. O, what good news. May the Lord have mercy on me, and take me soon—this very minute; yes, yes, that is good news." Soon the severe turn of suffering passed, and she continued about as she had been through the previous night.

Next morning she said to her husband, "Do you see any signs of my going home soon?" He says, "No more than heretofore." She said, "When you do, will you tell me?" He answered her he would. She said, "O, this is hard living, and hard dying." About noon she was much distressed, and said she was so long dying she was afraid she should become discouraged and complain.

On the 12th, 13th and 14th, her physicians thought her symptoms more favorable, and her sufferings were not so severe. She told them they were greatly mistaken. Mrs. Margaret A. Dunn, from New Market, a cousin of her husband, talked much with her on the subject, and told her that the church were praying for her recovery, and she thought she would certainly get well. She said, if she recovered she would try to be reconciled, but she thought they were mistaken; she should not get well.

In the afternoon and next day she was worse, and continued gradually to sink, often praying earnestly that the Lord would come and take this poor, suffering, sinful dust to Himself. She said that she hoped that every body would forgive her all her wrongs, trusting that God had forgiven her for Jesus Christ's sake; saying, I have nothing before me but a bright prospect of eternal peace with God. Thus she continned until eleven o'clock on the 16th, patiently waiting the summons. When she was evidently dying, her husband asked her if she knew that she was going. She nodded her head by way of assent, but could not speak, and looked around upon her husband and children, then closed her eyes, and in a few minutes she ceased to breathe; her spirit took its departure; it went to its eternal rest.

Her funeral was attended on the 18th. There were more people than could be comfortably accommodated in the capacious church. Five of the neighboring clergymen were present, four of them participating in the exercises. The sermon was preached by Rev. David Clawson, of Marlborough, from 2 Corinthians, 5: 8—"We are confident, I say, and willing rather to be absent from the body and to be present with the Lord." Her remains were deposited in the coffin, and put in a brick vault, purposely prepared for them, where they will quietly rest until the resurrection day.

Thus lived and died [illegible] who, being now gone from us, will be missed by us as long as we survive her. In the narrative which affection has penned, there has been no effort at eulogy—it would have pained her while living to have feared such a thing. She was eminently retiring, self-sacrificing—living for others, more than for herself. Her deceased brother-in-law, Rev. D. H. Gillette, of sainted memory, was long an invalid at her house, and he often referred with admiring gratitude to her patient waiting and affectionate tenderness, never wearying in well-doing whatever she could do to promote the comfort of others. Her aged mother-in-law spent many months with her in Piscataway, always receiving that kind deference and affectionate attention due to one so venerable and peculiarly related to her and hers. Her husband's brothers and other relatives loved to visit her, for they loved her as a sister, and if ever they regretted any thing while there, it was that she took such unwearied pains to make their visits agreeable and delightful. Many clergymen of her own and other sections of the church can testify how pleasant they always found a temporary residence at her husband's fireside, and her prophet's chamber. The memory of the just is blessed. May we meet her in glory.

A. D. G.

---

* Referring to the last sermon her husband preached.

DEATHS OF THE APOSTLES.—St Matthew is supposed to have suffered martyrdom, or was slain with the sword, at a city of Ethiopia. St. Mark was dragged through the streets of Alexandria, in Egypt, till he expired. St. Luke was hanged upon an olive tree in Greece. St. John was put into a cauldron of boiling oil at Rome, and escaped death! He afterwards died a natural death at Ephesus, in Asia. St. James the great was beheaded at Jerusalem. St. James the less was thrown from a pinnacle or wing of the temple, and then beaten to death with a fuller's club. St. Philip was hanged up against a pillar, at Hieropolis, a city of Pophrygia. St. Bartholomew was flayed alive by the command of a barbarous king. St. Andrew was bound to a cross, where he preached to the people till he expired. St. Thomas was run through the body with a lance, at Coromandel, in the East Indies. St. Jude was shot to death with arrows. St. Simon Zelotes was crucified in Persia. St. Matthias was first stoned, and then beheaded. St. Barnabas was stoned to death by the Jews at Salamia. St. Paul was beheaded at Rome by Nero.

MAN BY NATURE, BY GRACE, AND IN GLORY.

BY NATURE.

'Dead in trespasses and sin,'
'Vile,' 'polluted,' and 'unclean;'
'Naked,' 'miserable,' 'blind,'
'Darkened' in his 'heart' and 'mind,'
'Satan's slave,' a 'child of wrath,'
Wandering 'helpless' from the path,
'Without hope,' and 'without God,'
'Without strength,' to seek the road;
'Knowing nothing,' 'hating life,'
'Speaking evil,' 'sowing strife;'
'In the way that leads to death,'
His best hope 'a puff of breath;'
'Of the world,' he hath no rest,
Peace a stranger to his breast;
'Hating God,' who 'knows him not,'
'God is not in all his thought;'
A 'despiser' of the word;
One who 'will not' seek the Lord;
But 'stout-hearted,' void of faith,
And 'condemned' to endless death.

BY GRACE.

'Quickened' by the voice of God;
'Cleansed' by his atoning blood,
'Clothed,' and 'blessed;' light is given;
Darkness from his spirit driven;
See, 'the Son has made him free,'
And he 'walks at liberty.'
He is an 'adopted son,'
Dwelt in by the Holy One!
He has found the pathway 'strait,'
'Leading to the heavenly gate.'
He is 'strong in Christ the Lord,'
And he loves his holy word.
Now he knows the 'better part;'
God has given a fleshly heart.
He will 'follow after peace,'
Own the 'Lord his righteousness,'
He is 'holy,' 'true,' and 'just;'
'In the Lord he puts his trust;'
Living, lives a life of faith;
Dying, triumphs over death!

IN GLORY.

'Life eternal' shall be his;
He shall 'see Him as he is;'
He shall 'know as he is known;'
He shall love the Lord alone;
All his sorrows shall be o'er;
Sin shall never grieve him more.
'Faith shall then be lost in sight;'
God shall be his glorious light;
He shall see him 'face to face,'
Who has saved him by his grace.
'Like' his Saviour he shall be,
Sharer in his majesty.
He shall 'enter into rest;'
He shall mingle with the blest;
He shall cast his purchased crown
At the Saviour's footstool down.
"Filled and satisfied' with joy,
Naught shall burden, fade, or cloy;
Death shall ne'er his bliss dissever;
He shall be 'with Christ' forever.

THE LIFE TIME OF MAN.

When the world was created, and all creatures assembled to have their life-time appointed, the ass first advanced, and asked how long he would have to live.

'Thirty years,' replied Nature; 'will that be agreeable to thee?'

'Alas!' answered the ass, 'it is a long while. Remember what a wearisome existence will be mine; from morning until night I shall have to bear heavy burthens, dragging corn sacks to the mill that others may eat bread; and that while I shall have no encouragement, nor be refreshed by anything but blows and kicks. Give but a portion of that, I pray!'

Nature was moved with compassion, and presented but eighteen years. The ass went away comforted, and the dog came forward.

'How long dost thou require to live?' asked Nature. 'Thirty years were too many for the ass, but wilt thou be contented with them?'

'Is it thy will that I should?' replied the dog. 'Think how much I shall have to run about; my feet will not last for so long a time, and when I shall have lost my voice for barking, [illegible] growl?'

Nature thought he was right, and gave twelve years.

The ape then appeared.

'Thou wilt doubtless willingly live the thirty years,' said Nature; 'thou wilt not have to labor as the ass and the dog. Life will be pleasant to thee.'

'Ah, no,' cried he, 'so it may seem to others, but it will not be! Should puddings ever rain down, I shall excite laughter by my grimaces, and then be rewarded with a sour apple. How often sorrow lies concealed behind a jest! I shall not be able to endure for thirty years.'

Nature was gracious, and he received but ten.

At last came man, healthy and strong, and asked the measure of his days.

'Will thirty content thee?'

'How short a time!' exclaimed man; 'when I shall have built my house, and kindled a fire on my own hearth—when the trees I shall have planted are about to bloom and bear fruit—when life shall seem to me most desirable, I shall die. O, Nature, grant me a longer period!'

'Thou shalt have then the eighteen years of the ass besides.'

'That is not enough,' replied man.

'Take likewise the twelve years of the dog.'

'It is not yet sufficient,' reiterated man; 'give me more.'

'I give thee the ten years of the ape; in vain wilt thou claim more.'

Man departed unsatisfied.

Thus man lives seventy years. The first thirty are his human years, and pass swiftly by. He is then healthy and happy. He labors cheerfully and rejoices in his existence. The eighteen of the ass come next; burden upon burden is heaped upon him; he carries the corn that is to feed others; blows and kicks are the rewards of his faithful service. The twelve of the dog follow, and then he loses his teeth, and lies down in a corner and growls. When these are gone, the ape's ten years form the conclusion. The man, weak and silly, becomes the sport of children.

INFIDELITY OF DESTRUCTIONISM.

When we expressed our conviction, as we did week before last, that *materialism* was at the bottom of the doctrine of the soul's unconsciousness between death and the resurrection, and that the legitimate tendency of the doctrine was to infidelity, we thought it not improbable that some of our readers would consider us very illiberal. But we have no disposition to recede from what we said. It is our solemn belief, that the doctrine we have oppugned is a most dangerous one.

It is so difficult for the mass of people to conceive, that any thing can have a real and living existence, which has not also some kind of *form*—something like *dimension* and *solidity*—a figure whose *outlines* and *contour* are capable of being marked—that the strict immateriality and spiritual nature of the soul are held by them with a very feeble faith. Even those who theoretically admit its spirituality, do, nevertheless, in imagination, assign to it some *shape* or *form*, and find it extremely difficult, if not possible, to conceive of its living existence wholly disconnected with any bodily organization. It is not wonderful, therefore, that when a specious philosopher affirms, that what is called the soul is nothing but a modification of matter, or that the mere organization of the brain is all that gives rise to thought and intelligence, many are ready to fall in with his views.

The Scriptures assure us, however, that besides the flesh upon man, which is sensitive to pain, there is a soul within him that mourns, (Job. 14: 22)—that besides the body, which returns to the earth as it was, there is a spirit which returns to God who gave it. (Eccles. 12: 7.) If there is any philosophical absurdity in supposing this spirit to have a living, substantial existence, independent of the body, and of any bodily organization or form whatever—if such a thing cannot be without some bodily form in which its existence inheres, then how do we know that God himself can exist without some bodily form? Man was created in the image of God; and if God can and does exist as a pure spirit, without form or similitude, why may not man, his image, so exist?

Certainly, God exists as a pure spirit, without bodily form or parts. He is invisible, in the strictest sense of the word. (1 Tim. 6: 16) The prohibition of the second commandment is founded on the fact that the Divine Being is a pure, spiritual, uncompounded essence, and therefore incapable of being represented by any thing that has figure, form or dimension. But if we assume that man cannot exist as a mere spirit, abstracted from bodily organization of any kind, we might as consistently say that God cannot; which is the stand-point of the atheist. For this reason we say, that the doctrine we oppugn does legitimately tend to infidelity.

It has always been a favorite point with infidels, that what is called the soul, or thinking principle of man, is simply the result of the structure of his brain. They well understand, that on the contrary doctrine, namely, the immateriality and spirituality of the soul, is based the whole system of human accountability. They well understand, that if death is the end of our existence, then all our responsibility ends with this life. That which goes absolutely out of existence, never exists again. The same thing cannot have two existences. There may be two, or even more, different *modes* or condi [illegible] solutely different and distinct existences of one and the same thing, is an impossibility, nay, an absurdity. If one existence of a man, therefore, is destroyed, he can never exist again, no, not by Almighty Power. Almighty Power may bring about a new existence, which shall *resemble* the old in every particular; still, it will not be the *same* existence.

Infidels, therefore, and all who hate the doctrine of human accountability, convert man into a brute by giving him a material soul, that dies with his body. And when we see such a sentiment assuming the garb of Christianity, and imposing itself upon God's people under the pretense that the resurrection makes it all straight, we feel that we should be wanting in faithfulness, if we did not warn them against the cheat. "That which is crooked cannot be made straight," by the resurrection, nor by any thing else. The resurrection is not the accomplishment of an absurdity; it is not the giving of a second existence to a race of beings, who had been absolutely destroyed out of being. It is the investiture of the same race of beings, who dwelt here on earth, with a new *mode* of existence.

Those of our brethren who have been deceived into the adoption of this error, will do well to examine the ground they are treading upon. We give it as our opinion, that Universalism, Restorationism, Romanism, indeed, almost any theory of the future life, is better than this. The isthmus which divides between it and absolute scepticism is a very narrow one; and though many excellent people have incautiously adopted the sentiment, we trust they will take the sober second thought, and not persist in a thing of such destructive tendency. T. B. B.

Kanzas Emigration.—A meeting of persons connected with the Kanzas Emigration Companies of New York was held at Hope Chapel a few evenings since, at which Theodore Dwight, President of the American Settlement Company, and Secretary of the Kanzas League, made a statement of the labors and plans of those organizations. From his statement, it appears that there is a prospect of large emigration to Kanzas this season, and that it will consist mostly of Americans of substantial character, regular habits, industry and intelligence. The League will soon commence sending out parties with through tickets. The Settlement Company have now made arrangements to locate on their fine site for Council City, about 90 miles in the interior, on the great Santa Fé road. One of their directors has gone there with a steam saw-mill. A Rev. Mr. Lowry is about to set off for that place from the interior of New York, accompanied by a portion of his Wesleyan congregation.

TRACT ON THE SABBATH.

(The following is a rough translation of a Tract on the Sabbath, of which Bro. Wardner has lately had ten thousand copies printed for circulation in China.)

The God who created heaven, earth, and all that in them is, has said, "Remember the Sabbath day to keep it holy. Six days shalt thou labor and do all thy work; but the seventh day is the Sabbath of the Lord thy God; in it thou shalt not do any work, thou, nor thy son, nor thy daughter, thy man servant, nor thy maid servant, nor thy cattle, nor thy stranger that is within thy gates; for in six days the Lord made heaven and earth, the sea, and all that in them is, and rested the seventh day, and hallowed it." This commandment enjoins upon us to remember the day of the Sabbath; and also that it must be kept holy—that no common business should be performed upon it; but that we follow the example of God himself when he created the heavens and the earth. He regarded this with the other nine precepts as so important that he came down upon Mount Sinai and proclaimed them in the hearing of more than six hundred thousand people. If He, the Author of the universe, regarded the Sabbath of so much importance that he came down from heaven to proclaim and enforce it, how disrespectful it must be for man to treat it with indifference!

God will not allow us to select any day we choose, and call it the Sabbath, but commands us to keep the seventh day, and that only; and enjoins it upon us to labor on the first with the five following days of the week. Whoever, therefore, labors, trades, or seeks pleasure on the seventh day, insults Jehovah. Man must not exalt himself above his Maker, and presume to change his laws. See what He has said in Rev. 22: 18, 19.

God has set up the seventh day as a monument for all time, that all men may know that he alone created all things in six days, and rested the seventh, and therefore he alone is the true God. Hence, whoever worships any other deity provokes his wrath, and brings misery upon himself.

No day but the seventh will commemorate the finishing of creation; for it was not finished till the commencement of that day. No other day will commemorate Jehovah's rest; for He only rested on the seventh. No other day is holy; for he never blessed any other day, neither has he ever promised the blessings of the Sabbath to any except such as keep the seventh day; but, on the contrary, has pronounced curses upon all who do not keep it holy. See Lev. 26: 2, 34, 43—46; Isa. 56: 2, 6; 58: 13; Jer. 17: 21—25, 27; Ezek. 20: 12, 13, 24; 22: 8; 23: 38; 44: 23, 24.

The Sabbath commences at sunset, and ends at sunset. Such was the manner in which God kept it at first, (see Gen. 1st,) and thus he commanded the Israelites to keep it, (see Lev. 23: 32,) where he says, "From evening to evening shall ye celebrate your Sabbaths." All the [illegible]gether with Jesus and his Apostles, observed the Sabbath according to this rule. Those who begin and end their Sabbath at midnight, or in the morning, do not keep the whole of any one day, but part of two days, and thus become transgressors of the law.

The true Sabbath is always pointed out by the four constellations "tee-nyu-way-leur," not "mong-shen-sing-maw." These last point out the first day, on which God has commanded us to labor.

There are those who say that since the resurrection of Jesus his disciples have always kept the first day in commemoration of that event, and give it the name God gave to the seventh day, calling it "Sabbath," "Lord's day," &c., and teach also that God enjoins the observance of this day in the fourth commandment. But all readers of the Bible know, that the resurrection day is not the Sabbath spoken of in the fourth commandment. All know, that Jesus never enjoined upon his disciples to observe his resusrection day as a Sabbath; but, on the contrary, taught them to keep the seventh day according to God's law, saying, "Till heaven and earth pass, one jot or one tittle shall not pass from the law, till all be fulfilled." Matt. 5: 18. James, one of his apostles, speaking of the ten commandments, said, "Whosoever shall keep the whole law, and yet offend in one point, he is guilty of all." Who does not know, that the resurrection day is the first day, and not the seventh day? If the fourth commandment requires us to rest on the seventh day, and work on the first, then it will not allow us to work on the seventh day, and *rest* on the first. If God requires us to rest on the seventh day, because he rested on it when he finished the creation, how can he be pleased to have men cast away his rest-day, and keep another, which he has forbidden to be kept? He has distinctly enjoined upon us to labor on the first six days of the week, and has strictly forbidden us to labor on the seventh. Would a king be pleased to have his officers forge his name and make laws subversive of his own? But God is King of kings and Lord of lords, and how much more offensive to him would be such conduct in his subjects? The resurrection day is never in Scripture called "Sabbath" or "ceremony-worship-day" or "Lord's day." Jesus said he was Lord of the Sabbath day, (Mark 2: 28,) but he never claimed to be Lord of the first day, nor did any of his apostles teach that it was his day. Those who honor Jesus should obey him and imitate his example; whoever does not, He has pledged to disown. Is a child filial who will neither obey his father nor imitate his example? Or, is a scholar dutiful who will not heed his teacher's instructions?

On the day of his resurrection, Jesus with two of his disciples walked to Emmaus and back again to Jerusalem, making in all about sixty lee, according to Luke 24: 13, 33—37. But in Dr. Robertson's recent work he very clearly demonstrates, that it was about 148 lee, and that the early copies of Luke's gospel made it the same even down to the beginning of the fourteenth century, when, through carelessness in copying, one of the figures was omitted. Was this resting? Jesus never traveled thus on the seventh day. But here, on the very day on which he arose, he gave his disciples an example, showing that it was proper to travel and do secular business on that day; which example his apostles afterwards imitated. See Acts, 20th chapter. It appears by this chapter, that as Paul was to leave Troas in the morning, and the disciples of that place never expected to see him again, therefore they assembled at night, after the Sabbath was passed, being the commencement of the first day, to break bread and hear him preach. And while he was there preaching, Luke and the other disciples who accompanied him, took ship and sailed round to Assos, and there waited for him. When it was light Paul left Troas and walked across to Assos, about seventy lee, and there taking ship went on. Thus it is evident that they spent the whole of the first day in traveling. This was seventeen years after Jesus' resurrection, and proves that they did not keep the resurrection day as a Sabbath or a holy day. They never traveled thus on the seventh day, but always spent it in preaching and acts of worship. See Acts 13: 14, 15, 42, 44; 15: 21; 16: 13; 17: 2; 18: 2, 3, 4; 19: 8. The disciples of Christ uniformly kept the seventh day for several hundred years after his resurrection, and some have kept it faithfully down to the present time.

But it may be asked, how came the day to be changed, if neither Christ nor his apostles did it? *Answer*—It was changed by the Roman Catholics. But Jesus says, "In vain do they worship me, teaching for doctrine the commandments of men."

CONVERSATION.

There is nothing that more engages the attention and affections of others, than a pleasant address, and an easy and agreeable conversation; for truly our conversation should be such as not only to command civility and respect, but to afford improvement to all. In conversation, persons of good sense will not endeavor to show their superior knowledge, although they may possess it, but will choose to appear on a level with others, for "a well bred man," says Montaigne, "is always social and complaisant." Freedom of thought and speech, which is always the life of conversation, must be reciprocal, or it can never be agreeable; therefore we should always accommodate our thoughts and conversation to the capacity of those with whom we converse. [illegible] speak and act well in company, in spite of those who do differently, speaking always according to our conscience, but let it be in terms of good nature, civility, and good manners." If we understand the true genius of conversation, we shall enjoy ourselves far more in conversing upon each other's excellencies, than in triumphing over our imperfections; for he who converses kindly and tenderly, makes many lasting impressions, while he who only proclaims a triumph, has obliterated much that was good. "Words," according to one of *our* divines, "are the daguereotypes of our thoughts outside of ourselves;" and this accounts for the fact that so many miserably deformed and half developed sentences come forth in conversation, even among our learned men. How important, then, if our conversation is the true picture of our hearts, that our thoughts should be well formed, having every part well developed, and that they should only be taken when the sky is clear, and the light of such brilliancy as to insure a chaste and beautiful conversation.

Some men possess a talent of turning every thing into ridicule, whenever the conversation does not harmonize with their views or please their fancy; and rather than adopt that excellent rule which ought to be observed in all disputes, "that men should give *soft* words and *hard* arguments," they think to conquer by introducing such hard words and sentences as will at once put to silence every kind of argument, and destroy every tender feeling. It is true, that when the speech is corrupted, it almost invariably shadows forth the impure state of the mind. It should be remembered, that a jest is never an argument, and that it is impossible in any other way to inflict so deep an injury in one's memory, as to give them a severe and cutting jest, which allows of its being construed as resulting from unkind feelings, or malice; a jest of this kind should never be responded to, but treated with silent scorn.

In our communications, we should avoid all "foolish talking," and have our conversation entirely free from oaths, or imprecations of any and every kind, although they enter largely into, and are considered almost indispensable to, the fashionable language of the present day. As no one was ever born with a swearing, swaggering constitution, therefore we should regard all loud and boisterous conversation, especially where it is interspersed with oaths and imprecations, as a fashionable way of braying, there being braying men as well as braying animals.

A chaste and pure conversation is demanded of every Christian, for, "as he which hath called you is holy, so be ye holy, in all manner of conversation," "for God hath not called us unto uncleanness, but unto holiness," is instruction given in the Holy Scriptures. "Keep thy tongue from evil, and thy lips from speaking guile," "to him that ordereth his conversation aright, will I show the salvation of God," is the language of one who well understood the necessity of a "clean heart," and a pure conversation. Yet how frequently do we hear professors of religion use a loose and vulgar language, frequently using, as they perhaps may think, a modest set of oaths, such as "by George," "by gracious," "by golly," "Jiminetta," &c., &c., copying so near the language of the world, that no one would even suppose they had ever read the saying of the Saviour, that their communications should be "yea, yea; nay, nay; for whatsoever is more than these cometh of evil."

If by our words we are to be justified or condemned, how necessary that they should be words of truth, spoken with sobriety, and that in all our conversation we should strive to edify and instruct, rather than amuse, "those that oppose themselves," and comprehend if possible the value of that "*word*" which, if "fitly spoken, is like apples of gold in pictures of silver. H. H. B.

February 25, 1855.

THE EARLY DEAD.

The righteous dead need no eulogy, for they are beyond the reach of our benediction or criticism. Yet it is our duty to perpetuate their memories, by holding up their good example for the benefit of others. Our hearts are made better, while we dwell upon their devotion to truth, their meek and amiable spirit, their love and labor for their fellow men. The examples of such Christians are a public benefit, and their death is a public calamity. As the drying up of the spring upon the hill-side cuts off a needful supply of water from the valley below, so the death of a pious young man deprives society of a stream of moral and religious influence. We naturally anticipate much from a young man of industrious habits, whose head and heart are consecrated to God. His influence may for many years swell the stream that carries happiness to the heart of society, and to the church of God.

Among the "early dead" who will be remembered with pleasure, is George Alberti Maxson. He made a public profession of religion at the age of nine years. Even before this, his heart was drawn out for the salvation of his young associates. He not only asked them to love the Saviour, but he invited them to his retreat for prayer, where he poured out his heart to God for them. In the simplicity of childhood, he gathered his playmates together for prayer meetings. In these juvenile prayer meetings, several were converted, some of whom are now examples of piety. How simple, and yet how beautiful, is this principle of evangelization, as exhibited by a child, yearning over his associates. Such efforts are but the natural impulses of Christianity. After our brother united with the church, he demonstrated to all, that his interests were identified with the interests of the church. He wished to be useful, and to this end he applied himself to study with untiring application. While devoting himself to his task, disease fastened upon his system, and with slow but steady pace, it accomplished its work. Though his body is laid in the tomb, and his spirit has gone to God, he yet speaks to us, by an exemplary life, and a triumphant death.

L. M. Cottrell.

EMIGRANT CHURCHES FOR KANSAS.

"*A Journey through Kansas, with Sketches of Nebraska,*" by Rev. C. B. Boynton and T. B. Mason, of Cincinnati, is a very important contribution to the literature of this subject. The writer sketches the general features of the country, introducing just such information in regard to the fertility of the soil, the cost of improvements, the method of securing preëmption rights, and kindred topics, as an emigrant needs; and gives many amusing and interesting notes of personal adventure.

Among the many important suggestions contained in the book, are the following. After referring to the emigrant aid societies, the writer proceeds to say:—

But the highest possible exhibition of this scheme, and by far the most effectual for the salvation of Kansas, would be colonization by bands of Christians—"Christian colonization." Such a movement need not be isolated or exclusive in its character or aims. Certainly, there would be nothing objectionable, if Christians should agree to act as such, and in organized capacity, in connection with the efforts of others, for the purpose of establishing the Gospel and freedom on the soil of Kansas. Nothing is more obvious than that if emigrant churches could be organized in sufficient numbers, and planted in that territory, so that they should become the nuclei around which society there would form itself, that Kansas, with God's blessing, would not only be a free State, but a model State. If the Christians who may make Kansas their home, instead of being scattered abroad, could be settled in communities, from the first, and bound to each other by Christian sympathies, neighborhood attachments, and the ties of church relationship, what a waste of influence would be prevented! what a power would be created at these Christian centres, whose silent influence would flow forth, shaping and blessing all things! This presents itself in the light of a missionary effort on a large scale, and in the most effective form. If churches could thus be formed at different points in our land, either connected with colonies or forming a colony by themselves, to become in Kansas the germs of towns and cities, and to plant the seeds of all right things around them, how incalculable a benefit would thus be conferred upon Kansas, and how far into the future the movement would reach, in its influence upon slavery and the destinies of that remote west, even to the Pacific! How cheaply this operation might be performed! Every godly man or woman thus settling there, would be a missionary of the most effective kind, and once there, a man would not only sustain himself, but would be adding to the general wealth of the country, while laying the foundations of the kingdom of Christ. Why might not such churches be organized in different parts of the country, and the missionary societies aid them in sustaining their pastors? and why should not the same large-hearted benevolence, which sends yearly hundreds of thousands of dollars into foreign lands, contribute with more zeal and liberality still, to such a cause, so intimately connected with the progress of Christ's cause at home, and the interests of the country at large? It presents, too, a noble opportunity to lay aside denominational feelings, and unite in a common work for God. If at any locality there are Christians of different sects, who wish to emigrate to Kansas, why should they not unite in an organization liberal enough to embrace all evangelical Christians, and then go forth together, not to establish a sectarian religion, but to save, by their joint efforts, Kansas from slavery, and lay the broad foundations of the Gospel under the society forming there? Such an experiment might afford the opportunity for the exhibition of a higher and nobler form of Christianity than now exists in the country. Separated from old associations—old barriers thrown down—theological differences laid aside and forgotten, and drawn together by the power of new and interesting relations, and in circumstances more favorable for the cultivation of the affections—the idea of Christian brotherhood might thus, perhaps, be more nearly realized than it can be under the more rigid forms of older communities, and churches more nearly conformed to primitive models and primitive character, might manifest the power of a fresher and more spiritual life.

If Kansas and Nebraska could be occupied by such churches, composed of men who, while laboring to shut out slavery from the Territory, would not forget to exclude it also from church fellowship and communion, and would, moreover, see that a sound Christian literature were circulated in the families and communities about them—a literature not in alliance with popular and powerful sins—a work would thereby be done, by which the whole country might ultimately be saved from slavery, and over which men and angels might rejoice together!

To the Editors of the Sabbath Recorder:—

I have seen in many papers the following statement, which I would like to see corrected as written below:—

"The year 1854 began on Sunday, and will end on Sunday, thus having fifty-three Sundays in the year. January, April, July, October, and December, have each five Sundays. This will not occur again until 1882."

Correction.—The years 1865 and 1871 will each begin and end on Sunday, and will have fifty-three Sundays, and the same months will have five Sundays as in 1854. The year 1876, the hundredth anniversary of American Independence, is still more remarkble. It will not begin on Sunday, but will end on Sunday, and the same months will have five Sundays as in 1854, with this peculiarity—in addition to fifty-three Sundays, it will have fifty-three Bible Sabbaths. Another such year will not occur until 1916. H. B. C.

Missionary Circulars.—A few only of the many to whom were sent the Circulars calling for funds to purchase lands in Palestine, have responded thereto. The Committee wish to be able to make a full report at the Board meeting about the first of April. Those who have done any thing, and have not reported, and all who will do anything, are requested to report, as directed by the circulars, the amount pledged, within the course of the present month. J. Bailey.

The Society at Dakota, Wis.—A letter from Eld. Julius M. Todd, dated Berlin, Wis., Feb. 19th, says: "I will add, that I have just returned from Dakota, where I have been to administer the word and ordinances; and I have never been in any place where there seems to be so much union and brotherly love as manifests itself in this little church. The covenant meeting on Sixth-day, and the communion on the Sabbath, were deeply interesting seasons, and many souls were cheered and comforted on those occasions. The Second Adventists have given a series of ten lectures in that place, raising the usual cry of "Babylon," and that it means the churches, but as yet they have had no success. Join with me in praying God to bless and keep this 'little flock' in the wilderness."

3d Brookfield Church.—In a business letter from Bro. E. Maxson, he says: "Bro. L. M. Cottrell commenced his pastoral labors with us about the 1st of December last. We have had meetings most of the time three evenings in a week. There is a very pleasant state of religious feeling among us. There have been ten added to the church by baptism, and three others reünited with the church. I believe others still are deeply impressed with the duty of following the Saviour in the ordinances of the Gospel."

The Samaritans of Nablous.—A deputy from this ancient and suffering community is in London, under the following circumstances, as stated in an English paper:—

"Of late years the Samaritan community residing in Nablous, the ancient Sychar, Palestine, have been reduced to a state of great poverty, from, among other causes, the persecution and death in 1851 of El Abd es Samerez, a man of considerable importance, who was formerly well-known to many English travelers, most of whose property was seized by the factious governors of the district, who seem to have signaled out this little band, and by force levied fines which they were not in a position to pay; the famine of 1853 also added to their distress. The Samaritans have appealed to our government for help, and sent their trustee, Jacob esh. Shelaby, the only member of the community who has ever trod on British soil, for pecuniary and protective assistance in their trouble. He has received a favorable reply from the Secretary of State, and we are glad to see that E. T. Rogers, Esq., Vice-consul for Caiffa, who is now in London, 10 Carlisle street, Soho square, on leave of absence, has kindly taken this case into consideration, and the Bishop of London and many of the clergy and others have come forward to succor the remnant of this once-favored people."

Emancipation in South America.—In 1852, New Granada freed all her slaves, thus setting a glorious example for other and more enlightened States. Peru has followed the example of New Granada, and abolished the the system of slavery entirely. It seems that Castilla, having succeeded in revolutionizing the country, by defeating in battle the President Echinique, introduced his administration with this noble act. He decreed "that the men and women held until the present time, in Peru, as slaves, or serving-freedmen, whether in that condition by sale or birth, and in whichever mode held in servitude, perpetual or temporary, all, *without* distinction of age, are from this day wholly and forever free." He also decreed, that the whole people shall assume and pay to the owners of the slaves a fair price for them.

Christian Church.—This church, which seceded at one time from the Campbellites, has done as the Methodists and Baptists, divided on the much agitated question of slavery. The strength of this denomination is principally in the East and West, but in Virginia, North Carolina, Georgia, and Missouri, they have been on the increase, and now have quite a number of churches. A convention is held annually, in which the whole body is represented. At such a convention, a short time since, held in the North, strong resolutions were introduced, denouncing slavery and its abettors, which after a lengthy discussion and despite strenuous opposition, were passed; whereupon Elder Wellons, the Virginia delegate, and his brethren from the South, deeming themselves virtually excluded by their adoption, left the convention and returned home, determined that the South could not fellowship with the North hereafter.

Slavery in Egypt.—The Viceroy of Egypt has solemnly interdicted, for the future, the introduction of slaves into his provinces; but as to those already in Egypt, they are to remain in *statu quo*. A change, says the decree, would subvert the economy or prescriptive constitution of the Mussulman family; the anti-slavery principle, however, is inaugurated. The Viceroy was educated chiefly in Paris, and has acted wisely from the ideas which he imbibed there, and under the influence of his British and French councils. It appears from the testimony of travelers, that the number of bondsmen throughout Egypt is considerable, and the lot of the majority wretched enough.

Important Bill.—Under the *specious* title of "an act to protect officers and other persons acting under the authority of the United States," the Senate of the United States has just passed a bill the design of which is to give increased facilities for the execution of the Fugitive Slave Law. It is hoped that the House will arrest the infamous measure. If it does not, the State Courts will be effectually prevented from protecting the liberty of citizens, as the Supreme Court of Wisconsin, protected the liberty of Messrs. Booth and Ryecraft. The bill provides as follows:—

"If a civil suit be commenced or pending in any State Court, against any officer of the United States, or other person, for or on account of any act done under any law of the United States, or under color thereof, or for or on account of any right, authority, claim or title, set up by such officer or other person acting in aid of such officer, under any law of the United States, and the defendent shall, at the first Term of such State Court after the passage of this act, or at the first Term of such State Court after such suit shall be commenced, file a petition for the removal of the cause for trial into the next Circuit Court to be held in the district where the suit is pending; or if there be no Circuit Court in such district, then to the District Court invested with the powers of a Circuit Court next to be held in that district, and offer good and sufficient surety for his entering in such Court, on the first day of its session, copies of the process against him, and also for his there appearing and entering special bail in the cause, if special bail was originally requisite therein, it shall be the duty of the State Court to accept the surety and proceed no further in the cause, and any bail that may have been taken is to be discharged, and the cause is to proceed in the United States Court as if it had been brought there by original process."

Rev. Alexander Grozart, of Edinburg, has been some time in this country collecting materials for a life of Jonathan Edwards. The manuscripts in the possession of his descendants, of which Rev. Dr. Edwards, of New London, has custody, have been generously placed at his disposal.

The Central Congregational Church at Hartford, Conn., never dismissed a pastor, and never settled one who had a previous settlement. All its pastors have begun and ended their ministerial work in its service.

RELIGIOUS INTELLIGENCE.

Recently, J. W. Markersohn was ordained a missionary of the American Board at Hartford, Ct. Mr. M., says the *Puritan Recorder*, is a Jew, was born at Odessa, in Russia. He became a convert to Christianity, while at the Mission Station at Constantinople. On coming to this country, he was kindly taken into the family of Professor Thompson, of East Windsor Theological Institute, where, through all his course of study, he has found a welcome home. His theological course was completed at East Windsor last year. He expects to spend his days in laboring among his own people, the Jews.

Thank God, (says Rev. W. C. Milne,) that, amid the confusion and anarchy in certain parts of China, our Protestant missionaries are carrying on their labors without interruption, and the Spirit appears to be blessing them in their work. Letters from Shanghai and Hong Kong give us accounts of conversions from darkness unto light. In letters from Rev. John Stronach, of Amoy, (date Oct. 3d,) he observes: "In seven months we have baptized 20 women and 32 men; and there are 10 more applicants on our list."

The Kansas Free State records the death of Rev. M. Meeker, of the Baptist Mission among the Ottawas. He departed this life on Thursday, the 11th of January. He commenced his missionary labors at the age of 21 years, among the same tribe of Indians in Michigan, and has been a missionary ever since, except some four years spent in visiting his friends. He has spent twenty-one years in missionary operations in Kansas, five of which were among the Shawnees, and sixteen among the Ottawas.

Rev. R. C. Putray, of the M. E. Church, writes to the *Christian Advocate and Journal*, dated Hudson, N. Y., Feb. 12: "The Lord is graciously visiting us in this city. Sixty-five within three weeks have professed to find peace through believing in Christ. Yesterday fifty united with the church on probation. Last evening the altar was full of penitents, and five were converted. The good work seems just fairly commenced."

Dr. Warneford, who died recently at Burton-on-the-Hill, England, was well known to the public by his munificent benefactions to the Queen's Hospital, Birmingham, and by his *works of piety and charity*. His benefactions during his lifetime are estimated to have amounted to £200,000. To the Society for Promoting Christian Knowledge (in addition to former gifts) he has left £2,000, and the same to the Society for the Propagation of the Gospel.

Rev. Mr. Tuttle, pastor of the Presbyterian Church in Rockaway, N. J., states that that church has lost within a year, *seven members, whose average age is eighty and five-sevenths years*. Five of them were over eighty years of age. Within seven years the pastors of that church have attended the funerals of thirty persons over seventy years old, of whom seventeen were over eighty years, and six were over ninety years.

The new Senator from the twenty-ninth district of New York is a clergyman of the Methodist denomination, who has been actively devoted, up to the present time, to the duties of his profession. He is the first clergyman who has ever occupied a seat in the Legislature, and his advent commences a new era, so far as relates to the class of men who are likely hereafter to be our law-makers.

A division of the Methodist Protestant Church is apprehended in Illinois. The Illinois Conference of that connection has distinguished itself for its bold and earnest anti-slavery position; and for some years has been uneasy on account of the very unhappy relation it sustains, ecclesiastically, to slavery. It is well known, that the General Conference of the Methodist Protestant Church, at its late session, refused to take any action respecting slavery.

Rev. Mr. Van Lennep, missionary to Asia Minor, gives an account of the formation of a church in Tocat, where Henry Martyn lies buried. Mr. Van Lennep states that his gravestone lies buried in the earth. The grave is an exposed place, and he proposes to remove the body to the Protestant cemetery.

Mr. Ansel Pratt, of North Weymouth, Mass., recently deceased, bequeathed the American Tract Society $2,000, the American Bible Society $5,000, the Massachusetts Bible Society $3,000, the Massachusetts Home Missionary Society $5,000, and the residue of his property, after personal legacies, amounting probably to $8,000, to the American Board.

Dr. Scudder, now on a visit to South Africa, for his health, writes to a friend in New York, that the Dutch have forty-six churches in the colony, and seven over the Orange River, and three over the Vaal River; in all forty-six churches. They have six Classes. Their General Synod meets once in seven years.

On the first Sunday in February, thirty-two converts were baptized by Rev. L. Parmly, pastor of the church at Merion, Pa. The papers also speak of revivals at Frankfort, Bristol, Molmesburg, Bridgeport, Radnor, Wilkesbarre, Monroetown and New Castle, Pa., and Camden, N. J.

The Amoy Mission, of the American Board, has enjoyed an unusual blessing of late. According to the last number of the *Missionary Herald*, twenty-two converts had united with the church there, and many more were inquiring.

A correspondent of the *Christian Chronicle* says that several churches in the neighborhood of Lewisburg, Pa., are now more than commonly engaged in the Lord's work, and the fruit of increased zeal is beginning to be manifest.

Six Lutheran missionaries from Germany arrived in Texas on Dec. 28th, to labor among the German Lutheran population. Several congregations are still without pastors, and desire aid from their friends in the North, or in the fatherland.

It has been estimated that one revival of religion which took place in Yale College, under the Presidency of Dr. Dwight, raised up ministers who were instrumental in the conversion of fifty thousand souls in one generation.

The *Morning Star* has a letter from Milo, Me., which says "sinners are being converted, and wanderers are coming home." The same paper has intelligence of a revival in Saco.

A French correspondent of the London *Watchman* represents the cause of Methodism as prosperous in France, particularly in the South, where a revival has been enjoyed.

Abstract of Proceedings in Congress.

SECOND-DAY, FEB. 26.

In the SENATE, the Naval Reform bill was taken up, but immediately laid aside, to make room for Gen. Jackson's sword. This sword, which is presented to Congress by the family of the late Gen. Armstrong, was the one which Gen. Jackson used at New Orleans. Mr. Cass made the speech accepting it, which was eulogistic of Washington, Jackson, and Franklin. Mr. Bell also spoke admiringly of Gen. Jackson, and offered a resolution returning thanks to the family of Gen. Armstrong, which was unanimously adopted. The Naval Reform Bill was then resumed and passed, the Senate concurring in the amendments of the House. The Post-Office Appropriation Bill was also discussed and passed by a large majority.

In the HOUSE OF REPRESENTATIVES, a bill granting right of way to all Plank and Railroads through public lands in the Territories was passed. The bill granting public lands to Michigan for Railroads was laid on the table. The same fate met the bill giving lands to Florida for Railroads. The Secretary of the Senate, at this juncture, appeared, with Jackson's sword in one hand, and the Senate's resolution in the other, when the rules were suspended, and Mr. Smith, of Tennessee, welcomed the relic in an appropriate speech. Mr. Zollicoffer and Mr. Benton also spoke upon the subject, when the Senate's resolution was adopted. The Naval Appropriation bill was then taken up, when Mr. Peckham made some pungent allusions to the Greytown affair. The Naval bill was finally laid aside, and the Indian Appropriation bill taken up, but neither was finally acted upon.

THIRD-DAY, FEB. 27.

In the SENATE, the House bill to modify the rates of Postage was taken up. One provision requires prepayment of letters, always by stamps, after the first of January, 1856. Another provides for the registration of letters. After some consideration, the bill was passed. The Collins Steamer bill was discussed all the afternoon and evening. The Committee on Finance offered an amendment reserving to the Government power to terminate the contract after six months notice, but that was defeated, and without coming to any definite question, the Senate adjourned.

In the HOUSE, the Navy and Fortification Appropriation bills were passed. The House then took up the bill called the "Old Soldier's Bounty-Land bill," and indicated a disposition to pass it, but finally let it go over. The Indian Appropriation bill was taken up, and a discussion on Know Nothingism and Slavery ensued. At 11 o'clock the House adjourned.

FOURTH-DAY, FEB. 28.

In the SENATE, the bill to provide for more efficient discipline in the Navy was passed. The Mail Steamer Appropriation bill was taken up. An amendment to let the contract stand as it is for two years was rejected. Two or three other amendments were rejected, and finally the bill passed, Yeas 26, Nays 22. The bill continues the transatlantic mails to the Collins line until 1860, at $33,000 the round trip. The House Civil and Diplomatic Appropriation bill, with the tariff modification attached, was reported, but nothing was done with it. An Executive Session was held, at which the Senate unanimously confirmed Winfield Scott as Lieutenant General of the Armies of the United States.

In the HOUSE, after the passage of some unimportant bills, the Old Soldier's Bounty Land bill was taken up. Mr. Benton protested against crowding through under a gag a measure involving more than 200,000,000 of acres of land. It was finally passed, 135 to 39. The bill, as amended, provides lands for persons of all grades, by land and sea, including Indians, wagoners and flotilla men, who have served in the wars since 1790—160 acres in all, to each person who has served not less than fourteen days, except actually in battle for a shorter period. The widows or minor children to receive the benefit in case of the death of the persons so entitled. The widows of officers and the soldiers of the Revolutionary War to be entitled to the benefit of this Act, as likewise the volunteers at the invasion of Plattsburgh in September, 1814; the volunteers at the attack of Lewistown and Delaware, in the years 1812 and 1815, and the Chaplains who served in the several wars.

FIFTH-DAY, MARCH 1.

In the SENATE, Mr. Underwood's resolutions from the Committee on Foreign Relations, recommending, that in our treaties with other nations hereafter, we should secure to our citizens in foreign lands the right to worship and bury their dead according to the dictates of their own conscience, and in accordance with their peculiar predilections, were passed. The Civil and Diplomatic bill was then taken up, when a sharp tariff discussion ensued, lasting until recess. In the evening, the resolution to pay the regular salary to Members of Congress who have been kept away by sickness was adopted. The tariff discussion was then resumed, and Slavery, Know Nothingism, and other extraneous subjects were dragged in.

In the HOUSE, several private bills were passed; also an Act to carry into effect the Reciprocity Treaty between the United States and Great Britain. The House then took up the Senate's amendment to the Army bill, and began to discuss the propriety of an increase of the force.

SIXTH-DAY, MARCH 2.

In the SENATE, a number of bills of minor importance were disposed of, when the Civil and Diplomatic Appropriation bill was taken up. The vote on the Clayton amendment was reconsidered, and, after a brief debate, the amendment, which was to strike off all that related to the tariff, was adopted. Yeas, 24; Nays, 21. This kills the entire tariff modification business. The Senate then went on to amend and alter the Civil bill, adding extra allowances and gratuities to public employés. The report of the Committee of Conference on the Indian Appropriation bill was concurred in. The bill to carry into effect the Convention to settle claims between the United States and England, was passed. The General Appropriation bill was resumed, and a number of extensive amendments voted in.

The HOUSE took up the Army Appropriation bill, and non-concurred in the Senate's appropriation of $30,000 to purchase Camels for use in the army. The Four Regiments amendment was agreed to. The House concurred in the Senate's amendment to the Post Office Appropriation bill, authorizing the Postmaster General to contract for a single monthly mail along the Pacific coast. The House also agreed to all the Senate's amendments to the Emigrant Passenger bill.

SABBATH-DAY AND SUNDAY.

Of the doings on these two days the N. Y *Tribune* of Monday furnishes the following abstract:—

In the SENATE, the General Appropriation bill was the first business under consideration. There was a great deal of noise and confusion, so much that not one in a dozen of the members knew any thing of what was going forward. All manner of appropriations were crowded in, in the shape of amendments, and millions of money was voted away in the most blind and reckless fashion. Among the amendments were provisions adding five Inspectors and twenty Weighers and Guagers to the New York Custom-House force, and increasing the salaries of Weighers, Measurers and Inspectors; another directing that only refined bars should be transferred from New York to the Philadelphia Mint for coinage. The amendment appropriating large sums of money for Custom-Houses and Post Offices in New York, Philadelphia and Boston was defeated. The Post Route bill was passed, an attempt to establish a weekly mail between the Mississippi River and the Pacific being voted down. An appropriation of $25,000 to Hiram Powers for statuary to be executed was agreed to. The Florida Claims Appropriation bill was rejected. Early on Sunday morning the Civil and Diplomatic Appropriation bill was passed. The Naval Appropriation bill was then taken up, and the Seven Sloops amendment rejected. The Collins' amendment to the Ocean Mail Steamer bill, which had just been vetoed, was brought up and altered by striking out the clause repealing the power to give notice of discontinuance of the extra allowance, and was then attached as an amendment to the Naval Appropriation bill, and unanimously passed. In the evening the Fortification bill came back from the House; the Senate receded from its amendment and passed it. The House bill denying the right of the Legislature of Minnesota to incorporate a Railroad Company in that territory, was brought up with the report of the Senate Territorial Committee opposing the action of the House. An attempt was made to get that through by attaching it to some private bill, whereupon a sharp discussion upon the rules of order ensued, and finally the Senate refused to concur with the House. The Second Committee of Conference of both Houses on the Army Appropriation Bill, then made a report, which the Senate concurred in. The Conference Committee on the Post Office Appropriation bill, reported an agreement of the two Houses, and the bill passed. The bill for the erection of public buildings in Kansas and Nebraska was adopted. It was now Sunday, and objection was made to further legislation, on the ground that Congress had legally expired. The Chair decided that the Senate could sit until noon of the 4th of March. The extra compensation of pages and other employés about the capital, was taken up, and passed. About 2 1-2 o'clock the quorum ran out, and the Senate sat in informal session for a while—then held an Executive session, after which the Civil and Diplomatic bill was taken up and ordered to be engrossed. Mr. Douglas reported a bill authorizing the people of Oregon to form a State Constitution, and apply for admission at the next session. The Southern Senators generally opposed it; Mr. Wilson, of Mass., also objected; and finally Mr. Douglas moved to lay the bill on the table, which was done—27 to 11. During the debate on this bill the Civil and Diplomatic Appropriation bill came into the Senate with 148 amendments from the House. The Senate agreed to 104; the House receded from the remaining 44, and the bill passed. The bills signed by the officers of the respective Houses were then received, detaining the Senate until 11 1-2 o'clock on Sunday morning, when word came from the President that he had no further business to suggest, and, at ten minutes before noon, the Senate adjourned *sine die*.

HOUSE.—The Senate bill to give $161,000 to improve Savannah River was passed. A discussion sprung up on the Army Appropriation bill, when Col. Benton fancied that he heard Mr. Faulkner say something disrespectful of Col. Frémont, and a small row ensued, in which the great Missourian got into a violent passion. He was assured that he had mistaken the facts, and the storm passed over. The St. Clair Flats and St. Mary's River Improvement bills went through, but were, with others, vetoed by the President. The President's veto of the Collins Appropriation now came up, and caused intense excitement, some of the members crying for impeachment, others denouncing the veto power, and others still moving for adjournment. An attempt to pass the measure over the Veto was a failure, the vote being Yeas 98, Nays 79. The next move was the tumbling upon the table of an immense heap of manuscripts, said to be copies of letters and documents connected with the Ostend Congress of American Diplomats. Nobody looked at the stuff. The Civil and Diplomatic Appropriation bill came back from the Senate, that body having agreed to a great portion of the House amendments. The House disposed of the bill in Committee, and then took a recess. At 7, P. M., business was resumed, and an amendment granting $250,000 to furnish the city of Washington with pure water, was voted in. This caused great rejoicing in the galleries. At half-past one o'clock on Sunday morning, the House agreed with the Senate in striking out the Tariff modification, the vote being 86 to 80. The usual vote of thanks to the Speaker was proposed and almost unanimously agreed to. The bill requiring pre-payment of postage after the 1st of January next, was adopted by concurring in the Senate's amendments. The bill to prevent the landing of foreign paupers and criminals, was taken up, and, after a wrangle about Know-Nothingism, was tabled, or killed—67 to 53. Then came the annual swindle in the form of extra pay to pages and other persons employed in and around the Capitol, which, of course, went through. At 8½ o'clock Sunday morning, there was not a quorum, and the Sergeant went off to drum up recruits, some of the members requesting that breakfast be brought in, and Mike Walsh vociferating for a whisky-punch. At 9 o'clock, the required number of members was present, when the report of the Committee of Conference on the Naval Appropriation bill was taken up. The Senate had hitched the Collins Appropriation to this bill, leaving the Government the right to give six months' notice of the suspension of extra pay, and in this form it went through as a part of the bill. The House then agreed to the Civil and Diplomatic bill, and the bill to increase the compensation of Registers and Receivers under the Land Graduation act of last year. The rules were now suspended, and bills were rushed through with railroad speed. During the calling of Yeas and Nays, Mr. Benton objected to voting on the ground that the Thirty-third Congress had legally expired, and he was no longer a Member. It was now half-past eleven Sunday morning. Some personal explanations followed; the minutes were approved; the President sent word that he had nothing to communicate; Speaker Boyd gave a brief valedictory, and at noon on Sunday the House adjourned without day—the members cordially shaking hands, and turning their faces homeward in the best of humor.

European News.

By the steamers St. Louis and Canada, seven days later news has been received from Europe; but there is little of general interest to record.

Around Sevastopol skirmishes take place almost daily, but without any results worth mentioning. Meanwhile all eyes are turned towards Vienna, where conferences and negotiations are soon to open.

There is no change in regard to the siege of Sevastopol. The latest authentic advices are Feb. 1. The Russian Grand Dukes made a reconnoisance of the allied front. Two French divisions made a demonstration and marched toward Inkermann. The Allies are daily expecting an attack. The pickets have been ordered to be on the alert. The weather is warm. In a sortie that night three hundred of the French were put hors de combat; in the obscurity one French regiment firing upon another.

The Emperor Nicholas has issued a ukase calling the whole population of Russia to arms. This is remarked as a menace in reply to the appointment of Lord Palmerston as head of the English Government.

Gen. Neil, who arrived at the French camp on the 27th of January, has reported to the Emperor that the situation of the French army is on the whole good, and that of the British not quite so bad as reported.

Rumor is that Lord Raglan and the Earl of Lucan will shortly return from the Crimea.

Parliament, having been prorogued till the 16th, there is no news from either the House of Lords or Commons.

Lord John Russell has accepted the duties of British Plenipotentiary in the conferences and negotiations about to open at Vienna.

The reports of a mutiny among the Zouaves, in the Crimea, created a painful sensation in Paris. The story, there is little doubt, was greatly exaggerated, but it is not thought altogether without foundation.

A telegraphic dispatch dated Bombay, Jan. 16, states that an insurrection had broken out at Cabool. At Candahar, the rebels have acknowledged the suzeraineté of Persia. 12,000 Persians were besieging Bendu Cebasi. A murderous conflict had taken place, but the besiegers continued their resistance.

The affair of Mr. Phillips, an American citizen, arrested for Mazzini, is settled by the payment of $2,000, and the Chief of Police, at the Bastile, has been reprimanded.

Very severe winter weather prevailed throughout Europe. Much distress existed at Liverpool from lack of employment—about fifteen thousand persons being thrown out of work from the dullness of trade and the severity of the weather. Some 5,000 of these are unemployed from the non-arrival of American shipping.

CALIFORNIA NEWS.—California papers to Feb. 9th have been received, but they contain no news of special importance. The Legislature has not succeeded in electing a Senator. Both branches have passed the bill giving $1,000 to each member, despite the Governor's veto. The whole number of lives lost by the steamboat explosion was sixty-seven. Lynch murders seem to increase with fearful rapidity, some twenty men having been hung by mobs since the commencment of the year.

SUMMARY.

The Collins Steamers receive from the U. S. per annum $858,000. He has received extra on his original contract from January, 1852, to 30th June, 1855, $1,750,000—whole amount paid him under his originel contract up to 30th June, 1855, $2,502,500, so that the whole amount received by him is $4,252,500, which sum is independent of amounts paid for freight and passengers. Sixty cents is paid to Collins for every letter carried by his line to Liverpool.

Gen. Robert Halsey, of Ithaca, has recently been doing a very handsome thing. He requests the tax-gatherer of the town in which he resides, to pass over all cases where taxes have been levied upon individuals who cannot pay them without depriving themselves, or their dependent families, of the necessaries of life, or means of comfortable subsistence, and *present the same to him for payment.*

The Charter of the Ontario Bank will expire in January next, and that institution will not be re-organized under the Free Law. The capital and surplus will all be returned to the stockholders. The surplus, it is supposed, is about 15 per cent. The Ontario Branch Bank will be re-organized under the same management as at present.

Delaware has enrolled herself in the glorious company of Maine Law States. The struggle in her Legislature has been severe, but the triumph is complete. Delaware has well deserved the honor of being first among the Slave States to prohibit entirely the traffic in Intoxicating Beverages.

A dispatch dated New Orleans, Tuesday, Feb. 27, 1855, says: The steam-tug Thomas McDaniel exploded her whole six boilers yesterday, below this city, killing seven persons and injuring others. Two vessels in tow of the McDaniel were somewhat damaged. The boat is a complete wreck.

The Boston *Herald* says: "Under the laws relating to imprisonment for debt, as they now exist, upwards of eight hundred were incarcerated in Cambridge street jail during the year 1854, and in a previous year the number of cases amounted to 1,300!"

Since the introduction of labels for the prepayment of postage, not less than 350,000,000 have been manufactured, sold, and obliterated.

A dispatch dated Boston, Monday, Feb. 26, 1855, says: The farm of eight hundred acres, with the buildings thereon, known as Daniel Webster's Homestead, in Franklin, N. H., was sold at auction on Thursday for $15,000, and Rufus L. Tay, of this city, was the purchaser.

A dispatch dated Boston, Monday, Feb. 26, 1855, says: The 4 o'clock afternoon train from Lawrence, when near Lowell, ran into a carriage containing four Irishmen, returning from a funeral. The carriage was demolished, and the four occupants instantly killed.

Oranges and lemons are very cheap in N. Y; the latter being far cheaper than apples. At the late regular sale, oranges went for about $2 50 per box, and lemons for $2. In the streets lemons of excellent quality are retailed at ten cents per dozen.

A dispatch dated Philadelphia, Wednesday, Feb. 28, 1855, says: Mr. Anthony Burns, the late fugitive arrested in Boston, is now free and in this city, having arrived here last evening from Baltimore.

Mr. Benton lost, by a fire at his house in Washington, Feb. 27th, the data and notes for the second volume of his Thirty Years in the Senate, together with other important documents, manuscripts, books, &c.

The Scottish *Guardian* states that the Senatus of the University of Edinburgh has conferred the degree of Doctor of Divinity on the Rev. John Lillie, of New York.

New York Markets—March 5, 1855.

Ashes—Pots $6 25; Pearls 6 50.

Flour and Meal—Flour, 8 50 a 8 75 for common to good State, 9 12 a 9 50 for Michigan and Ohio, 11 00 a 12 00 for extra Genesee. Rye Flour 6 25 a 7 25. Corn Meal 4 25 for Jersey.

Grain—Wheat, 2 10 a 2 28 for mixed Western, 2 25 a 2 40 for white Ohio, 2 56 a 2 60 for white Genesee. Corn, 95 a 98c. Rye, 1 33 a 1 35. Barley, 1 10 a 1 22. Oats, 53 a 58c for Jersey, 67 a 69c for Western. White Beans 1 62 a 2 12.

Provisions—Pork, 14 00 for new prime, 15 00 for new mess. Beef, 6 00 a 7 50 for country prime, 9 00 a 11 50 for mess. Lard, 9⅜c. Butter, 16 a 20c for Ohio, 23 a 28c for State. Cheese, 11 a 12½c.

MARRIED,

On the first day of January, 1855, in Christiana, Wis., by Eld. Z. Campbell, Mr. ABRAM L. COON to Miss ALVIRA COON, all of Utica.

In West Edmeston, N. Y., Feb. 22d, by Eld. L. M. Cottrell, Mr. WILLIAM WHITMORE to Miss SIBEL MILLARD, all of West Edmeston.

In this city, on Thursday evening, March 1st, at the Seventh-day Baptist Chapel, by Elder J. Croffut, Mr. GEORGE W. MASON to Miss FRANCES S. CROFFUT.

At Alfred Center, N. Y., March 1st, by Eld. D. E. Maxson, Mr. CHARLES E. WOOLWORTH to Miss LYDIA L. SMITH, all of Alfred.

DIED,

Near Plainfield, N. J., March 1st, of consumption, Miss AMANDA M. RANDOLPH, daughter of Mrs. Rachel Randolph, aged 19 years. She died calmly, almost without a struggle. She requested her mother to "keep her grave up neatly;" and after bidding her weeping friends "good-bye," she exclaimed to her mother, "Let me go! I see them waiting"—and then sweetly fell asleep in Jesus.

"Let me go!" but kiss me, mother;
Bid me now a last "good-bye;"
All your grief and anguish smother;
We shall meet again on high.
Tears around me fast are streaming;
Ties of earth are breaking now;
Death, with icy fetters gleaming,
Chains my heart, and chills my brow.
"Let me go!" Oh, banish weeping;
Lay me in my narrow bed;
Let the church-yard breezes, leaping,
Toss the myrtle o'er my head.
Gems of Flora plant above me;
In their brightness let them wave;
Let the hands of those who love me,
Gather garlands from my grave.

"Let me go!" I would not linger,
'Mid the fairest scenes of earth;
Death's impartial, ruthless finger,
Withers all of finite birth.
Let me drink of life immortal;
Let me fly earth's prison walls;
Let me enter Heaven's portal—
Tread the glorious golden halls.

"Let me go!" The King of Terrors
Cannot now my soul appal;
Soft and slow the fatal Archer
Lets his poisoned arrow fall.
Icy coldness o'er me creeping,
Stifles now my feeble breath;
Soon shall I be calmly sleeping
The long silent sleep of death.

"Let me go!" The waning number
Of my earthly sands is run;
Let me sleep the breathless slumber,
Now my task of life is done.
"Let me go—I see them waiting!"
Angels fair would waft me home;
Through my earthly prison-grating,
Floods of radiant glory come.

"Let me go!" The fitful shadows
Of the mystic "border land,"
Fall but faintly on my spirit,
As they flit on either hand;
Treading now, with fearless footstep,
Through the "valley and the gloom,"
Yonder light, so brightly breaking,
Gilds the darkness of the tomb.

"Let me go!" Beyond the river
Dawns a scene divinely fair;
Angel pinions gleam and quiver,
In the light of glory there.
All the bliss of joy supernal,
Waits me now beyond the flood;
Let me live the life eternal,
In the bosom of my God.

"Let me go!" The vision brightens,
As I near the heavenly shore
Where immortal glory lightens,
"See the loved ones, gone before."
"Let me go!" Sweet seraphs waiting
Beckon from the blissful shore;
I shall join the throng triumphant—
Dwell with God forever more. ELLIS.

PLAINFIELD, March 4, 1855.

In Hopkinton, R. I, January 4th, Mrs. MARTHA BURDICK, wife of the late Jonathan Burdick, aged 77 years.

LETTERS.

C Saunders, Abel Stillman, O D Green, M L Potter, Welcome Clarke, Elias Frink, Russell Babcock, S Davison, V Hull, S P Stillman (right,) Charles Potter, S S Griswold, J M Allen (fifteen,) J R Butts, J M Todd, A W Coon, Z Campbell, H B Clarke, E Maxson, L M Cottrell, J B Wells, E R Clarke, John Cottrell.

RECEIPTS.

FOR THE SABBATH RECORDER:

Rachel Randolph, Plainfield, N J	$2 00	to vol. 11	No. 52
Francis M Mills, Utica, Wis	2 00	12	7

FOR THE SABBATH-SCHOOL VISITOR:

A W Coon, Scott	7 00
Truman Saunders, Southampton, Ill.	2 00
L M Potter, Potter Hill, R I	27

FOR SEVENTH-DAY BAPTIST MEMORIAL

T M Clarke, Pequonac, Ct	1 00
B F Langworthy, Stonington, Ct	1 00
Truman Saunders, Southampton, Ill	1 00
J H Mosher, New York	50

WILLIAM M. ROGERS, Treasurer.

Savery's Temperance Hotel
AND
TELEGRAPH DINING SALOON,
No. 14 Beekman Street, N. Y.
KEPT ON THE EUROPEAN PLAN.
MEALS AT ALL HOURS OF THE DAY.
LODGING ROOMS,
From $2 to $3 per Week, or 50 Cts. per Night.
BELA SAWYER, Sup't. JOHN S. SAVERY, Proprietor.

Western Association—Executive Committee.

THE Executive Committee of the Western Association will hold its next session at Alfred Center the first Fourth-day in April next.

E. R. CLARKE, Secretary.

Eastern Association.

AT a meeting of the Executive Committee of the Eastern Association, held at Westerly, R. I., Feb. 25th, the following resolutions were passed, and their publication in the *Recorder* was voted:—

1. That the ministers of the several churches be requested to visit the church in Newport, if practicable, and perform such missionary labors there as they may judge best; and that the Association defray their traveling expenses.

2. That the churches be requested to raise the sum of one hundred dollars to meet the expenses of the current year, and forward the same to the Treasurer, A. M. Babcock, Westerly, R. I., on or before the first of April.

S. S. GRISWOLD, Sec. P. L. BERRY, Pres.

In addition to the above, I would say, that it is very desirable that all demands be canceled prior to the ensuing session of the Association. Eld. H. Clarke's salary is already due for his labors at Green Hill. Will the pastors see that the several contributions are attended to. 39—3t. S. S. G.

3d Brookfield Church.

NOTICE is hereby given, that at an adjourned meeting of the Seventh-day Baptist Beaver Creek Society, held on the 5th of February, 1855, it was resolved, by unanimous agreement, to sell the meeting-house and its appendages at auction, and give the avails to the American Seventh-day Baptist Missionary Society, except such portion as may be called for by the original contributors, who shall receive their shares, according to the sum they respectively paid, if called for in three months from this date. The amount of the sale was $88. Also resolved, that the above notice be published in the *Sabbath Recorder*.

BENJ. BURDICK, Society Clerk.

SOUTH BROOKFIELD, Feb. 13th, 1855. 37—6t.

Rare Chance—For Sale.

A DENTIST, (wishing to retire on account of ill health,) having a good practice in a large, thriving, and beautiful town, where there is a community of Sabbatarians, will sell advantageously for the cash. Any person wishing to buy, can receive the most thorough instructions in every department.

Letters addressed to "Dentist," care of Rev. Geo. B. Utter, this office, will be answered, giving further particulars. 37—3t.

MAYOR'S OFFICE, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the jurisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

Alfred Academy,

At Alfred Center, Allegany Co., N. Y.

THE attention of the public is respectfully invited to the educational facilities of this Seminary.

1. The location is one of the *healthiest* in the world; in a community offering none of the usual inducements of youthful dissipation; easy of access by railroad; and in telegraphic communication with all parts of the country.

2. Young ladies and gentlemen occupy separate edifices, and enjoy, in the families of the Professors, the supervision of well-ordered *Christian Homes.* The health, morals, and manners of students are all looked after with parental solicitude.

3. The courses of instruction, embracing ten departments, with an experienced Professor or Teacher at the head of each, are thorough, extensive, and eminently practical. Young men wishing to study *Analytical* and *Agricultural Chemistry*, will find here every desirable aid for doing so to any extent. Classes in *Surveying* and *Civil Engineering* have daily field practice, under the directions of the Professor, with the most approved instruments. *Teachers'* Classes are carefully drilled in every branch of school-room duties. The *graduation course* for young ladies is adapted to fit them for the responsibilities of *American Women.* In the department of instrumental music, the pianos used are of the finest quality, and kept in perfect order. The Seminary employs no second grade teachers, but the *elementary* and higher classes receive alike the instructions of the *same* Professors.

4. The edifice containing the recitation, library, and society rooms, is one of the largest, most commodious, and best furnished school structures in Western New York.

The next term opens the 28th of March, and closes July 4th, 1855. The expenses are very moderate. For further particulars, address Rev. N. V. HULL, or W. C. KENYON.

Feb. 24th, 1855.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 35 cents per copy. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.

How many imperfections and errors may be found in this little book, we will not pretend to say; but place it before the public, being confident that it contains a variety of such pieces as persons will like to sing, and from which they will receive salutary impressions. We are perfectly aware that much of the music in this book differs in its character from what is usually included in the term "Sacred Music," and we intended it should; for, in our opinion, the varieties of music included under this head are altogether too few. Indeed, there is a burdensome monotony in the music commonly used for religious purposes. A stereotyped notion as to what is suitable to be sung in church, in connection with the non-sentimental spirit of the age, (which shows itself in the almost entire disuse of minor music,) results in the monotony to which we refer. We are happy to believe, however, that this evil is distinctly felt, and that musicians are beginning to employ a greater diversity of styles of music, in their collections for religious purposes. Airs having a wide range upon the staff, have been preferred, mostly, as being more agreeable, and more easily committed to memory, and also as affording the best exercises in reading music, and training the voice. We shall be glad if this book is found to meet the wants of those for whom it has been prepared, and in any degree diminish the evil alluded to. Whether the work is adapted to that end, others will judge for themselves.

As more than two parts cannot generally be sung, and sustained, by Sabbath Schools, we have, in a large proportion of cases, given only two parts—the Air and the Bass.

Miscellaneous.

The Way to get on in the World.

A working man, some time age, published his own biography, one of the most interesting little volumes that has appeared during the present century. It is as follows:—"It may, to some, appear like vanity in me to write what I do, but I should not give my life truly, if I omitted it. When filling a cart with earth on the farm, I never stopped work, because my side of the cart might be heaped up before the other side, at which was another workman. I pushed over what I had heaped up, to help him; so doubtless he did to me, when I was last and he first. When I have filled my column or columns of newspaper with matter for which I was to be paid, I have never stopped, if I thought the subject required more explanation, because there was no contract for more payment, or no possibility for obtaining more. When I have lived in a barrack room, I have stopped my work, and taken a baby from a soldier's wife, when she had to work, and nursed it for her, or cleaned another man's accoutrements, though it was no part of my duty to do so. When I have been engaged in political literature and traveling for a newspaper, I have gone many miles out of my road to ascertain a local fact, or to pursue a subject to its minutest details, if it appeared that the public were unacquainted with the facts of the case; and this, when I had the work, was most pleasant and profitable. When I have wanted work, I have accepted it at any wages I could get, at a plough, in farm-draining, stone-quarrying, breaking stones, at wood-cutting, in a saw-pit, as a civilian, or as a soldier. In London I have cleaned out a stable and groomed a cabman's horse for sixpence. I have since tried literature, and have done as much writing for ten shillings as I have readily obtained—both sought and offered—ten guineas for. But if I had not been content to begin at the beginning, and accepted shillings, I should not have arisen to guineas. I have lost nothing by working; whatever I have been doing, by spade or pen, I have been my own helper. Are you prepared to imitate? Humility is always the attendant of sense; folly alone is proud. A wise divine, when preaching to the youths of his congregation, was wont to say, 'Beware of being golden apprentices, silver journeymen, and copper masters.' The only cure for pride is sense; and the only path to promotion is condescension. What multitudes have been ruined in their prospects by the pride of their hearts! Away, then, young men, and away forever, with self-foppery, and empty pride, idle habits, and expensive associates—'stoop and conquer.' Sink in spirit and rise in opulence. Be faithful over a few things, and be made ruler over many." [London Christian Penny Magazine.

A Ride behind the Snow-plow.

Rev. Henry Ward Beecher gives in a recent number of the *Independent* the following graphic description of a ride behind the snow-plow:—

Among the things which I have always longed to see, is the work of the snow-plow, driven along the covered track, and through heaped snow drifted into deep cuts. This I have at length seen. The train came to Watertown from Cape Vincent, N. Y., with two engines and a snow plow. When we reached Pierpont Manor, the conductor kindly acceded to my wish to go forward and take a berth with the engineer. I was soon in position. For two days it had been storming. The air was murky and cross. The snow was descending, not peacefully and dreamily, but whirled and made wild by fierce winds. The forests were laden with snow, and their interior looked murky and dreadful as a witch's den. Through such scenes I began my ride upon the plow-shoving engine. The engineers and firemen were coated with snow from head to foot, and looked like millers who have never brushed their coats for a generation. The floor on which we stood was ice and snow half melted. The wood was coated with snow. The locomotive was frosted all over with snow—wheels, connecting rods, axles, and every thing but the boiler and smoke-stack. The side and front windows were glazed with crusts of ice, and only through one little spot in the window over the boiler could I peer out to get a sight of the plow. The track was indistinguishable. There was nothing to the eye to guide the engine in one way more than another. It seemed as if we were going across fields and plunging through forests at random. And this gave no mean excitement to the scene, when two ponderous engines were apparently driving us in such an outlandish excursion? But their feet were sure, and unerringly felt their way along the iron road, so that we were held in our courses.

Nothing can exceed the beauty of snow in its own organization, in the gracefulness with which it falls, in the curvature of its drift-lines, and in the curves which it makes when streaming off on either side from the plow. It was never long the same. If the snow was thin and light, the plow seemed to play tenderly with it, like an artist doing curious things for sport, throwing it in exquisite curves, that rose and fell, quivered and trembled, as they ran. Then suddenly striking a rift that had piled across the track, the snow sprung out, as if driven by an explosion, twenty and thirty feet, in jets and bolts; or like long-stemmed sheaves of snow-wheat spread out fan-like. Instantly, the drift past, the snow seemed by an instinct of its own to retract, and played again in exquisite curves, that rose and fell about our prow. "Now you'll get it," says the engineer, "in that deep cut." We only saw the first dash, as if the plow had struck the banks of snow before it could put on its graces, and shot it distracted and headlong up and down on either side, like spray or flying ashes.

It was but a second. For the fine snow rose up round the engine, and covered it like a mist, and sucking round, poured in upon us in sheets and clouds, mingled with the vapor of steam, and the smoke which, from impeded draft, poured out, filled the engine room and darkened it so that we could not see each other a foot distant except as very filmy specters glowering at each other. Our engineers had on buffalo coats, whose natural hirsuteness was made more shaggy by tags of snow melted into icicles. To see such substantial forms changing back and forth every few moments from a clearly earthly form into a spectral lightness, as if they went back and forth between body and spirit, was not a little exciting to the imagination.

When we struck deep bodies of snow, the engine plowed through them laboriously, quivering and groaning with the load, but shot forth again nimble as a bird, the moment the snow grew light.

Nothing seemed wilder than to be in one of those whirling storms of smoke, vapor and snow; you on one ponderous monster, and another roaring close behind, fastened together, and looming up, when the snow mists opened a little, black and terrible. It seemed as if you were in a battle. There was such energetic action, such irresistible power, such darkness and light alternating, and such fitful half-lights, which are more exciting to the imagination than light or darkness. Thus whirled on in the bosom of a storm, you sped across the open fields, full of wild, driving snow, you ran up to the opening of the black pine and hemlock woods, and plunged into their somber mouth as if into a cave of darkness, and wrestled your way along through their dreary recesses, emerging to the cleared field again, with whistles screaming and answering each other back and forth from engine to engine. For, in the bewildering obscurity, we have run past the station, and must choke down the excited steeds and rein them back to the depot.

We think Mazeppa's ride, lashed to a wild horse and rushing through the forests wolf-driven, to have been rather exciting. If a man in a buffalo hunt, by some strange mishap, should find himself thrown from his horse and mounted on the shaggy back of an old fierce buffalo bull, and go off with a rush, in cloud and dust, among ten thousand tramping fellows, pursued by yelling Indians, that, too, would be an exciting ride. But neither of these would know the highest exhilaration of the chase, until in a wild storm, upon a scowling day in January, he rides upon a double engine team behind a snow-plow, to clear the track of banks and burdens of snow.

A New Broth for the Sick.

RECIPE BY PROFESSOR LIEBIG.

Translated for the N. Y. Tribune.

For one portion of broth take half a pound of freshly killed meat, (beef or chicken,) cut it in small pieces, add to it 1⅛ pound of distilled water, to which has been added four drops of pure chlohydric (muriatic) acid, and half to one drachm of common salt; mix them well together. After standing an hour, the whole is strained through a conical hair-seive, such as is ordinarily used in the kitchen, allowing it to pass through without pressing or squeezing. The portion passing through first being cloudy, it is again poured through the sieve, and this process repeated until it becomes perfectly clear. Upon the residue of meat remaining in the seive, half a pound of distilled water is poured, in small portions. In this manner about one pound of liquid (cold extract of meat) is obtained, of a red color, and pleasant meat-broth taste. It is administered to the sick, cold, by the cup-full, according to their inclination. It must not be heated, as it becomes cloudy thereby, and a thick coagulum of meat albumen and hematin is deposited.

A young lady of 18 years, in my family, being ill with typhus fever, first induced this preparation. It was called forth by the remark of my family physician, (Dr. Pfeufer,) that, in a certain stage of this disease, the greatest difficulty met with by the physician lay in incomplete digestion, a consequence of the condition of the intestines, and, besides, in the want of a nutriment proper for digestion and for the formation of blood. The common broths prepared by boiling are deficient—in fact, in all those constituents necessary for the formation of the albumen of the blood—and the yolk of eggs, often added thereto, contains very little of this material, for it has 82½ per cent. water and fat, and only 17½ per cent. of a substance very similar to, if not the same as the albumen of eggs; and whether this is equal in nutritious qualities to the albumen of meat is, according to the investigations of Magendie, at least doubtful. The new broth contains, besides meat albumen, a certain quantity of hematin, and, therein, a far greater quantity of iron necessary for the formation of the blood corpuscles, and, finally, the digesting chlohydric acid.

A great hinderance to the employment of this broth in summer is its liability to change in warm weather; it commences regularly to ferment, like sugar-water with yeast, without the usual odor. (What substance is here formed is well worthy investigation.) On account of this the meat must be extracted with perfectly cold water, and in a cool place. Ice-water, and refrigeration with ice, completely removes this difficulty. Most important of all is it that the meat be perfectly fresh, and not several days old.

This broth is now in use in the hospital and in the private practice of several of the most distinguished physicians of Munich.

I should, perhaps, have hesitated to give greater publicity to so simple a thing, if a new—and to my family an especially important—case had not convinced me of the great nutritious properties of this soup, and hence arises the natural wish that its benefits may be experienced by a wider circle, and other sufferers be restored by its beneficent effects. A young married lady, who, in consequence of an ovarian inflammation, could take no solid food, lived for two months entirely upon this broth, at the end of which period her health was perfectly restored. During this time she gained in flesh and strength. Generally patients take this food without opposition only so long as they are ill; as soon as they can take other food they reject this, perhaps owing to the color and the faint meat-odor. It might in many cases be of use to color the broth brown by adding burnt sugar.

Ploughing.

Ploughing is a trade of itself. It has never been my good fortune to hire a man who knew how to plough. Although I employ from forty to fifty hands every year, I never hired a man who had worked on a farm, from whom I could not learn something. I have had a man who understood the mechanical art of ploughing, who could take a pair of horses, stick his stakes, and stake out his land so straight and with such exactness, that when he had finished the dead furrow, it would not vary one inch from an exact line, and yet this man did not know where to begin or which way the field should be ploughed; only that he had seen men plough parallel with the road, or at right angles. The first thing for a farmer to note when he commences ploughing a field is to see if there are any wet or springy places, and if so, to commence ploughing so as to make his back furrows at the lowest places in the field, and his dead furrows on the dryest and highest land, by which he can draw the water to some convenient ditch on the farm or the road side. He should plough his land, whether it is diagonal or square, exactly the way by which he can draw the falling water at the lowest possible rate, and have it run. For those who plough in the fall this is more essential, as the rains are much heavier late in the fall and early in the spring, and ruinous waste is made of farms by washing any portion of the soil away.

Foul in the Foot.

Small herds of cattle, or sheep, are scarcely ever affected with this disease, but like the cholera and yellow fever with the human family, it feasts upon the crowd. I have seen hundreds and hundreds of lambs less than three weeks old, as I have no doubt many of you have, walking on their knees, and the only symptom of foul or rot which could be found, would be a small break in the skin, between the hoofs, and could be cured at this stage in twenty minutes; and this, too, on land where slate or stone could scarcely be found. I have had some experience, for twenty-five years, with what I once regarded as one of the most injurious of diseases to cattle, and more especially to sheep. I now regard it as of little or no consequence, and I will only trouble you with one of twenty-five years' operations. And to that end, I will take the year in which the disease was most malignant, and which was 1850. I purchased in that year more than thirty thousand sheep, and had not less than one thousand head of cattle on my farm. During the pasturing season, more than one-half of all my sheep were afflicted with the rot, and because they were thus diseased, was the reason why I purchased so largely. Men came all the way from Ohio, to sell me their sheep, expressly on this account. My remedy is simple and plain, and my cure equally sure. I make a three-cornered field, and at the pointed corner I make a lane. In this lane or neck of the field I set a trough, twelve feet long, twelve inches deep, of the same width, on which I fasten some scantling substantially, flaring out. I then cover the scantling with boards so that only one sheep or steer can go through the trough at a time. In the trough I place fifty or one hundred pounds of blue vitriol, fill and keep it as full of water as it should be, covering the liquid over with straw, and set the cattle and sheep marching through. By leading a tame ox, the balance will follow. A good shepherd dog will start the sheep through, and one man, with a well-trained dog, can drive through ten thousand a day; and one man can clean and fill the trough with water, and one-half cent's worth of vitriol will cure the worst case I ever saw.

It will kill the disease. It will not make and replace hoofs, or parts that have rotted off. With cattle it is not so malignant as with sheep, but either may be cured without stopping their growth, if taken in time. If it has been of long standing, feed sulphur freely in your salt. In the first stages salt and water will do the work, and so will copperas, but blue vitriol is the sovereign remedy. It wants dry weather in the spring to breed the disease, and hot, wet weather in the summer to spread it broadcast, wherever the animal puts its foot.

Farm Work.

Every month in the year gives the farmer a chance to do something by way of improvement. Let him now, in stormy days, while his children are at school, look into the tool-house and see whether any are missing or out of joint. Now is a good time to grind, not the axes only for immediate use, but hoes and shovels and spades and all other edge tools that are to be used after the winter is past.

Iron bars and drills, and hay-cutters for farm use, may as well be sharpened now, as at the time when you want them for immediate use. And saws, chisels, augers, adzes, post-axes, and chains, may now be mended when you have not half a dozen men waiting and ready to use them.

Any farmer who has a vice in his shop to confine a handsaw, can file it, and make it sharp enough for all practical purposes, in less time than is required to go half a mile to a professional mechanic to have it filed in a scientific mode.

Now we know by actual trial, that a pair of good shoes may be put on to a sled in a single evening at this season of long nights. Maple joists are good for this purpose. Save a pair of them when you carry a maple log to the saw-mill. An axe, an auger and a handsaw, are the only tools required to put new shoes on a sled.

And while your hand is in, why not put the carts and plows in order? That wide hole in the cart-floor should be mended with a new board running the whole length of the body—for short strips nailed on to cover holes are much in the way when the contents are to slide out of the cart.

In regard to the different modes of tilting up loaded carts, farmers are not resolute enough to insist on having the best—and they leave the matter to the wheelwright to determine where the centre of gravity is, and where hinges or snipebills should be placed. We, of the Ploughman, still assert that the axle of an ox cart should always turn when the cart is tilted. The body, therefore, should be bolted on to the axle, and the tongue should be fastened to the body just forward of the axle. The cost of this is not more than the cost of snipebills on the back corner of the axle, and the cart is tilted with very little effort.

See to your cattle in this cold weather. Let no wind or rain come upon your young stock, and they will winter well in an open cow-yard. Racks are needed when cattle run loose, and racks are easily made by any farmer who can use an axe and auger.

[Ploughman.

SELF-POSSESSION—Self-possession is a valuable quality, but you are not likely to acquire it in great things if you do not practice it in common circumstances. "The mildness of Sir Isaac Newton's temper, through the course of his life, commanded admiration from all who knew him, but in no one instance more than the following: Sir Isaac had a favorite little dog which he called Diamond, and being one day called out of his study, Diamond was left behind. When Sir Isaac returned, having been absent for a few minutes, he had the mortification to find that Diamond, having thrown down a lighted candle among some papers, the nearly-finished labors of many years were in flames, and almost consumed to ashes. This loss, as Sir Isaac had no copy of the papers, was irretrievable; yet, without striking the dog, he only rebuked him with this exclamation, O Diamond! Diamond! thou little knowest the mischief thou hast done!"

A Balloon Ascension.

The following is Miss Bradley's account of her daring balloon ascension at Easton, Pa., a short time since. Miss Bradley belongs in New London, Conn., and this was her first adventure of the kind:—

"I rose with perfect calmness and great velocity to a height of over two miles, my whole feelings being those of indescribable tranquillity and gratified delight. There was no perceptible breeze until I reached the highest point of my voyage, directly over a bend in the Delaware, when four heavy currents struck my balloon on all sides with equal force. Finding the balloon full, I opened the valve three times in succession, and while letting off the gas as fast as I could, (the balloon at the same time rapidly emptying itself from the mouth,) a very strong under-current forcing up into the mouth of the balloon, caused a roaring like the ocean in a heavy storm, followed by a noise like the discharge of a cannon, and a sudden fall of about a hundred feet. I then looked up and saw my balloon all shattered, with the exception of two pieces—one, being about one-eighth the size of the balloon, formed a parachute in the top of the net-work, and the other a sail at the side, and bore me off eastward. The wind rocked the car violently at the time, and for ten minutes succeeding. Knowing my situation, I had no feeling of fright, or anxiety, whatever, but tranquilly trusting in that same Almighty Power I ever loved to trust, I prepared myself in the best possible manner I could for my descent, believing I should land safely. I threw out my sand and grappling iron, placed myself firmly in the car in an upright position, my hands extended, clasping the handles on each side; I deliberately looked on all sides, and admired the indescribable grandeur and beauty of the scene. I spent ten minutes in singing a song of praise to the Creator of such a scene of beauty and sublime grandeur. Rapidly descending, I landed safely, but with great force, in the center of a large clover field in Still Valley, New Jersey, four miles from Easton, at half past eleven o'clock, A. M., having been up just half an hour, twenty minutes of which was after the bursting of the balloon."

Has the Moon an Atmosphere?

The astronomical world has been a long time in doubt whether the Moon has an atmosphere or not, though the most credited opinion is, that it has not, at least, none of sufficient density to conform to our optical laws and the demands of any animal life known to us. The New York *Courier* announces, on the authority of one of the most eminent mathematicians and astronomers in the world, that the side of the Moon nearest to this world is sixteen miles higher than the other. If, therefore, we suppose that the Moon has an atmosphere such as ours, it would be of such extreme rarity on the only side exposed to our observation, that for our optical effect and animal life it might as well not exist. For mountains upon the earth, none of which are above five miles from the level of the sea, have been ascended to a height at which life could not be supported any length of time, and still mountains have stretched above the panting traveler. What then must be the atmosphere at four times such an elevation? The conclusion seems inevitable that, although the hither side of the Moon is uninhabitable for want of an atmosphere, the remote side may be perfectly adapted to animal life. It is at least certain, that the mere want of an atmosphere perceptible to us is no longer conclusive as to the uninhabitableness of the planet that rules the night. [Phil. Ledger.

To Young Mechanics.

'It is the first step that costs.' The main obstacle to saving is the lack of the habit. He who at twenty-two has saved one hundred dollars, earned by honest useful effort, during the first year of his self-control, will be very unlikely ever to be destitute thereafter. On the other hand, he who saved nothing at the end of his first year of independence will be pretty certain to carry a poor man's head on his shoulders while he lives. Our young mechanics are not thrifty because of the evil habits they have formed during their minority. By and by he marries, and retrenches some of his worst expenses; but too late; the increased demands of a growing family absorb every cent he can earn, and at fifty or sixty years of age, you will see him emerging, seedy, and sickly, from the groggery, whither he has repaired for his bitters, enfeebled in body, and discouraged in spirit, out of humor with everything and everybody, and cursing the banks or the landlords, the speculators and the capitalists, as plunderers and enslavers of the poor." GREELEY.

To Aspiring Young Men.

'I want to go into business,' is the aspiration of our young men. 'Can't you find me a place in the city?' is their constant inquiry. 'Friend,' we answer to many, 'the best business you can go into, you will find on your father's farm, or in his work shop. If you have no family or friends to aid you, and no prospect opened to you there, turn your face to the Great West, and there build up a home and a fortune. But dream not of getting suddenly rich, by speculation, rapidly by trade, or any how by a profession. All these avenues are choked by eager struggling aspirants, and ten must be trodden down in the press, where one can vault upon his neighbor's shoulders to honor or wealth. After all, be neither afraid nor ashamed of honest industry; and if you catch yourself fancying any thing more respectable than this, be ashamed of it to the last day of your life. Or, if you find yourself shaking more cordially the hand of your cousin the Congressman, than of your uncle the Blacksmith, as such, write yourself down an enemy to the principles of our institutions, and a traitor to the dignity of humanity. GREELEY.

UNDER DRAINING.—A tract of land which the writer determined to under-drain, was situated in the center of several other lots, walled into portions of various size and shape, consisting of plow land, permanent or wet meadow, and pasture. By survey it was found that the tract contained twenty-four acres, and that two and a half acres of it were covered, and thus entirely lost to use, by stone walls. These were all removed, the small stones filled in the drains; the rocks or large boulders undermined and sunk out of sight.

Thus he obtained a smooth lot, all dry enough to plow, with no wall in the way, and nothing lost to cultivation by useless division fences. The water from the drains was conducted eighty rods in a ditch to a dry field, and then used for irrigation, thus drying a wet spot and watering a dry one.

It was upon this drained land that he grew turnips, from English seed, at the rate of 500 bushels per acre, while it was in the rough process of reformation.

From experience it is recommended that turnips should not be sown before the 20th of July, on account of our dry summers. One pound of seed per acre is sufficient for broadcast sowing; if done in August, sow one bushel of red top and one bushel of herd's grass per acre, and the turnips will shade and protect the young grass plants. To this our friend adds a few pounds of cloverseed after the turnips are harvested, and the next season he has a crop of hay. [N. Y. Tribune.

The Spider's Bite.

There is a popular impression, very prevalent in the community, that the bite of the spider is poisonous, and that the insect is capable of inflicting a venemous and dangerous wound. This is shown to be unfounded. I must remark, that the vulgar notion, however widely diffused, that spiders inflict venomous wounds, is altogether a mistake. In what manner, indeed, the error has arisen, and been propagated, I cannot stop to inquire; but that the impression has no just foundation is certain, since no comparative anatomist has ever been able to detect in these animals any apparatus capable of secreting and retaining poison. And furthermore, to set the matter experimentally at rest, a French naturalist caused himself to be repeatedly bitten by these calumniated creatures, and with perfect impunity, beyond the slight scrathes which their tiny teeth were competent to produce. The fears, therefore, so generally entertained of the venom of spiders, are perfectly groundless; and how often has one of these persecuted insects been seen in the act of biting its supposed human victim?

THE WIRE WORM.—Ploughing in the fall is to become more fashionable than formerly, as I regard it as the best and only sure remedy to destroy the wire worm, which has made and is making sad havoc of almost every kind of crops, wholly destroying some. Ploughing late in the fall will not kill all, but most of them. In three years, I think they may be nearly or quite all destroyed, and it is the only remedy I know of to destroy the most mischievous and ruinous of insects the farmer has to contend with. I have heard it said that five bushels of salt to the acre would destroy them, or 100 bushels of lime. I have tried both, and have sowed 10 bushels of salt to the acre, and they only laughed at my folly. I tried one hundred bushels of lime as recommended, and they fattened on my bounty. I have only proved one remedy for the rascal, and that is to break the soil and sow it to buckwheat; plough late, and as often as possible in the fall, and then sow it to peas in the spring; with the like ploughing next fall, they will not disturb any crop the next season.

THE FLAG OF TRUCE.—The flag of truce is accompanied with a trumpeter, who sounds along the path on their way to the enemy. This is to attract the enemy's attention. At the first sound of the trumpet all hands are on the move—cease firing is sounded. You then see men come out of holes where you would never think of looking for them, and the sentries of both armies pass the compliments of the day by the Russians shouting "English," followed by a nod of the head. The English return the compliment by saying, "Rush," accompanied with friendly gestures; and in five minutes after, these sentries are firing at each other as if they had never seen each other, and I have no doubt cursing each other, (the latter I often hear as I pass along the works.) I am sure there were two hundred men of both armies standing and running about within a hundred yards, and the moment the flag fell, the whole rushed to their dens like mice from a cat, and tried who should fire first. There is only a turn of the trumpet to make them friends, and another to make them bitter enemies.

ICEBERGS.—The origin of these ice-mountains was long a subject of controversy. By some persons the berg was thought to be the result of months of freezing in the open sea. By others, it was more correctly attributed to a land origin. Dr. Kane, the historian of the late American Expedition, has proved conclusively, by observations on the spot, that the iceberg has a similar origin with the glacier, being deposited on the sides and in the valleys of Arctic mountains, and afterwards pushed forward, (exactly as glaciers are,) down the slope and along the gorge. As these valleys eventually open to the sea, the field of ice is finally protruded into the water, where a part of it breaks off, at last, by its own weight, and is floated away. The early navigators, seeing these enormous masses, called them, in their native tongue, "bergs," or mountains, and by that name they have been known ever since.

THE GREENING ON A SWEET STOCK.—Some varieties of apples are considerably influenced by the stocks upon which they are grafted. Mr. Eaton, of Buffalo, in the late Proceedings of the Am. Pomological Society, says: "I have observed the Rhode Island Greening to change its character much when worked on a sweet stock. It becomes more highly colored, being often a beautiful yellow, with a red cheek, and loses much of its acidity, becoming, however, more tasteless when kept late than is usual. The difference is so marked that it has been considered a distinct variety. It is, however, beyond a doubt, occasioned by the influence of the stock, as has been proved by experiment."

GUANO FOR MELONS.—We had a very fine melon patch which was well nigh destroyed by the striped bug. The vines had just commenced running, and in two or three days the bugs had stripped nearly every leaf. As a desperate remedy, we applied a handful of guano on top of the hill as far as the vines had run, taking care that it did not fall on the leaf. In twenty-four hours not a bug was to be seen; the vines assumed a healthy and vigorous appearance, and were loaded with fruit. This experiment was not on one vine only, but hundreds.

It is stated that there is a merchant in Boston, who, during fourteen years, has always had his name on the docket of some court, either as plaintiff or defendant. The lawyers "tip their beavers" to this gentleman almost instinctively.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, asfollows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A. M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Ayer's Cherry Pectoral.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night.

For a Cold and Cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequent refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

To Singers and Public Speakers this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, may be cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

For Croup, give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until it subdues the disease. If taken in season, it will not fail to cure.

Whooping Cough may be broken up and soon cured by the use of Cherry Pectoral.

The Influenza is speedily removed by this remedy. Numerous instances have been noticed where whole families were protected from any serious consequences, while their neighbors without the Cherry Pectoral, were suffering from the disease.

Repeated instances are reported here of patients who have been cured from

Liver Complaints by this remedy, so many that there can be no question of its healing power on these diseases. It should be perseveringly taken until the pain in the side and other unpleasant symptoms cease.

For Consumption in its earliest stages, it should be taken under the advice of a good physician if possible, and in every case with a careful regard to the printed *directions* on the bottle. If judiciously used, and the patient is carefully nursed meantime, it will seldom fail to subdue the disease.

For settled *Consumption* in its worst form, the Cherry Pectoral should be given in doses adapted to what the patient requires and can bear. It always affords some relief, and not unfrequently cures those who are considered past all cure. There are many thousands scattered all over the country, who feel and say that they owe their lives and present health to the Cherry Pectoral.

This remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. When once tried, its superiority over every other medicine of its kind, is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs, which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, etc., and for children, it is the pleasantest and safest medicine that can be obtained. No family should be without it, and *those who* have used it never will.

Prepared by J. C. AYER, Chemist, Lowell, Mass. Sold at wholesale in New York by A. B. & D. SANDS, retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

The Sabbath Recorder,
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

The Sabbath Recorder.

TRACT OPERATIONS.

Continued from the Recorder of March 1st.

The Snowhill Society is larger, and more efficient in its operations generally, than that at Ephrata; yet the same causes are operating there as at Ephrata, and with like discouraging results. While at Ephrata but few understand English, most of those at Snowhill are sufficiently acquainted with it to understand preaching in it, and I think they usually have their preaching in English. At Ephrata the preaching, and all the other exercises of social and public worship, are commonly in German.

At Snowhill I found that considerable feeling existed in reference to the monastic element in their Society. Indeed, I ascertained that the propriety or impropriety of fostering and perpetuating that feature of the German Seventh-day Baptist denomination, had become a question of sufficient importance among them to agitate powerfully the whole body. I should think the impression was pretty prevalent among them, that the monastic element can not long exist in the body—that the causes which once gave it strength, and the circumstances which once justified it, perhaps, or rendered it politic, have nearly ceased to operate. There are, as a matter of course, those who are desirous that the monastic feature should be perpetuated. If, in some instances, then, individuals especially interested in its continuance should exhibit some *indiscretion*, and too much *feeling* in its favor, it need not surprise any one. I thought I met with a case or two of the kind. If I misjudged the matter, it may have been because I did not understand the particular circumstances of the case minutely enough to appreciate properly the manifestations of feeling alluded to.

The Society at Snowhill treated me with much kindness and Christian hospitality, as those Ephrata had done. They made appointments for me to preach, and came out in good numbers to hear me. They made, too, some donations in money to the Tract Cause, which will be reported in the proper place. Also they presented me, at Snowhill, two larger and more ancient volumes of music than that received at Ephrata from Paul Ritter. I mention the name of the donor of that book here, because I see that I omitted to do so in my previous article. The donors of the music books received at Snowhill, were Catharine Slack and Abram Burger. That presented by the latter was written in 1747. These books are rare and interesting specimens in the line of penmanship and musical composition.

While I was visiting these Societies, I was constantly in company with the relatives and early acquaintances of Dr. Wm. M. Fahnestock. They made many inquiries about him and his family. Having lately visited him, I was happy to tell them of his welfare, and the interest he took in their affairs. I made up my mind to call on Dr. F. on my return, and communicate the many kind remembrances intrusted to me for him and his family. But I will not attempt to describe my deep sorrow, when, on my return to Philadelphia, I was informed by Mr. Potter that Dr. Fahnestock was *dead*. Mr. P. said that Dr. F. was in his office a few mornings before, and left to attend to some business, and be ready to leave for home in the next train of cars for New York—that he went to a printing office in the second story of a building in South-second street, and that on coming out, and when at the top of the second flight of stairs, (to which there was no stair rail,) his foot slipped, and he fell to the bottom of the first flight, having nothing to check the dreadful force of his fall with but his cane and umbrella, neither of which availed any thing for that purpose, as they were found with him at the foot of the stairs, broken, fit emblems of his own shivered frame and useful life, broken off in the midst. It appeared that Dr. F. lay at the foot of the stairs where he fell, about half an hour, before he was observed by any one who rendered him any aid, or attempted to relieve him. He was quite insensible when taken up, and was removed to the hospital, where he died. But his case having been already laid before the readers of the *Recorder*, I will not enlarge upon it. Under circumstances so afflictive to his family, I thought it my duty to call and let them know that I thought of them in their hour of distress. But as I had ordered an ample supply of publications for distribution in the city, (in addition to what I had distributed when there on my way out,) I remained several days to dispose of them. With a design to economise, I took board in a private boarding house, kept by a Catholic family, by the name of Gutgesell, at No. 19 South-tenth street. I found Mr. and Mrs. G. very agreeable people, and presented them a volume of Sabbath Tracts, which they politely received and read with some apparent interest.

Seeing a notice in the papers, that there was to be a debate in Franklin Hall, on First-day afternoon, upon the question, "Has the Reformation in England been of any benefit to mankind?" I went to the Hall to see how the thing was managed. Becoming interested in the subject, and there seeming to be a lack of speakers, I took a part with the affirmative in favor of the Reformation. When the debate closed, I distributed tracts to those present. I had previously arranged to give a lecture in another part of the same building the same evening; but the weather being very unfavorable, and becoming still worse till the hour for my lecture came, there was no audience to speak to. In distributing tracts one day, I came in contact with one of the leading disputants on the negative at the debate mentioned above. We had a long and interesting conversation on religious subjects, in the course of which he presented a variety of complaints against the churches, and especially the ministry. I made the best defense I honestly could for them, but was obliged to confess myself unable to clear them of some serious wrongs, with which he charged them; such as making money the basis of church privileges, to the exclusion of the poor, and connivance at popular corruptions, the road to high titles and large salaries. I gave this man some tracts and left him, impressed myself with this thought, How little do the secluded and exclusive herd of religionists know *of* or *appreciate* their errors, and the untold evils which flow from them; for the *reason*, that they have mistaken for *virtue* and *piety*, that *stupid* course of refusing to hear any views or representations of their principles or practices except such as are held up by those of *their* sect.

While in the city, I made the acquaintance of the Rev. Dr. Belcher, author of a work on the various religions extant, lately published by J. E. Potter, Philadelphia. The Doctor is an Englishman, and pretty familiar with the history of the Seventh-day Baptists in England. He had not seen our tracts on the Sabbath. I took tea at his house, and spent the evening with him in his study. On parting, I presented him with a volume of tracts which he seemed pleased to obtain, and invited me to call upon him when I came to the city.

Having closed up my operations in Philadelphia, I left, December 28th, and called at Bordentown to see Dr. Fahnestock's family. How great the change! How sad the contrast! Where, a few weeks before, I had spent an evening in the society of a cheerful family, with all that was necessary to complete the bright circle, in the same apartments, now, sorrow, sighs, and sadness, strike the attention, and oppress the heart. Crushing bereavement had entirely prostrated the now widowed mother of those two weeping daughters, the two remaining strands of that triple cord which had bound her to life. Now, like the frost-stricken rush, borne down by the storm-blast, she lies prostrate, and trembling in every nerve, and sleepless, except by the use of opiates prescribed by a voice unfamiliar at the side of her sick bed. At the hour when the Doctor had been accustomed to attend family worship, Mrs. F. had the family called into her room, and invited me to lead their devotions. What instructive chapters do such passages in human life compose! How forcibly do they present the blessings of religion! The next day I left that house of mourning, not unbenefited, though saddened by reflection on what had recently transpired.

Though I preached on the subject of the Sabbath and other topics among the German Seventh-day Baptists, and supplied such with tracts as wished them, a large part of my labor was scattering tracts in the principal towns on the route, namely, Lancaster, Harrisburg, Chambersburg, and other places, as I had opportunity. I placed a volume of tracts on the reading-room table at the American Hotel, Philadelphia, presented one to the Athenæum Library, another to the *Sunday Mercury*, one to the United States Hotel at Harrisburg, one to the Lancaster City Exchange Hotel, one to the *Independent Whig*, and one to J. Michael's Hotel. These three last named were all at Lancaster. I gave one volume to a colored man I met in the cars between Lancaster and Philadelphia. He appeared to be quite intelligent, and a good deal interested in the subject, as I also did in him.

For the sake of order and connection, these things should have been introduced before, and yet I must mention the rite of washing feet, which I saw performed while at Snowhill. It took place at a private house, in the evening after the Sabbath, in connection with the administration of the Lord's Supper. The meeting being convened, the emblems of Christ's body and blood, with the communion service (of which the cups are wood, turned in the shape of large wine glasses) being duly arranged on the table, the exercises were commenced by singing, prayer, and reading the Scriptures. Next, the leading minister presented an argument in vindication of feet-washing. That being done, the ministers, (two in number,) took off their coats, and girded themselves with towels, in the form of a long apron tied round the waist with strings. A vessel of convenient size, that is, a tub, containing water, being brought, the male members took off their boots, or shoes, and stockings, and one after another either coming to the tub, or it being placed before them, put their feet into the water, when the leading minister gave each a thorough but short rinsing, and his colleague wiped them well with the towel with which he was girded. That done, the men dressed their feet again, and the ministers laid aside the towels, put on their coats, and resumed their seats. Then a new supply of water being furnished, a couple of the elderly sisters took clean towels and girded themselves in the same manner as the ministers had done, and proceeded to wash the feet of the female members, in the way they had done the males. While these exercises were going on, I observed that there were a few individuals present (young persons) who were disposed to treat them in a somewhat light manner, though no very decided demonstrations of that kind were made. Nor was there any thing in the ceremony to excite lenity in any mind unless that mind were predisposed to trifle with serious things. Indeed, though I am not convinced that feet-washing is, or ever was, a *church* ordinance, I am willing to admit that there was something deeply impressive in the rite as performed at Snowhill, for it was evident those engaged in it, acted under a firm conviction of duty.

L. CRANDALL.

FOOTPRINTS OF JEHOVAH IN THE AGES OF REVELATION—NO. 3.

The First Day.

The history of creation is essential to the foundation of a successful system of religion. An unknown God once had an altar and a sacrifice; but it was a limited, local observance of brief duration. The worship of we know not what, we know not whom, finds no sympathies in the human heart; it calls for no love; it awakens no fear. Worship, to be sincere and effective, must be associated with a knowledge of existing realities. Such is Jehovah, the God of Revelation; and such is the system of religion which revelation enjoins. The origin and order of all that exists in nature, is in revelation attributed to an infinite Intelligence—a Being who produced them by the volition of his own omnipotent, omniscient will! That Being is Jehovah of the Hebrew Scriptures. He who made all things, reveals so much of the process as he sees fit, and no more; and upon that revelation which he has made claims the homage of man as his Creator, and reproves all who affect to know the secrets he has not disclosed, either by his works or his words! "Hast thou not known—hast thou not heard that the everlasting God, the Lord, the Creator of the ends of the earth, fainteth not, neither is weary? There is no searching of his understanding." Isaiah 40 : 28. To Job (Chap. 38th) he said, "Who is this that darkeneth counsel by words without knowledge? Where wast thou when I laid the foundations of the earth? Declare, if thou hast understanding." That sublime appeal of Jehovah to his servant Job contains questions no man can answer, and ought to put the blush of humility upon every man who has attempted to correct the cosmogony of revelation. The works of the Lord are great, and it is proper for those who take pleasure therein to search them out; but to assume that nature teaches more scientifically the very facts Jehovah has revealed, then does that revelation he has made appear to me arrogant and impious.

Moses' call to his work, as the divinely authorized instructor of Israel, may claim our attention at another time. I only assume here, that he is such, and through them the instructor of the world. If he be such, his statements are to be received in a corresponding manner. He does not write as an inductive philosopher; it was not his calling; he writes as a religious teacher, and proceeds in method just as we parents are obliged to do with an uninformed child; he states the facts as they existed, and events as they occurred. And they are such facts and events as the philosophy of nature never teaches, and cannot teach. They are no more the product of Moses' philosophy than of our own. They are such as man could never have imagined, unless they had first been communicated by a Being who existed prior to the existence of man. What can be more arrogant, than to assume to know what was, and how it was produced, before man existed—and that, too, in opposition to, or contravention of what He has said who made all things? Moses not only said what God did, but what God SAID on the occasion! This is not written upon rocks, nor in stars; and unless Moses received it from Jehovah, he must have been the most arrogant, hypocritical pretender the world ever saw, or he has out-philosophered all the other philosophers I ever read after.

But waving our assumption of his divine mission—if Moses has not given the true cosmogony of earth, who has? How many theories have geologists broached? If two independent, original geologists, have hit upon exactly the same theory, I have yet to learn who they are! But Moses, and near forty other sacred writers, stretching through thousands of years, have never varied in their statements, allusions, or inferences, from the cosmogony first given; and the reason is, that cosmogony contains the ineffaceable footprints of Jehovah, the author of that cosmogony, and of creation itself. Although nature could never have taught the history of its own origin and order, its present condition and order harmonizes with every proposition of Mosaic cosmogony; and every survey I take of it adds confidence and joy to my faith in that divine account.

At first, the earth was chaotic—a dark and deep profound, incapable of life. "*Without form*," it could have had no fixed shape! The necessary inference is, that it was in a soft, fluid, impregnable state. In this state, "the Spirit of God moved upon the face of the waters." For what purpose? Did the Spirit of God ever go forth upon an useless mission? Let the holy writers answer, (Psalm 104 : 30,) "Thou sendest forth thy Spirit; they are created; and thou renewest the face of the earth." Doubtless it was at this period that God impregnated it with those electric and magnetic forces requisite to solidity and order; and infused into it the salts, acids, and other chemical properties necessary to vitality.

> "O Spirit, . . .
>   Thou from the first
> Wast present, and with mighty wings outspread,
> Dove-like, sattest brooding on the vast abyss,
> And mad'st it pregnant!"

All the subsequent acts of creation appear to have been consequent upon this impregnating of the Spirit of God, for they all follow at the word of Jehovah. He spake and it was done; he commanded and it stood fast. No ages of transition were requisite to bring forth the forms that exist upon earth; no chance amalgams to produce life; no progress from the molusca to the crustaceous, or onward to the quadruped; all that God did was complete after its kind. This I believe is allowed to be the meaning of the sacred testimony, "And God saw that it was good."

"And God said let there be light, and there was light." One of the skeptical objections brought against the Mosaic history of creation, is the account of the creation of light before the creation of the sun; because the sun is now the great luminary of day. But every peasant in the world has the means at command to show that light can be made to exist without the aid of the sun. Let him take his flint and his steel, his friction wood, or his phosphorescent match, and he can make light in the darkest cavern; indeed, every magnetic and igneous substance possesses the property of making light independent of the solar beams, and electrical and mechanical force is sufficient to bring it forth. It is ill adapted to vegetable life, but the mosaic account speaks only of its existence before vegetation was called for, and it still subserves thousands of useful purposes for man, and doubtless it was in these respects that "God saw the light, that it was good."

"And God divided the light from the darkness." Doubtless it was hemispherical as now; and the aurora borealis shows that it were as easy to light one hemisphere of the earth without sun, as it is for a peasant to light his cabin in the darkest night.

"And God called the light day, and the darkness he called night." In this account of the first day we have facts related which no philosophy could have taught. Light without the sun! Divided from the darkness, to make the alternations of time, day and night, before the solar rays reach the earth, and before there was an atmosphere to receive them! And according with facts observable in nature, the rotation of the first day, subserves some of the highest and most useful purposes of life, which we shall notice hereafter.

Here, then, are the footprints of Jehovah, in the Records of Revelation, obvious to all the observers of the power and order of creation. The voice of nature perfectly harmonizes with the words of revelation, and all bespeak the omniscient and the omnipotent God. So far as light extends, and day succeeds to night, the power and truth of Jehovah are coetaneously seen by the reverent believer in revelation.

S. D.

WHAT IS MEANT BY FOLLOWING JESUS.

Following Jesus resembles *coming to Jesus*, just as a long journey resembles the first stage of it. The two are similar, for every act of following is a fresh coming. They also coexist, for all who truly come, follow. Yet they can be distinguished in our minds, just as following a guide can be thought of as something more than first applying to him. When the tract of country through which we travel is difficult, dangerous, and unknown, it is essential that we secure the services of a competent person to show us the road, and assist us in it. We put confidence in him, and act on his instructions. We keep our eye on him, watch his steps, and tread where he treads. We do not venture from the path he takes, nor lag behind so as to lose sight of him; but we do our best to keep near him, and willingly rid ourselves of any unnecessary luggage rather than be left behind.

We have lost our way in a world of sin. There is a road through it to a world of perfect holiness and joy. But we cannot find this road, nor keep it when found, without a guide. God himself undertakes to be our leader. In the Bible, loving and obeying him is spoken of as *following*. Caleb and Joshua are commended because they "wholly followed the Lord." We are told that David "followed God with all his heart;" and Elijah appealed to the Israelites, saying, "If the Lord be God, *follow* him!" When Jesus called his chosen disciples, he said, "Follow me;" and the sons of Zebedee left their nets, and Matthew rose up from the receipt of custom. They not only went to him, but remained with him. Their conduct while he was visibly on the earth was an emblem of what the disciple of Christ should do always after a spiritual manner. As the sinner earnestly seeking salvation is said to "come to Jesus," in like manner the after life of those who are truly converted is spoken of as "following Jesus." The disciples, grateful for the benefits they had received, delighting in his company, and conscious of their continued need of his help, followed him bodily—journeyed when he journeyed, rested when he rested, listened to his teachings, and rendered him any service he might require. Just so they who have come to him for salvation, continue to trust in him; and out of love to him, keep near him in their thoughts, study his word, imitate his example, and obey his commands. This is what is meant by the exhortation, "Follow Jesus." Numbers 32: 12; Matt. 4: 18-22.

LOOK ABOVE.

Wanderer o'er life's restless ocean,
Weary of its wild commotion,
                    Look above.
Though thy way is dark before thee,
And the clouds are gathering o'er thee—
                    God is love.

Watcher, thy lone vigils keeping
O'er the loved one, cease thy weeping,
                    Upword turn,
Where the stars in beauty gleaming,
Words of love and duty seeming,
                    Thee to learn.

Mourner, in the church-yard kneeling,
All thy new-born anguish feeling,
                    Look to God;
By his help thy loved one's risen
From his dark and lonely prison,
                    'Neath the sod.

Bondman, 'neath thy burden loitering,
Vainly to thy brother calling,
                    For release;
God has heard thy earnest prayer,
And will bring the weary where,
                    Tears shall cease.

Lone one, friendless and forsaken,
By the storms of life o'ertaken,
                    Doomed to die,
From thy soul the chains are falling,
Voices now to thee are calling,
                    From the sky.

Child of earth, in sickness pining,
See'st thou not the light that's shining
                    From above?
Though from earth thy soul is fading,
Fearful doubts thy spirit shading,
                    "God is love."

Hopkinton, R. I. JUNE CLIFTON

THE POWER OF A LITTLE BOOK.

In the Jubilee Memorial of the Religious Tract Society, the following striking fact is recorded, illustrative of the beneficial effects that follow the distribution of good books. This cheap and easy method of doing good we strongly recommend:—

An old vender of tracts, when visiting a depository at Stroud, related the following fact: "As I passed through a village in Yorkshire, I asked a poor woman to buy a religious tract. She refused. I turned round and threw one in at the door, and the wind carried it under the table. The man of the house came home, saw it, took it up, and read the title—'The Wonderful Advantages of Drunkenness;' he left his dinner, and put it in his pockets. After he got to his work he read it. In the evening his companions missed him at the ale-house, and when they saw him, they inquired where he was on the preceding evening. He said he had been reading a religious tract. On giving this account of himself, they all laughed, and said he was going to turn Methodist. His neighbors said, 'John P. was sober last night,' which quite surprised them, as this seldom occurred. But from this time he kept from the public house, and began to pay his debts. His wife told all who inquired about him, that the cause of this great change was reading a religious tract, entitled, 'The Wonderful Advantages of Drunkenness,' which a poor man had thrown in at their door. After being away two years, I returned to that neighborhood again. I stopped at a public house, about two miles distant from the village before named, and offered my tracts for sale. One of the persons in the room, with a dreadful oath, said I was one of those Methodists that had made their companion mad. The woman of the house said, 'Do you call him mad? then I wish you were like him, and would pay the five pounds you owe me; for he has paid me every farthing he owed me, and all in less than two years.' On entering a house about a mile further, I was informed that the tract I had thrown, two years before, into a poor man's house had made him another man. At length I arrived at the village. A woman looked very hard at me, and said, 'Are you not the man who sold me some tracts about two years ago?' I said I was. Then she said, 'You must go with me to the house where you threw the tract in, and I am quite sure the woman will not tell you to go to hell now.' As soon as I entered, the woman informed her I was the old man she so much wished to see. She cried out, 'What! that dear man who threw in the tract?' and running, she took hold of my hand, and said, 'I humbly beg your pardon for what I said; I was in a passion, and very vile and wicked.' She bade me sit down to dinner, and said her husband would be there in a few minutes. As soon as he came in, she told him who I was. He took me very kindly by the hand, and said, 'Blessed was that hour when you threw the tract into my house, and thrice blessed is that God who directed you to one so wicked. I was then poor and wretched; spent most of my time in the ale-house; but now, thank God! I have a house of my own, and it is my delight to talk of the goodness of that God which directed me to the reading of the tract.'"

MARKED BY DISEASE FOR DEATH.

The world, though pleasant in many of its aspects, is still sad in some of its events, and solemn in its remembrances. We frequently meet those in the streets and in their dwellings, who are marked by disease for death. The subtle enemy is preying upon their vitals, and though almost unconscious to friends beside them, is nevertheless certain in its progress towards the fearful accomplishment. To such, and some of them are dear to us as friends and acquaintances, we have a word to say. We have met them. We have mingled in pleasant conversation. But to us the conviction is too settled to be mistaken, that before the summer with its bloom and flowers shall bless us, they will sleep in the grave. The scenes and friendships of life will pass on, but by them will be unheeded. The mourners will go about the streets. The name of the departed will be mentioned. Sad memorials will be treasured of the once active and gay. But what of this? The regrets of friends and the love of kindred spirits avail nothing for the dead. The passing day while life lingers is the period of sympathy and concern. While the world is fading from the view and ambition dies out of the mind, and the soul is fluttering for its winged flight, let kindness smile and spiritual advice be given. Let the truth be told, that time is short, and that death is near. But one palliative can ease the troubled mind. This is the mercy of God and hope in Christ. With this secured, death is disarmed of its terror. Consolations like the shining of the heavens, may glisten around and through the pathway to the tomb, and when the event is mourned over by surviving friends, the track of the spirit may be traced to immortality and eternal life. So may it prove with some of our friends who will leave their dwellings again for the active duties of life; and some too, whose weakened and fragile tread betokens no future of health, and no smiling prospects for earthly friendships and associations.

[Christian Advocate.

CONTRAST.

Miss A. B., a native of Vermont, is a domestic in a wealthy family, with a compensation of two dollars per week. She is a member of the —— church, and is a regular, serious attendant of all its services. She dresses plainly but neatly. Such is the estimate in which she is held by the lady who employs her, as faithful, good-natured, and kind to the children, that she bestows upon her gratuities sufficient for her clothing and all minor expenses. Seventy-five dollars of her every year's wages she deposits in the Savings Bank. All of the remainder she gives to objects of benevolence, in sums varying from fifty cents to five dollars. Her knowledge of the comparative importance of those objects is derived from the annual reports of societies and religious newspapers. She never allows the contribution box to pass her without a gift from her hand. Her pastor rejoices in her growing spirituality, her godly walk, and her many prayers for his success.

Miss C. D. is the daughter of a respectable mechanic who supports his family well, and slowly adds to his property. She is a member of the same church, attends public worship one-half of the day on the Sabbath, and occasionally is present at other meetings. By no persuasion could she ever be induced to take a class in the Sabbath school, or, with her excellent voice, to join the choir. She reads an untold amount of books of the lighter kind, and works with her needle only upon articles of luxury. Fond of dress, her father is obliged to limit her allowance to ten dollars per month. This sum she expends wholly upon herself. When a collection is to be taken, she is generally absent from church, and when called upon by a collector, she has nothing to give. She has been a member nine years, and has never been known to contribute to all benevolent purposes the value of a dollar. Her general conduct is decorous; but she manifests no more interest in the prosperity of the church, or in the advancement of the Christian cause, than many who never professed religion. Here is one of the many cases with which her pastor knows not what to do. She seems to think that in joining the church she completed her duty for this life, and secured her salvation for the next.

[Watchman & Reflector.

THE MINISTRY AND THE PRESS.

That pastor errs egregiously who fails to give the due credit to the newspaper press, as an agent of the evils he would correct, or an instrument of the good he would accomplish. The time has come when newspapers are almost universally read. The family that takes no newspaper, is now the exception to the universal custom. And if companionship with a fellow infallibly leaves some impression on the mind, much more does the weekly visit of a friend in the shape of a newspaper, beget a regard and confidence which give him incalculable power in leading the opinions and forming the character of those who welcome his regular arrival. Probably every minister can trace various erroneous and foolish notions which he meets in some of the families of his parochial charge, directly to the newspaper they take. If so, how plain it is that the proper preventive or corrector of such evils, is a newspaper of a different character; and how can he act wisely—how can he act faithfully, if he do not do what he can to introduce such a needed antidote into such families?

A SLEEPING CHRISTIAN.—"The devil," says Luther, "held a great anniversary, at which his emmissaries were convened to report the results of their several missions." "I let loose the wild beasts of the desert," said one, "on a caravan of Christians, and their bones are now bleaching on the sands." "What of that," said the devil, "their souls were all saved." "I drove the east wind," said another, "against a ship freighted with Christians, and they were all drowned." "What of that," said the devil, "their souls were all saved." "For ten years I tried to get a single Christian asleep," said a third, "and I succeeded and left him so." "Then the devil shouted," continues Luther, "and the night stars of hell sang for joy."

FAITH VENTURES NOTHING!—There is no risk, nothing ventured—not even the possibility of losing anything permanently valuable, by living a life of faith in Jesus Christ. The late Rev. Dr. Simeon, long a tutor in Hoxton College, after many years spent in the service of Christ, as he drew near to death spoke with great disapprobation of the phrase used by good people, "*Venturing on Christ*." "When," said he, "I consider the infinite dignity and all-sufficiency of Christ, I am ashamed to talk of venturing on him. O, had I ten thousand souls, I would at this moment cast them all into his hands *with the utmost confidence*."

MARK THAT TEXT.—"Mark that text," said Richard Adkins, to his grandson Abel, who was reading to him the 32d Psalm. "Mark that text, 'He that trusteth in the Lord, mercy shall compass him about.' I read it in my youth and believed; and now I read it in my old age, thank God, I know it to be true. O, it is a blessed thing, in the midst of the sorrows of the world, Abel, to trust in the Lord!"

AT HOME AND ABROAD.

The religion of some seems to be altogether for the place where they live. The country merchant, for example, is a very good man at home; attends church, helps to support the ministry, perhaps is even a communicant at the Lord's table. But when he goes to the city, he visits the theatre, takes a glass of brandy at the hotel, and keeps late hours with very equivocal company. The fisherman is very circumspect in his own neighborhood; attends prayer meetings, exhorts his brethren, and seems to love the ordinances of religion. But abroad, on the waters, he forgets to call upon God, has no time to read his Bible, and knows no difference between the Sabbath and other days. The lumberman is an industrious, hard-working, honest man, and good neighbor, at home; is willing to rest on the Sabbath day, fills his seat in the house of God, and relishes the minister's expositions of divine truth. Who can say aught against him? But the floods come to carry him and his lumber to market, and he seems to forget that God is on the river as well as at home where he lives. He leaves his religion behind, finds no time for prayer, forgets when Sabbath day comes, vociferates boisterously at his various landing places, perhaps quarrels a little, fights a little, swears a little, drinks a little.

We might go on to enumerate other classes of persons, who are equally guilty. Indeed, we have heard of ministers of the gospel, who did not behave as well as they ought, when they happened to be where they supposed themselves unknown. But we doubt whether they ever read, with any seriousness, that passage of Scripture where one asks, "*Whither shall I go from thy Spirit? or whither shall I flee from thy presence? If I ascend up into heaven, thou art there: if I make my bed in hell, behold, thou art there. If I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right-hand shall hold me. If I say, surely the darkness shall cover me; even the night shall be light about me. Yea, the darkness hideth not from thee, but the night shineth as the day: the darkness and the light are both alike to thee.*" Ps. 139: 7–12.

The religion of such persons is, evidently, founded in the fear of man. They are upright, moral, church-going people at home, because they fear their neighbors will call them to account if they are otherwise. Their moral sense is roused to activity just in proportion to the degree in which others bear testimony to the cause of truth. If the community in which they live is highly and rigidly virtuous, they govern themselves strictly; if it is a loose community, they are loose with it. They never take the lead in any good cause, stemming the torrent of opposition; they are the mere creatures of circumstances. In a heathen community they would be heathen themselves. In view of any temptation to do wrong, they do not ask what is God's judgment, but what is man's opinion.

Such persons ought not to be members of any Christian church. A body that is designed to be *the light of the world—the salt of the earth*—should not hold in its communion such rotten members. It is true, it cannot be expected that a church, composed of men in the flesh, will be so decidedly pure as to hold in fellowship none but those whose piety is of the highest order. In every Christian body, there will be some so weak in the faith as to be hardly able to maintain their integrity, without the most vigilant care and good nursing of those who are better established. In the primitive churches, there were some who, because of their imperfection, were denominated "*carnal*"—not as denoting that they were still unrenewed, but that they were so in comparison of the more advanced. (See 1 Cor. 3: 1, 3, 4.) And the *strong* were always expected to lend their aid in supporting the *weak*. (Rom. 15: 1, Gal. 6: 1.) It is so still, and ever will be. Nevertheless, a person whose moral influence is decidedly and positively bad, should be rejected. All the benefit that a church can possibly be to one of this character, will never counteract the evil that he does to others. "*Put away from yourselves that wicked person.*" 1 Cor. 5: 13.

We have specified a few classes of persons, whose religion seems to be limited to the time of their abiding at home; but it must not be supposed, that our remarks are intended for one more than another. It gives us pleasure to say, that many of all the above classes are Christians in deed, as well as in name. Their example is, at all times, and in all places, salutary. But we do aim directly at those persons, of whatever class, denomination or profession, who throw off all moral restraint as soon as they find themselves where they fancy that they are not known. The fact is, they are often better known than they think they are. It is difficult for a sinner to hide his wickedness. It has such an offensive smell, that it is like "dead flies in the ointment of the apothecary." (Eccles. 10: 1.) Somebody is always on hand to bring back the evil report. Providence is so surely retributive, that no one escapes. "Murder will out," and so will every other form of wickedness. And though only some men's sins are open beforehand, going before to judgment, yet other some they follow after with the most unerring certainty. (1 Tim. 5: 24. Compare Num. 32: 23.) T. B. B.

THE CHURCH AND THE SCHOOL.

Historic.—Continued.

The dawn of light upon the dark ages was earlier and brighter upon the British Isles than upon the Continent. Schools and learning prospered there more than on the Continent; consequently the intellectual state was superior. This was doubtless chiefly owing to the fact, that Christianity was very early introduced into these Islands by learned Greek and Latin missionaries, and monastic schools established, while the progress of religion and learning was not as much interrupted in its early stages by the irruption of barbarians as upon the Continent. The advantage gained then, the position taken, has never been entirely lost.

Among the first institutions established was the very flourishing one at Bangor. "It was at first a college of Christian philosophy, or an academy of liberal arts and learned men; but after a time was changed into a monastery." At its destruction in the seventh century, by war, it was "a building so extensive that there was a mile's distance from one gate of it to another, and it contained two thousand one hundred monks."

Another very celebrated institution was the convent of Iona. "It was situated on a small island of that name on the western coast of Scotland, established by Columba, who, with twelve other monks, removed in the year 563 to that place from Ireland. This convent was an extensive Theological Seminary and Missionary School, and notwithstanding its title, was hardly more monastic in its character than are the colleges and seminaries of the present day. From this institution, preachers were sent to England, Ireland, Scotland, and Wales, and they even crossed the channel and carried the light of the Gospel into Belgium and Germany. Not less than a hundred similar institutions, modeled upon that of Iona, were said to have arisen in different parts of Britain, in which missionaries and ministers were also trained." The most prominent among these was perhaps that of York, one of the teachers of which, and the instruction, is thus celebrated in a poem by Alcuin, as given by Guizot: "The learned Ælbert gave drink to thirsty minds at the sources of various studies and sciences. To some he was eager to communicate the art and rules of grammar. For others he made flow the waves of rhetoric. He exercised these in the combats of jurisprudence, and those in the songs of Adonia. Some learned from him to sound the pipes of Castalia, and to strike with a lyric foot the summits of Parnasus. To others he taught the harmony of heaven, the works of the sun and the moon, the five zones of the pole, the seven wandering stars, the laws of the course of the stars, their appearance and decline, the motions of the sea, the tremblings of the earth, the nature of men, of beasts, and birds, and the inhabitants of woods. He unveiled the various qualities and the combinations of numbers. He taught how to calculate with certainty the solemn return of Easter, and, above all, he explained the mysteries of the holy Scriptures." This poetic description, reduced to simple prose, signifies that grammar, rhetoric, jurisprudence, poetry, astronomy, natural history, mathematics, chronology, and the explanation of the Scriptures, was the course of study pursued in that institution—a course very extensive for the times.

These institutions produced such men as Bede and Alcuin, and preserved a knowledge of religion and a love for learning until the time of Wickliffe.

While these schools were thus flourishing, there arose a man great not only in his own age, but great for any age—for all time;—a man rough, generous, brave, with energy indomitable, and invincible in war, yet ardent for the extension of civilization, and zealous for the prosperity of the church. "Without early education, he had the sagacity, in his manhood, to see that wisdom is the handmaid of virtue, and that knowledge is power. For the benefit of his kingdom, and especially of the church, he invited learned men to his court, and established a school in his imperial palace." He employed Alcuin, a distinguished scholar, divine, an Englishman, who had been both student and head instructor in the school at York, to take charge of this school. Alcuin had for his earliest students most of the French court, including the royal family—even Charlemagne himself. Charlemagne, who in his more youthful days could not write his name, but "signed his treaties with the hilt of his sword, and enforced them with the point," now gave himself up with equal determination and energy to study. He carried his writing apparatus with him day and night, sleeping with it under his pillow, that he might occupy every spare moment in improving his penmanship; and although he never excelled in the art, he became a very good Greek and Latin scholar, and a very acceptable lecturer to the other students, whom he was in the habit of frequently addressing.

With such a man as Alcuin for instructor, and such a one as Charlemagne for pupil and patron, the spirit of learning soon revived throughout Western Europe. "For several years," remarks an English writer, "Alcuin may be regarded as the minister of public instruction throughout Christendom." He gave his attention first to the restoration of correct copies of the holy Scriptures, and also of the classics and the Christian fathers. The Roman characters, in which books are now printed, became from his time, instead of Saxon or other characters, the common form of writing adopted by all scholars. Many of the manuscripts of those times are preserved to the present.

Thus we see that the church in the early ages was the patron of schools and of learning, and that, as she emerged from the wreck of empire, she still, notwithstanding the corruptions she had suffered, showed herself the same patron and guardian, fostering with parental solicitude every means for the diffusion of Christian knowledge. *

EDUCATION AND SPHERE OF WOMAN.

When we consider the injunction of our blessed Saviour, "Go preach the gospel to every creature;" when we see the good resulting from the efforts of Christians to carry out this injunction; and when we still hear the "Macedonian cry" from the isles of the sea, and from the uttermost parts of the earth, for Christian aid and sympathy; what disciple of Christ will not ask himself the question, Who is to respond to those calls, and bear the the "good seed of the kingdom" to the destitute? And will not each Christian begin to ask, Is it I?—Lord, is it I?

All agree that we must have men, good men, for missionaries. So we must; and out of this necessity grows the duty of qualifying, sending forth and sustaining men endued with the Spirit of God, as laborers in the gospel harvest. And corresponding to the imperativeness of this duty, we have schools and colleges endowed for the encouragement of intelligent and pious young men to prepare for the work. I rejoice at it; and my prayer is, God speed the work. I look for similar inducements to the young ladies of our land to prepare themselves for the Master's work; but I see them not. I ask, Is it not the duty, and may it not be the privilege, of females to be missionaries? Why not educate intelligent and pious young ladies, who are to be the companions of missionaries, and who would be their co-workers if equal advantages were afforded them? Is it less important that they should be missionaries? I answer, No; for woman, like man, is an intelligent and worshipful being. She too has a zealous heart, and is apt to feel for the woes of others. It is universally acknowledged, that the influence of woman is great, whether for good or for evil. Then why not educate and qualify her to use her influence properly, and then bid her God-speed in the work of evangelizing the world. It is woman, with her naturally affectionate spirit, who, with truth and the Spirit of God, can find access to the human heart. Again, in many portions of the world, it is only the influence of woman that can avail any thing in dispelling darkness and heathenism from the minds of those of her own sex; where, by usage and sacred superstition, females are excluded from society, and would ever remain ignorant of the great principles and glorious truths of religion, unless taught them by females. Here, then, we find a sphere for woman, and one too which is well adapted to her nature—a sphere in which some have moved, it is true, but that number has been too small. Who would not drop a tear when reading the lives of missionary heroines, such as Ann H. Judson, Sarah D. Comstock, and many others, who sacrificed their all for Christ's sake? None, who realize the value of a soul. We look around us to see women of our day, who will go and do likewise. Where are they? The love of God, and the desire for the salvation of souls, constrain some, it is true, but it is likewise true, that lack of encouragement and of proper qualification hinders many.

THE IMMORTALITY OF THE SOUL.

I feel incompetent to do justice to this subject, but as the doctrine of non-immortality and annihilation of the wicked, is advocated to a considerable extent in this section of country, I thought I would lay before your readers a few thoughts on it, hoping it may have a tendency to engage the talent of some able writer on a subject of such great importance.

We read that God formed man of the dust of the ground, and breathed into his nostrils the breath of life, and man became a living soul; hence I infer that he was endowed with a living principle superior to any of the animal creation; and, in connection with other scriptures, I conclude that this is nothing less than immortality. And again, in reference to man's dissolution, it is said by the wise man, "Then shall the dust return to the earth as it was, and the spirit shall return unto God who gave it;" and it seems to me that if that part which returned to God was mortal, it must have died in connection with the body.

We are taught that Enoch and Elijah were translated. Of the former it is said, that he should not see death, and was not found, because God had translated him; and of the latter, that he went up by a whirlwind into heaven. At the transfiguration there appeared unto them, (the disciples) Moses and Elias, talking with him (Jesus.) This proves clearly to my mind, that the soul of Moses was either immortal, or that he was raised from the dead; and the apostle tells us that now is Christ risen from the dead, and become the *first* fruit of them that slept.

Again, at the crucifixion, Jesus said to the penitent thief that was crucified with him, "To-day shalt thou be with me in paradise." The term paradise I think must mean (to say the least of it) a place of enjoyment; consequently he could not mean by it the grave; therefore I must conclude that he was endowed with an immortal soul, that ceased not to live when the body died.

Jesus has said in another place, "Fear not them which kill the body, but are not able to kill the soul; but rather fear him which is able to destroy both soul and body in hell." Now, if the soul and body are inseparably connected, and both die at the same time, I can see no propriety in the first clause of the foregoing expression.

In another place, Jesus gives us a description of two persons, or characters, after death, and that too prior to the judgment. They are the rich man and the beggar. The rich man died and was buried, and in hell he lifted up his eyes, being in torments. The beggar died, and was carried by the angels into Abraham's bosom. This short narrative shows conclusively to my mind, that when the body dies, the soul enters into happiness or misery, as the case may be. I am aware that many call the above case a parable to represent the Jewish and Gentile nations; and if we admit it to be so, we should bear in mind, also, that Jesus made use of matters of fact, and common occurrences, with which the people were familiar, for that purpose.

The question is asked, If the wicked go away into misery, and the righteous into happiness, when they die, what is the use of the judgment? To this I would say, for illustration, when a criminal is arrested, he is shut up in prison. However enormous his crime may be, he must wait and suffer the horrors of the prison and a guilty conscience until the time for the court to sit and investigate the matter and pass judgment accordingly. On the other hand, a father promises his son, if he will serve him faithfully thus and so, at a certain period he will reward him with his estate, or some other great reward. The son loves the father, and cheerfully obeys his requirements, and feels in the time that he enjoys the approbation of his father; and when his labor is ended, he waits in happy anticipation of the promised reward at the time appointed.

The Apostle Paul seemed to have the opinion, that when he departed this life he would be with Christ, when he says, "For me to live is Christ, and to die is gain." What does he gain to die? He says, "For I am in a strait betwixt two, having a desire to depart and be with Christ, which is far better." He says in another place, "Therefore we are always confident, knowing that whilst we are at home in the body, we are absent from the Lord; we are confident, I say, and willing rather to be absent from the body, and to be present with the Lord."

John, in his vision, saw under the altar the souls of them that were slain for the word of God and for the testimony which they held. This must have been in the intermediate state, between death and the judgment; and from it we learn that soul and body do not lie dormant or unconscious in the grave; and further we learn, that white robes were given unto every one of them, and it was said unto them, that they should rest yet for a little season, &c.

If the point is established, that the soul is immortal, then we see the propriety of the expressions used in the denunciations against the wicked, such as being "cast into hell, into the fire that never shall be quenched; where their worm dieth not, and the fire is not quenched;" and "shall go away into everlasting punishment;" "suffering the vengeance of eternal fire;" and many other like expressions, which would be useless, as far as I can see, if the wicked were annihilated.

I have thus briefly noticed some of the passages of holy writ in favor of the doctrine of the immortality of the soul and the conscious intermediate state of the dead; and if I have committed any errors, or presented any thing in an improper light, most gladly would I exchange error for truth, when convinced. H.

COLLEGIATE AND THEOLOGICAL STUDENTS.

At the Concert of Prayer for Colleges, held in one of the Boston Churches, on the last Fifth-day of February, an address was delivered by Rev. Mr. Tarbox, Secretary of the American Education Society, which embodied very important and solemn statistics in reference to the present condition of the Colleges and Theological Seminaries of the country. According to his statement, as reported in the *Puritan Recorder*, there has been a gradual but steady increase in the number of college students. The aggregate number in the New England colleges has increased, since 1840, from about 2,000 to 2,500. But things are quite different in the theological seminaries. In 1840, there were 322 theological students at the seminaries in New England. This year there are only 190. Andover, in 1840, had 150 students, and now, although the most prosperous of any, it has but 100. The same is true throughout the country. Auburn Theological Seminary is not in operation. The Theological Department of the Western Reserve College is suspended. Lane Seminary is educating a much less number than formerly. The decrease is not so marked in the Old School Presbyterian connection, but yet there is no increase. Mr. Tarbox went on to speak of this downward tendency as demanding the most serious inquiry and reflection. He said there was a smaller number of pious young men in the colleges now, than ten years ago; and that the proportion among them having the ministry in view, was at the same time diminished. He attributed this unpropitious change, in part, to an erroneous sentiment in the churches respecting the obligation resting upon pious students in the choice of a profession. Our colleges should be regarded more as religious institutions, established and sustained for the church, and should be made more frequently and generally the subject of prayer.

Movement toward Jerusalem.—A letter from Stuttgard (Wurtemberg,) of Nov. 18th, says: It may be remembered, that a very numerous Society was formed here some time since, of persons who, from purely religious motives, propose to emigrate to Palestine. This Society denominated itself, "The Society for the Gathering together of God's People in the Holy Land." It has just presented a petition to the Germanic Diet to the following effect: "The Society prays the Diet to ask the German States to address a demand to Sultan Abdul Medjid, requiring, 1st, a grant of land in Palestine, upon which the Society may found a colony; 2d, that the Society may have the right to administer the civil and religious affairs of this colony, according to their own ideas, that is, conformably to the word of God; 3d, that the person and property of the colonists may be protected against any arbitrary proceedings on the part of the Ottoman authorities, and against all oppressive taxes; 4th, that the colonists may be exempted from military service; and 5th, that all the colonists may have equal rights, whether they have been formerly Catholics, Protestants, Jews, Turks, or any other religion."

The Baptist Home Mission Society.—The next anniversary of the Baptist Home Missionary Society is to be held in Brooklyn, and not at Chicago as previously intimated. The question where it should be held has been much discussed of late in the Baptist papers, because at that meeting it is expected that the subject of having rooms in the new building of the American and Foreign Bible Society will be considered and finally acted upon. Just now some of the benevolent institutions of the Baptist denomination seem to be endangered by partizan feeling. The American and Foreign Bible Society and the Bible Union stand in an attitude of hostility; and the Home Mission Society is threatened with the organization of a rival institution if it occupies rooms in connection with the American and Foreign Bible Society. This makes the question to be determined at the forthcoming anniversary one of great importance. The Baptists of Chicago—at least, those who belong to the First Church—are inclined to keep out of the controversy; and to prevent the unsealing of this fountain of bitter waters at the West, they recently adopted the following resolution in relation to the meeting of the Home Mission Society with them:—

Resolved, That we are unwilling that the harmony which happily exists among us in this city and in the West generally, should be endangered, and that our denomination and our holy religion itself should be covered with reproach in the eyes of this community, by the re enacting here of those scenes of contention which have been witnessed on other anniversary occasions, and we accordingly withdraw our invitation to the Home Mission Society, as much as we love this Society, and should otherwise rejoice to entertain it, and decline to entertain or open our house to the other Societies named, until such time as the difficulties between their Boards shall have been definitely and amicably settled.

Glimpses of an Editor's Work.—The *New York Baptist Register*, after having been published more than thirty years at Utica, was recently removed to New York City, and united with the *New York Recorder*. Alexander M. Beebe, the veteran editor of the *Register*, in the last number issued from Utica, speaks as follows of his labors and anxiety during his thirty years connection with the paper:—

"For many, aye, for very many years, this humble journal has been a constant associate, by night and by day, in sickness and in health, at home and abroad, wherever we have roamed, in whatever company we may have fallen, on the land or on the water, it has never been separated from our companionship. Even in the silent watches of the night, it has lain in our bosom, and shared in our anxious regard. Had it only a tongue to tell all that has passed in our secret communings, what a tale it could unfold of deep solicitude, of elated hopes, of depressing fears, and mental labors that trenched upon repose! What distress on account of the propagation of error—what efforts to meet and expose it—what earnest labors to rectify misapprehensions and mistakes among true disciples, in regard to the nature of Christ's kingdom, to restore peace where unhappy dissensions have crept in, and to promote healthful activity in Zion, and a universal interest in behalf of a perishing world. Nor would this comprehensive summary furnish any adequate idea of the character and diversity of editorial labors."

Closing the Canal Locks on Sunday.—The subject of stopping business on the Canals by closing the locks on Sunday, is again before the Legislature of New York. A bill was offered by Senator Halsey for this purpose, and referred to the committee on Charitable Institutions. The Committee have reported back the bill for consideration by the Senate, accompanied by the following resolution:—

Resolved, (if the Assembly concur,) That hereafter all official duties of Canal Officers of this State shall cease on Sundays, between the hours of 12 o'clock on Saturday night and 12 o'clock on Sunday night.

Prejudice against Color.—The *Cincinnati Times* gives the genealogy of the mulatto boy who was recently turned out of school in Cincinnati, in consequence of his complexion. It is as follows:—

"The great-grandfather was a full blooded white man, and a Methodist clergyman in the State of Indiana, where he died. The father, David E. Graham, was a Baptist clergyman in Athens County, Ohio, where he preached to several white congregations. The wife of Allen E. Graham was half Indian and half white blood, making the grand-parents on the mother's side—the grandfather, one eighth African and the rest white. The grandmother had no African blood at all in her veins, but had a small portion of Indian blood. The mother of the boy is about one sixteenth African blood, and about the same amount of Indian blood, but is of fair complexion. The boy Graham has one thirty-second part of African blood in his veins, and about the same of Indian. The boy has fair skin, a high Roman nose, and light, straight hair, and has no African features about him."

Death of a Veteran Preacher.—English papers, recently received, report the death, on the 2d of February, of the venerable Rev. G. Fletcher, at the age of *one hundred and eight years.* He was born February 2d, 1747, at Clarbrouf, in Nottinghamshire. From six years of age he had been brought up in the tenets of Wesleyism, and remained a member of that body till his death. He spent 83 years of his life in active pursuits. He was at the battle of Bunker Hill, and followed Abercrombie into Egypt, where he gained the esteem and respect of his officers. He then entered the West India Dock Company's service, where he continued 36 years, when he retired on their bounty, still preserving, up to within six months of his decease, that astonishing activity of mind and body for which he was so remarkable, often traveling great distances by rail, and pursuing his holy calling, preaching two or three times a day, regardless of personal inconvenience, for the objects of charity and benevolence.

A Successful Missionary.—The London Missionary Society have had for twenty years a mission at Salem, (India,) in the Madras Presidency, in a district containing 1,200,000 inhabitants, superintended by a single European missionary. Notwithstanding this inadequate agency, more than five hundred persons have embraced Christianity. About three hundred are now receiving Christian instruction, in six or seven adjacent villages. Several of the young men have been instructed in various handicrafts. The mission-house, two school-houses, and several other buildings, were erected chiefly by the hands of these young converts; also a church, 70 feet long by 46 wide, the first ever raised in this part of India by Christian workmen, and at half the estimate of heathen builders.

Revivals.—We learn that a pleasant revival is progressing in the Seventh-day Baptist Church at Pawcatuck, R. I. Seven persons were baptized there on Sabbath, the 17th ult., ten on the 24th ult., and twelve on the 3d inst., *most of whom joined the church.* Three additions to the church had been made by letter—one from a Seventh-day Baptist Church, one from a First day Baptist Church, and one from a Methodist Episcopal Church.

In the Seventh-day Baptist Church at Scott, also, a revival is in progress, and some sixty or seventy persons have made a profession of religion.

Life of Dr. Judson.—There was an important case week before last in the Superior Court in New York, between Edward H. Fletcher and Charles P. Norton, the proprietor of "Norton's Literary Gazette," in regard to a life of Dr. Judson published by Mr. Fletcher. The facts are these: Dr. Judson died in 1850, leaving his wife, well known as "Fanny Forrester," and a large family of children, with no other provision for their support than an income of less than a thousand dollars a year. A life of Dr. Judson was commenced by Dr. Wayland, of Brown University, under the auspices of the American Baptist Missionary Union. The terms of various publishers were procured—among others those of Mr. Fletcher. Mrs. Judson decided upon Phillips, Sampson & Co., and looked to the sale of the book for an increase of income. The work was hardly finished before Mr. Fletcher, a New York publisher, employed some one to write another life, to be sold at a reduced price. Mr. Norton was involved in the affair by publishing a letter from Dr. Wayland to Mr. Fletcher, intimating that if he issued such a book he would be the means of depriving Mrs. Judson of subsistence, whereupon Mr. Fletcher brought a suit against Mr. Norton for libel. The case excited great interest, and terminated in favor of the defendant. [Independent.

Treasures that cannot be replaced.—The house of Col. Benton, in Washington, was recently destroyed by fire. To a friend who inquired if it was insured, he said:—

"No, it was not insured; but I care nothing about that; insurance could not have saved all that I considered valuable—the bed on which my wife died, on which I sleep; her clothes, which were in a trunk sitting at the head of it; the articles which she prized most, around it—the last things I saw at night, and the first in the morning—and the papers in the adjoining room, many of which cannot be supplied. But what I shall most feel; more than I now do; will be the loss of the memorials of my wife, whose body, still above ground, it will be my first care to remove to St. Louis when released from Congress, to be buried in the place in which I had collected the remains of my dead; my mother, children, grand-children, sister; to take the place by their side which she and I had marked out for ourselves."

Russian Cruelty.—Information has been received in England, (of the correctness of which, however, there is some doubt,) that, in consequence of the refusal by the *Moravians* in the Crimea to take up arms, 300 of them have been hanged by the Russian authorities. It seems the colony of the Moravians in the Crimea hold opinions with regard to the unlawfulness of war precisely analogous to the principles maintained by the members of the Society of Friends in this country. During the lifetime of the Emperor Alexander and his mother, Mary Feodorowna, when Elizabeth Fry, William Allen, and other influential Quakers, were upon terms of intimacy with the Russian Court, a special ukase was promulgated, exempting the Moravian colony in the Crimea from military service, with the exception of converts added to the colony. The military authorities have subjected the Moravians to every indignity and cruelty, such as flogging, imprisonment, etc.

The *London Morning Advertiser* says that Jenny Lind has entered into an engagement to revisit England in her professional capacity. From religious scruples she has determined never more to appear before the public under any circumstances which could be construed into giving her sanction to theatrical or operatic performances. She has further resolved that all her future exhibitions before the public shall partake, more or less, of the character of sacred music; and, with this view, she has, we are informed, stipulated that she shall sing only in Exeter Hall. Jenny Lind is now the mother of two children.

General Intelligence.

The New Post Office Bill.

The *Washington Globe* furnishes the following synopsis of the post-office bill passed just before the adjournment of Congress:—

Everything is to be prepared after July, and the postage to California is to be ten cents instead of six.

The bill provides that, in lieu of the rates now established by law, there shall, after the commencement of the next fiscal quarter, be charged for every single letter in manuscript, or paper of any kind in which information shall be asked for or communicated in writing, or by marks or signs, conveyed in the mail for any distance between places in the United States not exceeding three thousand miles, three cents; and for any distance exceeding three thousand miles, ten cents. For a double letter the charge is to be double, for a treble letter, treble, and for a quadruple letter, quadruple these rates.

Every letter or parcel not exceeding half an ounce in weight is to be deemed a single letter, and every additional weight of half an ounce, or less than half an ounce, is to be charged with an additional single postage. Upon all letters passing through or in the mail of the United States, excepting such as are to or from a foreign country, the postage is to be prepaid, except upon letters and packages addressed to officers of the Government on official business, which shall be so marked on the envelop.

And from and after January 1, 1856, the Postmaster General may require postmasters to place postage stamps upon all prepaid letters upon which such stamps may not have been placed by the writers. All drop-letters, or letters placed in any post-office not for transmission through the mail, but for delivery only, are to be charged with postage at the rate of one cent each, and all letters which are hereafter advertised as remaining over, or uncalled for, in any post-office, are to be charged with one cent each, in addition to the regular postage, both to be accounted for as other postages now are.

No postmaster or other person is to be allowed to sell any postage stamps or stamp envelops for any larger sum than that indicated upon their face, or for a larger sum than that *charged therefor by the Post-Office Department*; and any person who violates this provision is to be deemed guilty of a misdemeanor, and, on conviction, is to be fined in any sum not less than ten, nor more than five hundred dollars.

The following amendments were made to it, and accepted:

Provided, That nothing herein contained shall be so construed as to alter the laws in relation to the franking privilege.

And be it further enacted, That for the greater security of valuable letters posted for transmission in the mails of the United States, the Postmaster-General be, and hereby is authorized to establish a uniform plan for the registration of such letters on application of the parties posting the same, to require the prepayment of the postage as well as the registration fee of five cents on every such letter or packet, to be accounted for by the Postmasters receiving the same in such manner as the Postmaster-General shall direct: *Provided*, however, That such registration shall not be compulsory, and it shall not render the Post-Office Department, or its revenue, liable for the loss of such letters or packets, or the contents thereof.

Death from Ether.

The *Boston Traveler* of Feb. 28th furnishes the following:—

It appears that a woman named Farley, wife of a carpenter of that name, accompanied by a female friend, went into the office of Dr. Addison Davis, a well known dentist of Lynn, Mass., to have a tooth extracted. The dentist was about to extract it in the regular way, when the woman requested to have ether administered. To this objection was made by Dr. Davis, he stating that it would cost her 75 cents more. She pulled out some money, stating that she had enough to pay, and persisted that the ether should be given her. The doctor then inquired of her as to her state of health, if her lungs were in any way affected. She replied in the negative, when he proceeded to comply with her request. After she had inhaled from the sponge a while, he asked her if she could feel the pain in the tooth, and she replied that she did. He then held the sponge to her nostrils for a further brief period, noticing nothing unusual, and went to get his instruments. On his return he found that her mouth was set. He immediately proceeded to give her air, and took other means to restore her. Mr. James Buffum, a well known citizen, came in, and physicians were sent for, but nothing availed; she revived for a moment, breathed a little, and then died. A Coroner's inquest was held, and a post mortem examination of the body took place, when it appeared that the lungs of the deceased were considerably diseased, and the report of the examining physicians was, that she no doubt died of congestion of the lungs, brought on by the inhalation of ether. The female who accompanied the deceased having substantiated the statement of the dentist as to the persistent desire of the deceased to inhale ether, the Jury returned a verdict exculpating him from all blame in the matter.

Frozen to Death in the Prairies.

The *Chicago Daily Press* of Feb. 24th publishes the following extraordinary story, about which it is hoped there may be some mistake:—

On the Saturday preceding the memorable storm of the 21st of January, two families, numbering ten persons, moving from Southern Indiana to Northern Illinois, arrived at Oxford, the county seat of Benton County, Ind., about forty miles north-west of La Fayette, with two ox-teams, and well provided with necessaries for the road. They remained there through the storm, and on Monday morning resumed their journey. Last Tuesday morning a man passing over a prairie, only about five miles from Oxford, came upon a sight which filled him with horror. The carcases of two oxen, from which the viscera had been removed, lay upon the ground. Inside of one of them were the frozen bodies of four children, and in the other the frozen corpse of the mother, with a nursing infant at her breast. Under the snow was a heap of ashes, in which the iron of the wagons showed that the party had broken them up, and burned every thing they had in them, in the effort to save their lives. Not far from this spot was found the body of the other woman of the party, partly concealed in a snow-drift, and near her one of the men. The two other men had not been found. It is probable that the party became inextricably involved in the snow-drifts on the bleak prairies, and lost their presence of mind. After burning up their wagons, it would seem that the men had killed two of their oxen for a shelter to those found in them, and then, accompanied by one woman, vainly endeavored to reach the town they had left, and procure aid to rescue their companions. The two other oxen had wandered off. There was nothing about the persons to indicate who they were, and nothing more is known about them than was accidentally communicated by them during their brief stay at Oxford.

Murders in Missouri.

The St. Louis *Democrat* of Feb. 22, says: It has been communicated to the *Anzeiger* office in this city, by a gentleman living in Lexington, Mo., that two Irish peddlers, named John Kanehan and James Carrigan, left that city about two weeks ago, carrying with them two large and valuable packs, containing dry goods and jewelry. They traveled about forty-five miles to the town of Warrenburg, Johnson County, where they concluded to stop for the night. Feeling very much fatigued, one of them, Kanahan, immediately retired to rest. About an hour afterward, Carrigan went to the bedroom of his companion, and was surprised at not finding him. However, he finally concluded to lie down. As soon as he touched the bed he found it was wet. He lit a candle, and discovered that the bed was covered with blood, and upon looking under it, discovered the body of his companion. While looking at the body, he heard footsteps on the stairs. He extinguished the candle, drew his bowie knife, and stationed himself behind the door. In a few moments three men entered, one having a candle and a bloody axe in his hands, and the others clubs. He sprang upon them suddenly, and before they could recover from their surprise, succeeded in killing all three of them. He then went to a magistrate's office, made his statement, was tried, and acquitted.

THE QUESTION IN FRANCE.—The French correspondent of the *Independent* says: Who is to be Napoleon IV? For very many persons, this is the question. Plonpon has returned, but his Crimean campaign does not seem to have made him ascend one degree nearer the Imperial throne. For a few weeks the young Murat has been, in high circles, considered as the most likely to inherit the purple. Another candidate has just sprung up, and it is M. de Morny, the actual president of the legislative body. M. de Morny is, the fact is perfectly known, *the real brother* of Napoleon—both are the sons of Queen Hortense—only the one was born when she still lived with her husband, while the other, called De Morny, was born when, legally, he could claim no father! And now it is said, and with great pertinacity, that the Emperor is about to recognize publicly, by proper acts, De Morny as his brother, and Imperial prince. Troplong prepares a memoir to the Senate, wherein he establishes both the fact of Queen Hortense's licentious life and the Napoleonic origin of the said De Morny. It is added that when, next spring, the Emperor takes the command of an army on the Rhine, Morny, then prince, should be invested with the powers and title of Lieutenant of the Empire, and, in case of the Emperor's decease, should inherit the throne.

A FEARFUL ADVENTURE.—A thrilling incident occurred recently at Patterson's Falls, in Sparta. A little boy, only four years old, son of Mr. R. I. Patterson, left the house of his parents about 2 o'clock, and wandered to the head of the falls, half a mile distant. He not returning at 5 o'clock, a search was made in the direction of the falls, when at once the worst fears of his parents were realized. He had gone over the brink of the frightful precipice, as his track in the snow gave evidence, which covered the more abrupt juts of the falls. In the distance below a dark speck was all that could be seen, and nothing could be heard except the sepulchral roar of the water. After considerable difficulty, the summit of the falls was effected. The dark speck proved to be the hole produced by the fall, from which he was thrown into the snow, about three yards to the left. He had fallen 100 feet, and finding he could not retrace his steps, he ventured further—passing over three other falls, less dangerous, where he was found, nearly frozen. According to the boy's account, he then felt sick. He was immediately taken to the house, and soon revived. What is particularly providential is the fact that he received no other injury than a slight bruise upon his head, and the severe cold he suffered while in his dismal abode.

THREE HUNDRED AND SIXTY PERSONS FROZEN TO DEATH.—General report gives out that not far from Odessa, more than 360 foot soldiers and several Jewish carters perished in a snow storm. The causes of death were the want of adequate warm clothing, and the sudden set in of a frost; and it is also said that the wagons and teams had gone on before the men, who were thus left behind, and as the soldiers had on wet clothes from the previous rain, they froze into a crust of ice when the frost began. They looked about for a bridge, but could not find any. The day after groups of frozen dead bodies were found, and between twenty and thirty men lay in each heap.

One of the boxes of gold, containing about $20,000 lost from the shipment of Messrs. Page, Bacon & Co., recently, has been recovered. It was found in the coal bunk of the Sierra Nevada, the ship by which the gold was brought down from San Francisco. The thieves had evidently concealed it there, and had not been able to remove it ashore. When the ship was being coaled, preparatory to returning to San Francisco, some of the men employed for that purpose discovered the box. The other box is still missing.

A "Free State Society" has been organized in Lawrence, Kansas. The articles of association, say: "The object of this Society shall be union of effort for the purpose of securing this a Free State, by means of public and private effort, lectures, under the direction of the Executive Committee, the circulation of tracts and papers, as well as the encouragement of individual effort."

SUMMARY.

It is a singular fact, that while new and powerful efforts are being made for peace in Europe, most *extraordinary* efforts are also being made, by the Allied Powers, to increase their forces, and prepare themselves for a mighty conflict. At least 150,000 more soldiers will be on the field of battle within the next ninety days, from England and France alone. As may be supposed, the Emperor of Russia is not idle while his enemies are thus at work. It is reported that he has ordered into service every male inhabitant in the Empire. If this last effort for peace should therefore prove unsuccessful, we may expect soon to hear of bloodshed and death, such as the world never before witnessed.

The award of the great literary prizes—one of £1,800, and another of £600—to the authors of the two best treatises on "The Being and Attributes of God," was announced recently at Aberdeen, Scotland. The successful competitors were found to be—for the first prize, the Rev. Robert Anchor Thompson, A. M., Louth, Lincolnshire; and, for the second, the Rev. John Tulloch, manse of Kettins, Cupar Angus, Principal of St. Mary's College, St. Andrew's, Scotland. There were 208 treatises lodged.

At the recent term of the Circuit Court of Orange County, held at Goshen, Miss Charlotte Wright brought a suit against Langford R. Brown for breach of marriage-promise. The case was tried and the plaintiff recovered damages in the sum of $3,500. Thus Langford was done right brown; and as the circumstances are stated to have been of an aggravated character, we think the Jury but did their duty. This trifling with young ladies' affections is a non-paying business, and should be suspended.

In the chief city of Madagascar and its vicinity, a thousand persons are known openly as disciples of Christ, and they are regular in their attendance on Divine worship on the Sunday, and during the work; considerable numbers in other places also are professed and practical believers; many of them are judicious men, holding official stations. Though circumstances are unfavorable, converts continue to increase, and persons high in rank, and of noble birth, are among the gospel laborers.

The brig "Ethiopian Queen," a missionary vessel, built expressly for the conveyance of Christian teachers to the eastern coast of Africa, was launched opposite the city of Hamburg, in Germany, on the 27th of last September. She was built by a poor but charitable congregation in the German village of Hermansburg, and cost 13,000 thalers, of which one hundred and fifty came from some unknown persons in America. She was to leave for Africa on the 23d of October, with a company of missionaries.

The Chicago *Tribune* says that Gov. Matterson will not give Judge Trumbull a certificate of his election to the United States Senate. He bases his refusal on the ground that the Judge is not eligible under the clause of the Constitution which prohibits any Judge of the Supreme Court from accepting any other office during the term for which he was elected Judge, nor for one year after the expiration of such term. Judge Trumbull has resigned the office of Judge, but the term for which he was elected has not yet expired.

A dispatch dated Boston, Friday, March 9, 1855, says: At South Gardiner, Worcester County, on Wednesday night, two elderly ladies, sisters of the late Abner Kneeland, an infidel, were murdered in the house where they lived alone, as is supposed, by persons who were after money. From the appearance of their heads they had been beaten with clubs and stones until life was extinct. The house was then completely ransacked. A vagrant Frenchman has been arrested on suspicion of having committed the deed.

Hon. Horace Mann, the President of Antioch College, has become a communicant in the Church known in the West as "The Christian Denomination," and has recently officiated as a preacher in several of the Christian and Unitarian Churches in Ohio, with great acceptance. He conducts the entire exercises, and his services as a preacher are sought in the liberal churches of the West. The institution over which he presides is represented as being in a flourishing condition.

A novel mode of evading the Sunday law has just been discovered in New York. The *Courier* states that the keeper of a Lager Bier cellar in the Bowery, for the purpose of evading the law requiring him to close his place on Sunday, has been in the habit of holding pretended religious services therein, officiating himself as the leader of ceremonies. He takes the Bible, reads a chapter or two, serves each one of his hearers with a glass of bier, and *takes up a collection*.

The new Free Bank law which has just passed the Indiana Legislature over the Governor's veto, requires $110 of State Stocks to be deposited as security for $100 of circulation. The new State Bank law makes the branches mutually responsible for each other's liabilities, and also makes stockholders individually liable for an amount equal to their stock.

A letter from the Rev. Dr. Duff, written on the 1st of January, affords a pleasing prospect of his restoration to health. "Occasionally," he says, "I have still a return of some of the most distressing symptoms, but the interval between these returns is on the whole widening, while in the ordinary state there is a great abatement of the worst symptoms."

The amount of property of citizens of Massachusetts, insured in marine, fire and life risks, is not less than four hundred millions of dollars annually, and the amount paid for policies $8,000,000. Of the insurance-offices with which this business is transacted, one hundred and twenty are located in the State, and forty elsewhere.

A California paper states that a trip from there to Honolulu is getting quite the fashion—going down and stopping there a fortnight, amid the bananas, oranges, and pine-apples; paying a visit to the volcanoes, and other natural curiosities, and returning in from ten to fifteen days.

A young Italian boy—pious, and of great promise—is now being educated at the expense of a Sabbath-school in Chilicothe, O., with the purpose of sending him as a Methodist missionary to Rome.

Rev. Samuel Graves gives official notice that the subscription of $20,000, for the endowment of the Baptist Theological Seminary, Kalamazoo, is filled.

Some speculation exists as to which of the Major Generals will be entitled to the rank made vacant by Gen. Scott's elevation to the Lieutenant Generalcy. There will be a contest between the friends of Gen. Wool and Gen. Twiggs, who are both Major Generals by brevet. The brevet of Gen. Wool is older than that of Gen. Twiggs, but the latter has managed to procure the recognition, on various occasions, of his claims to precedency; and it is thought that the Secretary of War will sustain them on the present occasion.

The *Washington Star* states that a case is now on trial before the Supreme Court, in which the United States is plaintiff, and the Illinois Railroad and Bridge Company defendants. This case involves two questions; one is the right of the State of Illinois to run a railroad through Rock Island, which is a Government reservation; the other the right of the State to throw a bridge across the Mississippi.

It is stated in the news from Europe, that Mr. Peto, known to the public generally as a religious man, foremost in every good work, and known among his own denomination (Baptist) as the liberal founder of churches, and friend and treasurer of the English Baptist Missionary Society, is to be made a Baronet, in token of Her Majesty's appreciation of important and patriotic services.

The State Prison in Vermont is in a fair way to become a burden on the State treasury! When the number of criminals was ninety or one hundred, their labor paid the expenses of the establishment, but now, when reduced to about sixty, the necessary expenditures for support of officers, &c., continuing the same, some $2,500 will be necessary, in addition to the labor, to maintain them.

It is said that the new dogma of the immaculate conception of the Virgin Mary, recently promulgated by the Pope, is not received by the Roman Catholics of Germany. In Tuscany, also, the Domincan friars openly repudiate it, and the monks of St. Marino have been summoned before the archbishop of Florence on a charge of contempt of the Pope, in despising and rejecting the dogma.

The Puritan *Recorder* claims for the First church in Lynn, Mass., the honor of being the oldest Orthodox Congregational Church now existing in this country. All the churches which were planted before it have departed from the Puritan faith. With one exception—that of Southwark, London—it is the oldest Orthodox church in the world.

On the night of Feb. 24th, a fight occurred between a pack of New York rowdies, in the course of which the notorious Bill Poole was wounded by a pistol ball, from the effects of which he has since died. Six of the men implicated in the bloody affray have been arrested, but the principal, Louis Baker, is still at large. It is said that he has left the country.

Prof. Muller, of Basel, Switzerland, has just put forth an octavo volume on the Religion of the Native Tribes of North and South America. He presents a systematic view of the old Indian traditions and belief. He brought to the task a vast amount of learning and research upon a subject of no ordinary interest, especially in America.

On the first eight Sundays in 1854, the arrests in the City of New York were nearly 900; on the first eight Sundays in 1855 they were 338. Last year the Sunday arrests averaged over a hundred; this year, less than forty-five. Last year the Police were lax; this year they are strict, and arrests are more than twice as numerous in proportion to the amount of crime.

A dispatch dated Ogdensburg, Friday, March 9, 1855, says: Two persons in this city, formerly stage-drivers, have been committed by the United States Commissioners, in default of $2,000 bail in each case, on charge of robbing the mail.

A dispatch dated Syracuse, Friday, March 9, 1855, says: The Jury in the case of Alfred Fyler, on the charge of the murder of his wife, which has been on trial for the last seventeen days, after being out about five hours, returned with a verdict of guilty.

The total number of deaths in this city during the past week was 491, viz. Men, 98; women, 91; boys, 160; girls, 142, showing a decrease of 30 on the mortality of the previous week.

An extra meeting of the Board of Managers of the American Baptist Missionary Union will be held in the Rev. Dr. Lathrop's Church, Second-ave., opposite Astor-place, commencing on Tuesday, the 13th inst. The session to continue four days.

A dispatch dated Norfolk, Monday, March 5, 1855, says: The U. S. brig Bainbridge put in here in distress to-day. On the 21st of February, during a gale of wind, she became much disabled, and was obliged to throw her guns overboard.

Rev. George H. Hulin, who, for eleven years, has published and edited the Syracuse *Recorder*, as the local religious paper of Central New York, has just sold out to the New York *Evangelist*. He says he has sustained it for some time at a ruinous sacrifice.

The *Christian Advocate and Journal* (Methodist) says that Rev. Otis Gibson and wife will sail from the port of New York, on or about the 20th inst., for Fuh-Chau, China, to join the mission of the M. E. Church.

Councilman Wendell proposes to metamorphize the Crystal Palace into a public market. At his suggestion the Committee on markets is instructed to inquire into the expediency of the step. Its location, in five years, will be in the very center of our wealthiest population.

It is now believed that in due time the Brigadier-Generalship will be given to Jefferson Davis, and that he expects it to be the stepping-stone to the post of Commander-in-Chief.

Several of the first mechanics of Bordentown, N. J., with their families, are about emigrating to Virginia to cultivate the soil. They have purchased a large tract of land near Petersburg.

Mr. Samuel Swale, a member of the Sophomore Class of Madison University, died during the last month, after an illness of four days. Mr. S. was a native of Markham, Canada West.

The Morning Star reports revivals among the Free Will Baptists at Smyrna, N. Y., Nottingham, N. H., Scituate, R. I., and at two or three places in Illinois and Wisconsin.

A defalcation of $23,000 was discovered last week in the Pacific Bank, New York. Another smaller defalcation was discovered, but in what bank is not yet made public.

A machine for peeling Willows, (Oziers) preliminary to making baskets or crates of them, has been invented at Zanesville, Ohio. It is said to be very effective.

Fourteen dwellings and stores were destroyed by fire, at St. Marys, Georgia, on the morning of the 3d inst. The most valuable portion of the town was burned.

Travelers to California will be glad to learn that a considerable reduction in the price of passage to San Francisco has been made on the Nicaragua line.

The Prohibitory Liquor Law passed the Assembly of Wisconsin, by a vote of 42 to 23. The Senate is expected to concur.

MARRIED.

On the 9th of January, by Eld. D. Clawson, Mr. WM. S. AYARS of Manington, to Miss SARAH ELIZABETH RANDOLPH, of Shiloh.

On the 17th, by the same. Mr. CHARLES G. EDMONDS to Miss HANNAH M. DUFFIELD, of Bridgeton, N. J.

In Rockville, R. I., March 3d, by Eld. P. S. Crandall, Mr. HENRY G. DALLY to Miss FRANCES A. GREEN, both of Richmond, R. I.

In Rodman, Jefferson Co., N. Y., by Eld. James Summerbell, Mr. GEORGE R. BURDICK, of Hounsfield, to Miss AMANDA WOOLCOT, of the former place.

By the same, in Adams, Feb. 25, Dea. ROSWELL SAUNDERS to Miss CATHARINE GARNER, both of Adams.

By the same, in Adams, March 1st, Mr. ANDREW J. GREEN to Miss MARY LOUISA HULL, daughter of Mr. Joseph Hull, all of Adams.

DIED.

At Marlboro, N. J., on the 14th of January, of typhoid fever, Dea. MARKE MOORE, in the 65th year of his age. The deceased was a member of the Church at Marlboro, and for nearly thirty years had been an acting deacon, prompt in attendance on the Sabbath and all the meetings of the Church. In his sickness he was patient and resigned, and died in hope of a blessed immortality. D. C.

At Potter Hill, R. I., Feb. 18, 1855, ELIZA ELDRIDGE, daughter of Daniel W. and Eliza Eldridge, an adopted child of Barton D. and Surviah Burdick, aged 14 years. The disease which proved fatal was pulmonary consumption. Though she lingered long and suffered much, yet she was patient under her afflictions. She manifested a good hope in Christ, and an entire willingness to part with life at so early an age, for the glorious privilege of being with Christ, as a condition far more to be desired than all the scenes connected with the bright morning of her youthful earthly existence. "Don't mourn for me when gone," was an expression with which she sought often to console the friends she was about to leave.

In Brookfield, March 2d, ARLOENE R., daughter of Charles R. and Elona Carr, aged one year and one month.

In Brookfield, March 4th, of protracted illness, Mrs. MARY AYARS, wife of Mr. Ephraim Ayars, in the 53d year of her age. Sister A. was formerly from Cumberland Co., N. J., where in early life she became a member of the Seventh-day Baptist Church in Shiloh. Some thirty years since, she removed with her family to Brookfield, N. Y., and united with the 1st Seventh-day Baptist Church in this town. Her life has demonstrated the genuineness of her piety towards God, and her firmness and stability in the Christian faith. She suffered much in her sickness, in which she exhibited the patience of the saints, and, according to God's promise to the righteous, she had hope in her death. She was loved and will be lamented by all who were favored with her acquaintance.

In Leonardsville, N. Y., March 8th, Mrs. POLLY M. BURDICK, wife of Mr. Sela Burdick, in the 57th year of her age. She was a professor of the religion of Jesus, and a member of His church; and she died hoping in the mercy of God through Jesus Christ.

At Hope Valley, (Hopkinton,) R. I., March 3d, in a fit, Dea. JOSIAH W. LANGWORTHY, in the 51st year of his age. He left a wife and three children, with a large number of relatives, to mourn the loss of an affectionate husband, an indulgent father, a beloved son and brother, while other relatives and the church of Christ mourn their irreparable loss. He professed religion about thirty years since, and united with the Seventh-day Baptist Church in Hopkinton. About the year 1841, he was called by the church to the office of deacon, accepted the call, and was appointed to that office, which he has honored, and obtained a good degree and great boldness in the faith which is in Christ Jesus. D. C.

In Alfred, of apoplexy, March 6th, in the 69th year of her age, EUNICE, wife of Robert West. She was the daughter of Waite and Wealthy Stillman, deceased, late of Berlin, Rensselaer County, N. Y. The subject of this notice, according to the best knowledge of the writer, was born in the State of Rhode Island, from which place she was early removed to Rensselaer County, this State, where she made a profession of faith in Christ. Afterwards she came to reside in Allegany County, where she united with the 1st Church of Alfred, but subsequently she became a member of the 2d Church, of which she was an acceptable member, in the judgment of charity, at the time of her death. N. V. H.

W B Maxson	1 00	J B Clarke, vol	1 62

WILLIAM M. ROGERS, Treasurer.

Savery's Temperance Hotel

AND

TELEGRAPH DINING SALOON,

No. 14 Beekman Street, N. Y.

KEPT ON THE EUROPEAN PLAN.

MEALS AT ALL HOURS OF THE DAY.

LODGING ROOMS,

From $2 to $3 per Week, or 50 Cts. per Night.

BELA SAWYER, Sup't. JOHN S. SAVERY, Proprietor.

Board Meetings.

THE next Quarterly Meetings of the Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will be held in the meeting-house at Plainfield, N. J., on the second First day in April, 1855, commencing at 9 o'clock A. M.

Western Association—Executive Committee.

THE Executive Committee of the Western Association will hold its next session at Alfred Center the first Fourth-day in April next.

E. R. CLARKE, Secretary.

Eastern Association.

AT a meeting of the Executive Committee of the Eastern Association, held at Westerly, R. I., Feb. 25th, the following resolutions were passed, and their publication in the *Recorder* was voted:—

1. That the ministers of the several churches be requested to visit the church in Newport, if practicable, and perform such missionary labors there as they may judge best; and that the Association defray their traveling expenses.

2. That the churches be requested to raise the sum of one hundred dollars to meet the expenses of the current year, and forward the same to the Treasurer, A. M. Babcock, Westerly, R. I., on or before the first of April.

P. L. BERRY, Pres.

S. S. GRISWOLD, Sec.

In addition to the above, I would say, that it is very desirable that all demands be canceled prior to the ensuing session of the Association. Eld. H. Clarke's salary is already due for his labors at Green Hill. Will the pastors see that the several contributions are attended to. 39—3t. S. S. G.

3d Brookfield Church.

NOTICE is hereby given, that at an adjourned meeting of the Seventh-day Baptist Beaver Creek Society, held on the 5th of February, 1855, it was resolved, by unanimous agreement, to sell the meeting-house and its appendages at auction, and give the avails to the American Seventh-day Baptist Missionary Society, except such portion as may be called for by the original contributors, who shall receive their shares, according to the sum they respectively paid, if called for in three months from this date. The amount of the sale was $88. Also resolved, that the above notice be published in the *Sabbath Recorder*.

BENJ. BURDICK, Society Clerk.

SOUTH BROOKFIELD, Feb. 13th, 1855. 37—6t.

Rare Chance—For Sale.

A DENTIST, (wishing to retire on account of ill health,) having a good practice in a large, thriving, and beautiful town, where there is a community of Sabbatarians, will sell advantageously for the cash. Any person wishing to buy, can receive the most thorough instructions in every department.

Letters addressed to "Dentist," care of Rev Geo. B. Utter, this office, will be answered, giving further particulars. 37—3t.

MAYOR'S OFFICE, Jan. 2, 1855.

COMPLAINT BOOK.—There is opened at this office a Complaint Book under the charge of a competent person, for the purpose of receiving and entering all complaints of matters coming within the jurisdiction of the Municipal Authorities. The Mayor will entertain, and so far as the laws give him power, take cognizance of charges preferred by responsible parties for violation of ordinances and dereliction of duty upon the part of any person holding office under the City Government. By Order of the Mayor,

WM. H. STEPHENS, First Marshal.

All the papers in this City will please copy and send their bills to this office

Alfred Academy,

At Alfred Center, Allegany Co., N. Y.

THE attention of the public is respectfully invited to the educational facilities of this Seminary.

1. The location is one of the *healthiest* in the world; in a community offering none of the usual inducements of youthful dissipation; easy of access by railroad; and in telegraphic communication with all parts of the country.

2. Young ladies and gentlemen occupy separate edifices, and enjoy, in the families of the Professors, the supervision of well-ordered *Christian Homes*. The health, morals, and manners of students are all looked after with parental solicitude.

3. The courses of instruction, embracing ten departments, with an experienced Professor or Teacher at the head of each, are thorough, extensive, and eminently practical. Young men wishing to study *Analytical and Agricultural Chemistry* will find here every desirable aid for doing so to any extent. Classes in *Surveying* and *Civil Engineering* have daily field practice, under the directions of the Professor, with the most approved instruments. *Teachers'* Classes are carefully drilled in every branch of school-room duties. The *graduation course* for young ladies is adapted to fit them for the responsibilities of *American Women*. In the department of instrumental music, the pianos used are of the finest quality, and kept in perfect order. The Seminary employs no second grade teachers, but the *elementary* and higher classes receive alike the instructions of the *same* Professors.

4. The edifice containing the recitation, library, and society rooms, is one of the largest, most commodious, and best furnished school structures in Western New York.

The next term opens the 28th of March, and closes July 4th, 1855. The expenses are very moderate. For further particulars, address Rev. N. V. HULL, or W. C. KENYON.

Feb. 24th, 1855.

The Carol:

A COLLECTION OF ORIGINAL AND SELECTED MUSIC AND HYMNS, for the use of Sabbath-Schools, Social Religious Meetings, and Families. Compiled by Lucius Crandall. Published by the Seventh-day Baptist Publishing Society, No. 9 Spruce-st., New York.

"The Carol" consists of 128 octavo pages, and is got up in the neatest style of the art. It is sold at 35 cents per copy. The money should in all cases accompany the order. Address Geo. B. Utter, General Agent.

The following extracts from the Preface will give an idea of the scope and design of the work:—

This book is designed principally for Sabbath Schools. Variety has been aimed at, as both pleasing and beneficial. By accompanying each tune with one or more hymns, suitable to be sung in the same music, it has been intended to furnish a body of Hymns, adapted to the general wants of Sabbath Schools, and also to special occasions; such as the sickness of teachers or scholars, funerals, and anniversaries. A number of pieces suitable for social and public worship, together with a few Temperance Songs, have been inserted.

About a dozen tunes appear for the first time in this work. A few of these will be found not well adapted to be sung by Sabbath-Schools, as they are too heavy for young voices, having been composed for the choice poetry set to them, some of which had not been previously provided with music—such are Barbauld and Calvary.

A number of airs, the authors of which were not known to the compiler, have been harmonized for this work.
